obtained comparatively free, and where there is no obstruction placed upon capital, and where labor is cheap, so that the smelting works, instead of paying the tariff and paying freight upon ores, can ship the finished product into the United States, paying less freight and not much greater duty, and bring it in competition with the American product. That is the result of it.

If the tariff is fixed so high that the smelters, of which there are several, can not be successfully conducted in this country, they must go somewhere where they can conduct their business with profit to themselves. Mark you, out of every ton of ore that is shipped into this country there is but a small percentage that is lead as compared with the entire mass, and yet the freight rate upon that ore is just as great, and is just as great a draft upon the purse of the smelting company, as it would be if it were pure metal. It comes like anything else, by its weight and its classification.

If that freight rate can be reduced, as it necessarily will be reduced by the establishment of the smelters along the British line and along the Mexican line, where the freight rate will cease as the result of smelting there, then the American smelter who goes to Mexico or British Columbia, or wherever he may go, has nothing in the world to do but pay his freight and tariff upon the finished product, and then it comes in conflict with the American product. It is needless for me to say that the conclusion, if our Republican friends are right, is necessarily that the American laborer and not the American capitalist suffers as the result.

I desire to present some additional evidence upon this question. There is located at Omaha, in the State of Nebraska, the Carter White Lead Company, a very important manufacturing institution, and it bears testimony to the same effect. I will send up the letter and ask to have it read.

The Secretary read as follows:

OMAHA, NEBR., *May 28, 1897.*

DEAR SIR: We have noticed the Senate has made changes in the tariff on lead and its products in passing from the House to the Senate.

The following are the comparative rates, with pig lead at 2 cents per pound, as we understand it:

	House bill.	Senate bill.
	Cents.	*Cents.*
Lead ore	1	1¼
White lead	3	2¼
Litharge	2½	2½
Red lead	3	2½
Orange mineral	3½	3
Nitrate of lead	2¼	1¼
Brown sugar of lead	3	1¼
White sugar of lead	4	2½

We consider and believe that the House bill is a very just and equitable adjustment of the tariff question on lead and its products to the laborer, making a reasonable and fair difference between the prices under the low labor of the old country and the labor wages in our country, and when the laborers are fairly well protected, there is no reason why this country will not be as prosperous as it ever was, in our opinion; but if there is nothing for the laborer to do—foreign goods coming in at a less price than we can make them—there is no hope for this country. We need labor for our country, and plenty of it. Then will we have good times.

We hope and trust that you will see the tariff question on the lead in the same light that our Western people, as a general thing, do, and can see a way to work for the tariff of the House bill instead of the tariff that is adjusted by the Senate amendments, as we believe the former comes much nearer conforming to the wishes of the Western people than the Senate amendments.

Yours, very truly,

CARTER WHITE LEAD COMPANY,
L. CARTER, *President.*

Hon. WILLIAM V. ALLEN,
The Senate, Washington, D. C.

Mr. ALLEN. It is proper for me to say that I only indorse the letter so far as it applies to lead. That portion of it which engages in a general discussion of the tariff I do not indorse.

But it is another evidence that persons engaged in this very lead industry itself are satisfied with the House rate. Here are the Carter White Lead Company holding up to me the beauties of a protective tariff, pointing out to me wherein this country can be prosperous in consequence of the increase of tariff taxation, and I am perfectly willing that as constituents they should do so. It is a harmless sort of amusement upon their part. When that industry itself says it is satisfied with the rate fixed by the House, it seems to me it is inexcusable that the Senate should raise the rate.

We have not heard, and I do not suppose we will hear, from the other side as to why this rate was increased. When the lead industry or those engaged in a kindred industry declare that the rate fixed by the House of Representatives is sufficient to protect the industry, when they say they are satisfied with that rate, it occurs to me there ought to be some strong and persuasive equities before the committee of the Senate would be warranted in changing and raising the rate.

Now, I see my good friend the Senator from Connecticut [Mr. PLATT] sitting here in charge of the bill. If he will be kind enough to inform the Senate why this rate was increased, as one Senator I will be very much obliged to him.

Mr. PLATT of Connecticut. I do not know that I can give any reason for it except that the majority of the subcommittee thought it ought to be done.

Mr. ALLEN. I know, but why did they think it ought to be done?

Mr. PLATT of Connecticut. I think perhaps the other members of the committee might give those reasons a little better than I could.

Mr. ALLEN. It is unfortunate that the other members of the committee are not present.

Mr. LINDSAY. I suggest to the Senator from Nebraska that an increase in the leather schedule was explained yesterday upon the ground that it made the schedule more symmetrical, and I suppose this adds to the symmetry of the lead schedule, which ought to be a satisfactory explanation.

Mr. ALLEN. It is possible that that is as good a reason as can be given, but I beg the Senator——

Mr. PLATT of Connecticut. If the Senator from Nebraska will permit me, I will say that miners of lead ores of this character in this country claim that it is absolutely necessary for their business.

Mr. ALLEN. What is the present rate?

Mr. PLATT of Connecticut. Three-quarters of a cent a pound.

Mr. CARTER. If the Senator from Nebraska will permit me, I think I can cast some light on the subject which seems to be perplexing him now.

The letter written by the representative of the white-lead company indicates displeasure with the Senate amendment and great satisfaction with the House schedule. The fact is that the House schedule as finally passed allowed 4 cents a pound on white lead instead of 2¼ cents a pound, as provided in the Senate amendment. Hence, very naturally, the white-lead company, preferring 4 cents to 2¼, is dissatisfied with the Senate amendment and entirely satisfied with the House schedule.

The protection proposed to the white-lead trust in the bill as it passed the House represents the highest duty ever imposed anywhere in any bill, so far as I am advised, in favor of the white-lead trust. The Senate decreased the amount allowed the trust and increased the amount allowed in the schedules of the House on lead in the ore.

Mr. ALLEN. Why, if the Senator will be kind enough to answer me?

Mr. CARTER. I will explain that upon a basis so clear that the Senator will agree with me that the committee was entirely justified and the Senate will be amply justified in supporting the committee.

First, this lead ore constitutes as a mining proposition the principal labor item in the production of lead. As a general rule, about 8 tons of the average ore as mined from the ground are concentrated into 1 ton of what we know as lead concentrate. It costs about $3 per ton in this country at our rate of wages to mine the raw ore. The $3 paid here is paid in gold. It costs about $1 per ton paid in silver to mine ore in Mexico. Hence it is manifest that in order to make up the difference between the $3 in gold paid in the United States to the miner and the $1 in silver paid to the miner in Mexico a protective tariff must intervene in the interest of the American miner, or the miner must quit his occupation in this country entirely and permit the cheaper-paid labor of Mexico to supply the entire product.

Mr. ALLEN. I should like to ask the Senator from Montana if the lead-ore industry has not been developing right along for the last three or four years and increasing each year?

Mr. CARTER. The statistics furnished by the Bureau known as the Geological Survey furnish the figures in that regard.

Mr. ALLEN. I would rather have the observation of the Senator himself than any statistics.

Mr. CARTER. I will state to the Senate that certain mines producing lead have continued in operation in this country in the hope that by virtue of legislation expected they could continue later on at a profit. Numerous mines, however, have been compelled to suspend because the price of lead was reduced below the cost of production. Others have continued, not reaping profit from the operation, but regarding it as a necessity to avoid having the water fill the mines, until better days might come.

Mr. ALLEN. I should like to ask the Senator if the price of lead has not increased within the last few years?

Mr. CARTER. As the figures will show, the price of lead has steadily decreased in the United States for the last few years, during 1896 reaching the lowest point ever reached in the history of the United States.

Mr. ALLEN. The Senator does not pretend to say that that is due in any degree to tariff legislation? I understand that lead has suffered somewhat as all other articles have suffered in consequence of the depression.

Mr. CARTER. Lead has depreciated in the market from $4.33½ per hundred on the average from the year 1890 to an average of $2.83 per hundred in the New York market in 1896. That is the

history of recent years and under the law which the Senator would have us continue.

Mr. ALLEN. I do not ask for a continuance of the present law. I am perfectly willing to concede one-quarter of a cent per pound more and make it a cent, exactly as the House of Representatives made it.

Now, let me say, in this connection, that the House Committee on Ways and Means made a very thorough investigation of this matter. Whatever may be said about the bill as a whole—and I am inclined to believe that it was rather thrown together without any system—this portion of it was thoroughly investigated by Mr. TAWNEY of Minnesota, who devoted some weeks to acquiring information on the subject of lead by personal observation and by correspondence by mail and telegraph.

When the committee met they deliberated upon this portion of the bill itself, as I am informed, and this schedule was very seriously considered by them, and after looking over all the evidence that was submitted and canvassing all the facts that had been accumulated by this very diligent member of the Committee on Ways and Means, they came to the conclusion, the deliberate conclusion, that 1 cent upon lead in the ore was amply sufficient as a protective tariff upon that article.

The Senator from Montana admits that this industry has increased, but he says it has increased in the hope that there would be increased tariff taxation. I suppose it has lived upon faith, upon confidence. We have been told for the last three or four years that that is the way to live. When we had discussed the financial problem, which has rocked this country from center to circumference, we have been told by our Republican brethren that we want a restoration of confidence in this country, and that we do not need any more money. These gentlemen, it would seem, have been living upon confidence, upon faith, upon the hope that tariff legislation would change in their interest; and yet I submit that the Senator from Montana does not escape from the fact that during all this time they have lived and made a profit, as much as any other person proportionately; they have developed their industries; they have pushed them to a more perfect completion; they have, in a word, demonstrated to the country that they are capable of living under a tariff tax of three-quarters of a cent a pound.

Mr. President, the miner's interest is not the only thing to be considered. In the imposition of tariff taxes the interests of all persons concerned must be considered. The Senator from Kentucky [Mr. LINDSAY] says to me, "Except the consumers." The consumers seem largely to get the worst of it in the framing of a tariff bill. That is true largely, possibly, because they have nobody here looking after their interests particularly. They are not organized. But a tariff bill, in the very nature of things, must be a compromise, if it is based upon principles of equity. Here are the miners, upon the one hand, clamoring for a duty that will force the smelters to go into a market controlled absolutely by them or to go out of business in this country; and here are smelters, upon the other hand, asking the imposition of a duty that will permit them and permit the miners to transact business and make a living out of it and a reasonable profit.

Mr. President, what is the difference between imposing a tax upon an industry so high that you drive the industry out of existence and taking a man by the throat and putting your hand in his pocket and taking his money away from him? None in the world. The first is a species of cowardice; the other requires some degree of brute courage at least.

Mr. RAWLINS. I will ask the Senator whether he is in favor of the tariff schedule with respect to lead as it is found in the House bill?

Mr. ALLEN. I am inclined to think I am. I am not entirely certain about it yet.

Mr. RAWLINS. That fixed a duty of 1 cent on lead in ores and 4 cents on white lead. The Senate proposition reduced the duty from 4 to 2¼ cents. Speaking about consumers, who are the consumers of lead ore?

Mr. ALLEN. The Senator from Kentucky——

Mr. RAWLINS. I am asking the Senator from Nebraska the question.

Mr. ALLEN. I suppose any person who consumes lead in any of its various forms—it has a variety of forms—is a consumer.

Mr. RAWLINS. Are not all the smelters, or what is known as the smelting combination, which constitutes a trust, seeking high protection upon their products and free materials for their use in the manufacture of that product?

Mr. ALLEN. No; I think not. I am not prepared to say, but I think not.

Mr. RAWLINS. In other words, are there not three parties concerned in this schedule—the white-lead trust, a conceded monopoly, fixing the price to the consumers of white lead——

Mr. ALLEN. I think that part of it is true.

Mr. RAWLINS. The smelting combination, cooperating with the white-lead trust, aiding it in the maintenance of its monopoly, cooperating in fixing the price to the consumers, and also cooperating to depress the price to the producers, the miners, throughout the country?

Mr. ALLEN. I think that part of it wrong, and I think I can demonstrate it.

Mr. RAWLINS. I think I can show that the smelting combination, for which the Senator is now speaking, is a conspiracy both against the miner and the consumer—the man who wants this article.

Mr. ALLEN. I think I will confess and avoid part of that, and the other I will deny.

The attitude of the Senator from Utah is a most perfect illustration of the saying of Lord Lytton in one of his novels, that the color of the flower is as much sometimes in the vision as in the petal. It depends a great deal upon how you look at a thing. The Senator from Utah hails from a lead-producing State, and the thing uppermost in his mind is the lead miner and the lead mine, and he wants a duty that will give him a long pull on the whippletree, if I may so express it, as against Mexico and the British Possessions, and I have no particular objection to his having a little advantage; but I do not want him to have the advantage, and I do not want the miners to have the advantage, that they shall be able to smother up and destroy every other industry which depends in the slightest degree upon lead.

Mr. President, I have no doubt about the white-lead trust. It dictates prices. There is no doubt about that. It has dictated prices in the past, and it will dictate prices in the future until this Government becomes strong and vigorous enough in some one or more of its branches to enforce the law as it exists now.

Sir, we were treated to the spectacle here yesterday of being told by Senators in this Chamber upon both sides that, notwithstanding we have laws for the suppression of trusts, we are powerless to suppress them.

We can indict some poor devil for stealing a sack of flour when he is hungry, to feed himself and his family, and send him to jail; or we can indict some shoeless waif who has been compelled to commit some petty crime to sustain life; and yet when it comes to these gigantic corporations, all the legislative and judicial and executive power of the Government is powerless and impotent to enforce the law. If that is true, the Government is gone; there is no use talking about its going; it has gone. But when it comes to an assertion that the smelting companies are a part of the white-lead trust or a part of the lead trust, I do not believe it, and I think I can demonstrate to the Senator from Utah quite conclusively that my position is true.

The total consumption of lead in the United States in 1895 was 280,596 tons. Of this there were imported 38,704 tons, necessary to meet the demands of the market of this country. We were compelled to import 38,704 tons in addition to our production. The United States mines, as I am informed—and the Senator from Utah can correct me if I am incorrect—have never yet been able to produce lead enough to meet the American demand, and are not producing it to-day. Never in the history of lead mining in this country, if I am correctly informed, have we been able to turn out enough lead to meet the demands of our country alone. In 1893 the proportion between lead in ore and base bullion was as follows: Lead in ore, 58,487,319 pounds; lead in bullion, 3,959,781 pounds. Two years afterwards, in 1895, the proportion had changed, and was as follows: Lead in ore, 45,050,674 pounds; lead in bullion, 104,551,082 pounds.

Now, what brought about this wonderful change? It was brought about owing to the fact that the smelting companies were compelled to leave this country and go to Mexico. American capital was compelled to go out of the United States to foreign countries, and there construct smelting works and do their work and ship their leads into this country to supply the market.

While I am not a radical protectionist (nor am I a free trader), while I occupy the middle line—that which I believe to be the true line, namely, the line of levying a tax for revenue with incidental protection—I do not want to see this country go to the extent of driving out either capital or labor, for under the protecting ægis of our flag, under just and humane laws justly and humanely administered, there is ample room for both, and we could not get along without them.

Mr. President, how far the Republican caucus may have decreed that this amendment shall pass, I do not know. I, however, submit the case, so far as I am concerned, with the request that the following brief pamphlet be published as part of my remarks.

The PRESIDING OFFICER (Mr. PASCO in the chair). It will be so ordered, in the absence of objection.

The matter referred to is as follows:

CONCERNING PROPOSED DUTIES UPON LEAD IN ORE AND PIG LEAD.

PROPOSED CHANGE IN RATES.

In the new tariff bill which has recently passed the House of Representatives the duty upon lead in pigs and bars, base bullion, etc., is fixed at 2 cents per pound, and a duty of 1 cent per pound is placed upon the lead contents of all ores.

The Finance Committee of the Senate proposes to amend this by raising

the duty upon lead in ores to 1¼ cents per pound. As the duty upon pig lead and the duty upon lead in silver ores, or so-called fluxing ores, are the only items in which I am interested, I shall confine my discussion entirely to these materials.

DIFFERENCE BETWEEN FLUXING ORES AND DRY ORES.

Silver ore containing lead, or fluxing ore, is a material necessary in the smelting business for use in the smelting of dry ore, or ore containing no lead.

Of the ores produced in the United States from mines containing precious metals, over 75 per cent are those known as dry ores, or such as contain no lead.

SCARCITY OF FLUX ORE IN THE UNITED STATES SHOWN BY HIGH PRICE OF THAT MATERIAL.

That fluxing ore in the United States is not sufficiently abundant is clearly proven by the high price that has been paid for it for a long time past.

It is neither necessary nor proper to burden this statement with affidavits, therefore I consider it sufficient for me to say that I stand ready at any time to prove that the prices commonly paid for fluxing ores in the United States exceed the sum obtainable for the metal contained in these ores after it is extracted, and that smelters are compelled to bear a loss upon every ton of American fluxing ore they purchase.

This loss must be met by an increased charge for smelting dry ores, or the business of public smelting would have to cease.

Prior to 1890 fluxing ores were classified as silver ores and admitted free when the value of the silver contents of the ore was greater than the value of the lead contents of the ore.

I can prove that even during this period the prices obtained for flux ore in the United States involved a distinct loss to the smelter buying them, the reason for this being that the difference in freight costs between them and imported ores caused their prices to continue high, and foreign importations did not seriously affect them.

RATES UNDER LAW OF 1890.

In 1890 a duty of 1¼ cents per pound was placed upon the lead contents of silver ores, and no corresponding advance was made in duty upon pig lead, which was left at 2 cents per pound.

The immediate effect of this duty was to cause the failure of a number of American smelting works, to cripple and embarrass them all, and to encourage an investment, estimated at $10,000,000, in the smelting business in Mexico.

RATES UNDER WILSON BILL.

When the tariff laws were again revised and the so-called Wilson bill became a law, the lead schedule was again changed—this time to impose a duty of 1 cent per pound upon pig lead and three-quarters of 1 cent per pound upon the lead contents of silver ores.

This law simply reduced the rates without changing the ratio between these two materials, while the real difficulty lay not so much in the amount of duty imposed as in the maintenance of a proper difference in the duty between that placed upon pig lead, the finished product, and lead-silver ore, the raw material.

ILLUSTRATION OF ACTUAL WORKINGS OF EXISTING AND PROPOSED DUTIES UPON PIG LEAD AND LEAD ORE.

Perhaps the best way to show the absolute injustice done by our lawmakers in failing to recognize this needed difference is by giving an actual case as an illustration of how it works in practice.

The comparison to be made is between a Mexican smelting works and an American smelting works in reducing 2 tons of Mexican silver-lead ore. I will give to the Mexican works every benefit in this comparison. I will say his freight on the ore from the mines to his works is as great as that paid by the American from the Mexican mine to the American border, although, as a rule, it is a much less distance from the Mexican mine to the Mexican smelter than it is from the Mexican mine to the Mexican border.

I will also say that the American smelter gets the same benefit from the silver contents of the ore as his Mexican rival; but as a matter of fact this is not true, since the Mexican Government imposes an internal-revenue tax on silver, which the American smelter who imports Mexican ore has to pay in full, while nearly one-half of the tax is remitted when the ore is smelted in Mexico.

I will further say that the cost of smelting is the same in Mexico as in the United States, although this is not so, since the wages paid are over three times greater in the United States than in Mexico.

A Mexican smelter buys 2 tons of Mexican silver-lead ore containing 25 per cent lead, or 1,000 pounds in the 2 tons. The average price of lead in ore in Mexico for the last year or so has been 1 cent per pound, and therefore he pays for the lead in this ore $10. These 2 tons are smelted in Mexico and 900 pounds of lead recovered, as 10 per cent is lost in smelting. This 900 pounds of lead is then shipped, say, from the Guggenheim's smelter at Monterey, Mexico, by Tampico and water to Perth Amboy, N. J., at a freight rate of $5 per ton. At Perth Amboy it is either held in bond or offered for entry at the custom-house. If the latter is done, a duty of 1 cent per pound is demanded under the present law, and $9 is paid; and thus the lead contained in 2 tons of Mexican ore is landed in New York (Perth Amboy is only 7 miles away by water) at the following cost to the Mexican smelter:

Freight in Mexico (offset).	
Smelting in Mexico and United States (offset).	
Silver contents (offset).	
Cost of lead in ore in Mexico	$10.00
Freight on 900 pounds to Perth Amboy, at $5 per ton	2.25
Duty, 1 cent per pound, on 900 pounds	9.00
Total cost	21.25

Now, suppose the American smelter imports these 2 tons of Mexican flux ores.

Their purchase costs him $10, the same as the Mexican smelter paid.

When he gets them to the American line he is asked by the United States customs officer to pay three-fourths of 1 cent per pound duty upon the 1,000 pounds of lead contained in the 2 tons of ore, and he pays $7.50.

He now finds that with his 2 tons of Mexican ore just across the border in the United States he has spent $17.50, and that in order to land their contents in New York at $21.25, the sum paid by his Mexican rival, he has only a margin of $3.75 to get it to that point.

Admitting that it costs him no more to smelt this ore in the United States than it does his Mexican rival, he still has to transport his 2 tons of ore, either as ore or concentrated into bullion, by railway via Kansas City to New York, a distance of some 3,000 miles.

A very casual knowledge of railway freights will convince the most skeptical that this can not be done.

These facts will serve to explain the inconsistencies of the lead schedule in the existing tariff, and it can be easily seen that if these rates were made double, or 2 cents per pound upon pig lead, and 1½ cents upon lead in ore, while the amounts would increase, the conditions would remain absolutely the same, and these illogical and unscientific tariff rates would continue to give to the Mexican smelter an absolute advantage over the American smelter in his own home market.

THE CORRECT METHOD OF ARRIVING AT THE PROPER DIFFERENCE THAT EXISTS BETWEEN THE RATE OF DUTY UPON PIG LEAD AND LEAD IN ORE.

In order to arrive at the proper rate of difference that should exist between the duty upon pig lead and the duty upon lead in ore, the values of these two materials in foreign markets should be ascertained, and the same rate of difference that exists between their values should exist between the duties placed upon them.

Reference to the tables will show that foreign pig lead during the year 1896 averaged in value $2.45 per 100 pounds, and that the average value of foreign lead in ore during the same period was $1 per 100 pounds.

It will be found upon further investigation that for a number of years past foreign pig lead has ranged in value from two to two and one-half times more than the value of foreign lead in ore, and it is therefore fair to say that, whatever specific duty it is thought best to place upon lead in ore, a duty of at least from two to two and one-half times greater must be placed upon pig lead in order that the same ad valorem rate be borne by both articles.

RAW MATERIAL SHOULD NOT BEAR THE SAME RATE OF DUTY AS THE FINISHED PRODUCT.

But is it right that the same ad valorem rate should be borne by both these articles?

Pig lead is the finished product of the American smelting works, and fluxing ore is their absolutely necessary raw material.

The great difference in value between these two articles is represented almost entirely by labor.

TARIFF RATES SHOULD BE ADJUSTED IN STRICT RELATION TO THE LABOR REPRESENTED IN THE ARTICLE TAXED.

The theory of all tariff makers is that all duties should be adjusted in strict relation to the amount of labor represented in the articles upon which the duty is placed.

This theory may be carried out in other schedules of the proposed tariff bill, but is certainly not true in the lead schedule.

In this schedule they are not willing to even place the same rate of duty upon the raw material and the finished product, but insist that the raw material shall bear double the rate of duty to that of the finished product, thus prohibiting the use of Mexican fluxing ore by the American smelter, and encouraging the importation into the United States of Mexican bullion.

CERTAIN ARGUMENTS ADVANCED IN FAVOR OF HIGH DUTY ON LEAD IN ORE.

I will mention as many of the arguments as I can recall that are being used by those advocating a high duty upon lead in ore.

M. Guggenheim's Sons, whose interests are almost wholly Mexican, make the following:

SMELTING IMPORTED FLUXING ORES IN BOND.

"The argument of the dry-ore miner is that, in consequence of the scarcity of fluxes or lead ores, the dry-ore miner (whose ores contain no lead) is compelled to pay the smelter an abnormal price for having his ores treated. Section 23 in the proposed Dingley bill permits the smelting and refining of foreign wet or lead ores in bond duty free. As smelters can smelt and refine wet ores in bond duty free, the dry-ore miner's contention is entirely unjustifiable.

"In justice to the dry-ore miner, we will say the existence of section 23 is not generally known to him. In fact, many Senators were not aware of the effects and benefits of this section, and it is only recently that it became generally known to the various smelting companies that they could bond their works to advantage and obtain wet ores as fluxes, duty free, and only within the last few weeks have some of the largest smelting companies completed the operation of bonding their works. Therefore the full effect of having wet ores duty free in bond will be felt only in the future."

Both of these statements are misleading.

The provision for smelting in bond, originated in the tariff bill of 1890, was reenacted in the Wilson bill, and it is proposed to reenact it in the present bill.

It has been continuously in force for over seven years, and has been well known and thoroughly understood by smelters in the United States.

When examined carefully, it will be found that the provisions for smelting in bond are not so great a privilege as one might be led to believe.

I will take for an example an importation in bond of Mexican fluxing ores. These ores contain on an average 25 per cent lead, and it takes, therefore, the contents of 4 tons of ore to make 1 ton of bullion. The provisions for importing in bond are necessarily somewhat complex and much more expensive and burdensome to the importer than direct importations, as will be seen by reading the statute.

In order to smelt and refine the 4 tons of Mexican ore in bond, it is necessary to transport it from the Mexican border by railroad over 1,500 miles to the smelting or refining works, and then transport it again over 1,500 miles to the seacoast, say at New York.

So that this Mexican importation has paid freight either as 4 tons of ore or 1 ton of bullion for over 3,000 miles of railroad transportation, and then must take another trip by water of 3,000 miles to Europe, where it is offered for sale in competition with lead produced by the cheapest labor on earth.

It has borne 3,000 miles of American railway transportation; it has been manufactured by American workmen, and it is then the American smelter's privilege to transport it across the sea and sell it in the open markets of Europe.

Is any better argument needed to show American flux ores are too high and that the duty on foreign flux ores is too high than that American smelters have occasionally smelted foreign imported ores in bond?

It goes without saying that no revenue is produced by importations in bond.

DUTY UPON LEAD IN ORE HAS ONLY AN INDIRECT EFFECT UPON THE AMERICAN PIG LEAD MARKET.

They further state that the price of pig lead in America is equal to the price of pig lead in London, with the American duty on lead in ore added thereto, and that therefore the duty on lead in ore governs the price of pig lead in the United States.

As an argument this is utter foolishness, and as a statement of fact it is entirely untrue.

Below is given a table showing the official prices of pig lead in London and New York since 1880:

Pig lead, London.

Year.	Highest.	Lowest.	Average.
1880	4.10	3.30	3.50
1881	3.35	3.15	3.25
1882	3.25	3.05	3.10
1883	3.20	2.65	2.75
1884	2.70	2.30	2.45
1885	2.70	2.30	2.50
1886	2.90	2.70	2.80
1887	3.30	2.65	2.75
1888	3.20	2.70	2.95
1889	3.05	2.70	2.80
1890	3.50	3.00	3.20
1891	2.70	3.10	3.00
1892	2.45	2.00	2.50
1893	2.35	2.45	2.40
1894	2.35	2.40	2.30
1895	2.30	2.55	2.40
1896	2.40	2.55	2.45

New York prices pig lead.

Year.	Highest.	Lowest.	Average.
1880	5.90	4.50	5.00
1881	5.15	4.35	4.80
1882	5.10	4.60	4.90
1883	4.65	3.60	4.32
1884	4.10	3.60	3.75
1885	4.55	3.65	3.95
1886	4.90	4.30	4.60

The duty upon silver-lead ores from 1890 to 1894 was 1¼ cents per pound of lead contents, and from 1894 to date it was three-quarters of 1 cent per pound.

Prior to 1890, silver-lead ore was always admitted free.

By adding 1¼ cents to the London price of pig lead from 1890 to 1894, and three quarters of 1 cent to it from 1894 to date, and comparing the result with the New York price of pig lead, one can see how accurate these gentlemen are; but how they got along with their computation prior to 1890, when there was no duty to add to the London price, I am quite unable to explain.

Prior to the tariff law of 1890, ores containing silver and lead were classified as silver ores, when the silver content was greater than the lead in value. This classification was decided upon by a Senate committee of which Senator Edmunds was chairman, and was followed by the Secretaries of the Treasury from that time. Prior to 1890, therefore, lead in pigs bore a duty of 2 cents per pound, and silver-lead or fluxing ores were admitted free.

It is fair to say that if the duty upon lead in ores governed the price of pig lead in the United States, the price of pig lead would have certainly been affected when there was no duty at all upon lead in ores; and yet reference to the tables will show that with a duty of 2 cents on pig lead, and silver-lead ores free, the price of pig lead in the United States bore a higher average than it ever has since.

In the tariff law of 1890 a duty of 1¼ cents was put upon the lead contents of silver ores, and while various disastrous results followed this mistaken policy, the price of pig lead in the United States not only did not go up, but, on the contrary, continued to go down.

Your attention is called to the following table of imports and exports of lead into and out of the United States:

Imports and exports in tons.

Year.	Mexican ore.	Mexican bullion.	British Columbia ore.	Pigs.	Total imports.	Pigs exported.	Net imports.
1890	18,000	.....	.....	10,000	28,000	.....	28,000
1891	21,100	2,700	.....	4,600	28,400	2,700	25,700
1892	26,700	12,900	.....	14,100	53,700	12,900	40,800
1893	29,300	35,000	.....	.....	64,300	35,000	29,300
1894	18,000	39,000	1,700	8,200	66,900	29,000	37,900
1895	16,500	54,700	6,000	22,450	99,650	18,000	81,650
1896	15,400	51,800	10,100	2,000	79,300	52,600	26,700

From this table it will be seen that each year since 1890 a large amount of pig lead has been brought into the United States beyond all lead imported in ore, to satisfy the demands of our market.

If the average yearly importations of lead contained in ores are short of the demands of our market, how can a duty on lead ore affect the price of pig lead in the United States?

When fluxing ores were admitted free they did not lower the price of lead in the United States, and when they carried a duty of 1¼ cents they did not raise it. The duty on pig lead governs the price of pig lead in the United States, and the duty on lead ores can have no effect whatever upon the price of lead until the amount of lead imported in ores more than fills the full lead demands of our market.

REAL MOTIVES OF M. GUGGENHEIM'S SONS.

In answering the arguments of M. Guggenheim's Sons I have thus far given them credit for honest though mistaken views upon the subject of lead duties; but when their real motives in advancing specious arguments and making misleading statements about this matter are made clear, they should certainly bear no weight.

When the tariff law of 1890 placed a duty of 1¼ cents upon fluxing ore, it at once became evident that an almost fatal blow had been struck at American smelting interests; and as it seemed the purpose of our Government to prevent the use of Mexican silver-lead ores in the smelting works of the United States, preparations were made to erect smelting works in Mexico, where there was a plentiful supply of both fluxing ores and dry ores, besides cheap labor.

Among the first to invest largely in smelting works in Mexico were M. Guggenheim's Sons, and they own and operate to-day by far the largest smelting business in Mexico; in fact, they have repeatedly claimed that their works in Mexico are capable of smelting the enormous amount of 1,200 tons of ore per day. It is true that they still have interests in this country, but it is perfectly understood among smelters, and the most casual investigation will satisfy anyone, that the vast preponderance of their interests are purely Mexican.

These interests were called into being by the placing of a duty of 1¼ cents upon lead in ore, and what is more natural than that these gentlemen who own this foreign infant industry should wish to have it nourished by a continuance of that duty?

Whatever duty our American Congress places upon fluxing ores renders them that much harder for American smelters to buy in Mexico, and if a prohibitive duty is placed upon this material, they of course can not buy it there at all. In the same degree that the American smelter is excluded from the Mexican flux-ore market, the competition for the purchase of flux ores is lessened, and that material naturally becomes cheaper to the Mexican smelter, and when the American smelter is finally excluded, the Mexican smelter controls the Mexican flux-ore market entirely.

NO FRAUD PRACTICED OR POSSIBLE IN SMELTING IN BOND.

While M. Guggenheim's Sons claim that smelting in bond is of the greatest benefit to American smelters, others argue that it is a means of defrauding the Government of its revenues, and that quantities of lead are admitted duty free to the United States by reason of this method.

When the provisions of the statute for smelting in bond and the regulations of the Treasury Department are carefully read, any fair-minded man will be fully satisfied that fraud is impossible.

The smelters who import ores under these provisions are under heavy bonds to fully comply with all provisions of the law and carry out all the regulations, and while the law has been in force for over seven years there has never been a case where any penalty was asked for a rule broken or infringed upon.

NO COMBINATION AMONG SMELTERS.

It has been stated in Congress that there was a "smelting trust" in the United States, and that this trust was in some way connected with the so-called "lead trust."

There is not only no "trust" among the smelters of the United States, but there is absolutely no understanding or agreement of any kind whatsoever between the twenty or thirty different companies engaged in this business in America; on the contrary, they are entirely independent, and the sharpest kind of competition prevails between them.

NO CONNECTION BETWEEN SMELTERS AND LEAD TRUST.

The American Lead Company, or what is sometimes known as the "lead trust," is a very large manufacturer of white lead, and consequently a very large purchaser of pig lead.

Pig lead is the finished product of the smelter, who naturally wishes its price to be high, but as it is the raw material of the white-lead manufacturer, he quite as naturally wishes its price to be low.

The same harmony of interest, therefore, exists between the smelters and the American Lead Company as is usual between buyer and seller. There is not and can not be any connection between them.

NOT ENOUGH FLUXING ORES PRODUCED IN THE UNITED STATES TO SATISFY DEMANDS.

It is claimed that enough fluxing ore is produced in the United States to supply the wants of all American smelters.

If this claim were true, the price of fluxing ore in the United States would not be so abnormally high as it is.

It is also claimed that a duty of 1¼ cents per pound upon the lead contents of this ore would stimulate its mining, and new flux-ore mines would be developed.

This statement is a fallacy for the following reasons, viz:

HIGH DUTY ON LEAD ORE WILL NOT INCREASE ITS PRODUCTION IN THE UNITED STATES.

Fluxing ore in this country is so scarce, and the smelters are so anxious to get it, that they pay a premium for every ton they buy.

This fact is sufficient to stimulate the mining of this class of ore, and if any new mines could be found in this country they would be developed.

If a high duty upon these ores will develop new mines, why were they not developed when the high duty was on the ores?

A HIGH DUTY ON PIG LEAD THE GREATEST ADVANTAGE TO LEAD MINER.

A duty of 2 cents per pound on pig lead raises the price of lead in the United States, and thereby benefits the lead miners by increasing the value of the lead contents of their ore.

While a moderate duty upon lead in ore would prevent the importation of any larger quantity of that material than was absolutely needed, a high duty would really not be of any benefit to the lead miner. The smelters are paying him now all they can stand, because of the fluxing qualities of his ore, and if foreign fluxing ores are excluded entirely they can pay no more. They are his only customers, and to push them beyond the limit might cause them to combine against him.

FALSITY OF ARGUMENT THAT MINERS NEED PROTECTION AGAINST PAUPER LABOR.

A favorite argument of those who advocate a high duty upon lead in ores is that the miner must be protected; they say the smelting works and the rich mine owner can take care of themselves, but the poor miner must be protected against the peon labor of Mexico, and that the only reason a smelter in the United States has for going out of it to get fluxing ore is because he wants to get the cheap material produced by pauper labor.

It must be remembered that all ores of gold and silver are now and always have been, since the foundation of our Republic, upon the free list; the miners of these ores are now and always have been unprotected; it is only when lead is found in a silver mine that protection is needed from the competition of peons and paupers.

NO HIGHER WAGES PAID IN FLUXING-ORE MINES THAN IN DRY-ORE MINES.

The folly of all these protests will be seen when it is stated that there never was a case in any part of the United States where the miner in a highly protected lead-silver mine received any more wages than those paid to the absolutely unprotected dry-ore miner in the same locality.

CHARACTER OF ORE MAY CHANGE IN A MINE, BUT MINERS' WAGES DO NOT.

Mines containing silver ore with lead in it have been worked until they ceased to carry lead and became dry-ore mines, and later lead was found again, and thus the mines were protected and unprotected as these changes occurred, but the wages of the miners never changed a particle.

This is true of mines in Leadville, Colo., and a case never was heard of where wages were raised because a dry-ore mine changed in a flux-ore mine, as has often happened.

MARKET PRICE OF LEAD, NOT COST OF PRODUCTION, GOVERNS VALUE OF LEAD IN ORE.

The people who claim that American smelters buy fluxing ore in Mexico because it is produced by peon labor forget that the price of pig lead in New York governs the price of lead in ore wherever it may be found on this continent and not what it may cost to produce the ore.

DIFFERENCE BETWEEN LEAD ORE AND SILVER-LEAD ORE.

Lead ore and silver-lead or fluxing ores are two distinctly different commodities. Fluxing ore is a material in which the smelter is vitally interested, and the duty upon it affects his business; while, as he does not and can not with advantage use pure lead ore, he has no wish to import it, and personally does not care what duty is placed upon it.

In order that no confusion shall occur and no misunderstanding be had, a few words about lead ore may be needed.

From 1864 to 1894 lead ores bore a duty of 1¼ cents per pound upon their gross weight, or $30 per ton, whatever their lead contents might be.

This duty was, of course, ridiculous, as an ore which had no silver in it, but carried, say, 100 pounds of lead to the ton, was dutiable to the extent of $30 per ton, or about ten times the value of its lead contents after it was extracted.

Even under the Wilson bill this distinction exists, and three-quarters of a cent per pound duty is charged upon the gross weight of lead ores. As silver smelters can not use to advantage lead ores containing no silver, they have never cared and do not care now what duty is placed upon this material, and have, therefore, never considered it in any discussions upon the tariff in which they have taken part. When, however, the attention of the Ways and Means Committee of the Fifty-fourth Congress was incidentally called to it, they at once saw the absurdity of this provision, and fixed the rate of duty upon "the lead contents of all ores."

Respectfully, JOHN H. MURRAY.

The PRESIDING OFFICER. The pending amendment of the Committee on Finance will be stated.

The SECRETARY. In paragraph 179, page 56, line 12, after the word "cent," it is proposed to insert the words "and one-half;" so as to read:

Lead-bearing ore of all kinds, one cent and one-half per pound on the lead contained therein.

Mr. ALLEN. I want a yea-and-nay vote upon agreeing to the amendment.

The yeas and nays were ordered.

Mr. MANTLE. Mr. President, I gather from what the Senator from Nebraska [Mr. ALLEN] has just been saying that he desires a low rate of duty upon lead ores for the reason that the smelters of this country require these ores for the purpose of fluxing; that is, for use in smelting dry ores.

I submit, without going into any argument at this time upon the merits of protection or the necessity of protection as applied to the lead miners in this country, that there can be no question upon that score, for if there is a class of men or an industry in the country which requires protection in order that it may flourish it is the lead-mining industry of the United States as against the same industry as carried on in Mexico.

But there is a provision in the existing law, and it is also reenacted in the bill under discussion, which, it seems to me, covers the main objection to the duty upon lead ore. It is a provision under which fluxing ores, these soft ores, as they are called, may be shipped to this country in bond for the purpose of being used as a flux for reducing dry ores. It was placed in the law of 1894 in response to the representations made by the smelting industry of the country, which is the industry asking for free lead ore, or at least for a very low duty upon lead ores.

It was placed there, I believe, at their request and for the purpose of enabling them to secure fluxing ores free of duty, thereby encouraging the production of dry ores in the country by giving them the privilege of shipping ore in bond and setting aside each day an amount of metal equivalent to that contained in the ore as shown by the assay, the resultant product, of course, to be reexported or refined and manufactured in this country for the purpose of export. That provision was incorporated in the law of 1894. It is proposed to reenact it in this law, and I understand it covers every objection of this character, because it enables the smelters to bring in all the lead ore they desire, but it is to be used as a flux.

I have in my hand a letter addressed to my colleague [Mr. CARTER]. It is a letter which has been sent to a number of Senators here. It is from a smelting company, the concern of M. Guggenheim's Sons. I believe that they own the smelters or the smelting capacity in this country to the extent of one-third at least—that is, the smelters engaged in the production of ores in which lead ore fluxes are used. They write a letter bearing upon this question, in which they go into the details and explain the provisions of the bonding clause. I ask, in this connection, that the letter be read, as it seems to me it will throw a good deal of light upon the subject. It shows, too, that there are a great many people engaged in the smelting industry who are asking for this rate of a cent and a half upon lead in ores.

Mr. ALLEN. I ask the Senator from Montana if it is not true that the firm whose letter has been sent out and others of whom he speaks are so situated on tide water here that they can ship their fluxing ores by water from Mexico?

Mr. MANTLE. They can not ship the ores from British Columbia.

Mr. ALLEN. But they get their fluxing ores from Mexico, I understand, and they have water shipment.

Mr. MANTLE. Of course they must pay the rate of duty in any event, whatever it may be.

Mr. ALLEN. I know; but the difference between the rate by water and the rate by rail is very great, as the Senator well knows, and that difference would give this firm a percentage over a firm situated in Nebraska, Colorado, Missouri, or any other interior State.

Mr. MANTLE. At all events, we are to keep in mind in this discussion the prime object, which is to protect the lead miners of the United States. That is what we are trying to accomplish. I think the facts, so far as they have been developed by the discussion here, and so far as our experience has gone in this matter, amply justify—not only justify, but demand—that the rate shall be adopted at the point fixed by the committee if we are to encourage the lead-mining industry of this country.

The writers of this letter are themselves owners of lead mines and of a smelter in Colorado and at other points in the country. They are interested, I believe, in smelters in my own State. I am not certain about that, but I think they are; and I think in their presentation of the matter it will become clear how the provision to which I have alluded can be used by those who desire to import these fluxing ores free of duty. Of course if the product is to be used in this country the duty must be paid; otherwise there would be no advantage whatever derived from the protective duty levied; but they may import the ore used for a flux and reexport the product and not have to pay any duty whatever.

The PRESIDING OFFICER. The letter will be read, according to the request of the Senator from Montana, in the absence of objection.

The Secretary read as follows:

NO. 30 BROAD STREET, NEW YORK, *April 3, 1897.*

DEAR SIR: We beg to submit for your careful consideration our views and some data with reference to the proposed tariff legislation on pig lead and lead in ores. We believe it to be for the best interests of the United States to have a duty of 1¼ cents per pound on lead in all kinds of ore and 2 cents per pound duty on pig lead. There are various interests that must be considered in this matter, the most important factor being the miner. The argument of the dry-ore miner is that in consequence of the scarcity of fluxes or lead ores the dry-ore miner (whose ores contain no lead) is compelled to pay the smelter an abnormal price for having his ores treated. Section 23 in the proposed Dingley bill permits the smelting and refining of foreign wet or lead ores in bond duty free. As smelters can smelt and refine wet ores in bond duty free, the dry-ore miners' contention is entirely unjustifiable.

In justice to the dry-ore miner, we will say the existence of section 23 is not generally known to him. In fact, many Senators were not aware of the effects and benefits of this section, and it is only recently that it became generally known to the various smelting companies that they could bond their works to advantage and obtain wet ores as fluxes duty free, and only within the last few weeks have some of the largest smelting companies completed the operation of bonding their works. Therefore the full effect of having wet ores duty free in bond will be felt only in the future.

Another element to appease, in case the duty on lead should be high, is that interest which uses pig lead as a raw material, but this interest has been fully protected and taken care of in the proposed Dingley bill and the amendments thereto.

We find as follows:

	Duty.	
	McKinley law.	Dingley bill.
	Cents.	*Cents.*
White lead.....per pound..	3	3
Red lead.....do....	3	3
Linseed oil.....per gallon..	32	32
Brown acetate.....per pound..	3½	3½
Lead sheets.....do....	2½	2½
Lead pipe.....do....		

The above are the principal items manufactured in this country where pig lead is used in quantities as raw material. It will be seen that the tariff rates in the proposed Dingley bill are the same as they were under the McKinley law; consequently this interest should not take exception to the duties on lead ores and pig lead being the same now as they were under the McKinley law.

Some railroad companies, through their agents, have argued for a low duty on wet ores, believing it would benefit them in obtaining the haul on wet ores from foreign countries. They were not aware of the provisions of

section 23, which would give them the haul on the ore, as it will come into this country in bond duty free.

As regards the source of revenue to the United States Government, a duty of 1¼ cents a pound on lead in ore will very materially increase the revenue, as it has been demonstrated during the past years that in case the United States requires lead in addition to what it produces the parties requiring it will as readily pay 1¼ cents per pound as they will 1 cent per pound duty. It has been represented by parties having mining interests in foreign countries (British Columbia and Mexico) that the duty on pig lead regulates the price of lead in the United States.

This statement will not bear investigation, as it can be proven that the duty on ore regulates entirely the price of lead in the United States. A high duty on pig lead and a low duty on lead in ore will not advance the price of lead in the United States, because you lock and bolt the front door and leave the back door wide open. As the miner is paid for his lead in the ore according to the ruling price of pig lead, everything should be done to advance the price of pig lead, and it can only be done effectually by placing a sufficiently high duty on the lead imported in the ore.

To illustrate that the duty on ore regulates the price of pig lead in New York, you will find upon investigation that the average price for pig lead in New York for the four years of 1890, 1891, 1892, and 1893 was $4.07½ per 100 pounds. The average London price for four years was $2.55 per 100 pounds; adding 1½ cents per pound duty for the lead in the ore, the result would be $4.05 per 100 pounds, which is within 50 cents a ton of the average New York price for those four years; whereas if the duty on pig lead had regulated the New York price of pig lead, the New York price of pig lead should have been $4.55 for the average of those years, or $10 per ton more. As to a comparison of the New York price with the average London price plus duty on ore and duty on pig lead from 1894 to 1896, it is difficult to reach correct conclusions for various reasons.

The differential between the ore duty and the pig-lead duty was only one-quarter cent a pound, consequently it is difficult to estimate what the effect would have been had the duty between the two been, say, one-half cent a pound or more; and, furthermore, conditions of the New York and London markets during the last three years were abnormal, financial conditions and general depression of business in this country having made it so that for many months at a time there was practically no sale for lead here excepting at crisis prices, and the price in London varied materially during the last years because of the immense falling off in the Australian production.

There are in the United States a great many mines and many thousand miners that will be benefited by a high price for lead. We estimate that with 1 cent per pound duty on lead in the ores the ruling price of pig lead in New York would be from $3 to $3.50 per 100 pounds; whereas if the duty should be 1¼ cents per pound, the ruling price for pig lead in New York would probably be $3.50 to $4 per 100 pounds.

We are the owners of a lead mine in the United States having in sight 500,000 tons of lead ore. Should pig lead rule at from $3.50 to $4 per 100 pounds, we can afford to work this mine, but if lead rules from $3 to $3.50 per 100 pounds, we can not.

In Missouri, Montana, Idaho, Colorado, Utah, Arizona, Nevada, and New Mexico and other points there are large quantities of mines that could be worked and many thousands of laborers employed if pig lead ruled in New York at from $3.50 to $4 per 100 pounds, and we are satisfied in the course of time the United States would not be compelled to import any lead, as a sufficient quantity would be mined in this country to provide for home consumption.

The smelting interest of this country should also be considered in framing a tariff, and some of the owners of smelting works who have mines in British Columbia and Mexico have advocated 1 cent per pound duty on wet ores, claiming that there is insufficient flux in the United States to provide for their requirements. They fail, however, to mention in their arguments that they have the privilege of smelting wet ores in bond free of duty. This privilege fully protects them, and should give them all the flux that they require without the payment of any duty whatsoever.

Some of the smelters, having mined in British Columbia and Mexico, have also contended that one-half cent per pound, or $10 per ton, differential between lead ore and pig lead was insufficient to protect their interests in the United States against the growth of smelters in British Columbia and Mexico. As they have the privilege of smelting wet ores in bond duty free, this gives them very cheap fluxes. Besides, there is a differential of one-half cent per pound, or $10 per ton, between the lead ore and pig lead, and a freight rate from Colorado points for shipments to Europe for the resulting product, via Galveston, at $6 per ton, which is a little more than half the cost of freight in case products are brought to the East and then shipped to Europe. Should additional advantages become necessary to prevent the growth of smelting works in foreign countries, there is no legislation that can be enacted by the United States that will prevent the growth of smelters in foreign countries.

We are satisfied that in case a greater differential than one-half cent per pound is made between ore and pig lead, countries like Mexico would retaliate by putting an export duty on lead ore or by discriminating against other importations, corn, etc., from the United States, as they would be dissatisfied with a greater differential than what existed under the McKinley law, and their attention would be specifically called to the object intended in making this differential greater.

Furthermore, should the differential be 1 cent per pound, or $20 per ton as a differential between the duty on ore and pig lead, as is proposed under the Dingley bill, and should the contention be correct that the duty on pig lead and not the duty on ore regulates the price of pig lead in America, the bonus of $20 that the Dingley bill gives the smelter, then this would enable the smelter and refiner on the Atlantic Coast to bring lead ore from Australia, Spain, Greece, South America, in fact, from all over the world, in such enormous quantities that the price of lead in this country would in time fall to a price ruinous to the producers of lead.

We will be pleased to furnish you with any additional information that you may desire, and remain,

Yours, respectfully,

M. GUGGENHEIM'S SONS.

Hon. THOMAS H. CARTER,
United States Senator from Montana, Washington, D. C.

Mr. ALLEN. I should like to state to the Senator from Montana that this firm of M. Guggenheim's Sons own mines in the United States, and those mines produce fluxing ores, I understand. They are therefore interested in a high tariff on fluxing ores.

Mr. MANTLE. They seem to be interested both ways. They own, as I have stated, about 30 to 33⅓ per cent of the smelting capacity of the country, and they say, too, that they own mines. I think they have presented a very good case indeed from a protective side of the question. They have shown, I think, pretty conclusively that it is the duty upon lead ore that regulates the value of lead in this country, and not the duty upon pig lead. I think that they have brought that out very clearly and forcibly by quotations from the market reports both in London and in this country, showing that the difference in the price was the amount of the duty upon lead in ores.

Mr. President, there is just one thing I wish to say in relation to what I have already said respecting the provision of the law permitting these ores to be shipped for the purpose of fluxing in bond duty free. My opinion is that that provision ought to be amended so that a limit would be placed upon the time during which the resultant product of those lead ores might be held in bond in this country; that is to say, there ought to be a time specified at the expiration of which the duty should be paid upon such lead, or else it should be reexported. As the matter now stands, there is no limit placed upon the time during which the resultant product may be kept in bond; and, owing to the looseness with which the law was drawn, it is a fact, I believe, that a great deal of lead resulting from these ores, which have been shipped in bond and set aside, are lost track of. It went somewhere, no one seems to know where, but it was lost; the duty was not paid; and there can be no question but what it entered into use and was sold in this country, and evaded the payment of duty.

There is another phase of that question. Unless some limitation is placed upon the time during which lead resulting from these ores may be held in bond, it is piled up in enormous quantities, thus constituting a menace to the home product, because at any moment, when the market is feeble, the lead ore accumulated and held in bond may be released and thrown upon the market upon the payment of the duty, thereby lowering the price of the home product and greatly injuring, in fact almost destroying, the protective benefit which the lead miner is supposed to receive.

It does seem to me, Mr. President, that that weakness in the law ought to be remedied. I have offered an amendment intended to correct that trouble, and I sincerely hope the Finance Committee will favorably consider it.

As argument has been made by the Senator from Nebraska [Mr. ALLEN] in opposition to the amendment proposed by the committee, and documents have been filed presenting that side of the controversy, I ask that the documents I have here may be printed in the RECORD. I shall not stop to read them. One of them is a memorial of the Lead Miners' Association of Southern New Mexico, and presents their side of the controversy. The other is the statement of the St. Joseph Lead Company, which presents a most comprehensive statement of the entire situation with reference to the production of lead, its importation, its price, its consumption, etc. I ask that these documents may be printed in the RECORD.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The documents referred to are as follows:

THE TARIFF ON LEAD.

[Memorial of the Lead Miners' Association of Southern New Mexico to the Congress of the United States.]

At a meeting of the Lead Miners' Association of Southern New Mexico, held at Magdalena, N. Mex., February 4, 1897, it was—

"*Resolved*, That a committee of five be appointed to prepare a memorial to the Congress of the United States asking that the rates of duty imposed by the McKinley bill on imported pig lead and lead in ores shall be restored with proper facilities for their determination by commercial sample and assay, that the duties so determined shall be collected in cash at the port of entry, and that the privilege of importing and manufacturing lead in any form 'in bond' shall be abolished."

In accordance with the above resolution the following memorial was prepared and adopted, and it was also—

"*Resolved*, That Hon. W. S. Williams, of Socorro, N. Mex., a member of the committee, be requested to lay this memorial before members of Congress and urge the adoption of the provisions asked."

Attest:

GEO. F. WALKER, *Secretary.*
A. B. FITCH, *President.*

MAGDALENA, N. MEX., *February 4, 1897.*

MEMORIAL.

The lead-mining industry of the United States asks that the rates of duty imposed by the McKinley bill on all imports of lead and lead in ores shall be restored, that these duties shall be collected in cash when the entries are made, and that adequate measures shall be taken to honestly determine and collect the duties so imposed, without allowances or exemptions of any kind whatever.

This country is the largest consumer of white lead and lead pipe (which are the chief uses for pig lead) in the world, because we are building more houses of all kinds, and especially because we build more houses of wood, which must be painted in order to be preserved. Our consumption has always exceeded our production. During a period of great depression we consumed, in 1894, in round numbers, 193,000 short tons and produced only 163,000 short tons. In 1895 we consumed 242,000 short tons and produced only 170,000 short tons.

Our production increased 7,000 tons and our consumption increased 49,000 tons. (See Mineral Resources of the United States, 1895—Lead.)

It would seem that surely here was a legitimate and inviting field for the employment of idle American labor. On the contrary, the lead-mining industry is languishing; prospecting has ceased; the small mines are closed and the large ones are able to work only by reducing wages and a total surrender of profits. In one of the hitherto flourishing camps there is bitter strife against a reduction of wages, with the prospect that that camp will be ruined for many years.

The great smelting plants contend that this country can not supply the

demand and that it is necessary for them to go abroad for lead ores to conduct their operations of reducing our own gold and silver ores. In this kind of smelting the office of the lead is to collect and combine with the gold and silver and carry them safely through the melted slag into the crucible. The proportion of metallic lead used for this service is from 8 to 12 per cent of the furnace charge. The resulting product is base bullion, or pig lead, carrying the precious metals that have been smelted with it. The main object is the recovery of the precious metals.

The pig lead is in the nature of a by-product, though an important one. Its production must go on regardless of the demand or the market price for it as long as this method of recovering the precious metals is continued.

The most desirable lead ore for this service is that with the highest content of lead, so that the necessary quantity takes up the least room in the furnace, and that with the smallest content of sulphur, so that it does not require to be roasted before using. If it also has a high content of silver, that is extracted too, and the lead does its other work equally as well.

No great quantities of high-grade oxidized lead ores, high in silver, are known in this country now, but there is no lack of fair-grade oxidized ore, low in silver, that can not be mined at present prices, or of high-grade galena, good in silver, that is furnishing a considerable portion of the demand now from the mines of Idaho, Utah, Colorado, and New Mexico.

There is also a great quantity of galena, very low in silver, like the Missouri and Kansas ores, that might be used at a small expense for roasting. As a matter of fact, a very considerable amount of galena ore is now used in these furnaces without roasting, depending somewhat on the sulphur content of the ores being smelted with it.

If an American price could be paid for digging them, there is no doubt that this country could furnish all the lead ores necessary to smelt all our own gold and silver ores.

A very large proportion of the world's product of silver is obtained from argentiferous ores of lead. A policy that would encourage the working of our mines would probably enable them to furnish a large part or all the lead consumed in this country, give employment to our own people instead of foreigners, and increase the output of the precious metals in this country rather than that of Mexico or British America.

In old Mexico there are several districts that produce typical high-grade oxidized lead ores that carry a good content of silver. The most important of these is the Sierra Mojada, which has had the reputation of producing ore that ran 30 per cent lead and 30 ounces of silver per ton, year in and year out. It has been a heavy shipper to this country, reaching even as far as the Missouri River smelters and displacing the ores of the Mississippi Valley.

A late discovery, the Sierra del Carmen, in the State of Coahuila, within 15 miles of the Rio Grande, it is thought, will prove richer than the Sierra Mojada. Development of these mines has been prosecuted for two years, and the ore is said to run 40 per cent lead and to carry 40 ounces of silver per ton. That sort of ore can well afford to pay the highest rate of duty we can assess for the privilege of using our markets. Every ton of it will displace 2 tons of our own low-grade ores, the silver contents serving to carry it to the most distant markets.

The product of these rich mines is mainly controlled by Americans. Some of it is brought as ore to this country, displacing domestic ore, and more is brought in the form of base bullion to be refined in bond, the resulting lead being held as a threat to our market, keeping prices below the point of profitable home production.

There was also found in old Mexico such an abundance of cheap labor that the labor cost of mining and smelting these ores was only one-third the same cost in the United States.

It would seem that these Americans should be satisfied to make their fortunes in old Mexico, with all these advantages, but they are not. They want our cheaper coal and coke and, more than all, they want our market for their lead. They would like to have their "raw material" in the shape of ore admitted free of duty. Failing in that, they hope that the present low rate of the Wilson tariff, that has proved so ruinous to American mines, will not be exceeded. They have taken our legitimate work and given it to the Mexicans, who owe no fealty to this Government, leaving us idle. When they return with the products of that cheap labor, to take advantage of our better fuel and market, let them pay such tax on them as will be adequate compensation for our loss.

A practical example will show that it is not adequate now. A ton of 30 per cent Sierra Mojada old Mexico ore, carrying 30 ounces of silver, is worth now, delivered at the Missouri River, for the lead, $9.90; for the silver, $19.50; total, $29.40. The charges are: Freight, $12; American duty on lead, $4.50; Mexican duty on silver, $1; total, $17.50, returning to the miner $11.90 per ton.

A ton of 30 per cent lead ore from New Mexico, carrying 5 ounces of silver, is worth, at the Missouri River, $9.90 for the lead and $3.25 for the silver; total, $13.15. Charges are, for the freight, $7, returning to the miner $6.15, which, with close management, will possibly pay the cost of the digging, dressing and sorting, hauling, and loading on the cars, with nothing left for the mine owners.

The Mexican owner has twice as much returned to him with which to pay only one-third as great a labor cost. Of course it is the difference in the silver content that makes the difference in the amount returned to the miner; but that is the way nature has deposited values in the two localities.

THE SILVER IS THE CULPRIT.

It carries the load when it comes to making a long journey.

It is a pity we do not tax it for bringing that lead into this country, as it could not come except for the silver. It costs no more to dig a ton of lead ore with 30 ounces of silver in it than one with only 5, or none at all; so the example is fair.

If we made the duty 1¼ cents a pound of lead contents and collected another $4.50, the Mexican would still make a greater profit on his work than we could make on ours.

This is supposing that the tariff imposed is carefully and accurately collected. It is not collected so now. It is not possible to do it with the machinery provided by our Government.

At the port of El Paso, Tex., an average of 40 carloads of Mexican ores is received daily. To weigh, sample, and assay these 40 carloads of ores, the United States employs one assayer with one assistant. The assistant is only ornamental, so the assayer has the whole work to do.

On the other hand, the smelting company that uses this ore employs over fifty men to take the sample while unloading the cars and prepare it for the assayer, and they do not think that they do any unnecessary work. The contents of ores from any mine are constantly varying, and it is not possible to determine them for any given quantity without handling the whole of that quantity and sampling it in the regular commercial way.

Is there not a law requiring the proper sampling of imported lead ores? If there is, who is at fault that it has not been enforced?

Mr. Cleveland's Administration, through the framing of a tariff law by Mr. Wilson, sought to put lead ores on the free list as "raw materials."

They did not succeed by law, since half of the former duty was imposed, but if they did not succeed in fact, it was surely not because the door was not left wide open for undervaluations. This is plainly shown by the inadequate provisions for executing the law at El Paso, Tex., where the great bulk of the lead ores imported into the United States is entered.

It comes with ill grace for the great smelting plants to advocate a policy that will result in harm to the lead-mining industry of the United States.

As a rule they are not miners, nor are they interested in mines in this country, though some of them are quite heavily interested in old Mexico. They make contracts for lead ores and pay for them only when received and determined. They do not then pay the going market price, but have a dishonest habit of underquoting it as a sort of insurance that they may make use of the lead purchased and then market it without danger of loss from any decline while it is in their hands. At this writing (February 5, 1897), on a rising market, lead is quoted in New York strong at $3.20 to $3.25 per 100 pounds, and the "smelter quotation" for use in settling with the ore producers is $2.90.

This practice is permitted because the producers are not comb ned and the smelters are. In 1894 the great smelters had a "clearing house" and parceled out the lead mines that each one was permitted to devour. The devouring process was so successful that the clearing house was dissolved and the smelters raised the price of lead ores for their own salvation. (See Mineral Resources of the United States, 1895—Lead.)

Thus the actual decline in the market and more, too, has been borne by the producer, the lead miner. Is it any wonder that he has not kept up with the demand and that the smelters think they are compelled to go abroad for their supply of lead ores?

There is another governmental iniquity that has operated to depress the lead-mining industry. It is the privilege of importing and manufacturing "in bond." Why this privilege should be granted to lead and not to tin or sugar or wool, it is hard to say. It has been shamefully abused, and should be withdrawn.

This privilege makes it easier to import Mexican ores, that already hold a great advantage over those of domestic production. It also permits the "lead trust" to import European pig lead at small cost, to threaten and break down our market, as they did in July, 1894. It also breeds the suspicion that in some way or other the payment of duties, in whole or in part, is finally escaped.

Let those who wish to import lead in any form pay the duty when it enters this country, in cash. They need no assurance that the United States will refund it if the bullion is properly reexported, and when they get cash out of the United States Treasury they will be entitled to it.

The lead miners of this country do not desire the ruin of the smelting interests, but they do want such conditions that it will pay the smelters to favor domestic ores.

The great silver-lead smelters are not the proper exponents of what is best for the lead-mining industry of the United States, since they really have little interest in common with it. They ought to take a friendly interest in the prosperity of so important an ally, but they have not done so.

They have procured legislation that permitted them to bring in ruinous competition the rich ores of old Mexico that were mined by the cheapest labor in the world. They have become large owners in those mines instead of in the mines of their own country. They have no interest in the price of pig lead, on which the miners' price for ore is based, except that it shall not decline in the interval between their purchase of ore and selling of the resulting lead, and they protect themselves against that chance by using a fictitious quotation, lower than the actual market, on which to make those purchases. They must make a large and steady production, regardless of market conditions, which fact is taken advantage of by the "lead trust" to get its "raw materials" at the lowest cost.

Least of all should the "lead trust" presume to speak for the American lead miner. The chief end of its existence is to buy pig lead at the lowest possible price and sell its own products made from it at the highest possible price. With small gratitude for this country, that not only permitted but fostered its existence, it has sought to supplant our lead product with that of cheap labor from other countries, and its corroding plants on the Atlantic coast have been greatly increased in capacity to more conveniently receive that product by water, the cheapest of all transportation.

The domestic product of pig lead must reach this more distant market by rail and enter the competition hampered by greater freight charges. It is difficult to understand why so obnoxious a trust should be especially favored by permitting it to manufacture "in bond" this foreign product of cheap labor and carriage.

Let the taxes on imports of pig lead be high enough to offset these advantages, and let them be paid in cash when the entries are made.

The American lead miner speaks for himself and asks the Congress of the United States to restore the rates of duty imposed by the McKinley bill on all imports of lead and lead in ores, to require that those duties shall be paid in cash when the entries are made, and to provide adequate measures to honestly determine them, without any allowances or exemptions of any kind or degree.

[Statement of the St. Joseph Lead Company (J. Wyman Jones, president; Frederic E. Camp, treasurer; C. B. Parsons, superintendent, and Dwight A. Jones, secretary) and the Doe Run Lead Company (offices—Bryant Building, 55 Liberty street, New York; Laclede Building, Fourth and Olive streets, St. Louis; Bonne Terre, Mo.; mines and works in St. François and Jefferson counties, Mo.) in support of a duty of 1¼ cents on lead-bearing ores.]

Believing that the amendments of the Senate Finance Committee to paragraphs 179 and 180 of Schedule C of House bill 379, entitled "A bl to provide revenue for the Government and to encourage the industries of the United States," and particularly that the amendment which increases the duty on lead-bearing ores to 1¼ cents on their lead contents, are of vital consequence to the miners of this country who are interested in lead ores, as well as to all those who dwell in the lead-mining sections of our country and all who are interested in lead properties, we submit this statement for fair examination.

The above companies were organized in 1864 and 1886, respectively, and are the largest miners of disseminated galena lead ore in the United States. They employ over a thousand men and produce over 20,000 tons of pig lead annually. They have no other metal, in merchantable quantities, in their ore, and are dependent for life upon the American demand for lead in the open market. The industries carried on by them have built up several large towns in southeastern Missouri, have greatly increased the wealth of that section of our country, and have been the means of support of many thousand people.

These companies submitted to the Ways and Means Committee of the House of Representatives at the hearing on January 9, 1897, a statement which is printed in the report of the tariff hearings before that committee asking for the restoration of the duties affecting them to the rates of the tariff of 1890. This request was granted, in a measure, and the duty on pig lead and base bullion was made 2 cents a pound, but the House refused to restore the duty on lead ore, and thereby largely nullified the effect of its favorable action in regard to pig lead and base bullion.

This defect was remedied by the Finance Committee of the Senate after most careful investigation, and the duty on lead-bearing ores was increased by that committee to 1¼ cents a pound, the duty on pig lead and base bullion remaining at 2 cents a pound. We now urge the permanent adoption by the Senate, the conference committee, and the House of Representatives of this

amendment of the Finance Committee increasing the duty on lead in ores, and ask attention to the following statistics of the lead industry:

The production of refined lead in the United States from 1825 to 1896, both inclusive, is shown in the following table taken from the Report of the Secretary of the Interior, volume 4, Part III, 1894-95, page 359:

[Short tons.]

Year.	Total production.	Year.	Total production.	Year.	Total production.
1825	1,500	1843	25,000	1857	15,800
1830	8,000	1844	26,000	1858	15,300
1831	7,500	1845	30,000	1859	16,400
1832	10,000	1846	28,000	1860	15,600
1833	11,000	1847	23,000	1861	14,100

* First importation of foreign ores.

† The figures for 1895 and 1896 are from statistics prepared by Mr. E. A. Caswell, of New York, who is well known as a lead statistician and whose tables are used in Government publications. (See volume 4, Part III, Report of the Secretary of the Interior, 1894-95, pages 363, 369.)

We give, for comparison and for the purpose of showing additional facts relating to the ten years last past, the following table, which has been compiled by us from statistics prepared by Mr. Caswell.

Table of United States lead production and consumption, in short tons, from 1887 to 1897.

Year.	Desilverized lead.	Missouri and soft.	Total from United States mines.	Consumption in United States.	Used from foreign bullion and pig.	Used from foreign ore.	Mexican base bullion refined in bond.	Exported, manufactured and foreign bullion.
1887	117,022	27,958	144,980	164,416	4,312	15,060	.....	1,400
1888	125,800	31,252	157,052	162,490	1,642	27,018	.....	1,250
1889	127,577	27,400	154,977	188,046	283	24,650	.....	1,904
1890	114,546	33,840	148,386	185,037	10,174	14,064	.....	2,345
1891	150,478	29,763	180,241	203,305	3,651	21,575	2,036	2,921
1892	148,080	32,895	180,975	210,330	1,875	26,380	12,000	12,400
1893	126,703	32,859	159,652	191,011	4,424	29,270	34,000	35,935
1894	120,081	38,113	158,194	197,092	20,382	17,466	42,445	21,585
1895	130,748	38,189	167,937	235,356	(27,766) (22,947)	20,254	50,388	24,670
1896	128,305	44,616	173,011	202,876	(5,550) (2,414)	21,901	50,540	46,490

Table showing average price of common pig lead at New York City.

1873	6.30	1886	4.63
1874	6.00	1887	4.40½
1875	5.95	1888	4.41
1876	6.05	1889	5.80½
1877	5.45	1890	4.33½
1878	3.58	1891	4.54½
1879	4.18	1892	4.05
1880	5.05	1893	3.61
1881	4.80	1894	3.12
1882	4.90	1895	3.12
1883	4.32	1896	2.83
1884	3.73½	1897 to June 1*	3.26
1885	3.94½		

* See Engineering and Mining Journal, June 19, 1897, page 647.

Table showing duties, in cents per pound, since the organization of the St. Joseph Lead Company.

	1864.	1875-1882.	1883.	1890.	1894.	House tariff, 1897.	Senate amendments, 1897.
Lead ore	1½	1½	1½	1½	¾	1	1½
Lead in pigs, bars, and base bullion	2	2	2	2	1	2	2
Scrap lead, etc	1½	1½	2	2	1	2	2

We submit that these tables show that this country does not produce enough lead ore to supply the wants of the country; that our home miners are engaged in keen competition with foreign ores and foreign bullion, are receiving lower and lower prices, and are at the point of surrendering their market to foreigners.

It will be observed that the production of lead in this country, owing to the protection given the industry, has grown to a large business, but that it is even yet far below the needs of the country, and that nothing but the protective tariff prevents the absolute surrender of our only market to the prices at which Mexican lead can be sold here at a profit. The disastrous results which followed the importations for consumption in the year 1895, which were 20,254 tons of ore, 27,776 tons of bullion, and 22,947 tons of pig lead, illustrate clearly the effects of a low tariff. Nothing like the demoralization of the American market during the year 1896 has ever been experienced in the country, and the official price of lead during the year touched 2.50 cents per pound in the city of New York.

Mines were closed and abandoned, and the general depression among miners of lead ore and silver-lead ore reached its climax. Had the duties of tariff of 1890 been in force there would not have been such an overwhelming flooding of our market. But the restoration of a part of these rates will not remedy the trouble. If the price at which Mexican base bullion can be sold at a profit in this country is raised by the imposition of a duty of 2 cents a pound, we are still unprotected unless the duty on foreign ores is also raised proportionately. If this duty is kept at 1 cent per pound, all the foreign lead that comes here will come in the shape of ores, and the price will be controlled by the cost of these ores at New York, plus 1 cent a pound duty.

This price is not sufficient to protect our miners or to bring prosperity to the working classes. This country does not export lead made from domestic ores. The exports referred to in the Monthly Summary of Finance and Commerce, under the heading "Exports of domestic merchandise," are exports of foreign bullion, or manufactured lead, this classification covering all foreign articles the form of which has been changed or the value enhanced. (See Commerce and Navigation of the United States, 1896, Volume I, page vii.)

Nothing to-day stands between the American producer and the low prices of the summer of 1896 excepting the higher price of the London market and the prospective increase in our tariff. The London price enables refiners of bullion to make more profit by shipping their product to Europe than by paying duty here and selling it in our market. The importance of making the rate 2 cents on bullion is therefore evident, for without this increase, at the slightest weakness in the London market, this bullion can be put upon our market at destructive prices.

But unless the duty on ores is kept at 1½ cents, we shall still be at the mercy of the Mexican miners, for the difference in the price of labor and the cost of transportation is not covered by 1 cent duty nor even fully by 1½ cents, as was shown during the period while the tariff of 1890 was in force, when Mexican ores came here in large quantities and were able to compete with our domestic ores.

We call attention to the fact that the Government will receive more revenue if the duty on ores remains 1½ cents than it will receive if 1 cent is made the rate, as these ores must come here to supply our deficiency in production.

Under the tariff of 1890 a very large proportion of the foreign lead that came here came in the shape of ores, and this fact gives positive proof that it will come in this way again, as this is the natural result of the high duty on pig lead and bullion. Under the tariff of 1890 the duty on ores was 1½ cents, and the tariff yielded the following revenue from lead-bearing ores:

In 1891	$610,387.21
In 1892	813,739.35
In 1893	877,309.81
Total	2,301,436.37

(See Monthly Summary of Finance and Commerce, March, 1896, pages 1145, 1146.)

Had the duty been 1 cent, as was proposed by the House bill, the revenue collected would only have been:

In 1891	$406,924.78
In 1892	542,492.91
In 1893	584,873.19
Total	1,534,290.88

And the Government would have lost $767,145.49.

This is approximately what the Government will lose in the next three years by making the duty 1 cent instead of 1½ cents. Why should this loss be assumed? These ores have come here continuously since 1887, and are bound to come in the future.

The following number of short tons have been imported and used in American consumption:

In 1887	15,060	In 1892	26,380
In 1888	27,018	In 1893	29,270
In 1889	24,650	In 1894	17,466
In 1890	14,064	In 1895	20,254
In 1891	21,575	In 1896	21,901

During this period, from 1887 to 1896, the Government collected not only the duties on this ore but large amounts were received from pig lead and base bullion. Under the Dingley bill as it passed the House it is fair to assume that the Government will get no income from its high duties on pig lead and base bullion, because dealers will find it to their advantage to bring in the ores at the low rate of duty. If, however, the duty on ores is advanced to 1½ cents, it is reasonable to assume that, in addition to the increased amount of duty collected on the imported ores, considerable duty will be received from pig lead and base bullion, which can then have a chance of coming into the country at a cost that will bear some parity to the value of foreign ore, plus the expense of smelting in the United States.

The tariff of 1890, with its rates of 2 cents on pig lead and 1½ cents on ores, showed excellent results. And there was no such destruction of the home

market and loss of revenue as occurred in 1896. The following amounts have been collected in duties on lead and manufactures of lead:

Fiscal year ending June 30. (See Monthly Summary of Finance and Commerce, October, 1896, page 644.)

1884	$26,015.84	1887	$230,617.78
1885	147,136.01	1888	146,310.25
1886	221,947.37	1889	57,757.11

Calendar year ending December 31. (See Monthly Summary of Finance and Commerce, March, 1893, pages 1145, 1146.)

1890	$558,343.05	1894	$758,662.75
1891	686,864.74	1895	1,385,427.84
1892	867,916.74	1896*	410,871.86
1893	958,760.90		

*From figures furnished by the Bureau of Statistics.

The only opposition to the Senate rate on ores comes from a few smelters who try to obscure the rights of the miners. We assert that the increase of duty on ores does not prevent their purchase for fluxing. They are just as near our borders, just as easily transported when the duty is 1¼ cents as when it is 1 cent.

The lead and silver-lead miners need protection against low prices on these fluxing ores.

The price to the miners is the question with which the mining interests of this country are concerned. They have their ores to sell, and they desire to obtain a fair return for them. Why should the smelters object to this, unless they have interests in foreign mines? The advance in price is made good to them and they lose nothing.

This whole question turns on price. If the duty on ores is kept down to 1 cent, the great smelting establishments alone will secure the benefits of the tariff. They will no doubt advance prices for their products, and get the double benefit in their own profits of the increase in duties on pig lead and of the low price of ores. This is manifestly unjust. They should be willing to allow the price of ores to be sufficiently high to reestablish the mining interests of the country on a prosperous basis, and were it not for probable interest in Mexican and British Columbia mines they would be.

If we admit the claim that they must have lead ores for fluxing, we say: Let them buy American ores at a fair price or buy foreign ores and either pay a fair proportionate duty on them or take advantage of the bonding privilege and use the ores for fluxing and then export them. They are abundantly protected, for the duty on pig lead and on all lead products has been advanced. There is therefore no reason why smelters should stand in the way of the protection of American miners and the development of American mines, and some of them do not.

The contention of a few refiners that transportation and other expenses make three-quarters of a cent, or 1 cent, duty on lead in ore equivalent to 2 cents on pig lead is unsound, for experience and the record show that for the most part the duty on lead in the ore has been the actual margin at which the United States price has ruled above the foreign price, so that this lower duty must be considered as the maximum protection under any tariff.

A duty of 1¼ cents on lead ores means $30 instead of $20 a ton, or $10 a ton nearer a fair price for all lead from silver and other lead-bearing ores.

The duty on ores will, in conjunction with their cost, fix the lowest price at which they can be sold in our country, and the difference between 1 cent duty and 1¼ cents means $10 per ton to the miner. It is intimated that this increase in the price of ores will cause the smelters to charge more for refining dry ores. But this is highly improbable, because—

1. There is a corresponding increase of duty on pig lead, and the smelters have no excuse for charging more for their processes.

2. The amount of imported ores is about one-fifth of all the desilverized lead produced in the country, and therefore the extra cost per ton for fluxing ores, if it were all charged against the lead miners, would be only one-fifth of $10 per ton, which would leave a handsome profit to the miners who sold their ores at an advance of $10 per ton.

3. The competition among the smelters will keep down the cost of smelting.

4. Some of the most influential refiners favor the increase in duty on ores and will prevent injustice.

It may, therefore, be concluded that every section of our country where lead and silver-lead mines exist will be greatly benefited by this increase of duty on ore. Colorado, Montana, Nevada, Utah, Idaho, and Missouri will receive equal benefit; the depression in mining centers will be helped, and the benefits of protection will reach the homes of our mining population.

The benefits of the Senate rate are already appearing.

The nearer the date for the enactment of the tariff law of 1897 as amended by the Senate the better becomes the lead market. It is universally conceded that the price of pig lead, before settling down for the summer, is awaiting the action of Congress. The overthrow of the Senate amendment making the duty 1¼ cents on ores means a decrease in price, a market glutted with foreign ores, and stagnant business at home. These results will prevent the return of prosperity and depress the working classes.

On the other hand, an enactment of the bill with the Senate rate on lead in ores will stimulate the entire lead-mining industry of the country. It will make active work in many localities where it is sorely needed. It will enable employers to do their share toward extending that general prosperity for which we look and will help to spread among workers in this field of labor a firm confidence that Congress favors the encouragement of this home industry and the payment of American wages to American miners.

ST. JOSEPH LEAD COMPANY,
DOE RUN LEAD COMPANY,
By DWIGHT A. JONES.

JUNE 25, 1897.

Mr. ALLEN. Mr. President, this letter, written from No. 30 Broad street, New York, to the Senator from Montana [Mr. CARTER] by Guggenheim's Sons, seems to be a letter prepared for the occasion. I do not know who the firm of Guggenheim's Sons are, except, as I understand, they have a refinery somewhere upon the Atlantic Ocean, or upon the water, so that it can be reached from the ocean, and that their fluxing ores are shipped from Mexico by water, costing them practically nothing. I think I am substantially correct in that statement.

Mr. CARTER. Will the Senator permit an interruption?

Mr. ALLEN. Certainly.

Mr. CARTER. It is true the gentlemen who write the letter referred to by the Senator, and read from the Secretary's desk, are interested in mines and likewise in smelting. They insist upon an adequate duty upon lead ore not upon the basis of shipments made by them from Mexico, or upon the basis of the fact that they own a lead mine, or a number of mines, but upon the substantial ground that the price of lead ore in this country is primarily determined by the duty fixed upon the lead ore imported, and not the duty upon the pig lead. Hence, a low duty on the lead in the ore would fix the price of the lead to the smelters producing it, and a high duty on pig lead would not be available for the purpose of fixing the price.

Mr. ALLEN. In other words, they want to fix the price by statute, and they do not want that price to be affected in consequence of competition or anything else of that kind.

Mr. President, this firm, if they are to be believed—and I presume they are; I know nothing to discredit them—have access to fluxing ores from Mexico by water. They own a large mine, some 500,000 tons of fluxing ores, I think they state, somewhere in the mountain States, I do not know exactly where.

Mr. SHOUP. At Leadville.

Mr. ALLEN. At Leadville. If any person was ever in the position in which the negro advised his boy to set his deadfall when he was teaching him, Guggenheim's Sons are in that position. The negro told his boy to set his deadfall to catch the coon "comin' or gwine," and these fellows have got their deadfall so set as to catch the interests of this country from either direction. They are willing that their fluxing ores should be run as they are run now, providing they can get the advantage of fluxing ores from Mexico along the tide water up here to their smelting works, which I think are in New Jersey, although I will not state that they are.

Mr. CARTER. They are in the State of New Jersey.

Mr. ALLEN. In the State of New Jersey.

Mr. President, they have got every interior smelting mine by the throat under those circumstances. No wonder they throw their hats in the air for high duties on lead in the ore. Every ton of fluxing ore that is shipped from Mexico to Kansas City, or to Omaha, or into some other of the interior States to some of those refineries, must come by rail, where the rate of transportation is—I will not undertake to say how much greater than it is by water, but certainly 100 per cent or more.

Of course they can afford to do this. If the policy advised in the letter written to the honorable senior Senator from Montana by Guggenheim's Sons shall be followed out by Congress in the framing of this bill, every smelter who is not situated upon tide water in the United States will be closed if this bill becomes a law. That firm want the duty high, but, whether it be high or low, they can ship from Mexico; and if it be high, they can ship from their mines in Colorado or wherever their mines may be located.

But I call the attention of the Senate, and I call the Senators from Montana to witness the fact, that nine-tenths, if not 99 per cent, of the smelters of this country are opposed to this duty of a cent and a half a pound on lead in the ore, and have repeatedly so expressed themselves in letters and memorials and telegrams.

Mr. President, I do not want to see anything happen to the lead-mining interest of this country which will imperil it. I should like to see it built up; I should like to see it grow stronger from day to day and from year to year; but I do not want to see it propped up by legislation to the extent of driving the smelting and other important interests of the United States to the British Possessions and to Mexico.

Mr. VEST. Mr. President, in this, as in almost every other case, we are confronted with conflicting interests, each demanding certain protective rates from the Congress of the United States upon their production. In the case before us there are smelters who want the silver ore from Mexico admitted free for fluxing purposes. One of these smelters is within 5 miles of the city in which I live—the Argentina Smelter Company, in the State of Kansas. On the other hand, we find the silver-mine owners of the West, whose mines produce the mixed ores of silver and lead—for they are found together—in favor of the highest possible duty on the foreign ores and upon pig lead from abroad, especially upon those ores, because it is a competing product with that of their mines.

We have in the State of Missouri both interests, because the Argentina Smelter is practically in my State, though about 3 or 4 miles from the State line. Besides these interests, the State of Missouri has the largest galena ore mines in the United States, the St. Joe Mine being the largest I know of anywhere. The capital invested in it is $5,500,000, and there are a number of other mines; the Doe Run Mine, the Central Mine, and others in the immediate vicinity, with investments of from two hundred to three hundred and fifty and four hundred thousand dollars.

Mr. President, in the vote that I shall give, and for which I am responsible, I am actuated alone by what I believe to be the interests of the consumers of the United States. I do not think I am here to represent the lead-mine owners of Missouri or the smelters of Missouri. The question that I am to determine is, What is the effect upon the common people of the United States, the large mass of consumers, who must use the products of lead for the ordinary purposes of life? I very frankly state that I will not vote one cent for protection in order to increase the price of white lead to the poor people of the United States.

We have in this country an immense lead trust; and the superficial observer would be inclined to think that the interest of that trust was to put a low duty upon the imported lead, or to put it upon the free list, because that is their raw material; but I have before me the report of that trust, showing that their interest is entirely in the opposite direction, and that they want a duty upon lead for the simple reason, as they express it, that they have always on hand a large amount of the raw material, and a low duty decreases the value of that material as part of their assets. In this report, the last one made, for the year 1894, the National Lead Company, 1 Exchange place, Jersey City, N. J., makes the following report:

Surplus in December, 1893, $950,355.81. The net earnings during the year 1894 were $1,212,258.47. They paid in dividends on preferred stock March 15, dividend No. 9, $260,820; on June 15, dividend No. 10, $260,820, the same amount; on September 15, dividend No. 11, the same amount, and on December 15, dividend No. 12, the same amount—making $1,043,280—paid every three months during that year. Besides these dividends upon preferred stock, they paid on their common stock July 2, dividend No. 3, $149,054; October 1, dividend No. 4, $149,054, and December 31, dividend No. 5, $149,054.

Mr. President, this institution is in rather a flourishing condition. These dividends are paid quarterly upon the preferred stock, and the dividends I have named were paid upon common stock in a year of great depression, of great commercial calamity. When every interest in this country has been at the lowest ebb, these large amounts have been distributed to the stockholders of the company.

Now permit me to read, for the information of the Senate, their explanation of the position of the trust in regard to the tariff. They go on to state that the year 1894 was a year of great depression and that all values had fallen. Then they say:

Notwithstanding this, it is particularly gratifying to be able to state that this company had a substantial increase in its volume of business in every department except one during the year 1894 as compared with 1893. Profits were not so large, because the purchasing power of consumers having been sadly reduced and propositions for the reduction of the tariff having taken form in the early part of the year, the management decided to promptly meet these conditions by reducing prices to a basis as low as could be anticipated under the new tariff, and which would meet the prevailing necessity for cheaper goods.

I call the attention of the Senate to the fact that this trust, managed in such a fashion as to pay these enormous dividends, is of the opinion that a low tariff decreases prices, while a high tariff puts them up, and therefore they reduce expenses to meet the new conditions which they supposed would be caused by the Wilson Act. They then proceed to say:

It will be borne in mind that the values of substantially all merchandise were lower January 1, 1895, than on January 1, 1894. The tariff on pig lead and all manufactures of lead in which this company is interested was reduced practically one-half, as for instance on pig lead and white lead 1½ cents per pound. It is necessary for the proper and economic conduct of our business to carry an enormous quantity of lead in process of manufacture, and it will not occasion surprise to know that the reduction in the value of our lead products between January 1, 1894, and January 1, 1895, when inventories were taken at current values, amounted to more than $250,000.

Here is a statement clearly and frankly made that upon the lead they had on hand a reduction of from one and one-half to three-fourths of a cent in the Wilson Act caused this trust the loss of $250,000 in that year. What is the logical and irresistible conclusion of this statement coming from men who are able to pay these enormous dividends? It is simply that the price of all lead products with a higher tariff is increased to the consumer, whilst under a lower tariff it is decreased.

This trust manufactures, I am told, more than two-thirds of all the white lead used in the United States. What is white lead? It is the preservative of frame houses, of frame structures of every character. It is as necessary to the poor man who can not build a stone or a brick house as any other commodity that meets the necessary demands of his daily life. They say here emphatically that because we reduced the duty upon lead, the value of white lead, their principal product, was necessarily cut down, and therefore they were compelled to economize and to cut off expenses in order to pay these enormous dividends every three months upon their preferred stock, with three or four dividends besides upon the common stock. How can I hesitate as to my duty in view of these facts?

These statements are made by parties interested for themselves. What do they care for the people of this country except to make money out of them? What is their object except to increase these dividends to their stockholders? How am I to regard this statement except that a high tariff means a higher price for the products of this great trust?

Am I to listen to the Argentina Smelter Company, amongst whose stockholders are some of the dearest friends I have in the world, or am I to listen to these Western mine owners, with whom I have the greatest sympathy, and hundreds of whom are natives of my own State and went from Missouri to the West? I am not here to vote money into the pockets of these smelters or into the pockets of the mine owners. If that is the work to be done, somebody else must take my place. I am opposed to putting up these duties, because this lead trust tells us that that means to increase the price of their products to the common people, as Lincoln called them, of the whole country.

Mr. President, I am not speaking for political effect. My ambition has been fully gratified. I only hope to do my duty as I see it, and I would not give a single vote, if two-thirds of the people of the State of Missouri were here demanding it, if I believed that it violated the great principle of equity and equality which should govern every legislator in the discharge of his duty.

But, Mr. President, the duty proposed in this bill is above what the lead men ask. I have here before me the testimony taken before the Ways and Means Committee of the House of Representatives, and I find here the testimony of Mr. Cantwell, a most intelligent lead-mine owner in Missouri, a man of large capital, representing the Association of Missouri Lead Miners, who testified as the representative of all the lead miners in the State, and he gives their views, and here is his suggestion in conclusion:

All ores—

Here is the clause he submits to be adopted by the committee—

All ores, mattes, and slags containing 8 per cent or more of lead, three-fourths of 1 cent per pound; lead dross, 1½ cents per pound; lead in pigs and bars, in which lead is the chief component in weight, 1½ cents per pound, the duties on the articles mentioned in this section to be levied on the full weight of the mass as offered for importation.

Here is this gentleman, more largely interested, possibly, than any other citizen or any other mine owner in the State of Missouri, saying that this duty should be three-fourths of 1 cent per pound, as it is under the existing law. But we are told now that it must be put up to 1½ cents per pound. For what purpose? The price of lead has gone down. So has the price of everything else except gold. Has the price of the wheat of the farmer gone up, except in the spasmodic gambling in the grain pit at Chicago? Has the price of cattle gone up? Has the price of any commodity gone up in these last five or six years of terrible depression?

But the lead men come to us and ask us to relieve their trust from this depression by doubling these tariff duties; and their only argument is that it will exclude foreign lead from the United States, when the export and import statistics show that we export five or six million pounds of this lead each year, and did in the year 1893. Mr. Cantwell's principal complaint, if Senators feel any interest in the question, seems to be that this clause is found in the existing law and now stands in the present bill, which gives to the importer of silver-lead ores from Mexico the right to import in bond, and after he has gone into the smelting bonded warehouse of the United States and used these mixed ores there and extracted the lead, he can then export the lead abroad under a provision of the law which he claims has been shamefully and recklessly abused.

I will not trespass upon the patience of the Senate, and I have not the strength to do so, but I ask Senators to read the whole of the complaint of Mr. Cantwell, to be found in the Tariff Hearings before the House committee. I have heard it before, and I have no doubt to a large extent it is true.

I submit to our friends who control this bill whether it is not right now to correct that abuse and either to repeal or modify the bonded clause found in the act of 1894, for which I voted, and now found in the proposed act. If Senators have not had their attention called to that remarkable legislation, it amounts to this, that the importer can bring in from Mexico silver-lead ore; he can take it to a bonded warehouse of the United States where there are smelters. He can then take the lead and export it abroad, passing it simply through the United States after the smelting process has been completed. Mr. Cantwell charges that the officers of the United States have performed their duties carelessly and recklessly and have taken the statements of importers as to the amount of lead contained in the ores and the amount of silver without making the assay as was intended in the act of 1894 that it should be.

Under the proposed act our friends on the other side of the Chamber have simply altered this provision so that silver-lead ore from Mexico can be taken to any smelting institution in the United States, whether a bonded warehouse of the Government or not, and there, under the supervision of an assayer of the Government, the metals are to be separated and the amount of lead certified to the custom-house authorities. What will be the operation of this change of the law I am unable to say, but I have very great doubts whether this provision should have been put in the act of 1894 and I have great doubt whether it should remain in the law.

Mr. Cantwell in his testimony states as follows:

This provision—

Referring to the bonded provision—

to be effective should be supplemented by the repeal of all provisions for the smelting and refining of ores and metals, and particularly ores in bond.

Then he goes on to elaborate the proposition and give his reasons, as I have briefly stated them, in opposition to the bonded provision.

At the proper time I shall move to reduce the duty to three-quarters of a cent a pound upon these lead ores, and I should, with a great deal of pleasure, vote to put them upon the free list. I believe that lead should be free, and I am prepared to vote for it and to take my full share of responsibility for that vote, but as the existing law puts the duty at three-quarters of a cent, I am willing to take the present provision.

Mr. MILLS. What is the ad valorem?

Mr. VEST. About 45 per cent. That is all I desire to say.

Mr. RAWLINS. Mr. President, I have listened with interest to the discussion by the Senator from Nebraska [Mr. ALLEN] and also by the Senator from Missouri [Mr. VEST]. On general principles I do not differ so very much from the position which has been stated so forcibly and so eloquently by the distinguished leader upon this question on this side of the Chamber. I think we ought all of us to have regard for the consumers of the country. I perhaps would go further than the Senator from Missouri is prepared to go if I could frame legislation or a revenue system in reference to the principles which I think should be applied upon that subject. But I am compelled to differ with the Senator in some respects as to the details of this legislation. For instance, the question of the duties upon lead in its different forms. Let us apply our principles to the conditions as they confront us, not with reference to a situation as we would desire to make it.

When we came to the duty upon white lead, the Senator from Missouri moved a reduction of the duty upon that article, and I was glad to vote with him upon that question. We were defeated. So it is settled that the duty as fixed in the bill and as proposed by the committee is to prevail. The duty upon white lead under the Wilson law, the act now in force, and the duty as it is provided in the proposed legislation are absolutely prohibitive. We have had no importations into this country of white lead coming in competition with the product of the white-lead trust.

That great combination fixes the prices of the finished product, if we may so call it, to the American consumer, and no reduction in the duty upon other forms of lead will operate in the slightest degree beneficially to the people who build houses and use paint for their preservation. The argument which has been made by the Senator from Missouri has failed to convince me that a reduction in the duty proposed upon lead-bearing ores imported into this country can have the slightest possible effect in diminishing the burden of the great mass of the American consumers.

Next take the other condition. The smelting combination for which the Senator from Nebraska spoke—I do not mean that he spoke in its behalf or in its special interest, but as an interest located in his own State—while it may not technically exist in the form of a trust, is a combination of men whose capital is invested in great smelting concerns in this country, and I am informed they are also interested in the white-lead trust. All those smelters get together at different times and fix the price which they will be willing to pay miners throughout the country for their product. The duty in the existing law upon pig lead, which is the product of the smelting combination, and the duty proposed in this bill are absolutely prohibitive. I find that there are substantially no importations into this country under the Wilson law. So the smelting combination have a complete and perfect monopoly, excluding absolutely those products which come in competition with that which they have to put upon the market. Therefore they can fix to the consumers of pig lead, the consumers generally throughout the country, the price which they must pay. They must submit to the exactions which that combination see fit to make.

Mr. ALLEN. The lead miners have the markets of the world.

Mr. RAWLINS. Wait a moment. I will answer the question. So a reduction of the duty upon lead-bearing ores can not by any possibility benefit the consumers of pig lead or white lead.

Now, although it is a certainty, in accordance with the vote already cast by the Senate, that these high rates of duty giving an absolute monopoly to the white-lead trust and the smelting combination must prevail, it is insisted that the duty must be lowered on lead-bearing ores imported from Mexico and British Columbia. Who can be benefited if this motion should prevail? It can not be the mass of consumers among the American people. The consumers of lead-bearing ores in the United States are the lead-smelting combinations and the white-lead trust, controlling the market in the United States absolutely with respect to the articles they have to sell.

This same combination, this same trust, a conspiracy engaged in a legitimate business, but in an unlawful manner, which ought to be prosecuted and punished, as the Senator from Kentucky well said, ought not to receive legislative encouragement at the expense of the men who toil in the mines. But I doubt very much whether the miners in Utah would receive any resulting benefit from this duty. They have sent me petitions requesting that this modicum of favoritism, if it may be so called, be granted to them. As it can not operate to the injury of anybody except a criminal combination, I am willing to concede it to them. If it fails to prove beneficial to them, they will find out their mistake, and then they may be willing to lend their aid to the correction of this pernicious system which is largely concocted and conceived for the purpose of building up industries by bounties and subsidies, industries which otherwise would be unprofitable except as they receive governmental aid.

This bill is framed for the encouragement of manufactures upon the seaboard. To be more accurate in my statement, it is framed in order to facilitate the concentration of industrial enterprises of that character upon the Atlantic Seaboard. It is framed in accordance with that theory of political economy which maintains that it is to the best interest of the people that they should have materials as cheaply as possible upon which to operate, upon which to labor. All materials used in manufacturing enterprises which are to be made the ingredients of manufactured products, under the various provisions of this bill—that applies also to the schedule in relation to lead—are to be admitted free in bond if manufactured for export. Manufacturers in the interior of the country can not avail themselves of that provision. It has the effect of extending the market for the manufactures established in certain seaboard localities, increasing their power by competition to override manufactures in like lines located in the interior or other parts of the country.

Such establishments ought to seek the most favorable locality, where they can be operated with the greatest possible advantage and obtain the things they need out of which to make their manufactured products as cheaply as possible, thereby enabling them to furnish to the consumers in their respective neighborhoods the articles at the lowest possible cost.

That was the aim and purpose of the inauguration of the protective system as it was understood by Hamilton and as it was proclaimed by Clay—the diversification of our industries—and our friends upon the other side have now departed from that theory. They say the manufacturers along the seaboard must have raw materials free, to be manufactured for export. Some of our friends upon this side say that manufacturers generally must be favored to the extent of being allowed free of all duty, revenue or otherwise, materials which they need out of which to make their manufactured products.

The Senator from Delaware [Mr. GRAY] referred to Bastiat, a distinguished author, recognized as the most able writer in advocacy of the system of commercial and industrial freedom. The Senator from Missouri pointed to France as an example of a country where raw materials are free. It constitutes a part of the French protective system. He points to England. Of course in England all things are free, and as the whole includes the part, materials are free. This author not only exposes the fallacies of protection, leaving protection nothing upon which to stand from a true economic standpoint, but he takes up the policy to which the Senator from Delaware and the Senator from Missouri and some other Senators upon this side seem to be wedded—the policy of free raw materials—and I wish to read briefly what he says upon this subject in chapter 21:

> It is said that no commerce is so advantageous as that in which manufactured articles are exchanged for raw material; because the latter furnishes aliment for national labor.
>
> And it is hence concluded that the best regulation of duties would be to give the greatest possible facilities to the importation of raw material, and at the same time to check that of the finished article.
>
> There is in political economy no more generally accredited sophism than this. It serves for argument not only to the protectionists, but also to the pretended free-trade school, and it is in the latter capacity that its most mischievous tendencies are called into action, for a good cause suffers much less in being attacked than in being badly defended.
>
> Commercial liberty must probably pass through the same ordeal as liberty in every other form. It can only dictate laws after having first taken thorough possession of men's minds. If, then, it be true that a reform, to be firmly established, must be generally understood, it follows that nothing can so much retard it as the misleading of public opinion. And what more calculated to mislead opinion than writings, which, while they proclaim free trade, support the doctrines of monopoly?
>
> It is some years since three great cities of France, viz, Lyons, Bordeaux, and Havre, combined in opposition to the restrictive system. France, all Europe, looked anxiously and suspiciously at this apparent declaration in favor of free trade. Alas, it was still the banner of monopoly which they followed—a monopoly, only a little more sordid, a little more absurd than that of which they seemed to desire the destruction. Thanks to the sophism, which I would now endeavor to deprive of its disguise, the petitioners only reproduced, with an additional incongruity, the old doctrine of protection to national labor. What is, in fact, the prohibitive system?

We will let these petitioners from Bordeaux, the manufacturers, like the petitioners from New England, manufacturers, seeking to have a protective market for all they have to sell and a free-trade market for all they have to buy, settle this in a controversy between themselves, and this author permits them to do it. Now I will read briefly again, without detaining the Senate to read the whole of it:

> The agriculturist does not pretend that he has created the corn—
>
> Speaking of the tariff upon corn—
>
> but he has given it its value. He has by his own labor, and by that of his servants, his laborers, and his reapers, transformed into corn substances which were entirely dissimilar from it. What more is effected by the miller who converts it into flour or by the baker who makes it into bread?

In order that a man may be dressed in cloth, numerous operations are first necessary. Before the intervention of any human labor, the real primary materials of this article are air, water, heat, gas, light, and the various salts which enter into its composition. These are indeed untouched by human labor, for they have no value, and I have never dreamed of their needing protection. But a first labor converts these substances into forage, a second into wool, a third into thread, a fourth into cloth, and a fifth into garments. Who can pretend to say that all these contributions to the work, from the first furrow of the plow to the last stitch of the needle, are not labor?

And because, for the sake of speed and greater perfection in the accomplishment of the final object, these various branches of labor are divided among as many classes of workmen, you, by an arbitrary distinction, determine that the order in which the various branches of labor follow each other shall regulate their importance, so that while the first is not allowed to merit the name of labor, the last shall receive all the favors of protection.

But the answer propounded to me, perhaps, in the minds of gentlemen is this: If you tax the materials upon which the manufacturer operates, he can not compete with the manufacturer of like articles abroad; he must have some special subsidy or compensation. But that ignores a fact of which everybody must take notice, that the sun in its course around the world never finds a spot in which there is no taxation. The manufacturer in France and the manufacturer in Germany and the manufacturer in Great Britain are subject to the burden of taxation, and there is no reason why anybody in the United States should be exempt from a just and equitable share of contribution to support the Government which affords him and his property protection alike with other people. My principle is such that I do not concede the right to any pecuniary compensation by reason of a tax imposed for revenue.

The compensation which a man who is subject to the burden of taxation receives, and the only compensation to which he is entitled, is the governmental benefits which may result to him by reason of the administration of the Government and the equal and just laws which may be enacted, not only for his protection, but for that of all people upon like terms with himself. That is the compensation which any just system of taxation recognizes, and there is no other. When you assume that this burden of taxation must fall upon two-thirds of our population, engaged in the production of the crude materials by the employment of labor, who already bear their share of the burden to maintain the Government and receive no other benefit than the governmental protection to life and liberty and property, and say that the other one-third, who are engaged in no more lawful or meritorious labor, shall be exempt from the burdens of taxation, and that if by any chance taxes be imposed upon them indirectly they must receive a bounty or a subsidy special to them, in disregard of the duty which they owe to the Government in common with their fellow-citizens, it is an injustice to the former class.

There is no better ground upon which a man who believes in commercial and industrial freedom can stand than that of equality as enunciated in the Chicago platform. In the States, if you levy a direct tax upon property, exemptions are never favored. If you exempt certain property, it but increases the burden upon other property. Hence any provisions relating to exemptions are specialized and strictly construed, so that the taxing power may reach every conceivable object, making the burden as light as possible upon all, and making everyone share it alike. We propose, instead of levying taxes direct, to levy them upon consumption.

I start with the proposition announced by the Senator from Missouri, that we shall only raise so much money as is necessary to defray the expenses of the Government economically administered. Are you going to collect that from the consumer by increasing in a measure the cost to him of the articles which he may have to buy, which he needs for his consumption? Every article imported into the country should pay only the smallest possible duty which will yet raise the needed revenue, the burden to be distributed as uniformly as it is possible under the system in which favoritism must to some degree prevail. That was the doctrine of Calhoun, and he had a very clear insight as to the best interests of the great industrial people of this country. It was the doctrine of Walker. It was embodied in the recommendations upon which the Walker tariff was framed. It was recognized and most clearly enunciated by Albert Gallatin. It was the doctrine of the Democratic party down to the moment when Abram S. Hewitt, of New York, a great iron and steel manufacturer, concluded that he wanted free iron ore. He came down to Congress and made the proposition, and it was taken up in the interest of other manufacturers in other sections of the country. Strange to say, the people of the South, the people of the West, surrendered to it. While crying that they would tear down the temple of protection until not one stone would rest upon another, that they would lower the wall of the tariff to the ocean level, they suddenly found themselves prostrate at the feet of the protective idol, making legal tender of favoritism to monopoly in the form of free raw materials.

When we say that taxation should be uniform and equal, we are standing upon a proposition of justice which underlies the framework of our Government, and it is upon that proposition that the great Democratic party, in my judgment, should stand and will stand. It took that position at Chicago, and I do not believe it will retreat from it.

Mr. LINDSAY. I ask the Senator from Utah if he regards the change of phraseology adopted at Chicago as a change of doctrine from the Democratic platform of 1892?

Mr. RAWLINS. The Democratic platform of 1892 declared that Republican protection was a fraud, and said it was in favor of the imposition of duties for the purpose of revenue only. Then it had something to say about free raw material. It is in this last feature, in my judgment, that the platform of 1896 repudiated it.

The PRESIDING OFFICER. The question is on the amendment proposed by the Committee on Finance, which will be again stated.

The SECRETARY. In line 12, page 56, paragraph 179, after the word "cent," insert the words "and one-half;" so as to read:

Lead-bearing ore of all kinds, one cent and one-half per pound on the lead contained therein.

The PRESIDING OFFICER. On this question the yeas and nays have been ordered, and the Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CLARK (when his name was called). I am paired with the junior Senator from Kansas [Mr. HARRIS]. In his absence, I withhold my vote.

Mr. DAVIS (when his name was called). I am paired with the Senator from Indiana [Mr. TURPIE].

Mr. GEAR (when his name was called). I am paired with the senior Senator from New Jersey [Mr. SMITH]. I transfer that pair to the Senator from Maine [Mr. HALE], and vote "yea." The Senator from New Jersey [Mr. SMITH] will stand paired with the Senator from Maine [Mr. HALE].

Mr. PETTUS (when Mr. MORGAN'S name was called). The senior Senator from Alabama [Mr. MORGAN] is necessarily absent from the Chamber, and is paired with the senior Senator from Pennsylvania [Mr. QUAY].

Mr. BERRY (when Mr. MURPHY'S name was called). I was requested by the Senator from New York [Mr. MURPHY] to state that he is paired with his colleague [Mr. PLATT of New York] on this question. If the Senator from New York [Mr. MURPHY] were here, he would vote "nay."

Mr. TELLER (when Mr. PETTIGREW'S name was called). The Senator from South Dakota [Mr. PETTIGREW] is paired with the junior Senator from Kentucky [Mr. DEBOE]. If the Senator from South Dakota were present, he would vote "nay" and the Senator from Kentucky would vote "yea."

Mr. ROACH (when his name was called). On this question I am paired with the Senator from Rhode Island [Mr. ALDRICH], and therefore withhold my vote.

Mr. SEWELL (when his name was called). I am paired with the Senator from Wisconsin [Mr. MITCHELL], and withhold my vote.

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER], and therefore withhold my vote.

Mr. WELLINGTON (when his name was called). I again announce my pair with the junior Senator from North Carolina [Mr. BUTLER], and in his absence withhold my vote.

Mr. WHITE (when his name was called). I am paired on this vote with the Senator from Utah [Mr. CANNON]. If he were present, I should vote "nay."

The roll call was concluded.

Mr. LODGE. Has the Senator from Georgia [Mr. CLAY] voted?

The VICE-PRESIDENT. The Senator from Georgia [Mr. CLAY] has not voted.

Mr. LODGE. I am paired with that Senator, and therefore withhold my vote.

Mr. QUAY. Has the Senator from Alabama [Mr. MORGAN] voted?

The VICE-PRESIDENT. The Senator from Alabama [Mr. MORGAN] has not voted.

Mr. QUAY. Being paired with that Senator, I withhold my vote.

The result was announced—yeas 31, nays 23; as follows:

YEAS—31.

Allison,	Gallinger,	McBride,	Pritchard,
Burrows,	Gear,	McMillan,	Proctor,
Carter,	Hanna,	Mantle,	Shoup,
Chandler,	Hansbrough,	Mason,	Spooner,
Cullom,	Hawley,	Nelson,	Stewart,
Fairbanks,	Heitfeld,	Penrose,	Teller,
Foraker,	Hoar,	Perkins,	Wilson.
Frye.	Jones, Nev.	Platt, Conn.	

NAYS—23.

Allen,	Daniel,	McLaurin,	Rawlins,
Bate,	Faulkner,	Mallory,	Tillman,
Berry,	Gray,	Martin,	Turner,
Caffery,	Jones, Ark.	Mills,	Vest,
Chilton,	Kenney,	Pasco,	Walthall.
Cockrell,	Lindsay,	Pettus,	

NOT VOTING—35.

Aldrich,	Elkins,	Mitchell,	Smith,
Bacon,	George,	Morgan,	Thurston,
Baker,	Gorman,	Morrill,	Turpie,
Butler,	Hale,	Murphy,	Warren,
Cannon,	Harris, Kans.	Pettigrew,	Wellington,
Clark,	Harris, Tenn.	Platt, N. Y.	Wetmore,
Clay,	Kyle,	Quay,	Wolcott,
Davis,	Lodge,	Roach,	White.
Deboe,	McEnery,	Sewell,	

So the amendment of the committee was agreed to.

The next amendment of the Committee on Finance to paragraph 179 was, in line 21, page 56, after the word "establishments," to insert a comma and the words "whether designated as bonded warehouses or otherwise;" on page 57, line 5, after the word "and," to strike out "upon his report of the lead contents of the ore" and insert "report the result to the proper customs officers, and;" and in line 8, after the word "thereon," to insert the words "except in case of ores that shall be removed to a bonded warehouse to be refined for exportation as provided in this act;" so as to make the paragraph read:

179. Lead-bearing ore of all kinds, one cent and one-half per pound on the lead contained therein: *Provided*, That on all importations of lead-bearing ores the duties shall be estimated at the port of entry, and a bond given in double the amount of such estimated duties for the transportation of the ores by common carriers bonded for the transportation of appraised or unappraised merchandise to properly equipped sampling or smelting establishments, whether designated as bonded warehouses or otherwise. On the arrival of the ores at such establishments they shall be sampled according to commercial methods under the supervision of Government officers, who shall be stationed at such establishments, and who shall submit the samples thus obtained to a Government assayer, designated by the Secretary of the Treasury, who shall make a proper assay of the sample, and report the result to the proper customs officers, and the import entries shall be liquidated thereon, except in case of ores that shall be removed to a bonded warehouse to be refined for exportation as provided in this act. And the Secretary of the Treasury is authorized to make all necessary regulations to enforce the provisions of this paragraph.

The amendment was agreed to.

Mr. ALLISON. In line 11, page 57, I move to strike out the words "in this act" and insert "by law;" so as to read, "as provided by law."

The amendment was agreed to.

The next paragraph passed over was paragraph 180, on page 57, which the Committee on Finance proposed to amend, in line 15, after the word "bars," by striking out "and" and inserting "lead in any form not specially provided for in this act;" and in line 18, after the word "remanufactured," by striking out the comma and inserting a semicolon and the words "all the foregoing;" so as to make the paragraph read:

180. Lead dross, lead bullion or base bullion, lead in pigs and bars, lead in any form not specially provided for in this act, old refuse lead run into blocks and bars, and old scrap lead fit only to be remanufactured; all the foregoing, 2 cents per pound; lead in sheets, pipe, shot, glaziers' lead, and lead wire, 2½ cents per pound.

The amendment was agreed to.

Mr. ALLISON. In line 18, after the word "two," I move to insert "and one-fourth," so as to read:

All the foregoing, 2¼ cents per pound.

The amendment was agreed to.

Mr. ALLISON. I ask that the clerks may be allowed, in line 12, page 56, after the word "one," to strike out "cent;" and after the words "one-half," in the same line, to insert "cents;" so as to read:

Lead-bearing ore of all kinds, 1¼ cents.

The VICE-PRESIDENT. Is there any objection?

Mr. VEST. What page is that on?

The VICE-PRESIDENT. On page 56, line 12.

Mr. FRYE. It is merely a correction of the phraseology.

Mr. ALLISON. The Senator will see that it reads "1 cent and one-half." The word "cent" is in the wrong place, and it should read "cents."

The VICE-PRESIDENT. Without objection, the clause will be amended so as to read "1¼ cents." It is agreed to.

Mr. VEST. I want to call attention to the fact that this last amendment of the Senator from Iowa, in line 18, on page 57, makes an increase over the McKinley rate. Under the McKinley rate the duty upon the articles specified in paragraph 180 was 2 cents. Under the existing law it is 1 cent. It is now made 2¼ cents, which is above the McKinley rates. I move to strike out "2¼ cents" in line 18 and to insert "1 cent."

The amendment was rejected.

Mr. VEST. In line 20, page 57, I move to strike out the words "two and one-half," after the words "lead wire," and to insert "one and one-fourth," which is the existing law.

The amendment was rejected.

The next paragraph passed over was paragraph 181; which was read, as follows:

181. Metallic mineral substances in a crude state, including monazite sand, and metals unwrought, not specially provided for in this act, 20 per cent ad valorem.

Mr. ALLISON. I move, after the word "state," in line 22, page 57, paragraph 181, to strike out the words "including monazite sand;" and at the end of the paragraph to insert a semicolon and the words "monazite sand and thorite, 6 cents per pound."

Mr. VEST. What is the equivalent ad valorem?

Mr. ALLISON. About 20 per cent. It is not quite that much.

Mr. VEST. You simply insert a specific instead of an ad valorem rate. I have not the unit of value here.

The amendment was agreed to.

The next paragraph passed over was paragraph 182, page 58, which the Committee on Finance proposed to amend, in line 1, after the word "Mica," by striking out:

Two cents per pound on dimensions of 1 square inch or less, and 2 cents per pound additional for each additional square inch: *Provided*, That the maximum rate of duty shall in no case exceed 50 cents per pound.

And inserting "40 per cent ad valorem;" so as to make the paragraph read:

182. Mica, 40 per cent ad valorem.

Mr. ALLISON. I move to strike out paragraph 182 and insert a new paragraph:

182. Mica, unmanufactured, 5 cents per pound and 20 per cent ad valorem; mica, cut or trimmed, 10 cents per pound and 20 per cent ad valorem.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. ALLISON. On page 17, paragraph 86——

Mr. VEST. Before we pass from the mica paragraph, I should like to understand it.

Mr. ALLISON. Very well.

Mr. VEST. Let the Secretary read it the way it stands as amended.

The SECRETARY. As amended the paragraph would read:

182. Mica, unmanufactured, 5 cents per pound and 20 per cent ad valorem; mica, cut or trimmed, 10 cents per pound and 20 per cent ad valorem.

Mr. VEST. Will my friend from Iowa be kind enough to inform us what is the ad valorem duty? I have not been able to make a calculation under this amendment, but under the paragraph as originally reported from the committee it doubled the Wilson rate and was 5 per cent over the McKinley rate. It must be now very largely over the McKinley rate, because "mica, 2 cents per pound on dimensions of 1 square inch or less, and 2 cents per pound additional for each additional square inch: *Provided*, That the maximum rate of duty shall in no case exceed 50 cents per pound." "Fifty cents per pound" was stricken out, and it was put at 40 per cent ad valorem. I should like to know what is the ad valorem now under the amendment just made.

Mr. ALLISON. The nearest ascertainment of the equivalent ad valorem of these specific duties is about 41 per cent. Of course, in an article so variable as mica, it is not possible to have a uniform ad valorem. The uncut mica will probably be less, as a rule, than 40 per cent; cut mica will probably exceed that somewhat; but I should say the average will be about 40 per cent, as stated to us by one of the experts of the Treasury Department who made a thorough examination of the subject.

Mr. VEST. I move to strike out the rate in the amendment and to insert "20 per cent ad valorem," that being the existing law.

Mr. ALLISON. Have the amendments proposed by the committee been agreed to?

The VICE-PRESIDENT. The committee amendments to the paragraph have been agreed to.

Mr. JONES of Arkansas. A copy of the petition from the electrical manufacturers, addressed to the Committee on Ways and Means of the House of Representatives, has been sent to me. It is in these words:

MARCH, 1897.

To the Committee on Ways and Means of the House of Representatives:

We, the undersigned, manufacturers of electrical machinery and operators of railroads and plants using the same, respectfully petition that in the preparation of the tariff bill to be submitted to the Fifty-fifth Congress the present rate of duty on mica of 20 per cent be retained, for the reason that the quality of mica most largely used for electrical insulation is not found in the United States, and an increase in the duty would, therefore, simply enhance the cost of the material without furnishing any additional protection to the American miners.

This is signed by a large number of these companies. There was a similar petition sent by the manufacturers of stoves to the same committee, dated in March last. It is as follows:

MARCH, 1897.

To the Committee on Ways and Means of the House of Representatives:

We, the undersigned, manufacturers of stoves and ranges, respectfully petition that in arranging the schedule of duties for consideration at the coming session of Congress the present duty on mica of 20 per cent ad valorem be retained, as the imposition of any increased duty would be an additional burden upon the manufacturing interests which we represent.

I have a clipping from the Electrical World which clearly sets out the facts in this case. I am sure, however, that it is absolutely useless to argue with the majority. It is a waste of time to attempt to induce them to change what they have already determined shall be done in this matter. It seems to me to be unjust and not defensible in any way, though there is nothing left for us to do except to appeal to public opinion. I will insert this in the RECORD with my remarks, without any further comment.

The paper referred to is as follows:

[From Electrical World, June 19, 1897.]

DUTY ON MICA.

Reading over the discussion about the tariff on mica in a late number of the CONGRESSIONAL RECORD, amazement at the want of knowledge upon the subject as a whole on the part of our legislators is the feeling that dominates one who has happened to have a close connection with both the production and consumption of this remarkable article.

The general refrain is that mica is too cheap; if we could only increase the cost of mica three or even five fold, the country would be richer; that if we could stop the importations, profitable mines would be opened up in almost every State in the Union. Is this the truth? From my own experience it is not. The true cause of the low price of mica is owing to the fact that the supply greatly exceeds the demand. And at even the present low rate of prices the material is looked upon as a necessary evil, on account of its cost, by every consumer, and the tendency is to use pieces as small as possible. The smaller the piece used the greater the labor entailed; so in all cases an equilibrium has to be struck, which balances the price of the mica with the subsequent labor. If the price is increased, smaller sizes will be used, and vice versa. If the price is reduced, large sizes can be used, and, what is of greater importance, owing to the oversupply, larger quantities also.

Everyone knows that mica varies greatly in its properties, especially in hardness and transparency. North Carolina and Dakota and mica from other States stands at the head in combining these two properties, excessive hardness and perfect transparency, and this mica has nothing to fear from competition with that of other countries. It will always command a fair price, if the consumption is not interfered with in any way. The mining industry in the States concerned will be in a healthy condition. The consumers of this quality of mica are the stove manufacturers, the makers of lamp chimneys, shades, etc., and to a limited extent the electrical manufacturers.

Although the electrical manufacturers use this kind of mica where its qualities are required, the bulk of their supply happens to come both from Canada and India. Both countries possess mica of exceeding softness, the quality which is absolutely necessary for them, and Canada, with its high-priced labor, successfully competes with India, and so would this country if it only had the proper qualities. This soft mica has not been discovered in this country, and electrical manufacturers must have it at any price, and no electrical engineer in his senses would think of using a hard mica when a soft one was essential. He would rather use a substitute, such as paper or fiber, which may be said to rank as the next best practical insulator.

Paper at 3 cents, mica at 19 cents—a pretty bedfellow, to be sure. Any increase in the price of mica is certain to result in a decreased consumption, and it is to the interest of everyone in the mica business, whether he be a miner or importer, that the price of mica be as low as possible. The increased sales at a low price will more than offset the small sales with a larger profit.

Whatever tax is put upon the mica imported from other countries will not increase the price of mica mined in this country. There is already an overproduction. It would increase the price of the soft mica imported from Canada and India, and there would be a stronger tendency than there is now for the electrical manufacturers to use entirely different substitutes.

It is due to the electrical manufacturer that he has scoured the world over to find a suitable cheap mica for his purpose, and the present duty of 20 per cent is a severe tax upon his business, and the question of using mica at all is always before him. If from any cause the price is greatly increased, a great blow will be struck at the mica business, and the miner, whether he be in Dakota or in India, will equally suffer. It will not only be the miner, but the electrical manufacturer also. There is no business in the country which has brighter prospects of sending their product abroad than the electrical manufacturer.

Only the other day one of them secured contracts in England and Australia entailing an outlay of over $1,000,000. In fact, they are now looking forward to their export business as their chief outlet, and any tax on them when competing with Germany and England—and the one on mica is about the only one—might result in a loss to the foreign business to the amount of millions of dollars.

Mica, by the bye, has played no unimportant part in securing these contracts. Owing to its large use, American insulation stands very high abroad.

This debate about mica in Congress shows a general pressure put upon the various representatives for a higher duty on mica. This pressure has come from those who own a bit of land with mica upon it. They are not in a position to know if a duty would help them or not. I most emphatically say that it would not. The remedy is a greater demand, not a higher price. I may be like one crying aloud in the wilderness, but for the benefit of the miners, the thousands of men and women who are employed in working the mica after it has been mined, and for the mica business generally.

I trust these few words will have a hearing.

MICA INSULATOR COMPANY,
Per CHARLES W. JEFFERSON, *Manager*.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Missouri [Mr. VEST], in paragraph 182 to strike out the rate proposed by the Committee on Finance, "40 per cent." and insert "20 per cent."

The amendment was rejected.

Mr. ALLISON. Now I ask the Senate to return to paragraph 86.

The VICE-PRESIDENT. The Secretary will read paragraph 86.

The Secretary read paragraph 86, which had been reported by the Committee on Finance with an amendment, in line 3, after the word "plaster," to strike out "of paris" and insert "rock;" in line 4, after the word "calcined," to insert "$1.50 per ton;" in line 4, before the word "pearl," to strike out "and:" in line 5, after the word "hardening," to strike out "or artificial sulphate of lime;" at the beginning of line 6, strike out "manufacturers'" and insert "makers';" and in the same line, after the word "use," to strike out "$1.50 per ton" and insert "20 per cent ad valorem;" so as to make the paragraph read:

86. Plaster rock or gypsum, ground or calcined, $1.50 per ton; pearl hardening for paper makers' use, 20 per cent ad valorem.

Mr. ALLISON. Before the printed amendments of the Committee on Finance are adopted, I move the amendments which I send to the desk.

The VICE-PRESIDENT. The amendments proposed by the Senator from Iowa will be stated.

The SECRETARY. In paragraph 86, page 17, line 3, after the word "gypsum," it is proposed to insert "crude, $1 per ton; if;" so as to read, if the amendment of the Committee on Finance should be adopted:

Plaster rock or gypsum, crude, $1 per ton.

The amendment to the amendment was agreed to.

The amendment of the committee as amended was agreed to.

Mr. ALLISON. I ask the Senate to return to paragraph 278.

Mr. JONES of Arkansas. Mr. President, I wish to say a word as to paragraph 86.

Mr. ALLISON. I thought that was disposed of.

Mr. JONES of Arkansas. I did not think so. I have no doubt this matter is all settled without regard to its merits. The fact that this article has been on the free list heretofore and now becomes taxable will not influence the action of Senators on the other side; but as I think it is proper that the arguments shall go to the public, without detaining the Senate by presenting any of them, I send to the desk a protest by the Red Beach Plaster Company, dated February 8, 1897, which I ask may be printed as part of my remarks.

The VICE-PRESIDENT. It will be so ordered, in the absence of objection.

The paper referred to is as follows:

RED BEACH, ME., *February 8, 1897.*

DEAR SIR: A combination of plaster mills in the United States is endeavoring to secure legislation from Congress at this time which will help them to completely control the market for the sale of land plaster and calcined plaster.

To effect this object they wish to impose a duty on raw plaster rock, known as gypsum.

This material has heretofore been brought into the country free of any duty on account of the extensive use to which it has been put, when ground, as a fertilizer.

Land plaster, besides being a fertilizer itself, also acts as a regulator on the price of other fertilizers, and if its cost to the farmers should be increased by placing a duty on the plaster rock out of which it is made, it would tend to increase the cost of other low-grade fertilizers which are now being sold in competition with it.

It is used very largely on the soils of the Southern Atlantic States, but it is also used in other parts of the country more or less, where the peculiarity of the soils and climate requires it.

The owners of the plaster mills and mines in Michigan, Ohio, Iowa, Kansas, Indian Territory, Illinois, New York, South Dakota, Nebraska, and Virginia have united in petitioning the Ways and Means Committee of the present Congress to give them a duty as against this raw plaster rock.

In their brief, addressed to the Ways and Means Committee, in which they ask for protection, the representatives of these mills and mines say:

"As has already been stated, the deposits of gypsum are of such a vast extent in this country it is impossible to form any monopoly of the business. A few thousand dollars is sufficient to erect and equip a plant, and there is no secret about the method of its manufacture. There is no more danger of a combination on this product than there is of a combination on flouring mills, and if the price should be advanced to a figure beyond that which would warrant a legitimate profit to the manufacturer, numerous mills would immediately spring into existence, and thereby thwart the object of the promoters of such an enterprise."

The claim of the combined interests as set forth above, that it is impossible to organize a combination, is best confuted by the attached evidence that such a combination is already in existence in Chicago, and that the factories comprising this combination average the largest output and are at the present time selling their goods through an organization comprised of the various interests, as indicated by the following extract from a commercial agency report descriptive of the "Michigan and Ohio Plaster Company, 401 Pythian Temple, and Chicago, Ill., and Detroit, Mich.; Benjamin W. McCausland,* president, Chicago, Ill.; William McBain, vice-president, Grand Rapids; A. C. Torrey, secretary and treasurer, Grand Rapids.

"This is not a corporation, but a combination of the following concerns in the plaster business: F. Godfrey & Bro., Alabastine Company, Grand Rapids Gypsum Works, Grand Rapids Plaster Company, all of Grand Rapids; Western Plaster Works, Chicago, Ill., Detroit and Alabaster, Mich. Marsh & Co., of Sandusky, Ohio, formerly belonged to this combine, but Mr. A. C. Torrey, secretary and treasurer of this concern, informs us to-day that they have no branch at Sandusky, Ohio; otherwise there is no change.

"The combine is managed by a representative from each concern interested, and elects the above-mentioned officers, who have the same duties as other officers in mercantile corporations."

Here follows names of the representatives.

"The object of the company is to market the product of all the mills interested and divide the profits among them."

The undersigned has been engaged in the manufacture of land plaster and calcined plaster at Red Beach, Me., for over forty years, during which time very large quantities of this cheap fertilizer have been furnished to American farmers.

The raw material has always been obtained free of duty under all tariffs, and if at this late day plaster rock should be taxed by the Government, it would result in the stoppage of the mills and the discharge of the workmen engaged in them.

The interests of the American farmer would also be very injuriously affected, particularly as regards those located on some poor soils, where this fertilizer is specially advantageous, and where the farming interest is already greatly depressed.

Believing that you are opposed to monopoly, and that your interests as well as our own would be adversely affected by the imposition of such a duty in aid of a monopoly, we write to urge upon you the great desirability of immediately communicating with your Senators and Representative in Congress, urging upon them the necessity of immediately protesting before the Ways and Means Committee against such action.

This must be done at once, if at all, as there is little likelihood of changes being made in the minor provisions of the tariff bill after it shall have left the hands of the Ways and Means Committee.

RED BEACH PLASTER CO.,
Per C. H. NEWTON.

* Mr. McCausland's name is signed to the Congressional petition asking for a duty. He represents the "mills in Illinois."

Mr. JONES of Arkansas. I also present a newspaper clipping, properly accredited, which I desire to have printed in the RECORD.

The VICE-PRESIDENT. In the absence of objection, it will be so ordered.

The paper referred to is as follows:

[Journal of Commerce, April 21, 1897.]

WANT GYPSUM KEPT ON FREE LIST—EASTERN MANUFACTURERS REPLY TO ARGUMENT OF WESTERN PRODUCERS.

The efforts now being made at Washington to induce the Senate to impose a duty upon plaster rock, or gypsum, which in the House was left on the free list, are exciting much opposition from calcined-plaster manufacturers on the Atlantic Seaboard who use the Canadian rock for raw material.

The agitation for a duty comes from owners of Western quarries, who submitted arguments to the Ways and Means Committee of the House in favor of a duty. A counter-memorial was last night forwarded to the Finance Committee of the Senate by a number of Eastern manufacturers. The protest takes up the arguments of the Western producers in detail. In reply to the claim that the admission of the rock free of duty curtails the employment of labor in this country, as at least four-fifths of the labor involved in the production of plaster is in quarrying it and preparing it for the mill, the memorial of the Eastern manufacturers states that "it is doubtful if one-fifth of the cost of producing plaster can be charged to quarrying."

The memorial also sets forth that, while Western plaster mills are, as a rule, located at the quarries, and consequently not obliged to pay for carriage of the raw material, the Eastern mills using the Canadian rock "are subjected to very heavy charges for transportation, most of which is paid out in the form of labor to American seamen and vessel owners engaged in the coastwise trade." The imposition of a duty, it is argued, would enable the railroad companies and Western quarrymen to make larger profits, but would correspondingly depress the American coastwise trade, while at the same time increasing the cost to the consumer for the benefit of railroads and mine owners.

In the memorial submitted by the Western producers it was held that "it would be impossible to form any monopoly of the business. A few thousand dollars is sufficient to erect and equip a plant. There is no more danger of a combination on this product than there is of a combination of flouring mills, and if the price should be advanced to a figure beyond that which would warrant a legitimate profit to the manufacturer numerous mills would immediately spring into existence." In reply to this the memorial of the Eastern manufacturers sets forth that the Michigan producers "organized themselves as regards the sales of their product into an association to control the price artificially," and that in a report of one of the large commercial agencies it is stated that the Michigan and Ohio Plaster Company is "not a corporation, but a combination," that the "combine is managed by a representative from each concern interested," and that "the object of the company is to market the product of all the mills interested and divide the profits among them."

"Gypsum rock," continues the memorial of the Eastern manufacturers, "constitutes the raw material used as the basis for a very important industry, which has been built up under conditions of free importation and which conditions it would be ruinously unjust to change. When it is considered that gypsum rock used for land-plaster purposes sells for from 50 to 75 cents per ton on board at the Canadian quarries, and calcining rock sells for from 80 cents to $1.25 per ton on board at the same quarries, the injustice of placing a duty upon it becomes at once apparent. The land-plaster industry would be ruined to the great disadvantage of the farmers and small milling interests of the country, and a large part of the calcining business would also be destroyed, to the disadvantage of the owners of the mills and the thousand or more workmen employed in them. By the destruction of the one interest and a radical curtailment of the other, the already greatly depressed coastwise trade of the United States would be most seriously injured.

"It is to be noted that the great proportions to which the plaster business has attained in the West, according to the estimates of the petitioners in favor of a duty on the rock, have been attained under the existing conditions of free importation of Canadian rock, and the fact is patent that they have already, by their creditable enterprise, secured to themselves not only the market for land plaster and ordinary grades of calcined plaster throughout the West, which, a comparatively few years since, were supplied by Eastern manufacturers, but they are also selling their calcined plaster in Eastern markets even as far as the seaboard, where plaster not of the highest quality is required.

"To ask for a duty on the raw material of their Eastern rivals under these circumstances is manifestly unfair.

"First. They already have protection against the Eastern plaster manufacturers by the amount of the freight between Nova Scotia and the American ports (amounting to from $1.30 to $1.50 per ton) and the freight on the manufactured article from the seaboard to the Western cities, which, taken at the lowest rate prevailing during the season of open navigation, when Chicago, Milwaukee, Duluth, etc., can be reached by water routes, is not less than $2 per ton to Chicago, and has averaged for a number of years past even higher than that.

"Therefore the Western manufacturer has already a virtual protection in ocean and inland freights amounting to at least $3.30 per ton. When shipped by rail this protection is increased by $2 per ton additional freight, making $5.30 per ton during the season of closed navigation, which covers about five months of the year.

"There is an absolute loss in weight in the process of calcining plaster rock amounting to at least 25 per cent of the total weight, which fact affords an excess of protection to the Western plaster manufacturers against injury by their Eastern rivals.

"A duty on a pure article for the purpose of enhancing the value of an inferior substitute article and forcing its use upon that large class of consumers in the East that are reached by deep-water navigation is not protection, but amounts to tariff between States."

Mr. BUTLER. I should like to ask the Senator from Arkansas if this plaster is not used as a fertilizer?

Mr. JONES of Arkansas. Yes; and because it will increase the price of fertilizers is one of the reasons why I oppose it.

Mr. GEAR. I will say to the Senator from North Carolina that not more than 2 per cent of the plaster used in this country is used as a fertilizer.

Mr. BUTLER. In reply to the Senator from Iowa, I should like to know what reason there is for putting on the dutiable list fertilizers, which are certainly used to a great extent in Virginia and North and South Carolina, and in that portion of the country where it is necessary to use fertilizers.

If there is any reason for putting this on the dutiable list, I should like to know it. It has heretofore been on the free list. I have had a number of letters from manufacturers of fertilizers in regard to the imposition of this duty. Plaster is very largely used in the manufacture of fertilizers which are used in my section. I will ask the Senator from Iowa to permit this paragraph to be passed over. My colleague and I are both interested in the paragraph, and my colleague would like to be heard upon it.

Mr. ALLISON. Does the Senator desire to have the paragraph passed over until to-morrow morning?

Mr. BUTLER. Yes, sir.

Mr. ALLISON. I shall not object to the paragraph passing over until to-morrow morning.

The VICE-PRESIDENT. The Chair understands that paragraph 86 is to be passed over.

Mr. ALLISON. To be called up to-morrow morning.

The VICE-PRESIDENT. If there be no objection, it will be so ordered.

Mr. ALLISON. On page 80, in paragraph 278, I am instructed by the majority of the Committee on Finance, in line 4, to move to insert "three-fourths of."

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. On page 80, paragraph 278, line 4, after the word "tallow," it is proposed to insert "three-fourths of;" so as to read:

278. Tallow, three-fourths of 1 cent per pound; wool grease, including that known commercially as degras or brown wool grease, one-half of 1 cent per pound.

The amendment was agreed to.

Mr. TILLMAN. Mr. President, some days ago I gave notice of an amendment to the pending bill, and by consent of the Senator in charge of the bill, I wish to have that amendment taken up now and try to dispose of it this evening.

Mr. ALLISON. The Senator from South Carolina has appealed to me privately to allow his amendment to be voted upon this evening, because he is compelled to be absent from the Capitol during the remainder of the time to be devoted to the consideration of the pending bill. I shall not interpose any objection myself to the consideration of the amendment at this time if it be agreeable to the Senate.

Mr. JONES of Arkansas. What was done with paragraph 278?

Mr. ALLISON. That was agreed to.

Mr. VEST. We did not get rid of paragraph 278.

The VICE-PRESIDENT. Paragraph 278 is still open to amendment.

Mr. VEST. I want to call attention to that paragraph.

I understand that there has been a reduction made of one-fourth of a cent a pound, and whilst I am very grateful on behalf of the consumers for that reduction, still I think it is an enormous tax. This article under the existing law is on the free list. The comparative statement shows that in 1896 we exported $2,323,764 worth of tallow, and we imported in the same year $349,854.36. There is an enormous difference between $2,323,764 and $349,854.36. Why should that duty be put upon this article, an article of prime necessity? We have a great many applications on behalf of the soap manufacturers to allow the law to remain as it is.

I move, with the consent of the Senate, that both these duties, "three-fourths of a cent," in line 4, and "one-half of 1 cent," in line 6, be stricken out; or, rather, I will move that the entire paragraph be stricken out, in order that I may hereafter move to put tallow on the free list, where it is now.

The VICE-PRESIDENT. The Chair understands the Senator to move to strike out the entire paragraph.

Mr. VEST. I move to strike out paragraph 278, and I desire to move hereafter to put tallow on the free list.

The VICE-PRESIDENT. The question is on the motion of the Senator from Missouri to strike out paragraph 278.

The motion was rejected.

The VICE-PRESIDENT. The amendment proposed by the Senator from South Carolina [Mr. TILLMAN] will be stated.

The SECRETARY. It is proposed to insert as additional sections the following:

SEC. —. That there shall be collected a head tax of $100 on all immigrants coming to the United States by land or water.

SEC. —. That it shall be a misdemeanor, punishable by fine or imprisonment, for any alien who does not intend to become an American citizen, or who retains his citizenship in a foreign country, to enter the United States for the purpose of engaging in any mechanical trade or manual labor within the borders thereof: *Provided*, That this section and the one immediately preceding shall only remain of force until silver shall be admitted to our mints for coinage at the ratio of 16 to 1 on the same conditions with gold.

Mr. TILLMAN. Mr. President, this measure which I propose as an amendment is to some Senators, perhaps to most of them, a startling proposition, entirely foreign or contrary to all their inherited feelings, prejudices, and sentiments. We have a large, expansive country, many hundreds of thousands of square miles which are undeveloped, lands which would afford homes for millions, yea, hundreds of millions, because our territory will in time,

when it is densely populated, come to hold as many people as Europe; and the idea of excluding immigrants from coming to our shores, or of limiting immigration, is one that has always been obnoxious to the American people, and in fact it has never been broached with any seriousness until within the recent past.

The Senate last winter, and also the House of Representatives, passed a bill restricting immigration along the lines of intelligence; that is, forbidding immigrants to come in who could not read or write their own language or the English language, showing that they had been educated to some extent. This amendment offered by me proposes to put a value upon American citizenship, to show how much it is worth to become an American freeman.

Mr. CHANDLER. To sell American citizenship for a hundred dollars.

Mr. TILLMAN. If the Senator, who is so anxious to get into a colloquy, will wait, I will try to accommodate him before I get through.

It is a question whether we will sell or put a value upon it, and let those who are able to pay that value buy it. At all events, it is the essence of protection, and that is what the Senator from New Hampshire claims to be—a protectionist; it is the quintessence of protection to American labor; and you stand here, and the Republican party stands here, as the champion of American labor against the pauper labor of Europe. You erect a barrier against the products of the pauper labor of Europe, and you allow the pauper labor of Europe to come here and compete in our markets until you have to-day perhaps a half million of men tramping the streets of the Northern cities without bread, begging for work.

The question is, Will you carry out your platform in any degree, in any pretense of fairness as to its construction, and give that protection to those who have already come to our shores which alone will enable them to obtain work for the next few years, and that is, by stopping the supply of labor? For every man now tramping the streets you wish to add another man. If you do not do something to stop it, you continue to pour into the supply of labor additional laborers, while you limit and harass and hamper and tie up the conditions which would allow the country to grow and expand in a natural way.

The Republican platform, adopted last year, on this subject reads as follows:

> For the protection of the quality of our American citizenship and of the wages of our workingmen against the fatal competition of low-priced labor, we demand that the immigration laws be thoroughly enforced, and so extended as to exclude from entrance to the United States those who can neither read nor write.

The Democratic platform has this plank in it:

> We hold that the most efficient way of protecting American labor is to prevent the importation of foreign pauper labor to compete with it in the home market, and that the value of the home market to our American farmers and artisans is greatly reduced by a vicious monetary system, which depresses the prices of their products below the cost of production, and thus deprives them of the means of purchasing the products of our home manufactories.
>
> And as labor creates the wealth of a country, we demand the passage of such laws as may be necessary in order to protect it in all its rights.

In the Fifty-third Congress a leading Democratic member of the House of Representatives declared that platforms were made to get into power with, but not to carry out in good faith. I propose to ask that the Senate go on record on this amendment as to whether these two platforms were made to get into office or only made to get votes and deceive the people. The Democrats will perhaps cavil and dispute as to whether this is a correct interpretation of our platform.

What is a pauper? If you go out in the streets of this country in our cities and come across a man with a hundred dollars you will say that he is rich. So he is rich to-day in comparison with the thousands and hundreds of thousands who are out of work; but if you turn a stranger loose in New York City from abroad with only $100 and with no likelihood of getting work unless he pushes some other man out of a job at a reduced price, you can characterize and classify such a man as nothing but a pauper. It is a question of the definition of "pauper."

If an immigrant coming to our shores with only $100 is not a pauper, he soon will be, and if you will listen to the statistics which I shall present to you, you will find that your jails, your asylums, and your penitentiaries are to-day filled with this very class of men who have been admitted to our shores without any practical limitation.

I am simply asking you, my Republican friends, and asking the Democrats, to vote here to give some value to American citizenship, and as you stand here pretending that you value it, that you want to hold it up, that you want to maintain the price for it, that you do not want it to sink to the level of the pauper labor of Europe, it remains to be seen whether you will continue to allow the stream of a quarter of a million annually to pour into the American labor market, competing directly with our own people and with those foreigners who have preceded them for the work that is to be had, when there is no work here under the conditions that exist.

If you are honest protectionists and want to protect labor, you can not help but vote for this measure or something akin to it. The mere pretense that you will restrict immigration to those who can only read and write is not sufficient, and will not go down with American laborers. It is not a question of being able to read and write; it is whether you can handle brick and mortar and whether you can go into a factory or not. Thousands and tens of thousands of these ignorant and degraded foreigners who have come to our shores and debauch our suffrage were the main instrumentality of carrying the last Presidential election. I stood in the city of Chicago on the day of the election, and saw hundreds and thousands of them stand there waiting to be bought. These are the men who have brought this country to the verge of ruin, both from a business standpoint and from a political standpoint.

An examination of the records kept by the Government shows that since 1820 about 18,000,000 foreigners have come to America. These people have helped to develop America and make it what it is. Many of them constitute the very highest class of citizenship which we have. I have nothing against a foreigner because he was born in Europe. All of our ancestors came from Europe at some time, if you go back one century or two, and it is only a question of how long you have been here when you come to test us by that standard. But the question now is, Can we afford to allow this continual inpouring of a corrupt and debased element that is lowering the standard of labor, lowering the standard of wages, debauching the suffrage, and doing everything that is contrary to good order and morals?

Pennsylvania, where perhaps as much misery exists as in any other State in this Union, seems to have been the depot where most of these people have congregated, or at least a large percentage of them. I have been in the coal mines of that State, and I have seen there more misery and less manhood, less opportunity for manhood, than ever existed on a Southern farm before the war when the black slave was sold as a chattel; and to-day's paper brings the report that a strike has been ordered involving the entire coal region of five States, embracing 125,000 men, who are demanding an increase of wages in order to be able to live and give bread to their families.

The Pennsylvania legislature have had this question under consideration and been examining it, and the result of their investigation is a law passed by the last assembly and approved, to go into effect on the 1st of July, by which that Commonwealth levies a tax of 3 cents a day on every alien at work within its borders. I have here a notice clipped from one of the Philadelphia papers giving the details of the legislation and how the tax is to be collected. I will not consume the time of the Senate by having it read. I merely state the substance of it, and nobody will dispute the accuracy of my statement. I therefore send it to the desk and ask to have it incorporated in the RECORD.

THE TAX ON ALIENS TAKES EFFECT JULY 1—FOREIGNERS MUST THEREAFTER PAY 3 CENTS PER DAY TO THE STATE—EMPLOYERS RESPONSIBLE—THEY MUST KEEP AN ACCURATE RECORD, DEDUCT THE TAX FROM THE WAGES, AND ACCOUNT TO THE COUNTY COMMISSIONERS.

Contractors, manufacturers, and officials of corporations throughout this city and State are much exercised over the passage of the bill by the legislature a few days ago which imposes a tax of 3 cents per day on the male aliens employed in all parts of the Commonwealth, such tax being required to be deducted from the salary of such laborers by their employers and turned over to the county treasury. As the bill has been signed by the governor, it has now become a law, and is to go into effect on July 1.

The law makes it compulsory on the part of employers to ascertain whether any of their male employees over 21 years of age are unnaturalized, and to keep a record of the number of days such persons are employed each month, subject to examination by the county commissioners. Such employers must make a quarterly report on the 1st day of January, April, July, and October each year to the county commissioners of the county in which employment is given, and on failure to so report shall be fined from $200 to $1,000. Blanks are to be furnished by the commissioners.

From the statistics available through the reports of the Commissioners of Immigration, the various consuls, and the census for some years back it is estimated that there are more than 100,000 aliens working in Pennsylvania, a large number of whom are to be found in the mills of Kensington, Manayunk, and the other suburban districts of this city. Of course the majority of the alien population of the State is located in the mining regions of the Wyoming, Hazelton, and Schuylkill coal fields, where, it is said, nine-tenths of the miners never become naturalized.

The bill is also to protect the State against such skilled laborers as those coming from England and, after working during the summer months, return to spend the winter at home. These men are bricklayers, painters, carpenters, and others employed out-of-doors. It is estimated that they receive almost as much for one day's work in America at these trades as they would for a week's labor abroad, and can thus afford to go back and forth at will, at the same time saving money and not paying anything for the privilege of carrying on their vocation on this side of the water. Such persons as these will, no doubt, cause the contractors and builders a considerable amount of trouble under the new régime, but as the object of the bill is to favor the employment of American labor, it is thought that many of the foreigners will, on account of the additional bother necessary in rendering a report of their services to the State, be completely frozen out.

Manufacturers are beginning to wonder how they will arrive at the number of aliens in their employ, and are realizing that it will necessitate an outlay which would not be requisite should they restrict the nationality of their laborers to Americans exclusively.

For some time past the city contractors have been compelled, through an

ordinance of councils, to employ only Americans, and are fined $5 for the violation of the act. Director of Public Works Thompson said yesterday afternoon that there are now to his knowledge no aliens at work on city improvements, and added that whenever he heard that such were being employed he at once served notice on the contractors to have such persons discharged at once.

"So far," he continued, "we have had no trouble in enforcing this law, and now that the State has placed a tax on the foreigners, and also provided a fine for the nonaction of their employers in collecting the same, there is little doubt but that the Americans will have a considerably better show."

The tax of 3 cents per day for three hundred days in the year would amount to $9 each head, and would probably yield a million dollars. One-half of the revenue is to go to the schools, and the balance to defray the general expenses of the county.

The federated workers have had the question of immigration under discussion for some years, and after long cogitation, because most of them, or at least a great number of them, are foreigners themselves, and they weigh what they do when they ask that restriction be placed upon immigration—they have within the past week, through a referendum vote in the State of New York, in which upward of 100,000 men participated, by an almost unanimous vote, asked that immigration be restricted absolutely for five years, showing that they realize that the supply of labor exceeds the demand, that the opportunity to get work does not exist under present conditions, and that they see nothing ahead of them but suffering and misery, unless you cut off this continual inpouring of foreign labor to compete with American labor. I will send up this statement and ask that it may be printed in the RECORD. The head lines are as follows:

No immigration for five years—State Federation of Labor's drastic recommendation—Wants Congress to act—Resolutions favoring a long suspension of entry indorsed by 98,000 wage workers.

The resolutions referred to are as follows:

TO SUSPEND IMMIGRATION.

Whereas the repeated abuses of this country's very liberal immigration policy, the regular evasion of laws extending generous privileges and opportunities to the oppressed of all nations, and the increasing degradation and displacement of American workmen by the importation and employment upon our public works of cheap labor from foreign lands, have opened the eyes of our wage earners to the fact that a system of protection which operates merely to exclude a few foreign products, while attracting and admitting hordes of foreign producers, is a curse instead of a blessing to home industry: Therefore,

Be it resolved, By this convention, representing 98,000 trade unionists of New York State—and thus voicing the suppressed appeal of 2,000,000 unemployed but willing workers throughout the United States—that we recommend to Congress the enactment of a Federal law suspending immigration for a period of five years, and until such further time as the domestic demand for labor shall have overtaken the supply.

And be it further resolved, That steps be taken to notify the workers of the world that we believe the interests of international brotherhood demand this action for the good of all concerned.—*Resolutions adopted at the convention of the State board of the American Federation of Labor, and now indorsed by a referendum vote of 98,000 workers.*

Mr. TILLMAN. No doubt three-fourths of them voted the Republican ticket. You promised them protection for American labor by your tariff. Now, incorporate in that tariff a provision which will protect them by keeping their competitors at home in Europe instead of only levying tariff duties on the articles which that labor produces abroad. What is the difference between the pauper labor of Europe transported to America and the pauper labor of Europe in Europe? You are sinking your labor to the level of the labor of Europe by allowing free trade in labor where you demand protection against the products of foreign labor. You can not deny the proposition or the honesty or truth of it.

My friend the Senator from New Hampshire [Mr. CHANDLER], who is smiling so complacently and derisively, will undoubtedly controvert some of the positions I take. I want to call his attention to a few facts taken at random from different official reports, some from his own reports, some from the Senator from Massachusetts [Mr. LODGE], some from the report of the legislative committee of Pennsylvania which recently visited the coal mines of the anthracite region and the coal mines of the bituminous region. Here is what the legislative committee says in its report, just printed:

Sixty per cent and more of miners in the district have been drawn from the lowest ranks of the laboring classes of the Old World, and who come here without any knowledge whatever of our Government, its institutions, or its people. They congregate in these mining communities in such large numbers as to enable them to retain their language, their manners, their customs, and even their laws; they make little attempt to become, and as a rule do not become, Americanized, apparently have no desire to become assimilated with our body politic or life, crowd themselves into miserable dwellings or abodes, in many cases living worse than beasts, and by their practices become a menace to the lives, health, and safety of the community in which they live.

Your committee found the homes or abodes of the miners at many of the mines in a very filthy and untenantable condition, the miners being herded together like cattle and in many cases wallowing in their own filth, breeding disease and affecting not only their own health, but that of the community in which they live, their condition being a rebuke to our civilization and a disgrace to our State, degenerating and debasing American labor and helping to drag it to their own low level, making their condition one of chronic servitude and depravity, and in many cases enabling their employer to pay them but little for their services or whatsoever he feels disposed.

That is in Pennsylvania, thirty years after your boasted emancipation of the black slaves. Here is a statement of the same committee:

The small percentage of American and English-speaking laborers who find employment in the mines as a general rule are an intelligent, industrious, and frugal class of people, willing to work, and as a rule seeking it, but, on account of the large percentage of foreign labor above referred to, are unable to find employment therein or to ameliorate their condition.

Then the committee go on to say that the products of those mines running at full time would be 30,000,000 tons, while the demand is for only 15,000,000 tons, and they state further that therefore those men for years have been able to get only two and a half or three days' work a week, while they are compelled to remain idle the balance of the time; and yet you do not want to protect American labor by keeping out competitors. Perhaps they will keep on voting the Republican ticket; and if they do, so help me God, I hope they will not get relief, for you have only been giving them lip service for years.

Mr. QUAY. I desire to call the attention of the Senator from South Carolina to the fact that the report he is reading from is the report of a Republican committee; that the act of the assembly which he has had incorporated in the RECORD is the act of a Republican legislature, and was signed by a Republican governor.

Mr. TILLMAN. And I am asking a Republican Congress to go a little further and give some actual protection by keeping out their competitors from abroad. Will you do it? Dare you do it? Or will you only give them lip service at 3 cents a day as a tax levied on their competitors?

There are so many iniquities disclosed here as to the methods of the coal barons and the railroads in dealing with these people that it would be good reading to give it all to you, but I can only pick out at random an occasional instance of the infamies that are practiced. I am not dealing with that special subject, however, and prefer to go on and present the facts as to why these people ask you to protect them by restricting immigration and giving the country time to absorb and assimilate this vast inpouring of millions of foreigners who have come here so rapidly that we have not been able to Americanize them or give them work.

The surplus labor in and about the anthracite mines contributes largely to the present condition of affairs. After the strike of 1875 the influx of foreign immigration began and has continued with but little interruption to the present time. While the country has always encouraged foreign immigration, yet since the time mentioned a class of foreigners have been coming in to which particular objection is made on the part of those employed in the anthracite mining regions, namely, the Poles, Hungarians, Italians, and Slavs.

I believe my friend the Senator from Minnesota called that Slav. I will leave off the "e" in the last word I read for his benefit, because I do not want to insult his cultured ear or bring up unpleasant reminiscences or recollections or sentiments in connection with the word "slave."

Mr. NELSON. There is no trouble about "the Senator from Minnesota." He will always take care of himself.

Mr. TILLMAN. I do not doubt that.

At first doubtless they were all employed as laborers, but gradually they became miners, and in many instances the former employer was confronted by his foreign laborer as a rival for his own position. It is claimed that this class of people are un-American in every way, adopting none of our ideas of citizenship and living in a manner unknown to us as a people. In most cases their objects and aims are to secure sufficient to enable them to return to their native lands or to assist in bringing other of their kin to this country. Unless a change is speedily made, the time is not far distant when the miners of the anthracite region will be composed entirely of these people to whom they now strenuously object. Such a condition of affairs is not conducive to safety in the mines. Non-English speaking superintendents and foremen must necessarily produce trouble and render the mine more liable to accidents. The committee has referred to the undesirability of this class of people. Their un-American ideas are further shown by the fact that every month large sums of money, representing their surplus earnings, are sent to their native lands.

Now, here is another extract from one of the Pennsylvania papers, in which Chairman Focht, of the joint legislative committee appointed to investigate the number of aliens in State institutions, presented his report to the house of representatives. It is too long for me to read. The substance of it, however, is that foreign countries make a business of gathering up their paupers and criminals and their other undesirable classes of citizens and shipping them here, and that our laws do not stop them and keep them out; consequently, that the charitable institutions of Pennsylvania today are overburdened to the extent that one-half of their inmates are foreign born, and the American farmers and others are compelled to support those institutions for the benefit of the paupers who have been admitted here under our immigration laws.

I will ask that this clipping be inserted in the RECORD. I do not know that anybody will ever read it, and I do not care whether they do or not. Like a good many other things that go into the RECORD, it may never be read.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). Without objection, the article will be printed in the RECORD.

The article is as follows:

UNWELCOME ALIENS—MOVE TO RID THE STATE OF AN INCUMBRANCE—FOREIGNERS TOO PLENTY.

Chairman B. K. Focht, of the joint legislative committee appointed to investigate as to the number of aliens in State institutions, will present his report in the house to-day. This committee has been busy for a year and a half, assisted in its work by the patriotic organizations throughout Pennsylvania. Personal visits have been made to the institutions supported in part

or whole by the State. The cost of the inquiry was about $3,000, which was provided for at the last session.

The committee's report says in part:

"The evils complained of that led to the framing of the resolution authorizing this investigation have grown out of the too liberal immigration laws of the country. In later years they have invited, in many cases, no longer the thrifty European, who at once became self-sustaining and a good citizen, but many of the degraded and ignorant of the Slavonic countries. These have not only been a menace to American workingmen, unbalancing the equilibrium that previously existed between employer and employee, but the burden put upon the taxpayer for the support of these unnaturalized foreigners has become unbearable, and there is need of quick action lest the great charities that have been furnished through the Christian benevolence of the people of Pennsylvania be in large part diverted to the support of a purely alien class, instead of relieving the distress of American citizens and former taxpayers.

"It is a fact, confirmed by statistics, that the extent of immigration to our shores during given years or periods depends upon business prosperity, showing how impossible it is for years of prosperity to extend over long periods, since, as soon as there is a demand for our products, the tide of immigration turns to our country and the demands for labor are quickly filled, wages go down, and then follows complaint of hard times.

"This is particularly hurtful to Pennsylvania and the Eastern States, for, while the West has received many immigrants, who were quickly absorbed on account of the vast stretches of unsettled country, in the East American labor is confronted with the necessity of surrendering a fraction of its employment to the newly arrived immigrants, who have swarmed here like diseased matter from a body politic, or sending them to our public institutions to be supported by the State.

"Foreign countries have made it a business to gather up the mentally and physically weak—those likely to become a public burden—and have shipped them to the United States, paying their ocean passage, and here they quickly become objects of public bounty."

The committee's records are as nearly accurate as such information can be, when it is considered that the work of ascertaining these facts was done among a class who not only in many instances have unpronounceable names, but who speak a foreign tongue. And it is fair to assume that the percentage of burden borne by the State and counties is in excess of the numbers and amount ascertained by the committee.

"Fearing the refusal of admittance, many claimed citizenship who never were naturalized, while, where records were not kept, hundreds were left out, and the extent to which they were a burden upon the public must be approximated. It is the belief of the committee that, while our report shows that the number of inmates exceeds 20,000, necessitating an expenditure of over $1,000,000 per annum, as the sum-total cost to the State and counties for the maintenance, it is our conviction, from observation and investigation, that the amount is in excess of $1,500,000, and is yearly increasing.

"Our correspondence with the officials of every State in the country discloses the fact that everywhere the people are awake to this issue, and are considering means of relief.

"Minnesota has just passed a law providing for the removal of aliens into other States and to other countries where they belong. Massachusetts long ago began to battle with the question, and a law on the statute books enables the authorities to remove alien paupers and alien insane to other States and other countries.

"To meet and remedy the evil which exists in Pennsylvania, and which is universally deplored, we have drawn a bill which is now on the house calendar. It is modeled after the laws of other States where the plan has worked successfully, but so as to entirely conform to not only the constitution of the State but to humanitarian usages. We are confident that if this bill becomes a law the Commonwealth will be saved millions of dollars, the standard of citizenship elevated, our congested public institutions relieved, and a higher incentive to acquire the requisite qualifications of citizenship presented to those who truly and honestly come to our shores to seek freedom and become a law-abiding, industrious part of the body politic."

Mr. TILLMAN. The only thing I am solicitous about getting in the RECORD is how Senators are going to vote on the amendment.

I have a table, copied from a Government publication, the Abstract of Statistics, giving the total immigration by nationalities for the last seventy-six years. I ask that it also may be inserted in the RECORD.

The PRESIDING OFFICER. Without objection, the table will be inserted in the RECORD.

The table is as follows:

No. 1.—*Total immigration to the United States during each fiscal year since 1819.*

Year.	Number of immigrants.	Year.	Number of immigrants.	Year.	Number of immigrants.
1820	8,385	1847	234,968	1874	313,339
1821	9,127	1848	226,527	1875	227,498
1822	6,911	1849	297,024	1876	169,986
1823	6,354	1850	369,980	1877	141,857
1824	7,912	1851	379,466	1878	138,469
1825	10,199	1852	371,603	1879	177,826
1826	10,837	1853	368,645	1880	457,257
1827	18,875	1854	427,833	1881	669,431
1828	27,382	1855	200,887	1882	788,992
1829	22,520	1856	195,857	1883	603,322
1830	23,322	1857	246,945	1884	518,592
1831	22,633	1858	119,501	1885	395,346

Total		18,022,785

No. 4.—*Population of the United States in 1890.*

Total population	62,622,250
Native born	53,372,703
Foreign born	9,249,547
Native born, both parents foreign	8,085,019
Native born, one parent foreign	3,418,656
Foreign born and of foreign parentage	20,753,222
Native of foreign parentage	11,503,675
Total immigration, 1820-1895	18,022,785

Mr. TILLMAN. In the report of the Commissioner of Labor for 1894, page 44, it appears that the proportion of those of foreign birth to the total population in the slums in Baltimore was 77 per cent, in Chicago 90 per cent, in New York 95 per cent, and in Philadelphia 91 per cent. It also appears from the same report that of every 100 aliens, 40 were illiterates in the slums of Baltimore, 47 in Chicago, 59 in New York, and 51 in Philadelphia; and that of every 100 of these illiterate aliens there were 67 males of voting age in Baltimore, 77 in Chicago, 78 in New York, and 85 in Philadelphia.

An analysis of the destination of the immigrants for the last three years shows that over one-half of all the immigrants to this

country have settled in the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, and Pennsylvania (North Atlantic division).

In 1895, 65 per cent of our immigration settled in three States, namely, Massachusetts, New York, and Pennsylvania, and 53.40 per cent settled in New York and Pennsylvania.

So you see how you got your big Republican majority last year in the States named, and it is easy to see that there is too much labor being imported, and that something ought to be done.

By the last census, 26 per cent of the white prisoners confined in jails are persons of foreign birth. The total number of convicts in our penitentiaries whose birthplace is known is 28,440, composed of 13,715 native born and 14,725 foreign born, showing more than one-half of all our white convicts to be of foreign birth. Our charitable institutions contained 69,962 inmates, of which 24 per cent was of foreign birth. Our poorhouses contained 53,696, of which number 27,648 were born in foreign countries, or a little over 51 per cent.

In a report made to the House in the second session of the Fiftieth Congress by Mr. Ford, from the Select Committee on Investigation of Foreign Immigration, we find the testimony of Dr. Hoyt, for twenty years connected with the board of charities and corrections in the city of New York. Here is what he said:

> That every charitable institution in the State of New York is now not only filled with occupants, but overflowing, and that the State annually expends in taking care of paupers, insane persons, etc., $20,000,000, and that this condition of affairs is largely due to improper immigration.

Free trade in labor, high protective tariff on the products of labor! I want to know how much longer you Republicans are going to be able to fool these poor devils and get them to vote your way.

Fifteen years ago 90 per cent of the people engaged in the manufacture of cigars in the city of New York were American citizens. To-day over 90 per cent are foreigners. The Americans have been driven out. The wages were then fifteen and twenty dollars a week, and now four and eight dollars per week.

Now I come to the kind of law you have on the statute books, by which you intend or endeavor honestly to keep out undesirable citizens. That is the contract-labor law and the law prohibiting the introduction into our country of paupers and insane persons and others of the lowest and the dirtiest and meanest of men.

What have been the statistics as to these classes? I find from an examination that the number of alien contract laborers returned to the countries whence they came from March 1, 1889, to March 31, 1894, was 2,887, whereas the total number of immigrants from 1889 to 1894 was 2,985,000.

In 1894, when our immigration amounted to 314,467, the following were returned under that law: Contract laborers, 461; those designated as a public charge, 427; convicts, 1, and diseased persons, 2, thus showing a return of only 891.

The percentage of those which our system has been able to catch and return has been so infinitesimal that it is not worth talking about. We have absolutely let in everybody who was shipped here. The laws which we have are not worth the paper on which they are written, so far as restricting and keeping out undesirable immigrants is concerned.

Now, Mr. President, I thank God I can say it, for it is the truth, that to-day in the Southern States the man who wants to get work can find it. There are no hungry people there who can not get something to eat. We are the section which has been robbed by the policy of protection to American labor, but to-day the only place in America where every man can get something to eat, if he is willing to work, is south of Mason and Dixon's line. Therefore there is nothing in this for my section except to purify, elevate, and lift up the general standard of American citizenship, and to give us a voting population in the near future, after they shall have been educated to know the duties and rights of American citizens, so that we can have a better Government and happier country than we have.

We are face to face with conditions that are appalling to every student of history. There are to-day unemployed in these vast aggregations of Northern cities, where the millions "nose each other like flocks of sheep," hundreds of thousands of foreigners and other desperate men who are calculating and thinking and talking sedition. They are wondering how much longer they can endure the pangs of hunger and how much longer they will have to suck the dry husks of protection and gold monometallism as the only means that will give them relief. They voted for it. They do not deserve any pity.

But nevertheless you in honesty ought to reach out your hand and say, "We will give you this protective tariff just as fast as we can, and we are hurrying it as fast as possible, but in the meantime we will protect you in the most effectual way we can by shutting down the floodgate which is letting into this country every month fifteen or twenty thousand competitors, who enter with you into the market and ask for the work which you ought to have when there is not enough work to go round." Instead of the condition of affairs which ought to exist, and which existed until the recent past, in which every man who had a job found it difficult to find a man to take his job, there are two, three, or five men hunting for every job that exists, and if you continue to allow people to be poured in, fail to check the inroad of Goths and Vandals and Huns—to use the simile of those who destroyed the Roman Empire—I tell you that you are laying up a day of wrath when these people will turn and rend and burn you in your own palaces.

It is just as certain as that Paris was burned by a mob of the commune in 1871; it is just as certain as fate, unless you do something to relieve and stop this cancerous ulcer, that the country is to be thrown into the throes of revolution and bloodshed and fire by this very class you have allowed to pour in here.

I have a great many facts here bearing on this question which I will not present. The Senate is impatient to move on in its blindness, in its desire and effort to give protection to American labor by erecting a wall around America and leaving the flood gates open, so that the workmen of foreign countries are perpetually crawling and coming through the door to compete with those who have come in ahead, and to compete with native-born Americans.

I ask, however, leave to insert two letters, with the accompanying tables referred to, as showing the condition of affairs in the anthracite coal region of Pennsylvania. They are from a prominent attorney of Pottsville, who has been a Republican all his life, but who supported the Chicago platform and its nominee in the last campaign:

POTTSVILLE, PA., *June 22, 1897.*

DEAR SENATOR: I inclose you an article headed "Interesting tables." Mr. R. C. Luther, general manager of the Reading Coal and Iron Company, furnished the data for this table under oath before the legislative committee. You will notice 35½ per cent of the employees of the Reading Coal and Iron Company in and around their mines are Poles and Huns for the month of October, 1896. You will further notice that there are only 27 per cent of the employees Poles and Huns in and about their mines in 1892. The Reading employees are 20 per cent of the total number in the anthracite fields.

This is the most definite and accurate information you can get on this subject. The same proportion of Poles and Huns are employed throughout the entire anthracite fields in Pennsylvania, and the average would be the same for the entire number employed in the anthracite fields. Some individual operators employ a larger proportion of Poles and Huns, and some a much smaller proportion, but an average of the whole field would be what is shown in this sworn statement of Mr. Luther.

The legislative committee filed their report on the 14th of June. This extract is from the Pottsville Daily Republican of June 16. I also inclose you an extract from the report of the chairman of the legislative committee to make an investigation of the foreigners in our penal and charitable institutions. I will during the day receive from Mr. Brower a report as to our jail, of which he is warden, and send that. The most astonishing thing in regard to our foreign emigration is the number of them that are getting into our charitable and penal institutions. They crowd our almshouses and our jails. If there was no reason other than that, this hundred-dollar tax should be imposed upon these foreigners.

The work ahead of you may seem beset with almost insurmountable difficulties, but Garretson had to meet more determined and better fortified opposition when he undertook the fight against slavery.

The great majority of our people are getting but a bare existence. It is painful to hear of the poverty and depression. I just had a talk with a traveling man who has spent six weeks in western Ohio, Illinois, and Iowa, and he tells me that a worse condition prevails there than here. It seems hard to realize.

Yours, sincerely,

WM. WILHELM.

Senator B. R. TILLMAN,
Washington, D. C.

—

POTTSVILLE, PA., *June 26, 1897.*

DEAR SENATOR: I inclose you a statement received from the warden of our prison. He tells me that the percentage of Poles and Huns that were committed to the prison is much larger than appears according to the inclosed statement, but all young Poles and Huns born in this country are classed as Americans, although, to all intents and purposes, they are not Americans. The Polish and Hungarian population of this county is only 15 per cent of the total population, although you see that the foreign-born Poles and Huns constitute over 44 per cent of the jail commitments for the year 1896. A still larger percentage of these Poles and Huns are found in our poorhouse.

Yours, sincerely,

WM. WILHELM.

Senator B. R. TILLMAN,
Washington, D. C.

—

POTTSVILLE, PA., *June 26, 1897.*

DEAR SIR: In regard to your inquiry as to the Poles and Huns committed during the year 1896, I find the record shows the following:

Total commitments to Schuylkill County prison, 1896	1,135
Number of Poles	386
Number of Hungarians	114
Total of Poles and Huns	500

Of the 1,135 committed during the year 1896, there was 42½ per cent American born, 57½ per cent foreign born.

I give you this statement in lieu of any published statement with reference to the Poles and Huns, as at the present time we are not making up any published reports.

Yours, truly,

C. W. BROWER, *Warden.*

WILLIAM WILHELM, Esq.,
Pottsville, Pa.

INTERESTING TABLES CONNECTED WITH THE REPORT OF THE LEGISLATIVE MINING COMMITTEE.

During the month of October, 1896, when the collieries were in full operation, a register of all the employees in the mining department was prepared, and the following is a condensed statement of the same:

Occupation.	Total employees.	Parentage.									Foreign born.	Married.
		American.	English.	Irish.	German.	Scotch.	Welsh.	Polish.	Hungarian.	Italian.		
INSIDE LABOR.

These letters show most conclusively the necessity for prompt and vigorous action by Congress. In a report presented to the Senate by Mr. CHANDLER, from the Committee on Immigration, at the first session of the Fifty-first Congress, No. 1095, we find that Edmund Stephenson, on April 11, 1890, in the course of his examination, testified as follows:

My experience in Castle Garden is that hundreds and thousands of skilled mechanics, stonecutters, stone-masons, glass blowers, locomotive engineers, come regularly to this country every spring, year after year, and stay here until about November. They pay no taxes for our schools; they perform no jury duty, nor are they liable to; they do not perform any of the duties of citizenship except the protection they get from the city, the State, wherever they reside.

During all the working season they are sending their money back home to their wives, their children, their parents, and at the end of the working season they pack their gripsacks and go back to Europe, spend the winter, and the next year come back here again, and repeat the same thing over and over again. They come into direct competition with American labor. They drive out American labor by their coming here, skilled workmen that they are, and they generally work under the price of American labor. But they earn much more money here, and they can afford to go back there and live a few months until the working season, and then come back here. I regard that, gentlemen, as infinitely worse than contract labor.

Q. (By the chairman.) How would you correct it?

A. I would put a tax upon every man who came here as I would upon every foreign production that is imported into this country. I would collect it like the internal-revenue taxes. I would put every employee under oath, and learn from the employer whether he came here to be a citizen or not. That is the way to do it.

Q. (By Mr. Lehlbach.) Would you tax every man that is not a citizen?

A. That comes in that way, yes, sir. Every man that takes his money back, or sends it back, never brings his family or intends to do that.

The Democratic party stands committed to protect this country against pauper labor by prohibiting its importation. It is a question with my Democratic colleagues whether this condition shall be brought about. The Republican party is committed to the protection of American labor at any and at all times, but especially to protect it by prohibiting the illiterate from coming in. The $100 which I ask you to put here is a very small bonus for a man to pay for the privilege of coming into this great country and becoming a citizen, with the right to have the tender nursing of that mother of American industries, the Republican party. It is a very small amount to charge. The question is, Can you afford not to charge it, under the circumstances?

Now I will let my friend from New Hampshire, who has been enjoying himself in anticipation of the meal he is going to make off of me and my amendment, come in and explain why it is that he will not vote for it.

Mr. CHANDLER. Mr. President, nothing would give me greater pleasure than to devour the incisive and inconsistent Senator from South Carolina. But I am afraid I shall not have the pleasure of making a final meal of him to-day.

The Senator has well stated the evils of indiscriminate immigration into this country. I agree, I am happy to say to him, with every word he has said in reference to those evils. Everything that can be done by law and by good administration to keep out bad, degraded, injurious immigrants should be done. Two very good laws within the last ten years restricting immigration have been placed upon the statute book of this country. They are good laws of administration, and they have been well enforced by officials, Republican and Democratic.

Under the chairmanship of the junior Senator from Massachusetts [Mr. LODGE] at the last session of Congress, a new restrictive bill was passed which provided that no immigrants should come into this country unless they could read and write either their own language or the English language. That law, as all Senators will remember, passed both Houses of Congress by an overwhelming majority. It would have been of immense service in overcoming the evils which the Senator from South Carolina has described. Will the Senator from South Carolina, who has brought politics into this discussion, kindly tell me why that is not a law upon the statute book to-day?

Mr. TILLMAN. Because a so-called Democratic, but in acts a Republican, President, Grover Cleveland, vetoed it. [Laughter.]

Mr. CHANDLER. If I required a justification for devouring the Senator from South Carolina if I could, I certainly, in the eyes of the whole world, should receive it when he attributes the responsibility of Grover Cleveland to the Republican party.

Mr. President, a Democratic President stopped that bill, a President for whom the Senator from South Carolina voted, and for which may he ask to be forgiven before high Heaven.

Mr. TILLMAN. I hope to be forgiven for what I did. I will never do it any more.

Mr. CHANDLER. But it was the President of the Senator from South Carolina, and not a Republican President, who put the barrier in the way of restriction upon immigration by vetoing the measure that was enacted by the last Congress. Under those circumstances the Senator, before criticising the Republican party for any assumed unwillingness on its part to restrict immigration, should have turned the tines of his pitchfork against Grover Cleveland, who is not yet dead, and should have disemboweled him, if possible, leaving the Republican party to some future day.

Mr. President, so much by way of responding to the genial and gentle badinage of the Senator from South Carolina. A few words as to the merits of the question. I will join, this side of the House will join, the Senator from South Carolina in passing any wise, stringent bill for the restriction of immigration. If this session continues long enough, after passing the tariff bill and the bill allowing the State of South Carolina to do what it pleases with all the spirituous liquor that wicked Northerners and conspiring Southerners may take into the borders of that State, the Senator will have an opportunity to vote to pass over again the bill which President Cleveland vetoed, and which required that foreigners coming to this country should be able to read and write.

That would be a wise law; and if the Senator from South Carolina can discover any other restrictive law that will be beneficial and will preserve the purity of American citizenship, and will preserve American labor for American laborers, no doubt he will find many more Senators on this side of the Chamber willing to vote for it than upon the other side of the Chamber, although in saying that I make no imputation upon the Democratic side of the Chamber, because Democrats and Republicans alike concurred in the overwhelming majorities by which the bill was passed which a Democratic President vetoed.

But, Mr. President, I am obliged to say that I am not in favor of a hundred-dollar head tax as a means of restricting immigration. My point is a simple one. It has been made before in this Chamber. There have been differences of opinion on the subject, but the prevailing opinion I believe to be that which I express, that while it might be wise and proper to impose a head tax to keep out an improper immigrant, it is very unwise to take money out of the pockets of an immigrant who comes here. If we can have a head tax so high that no immigrant can come, in other words, if we can have a prohibitive tax upon immigrants, that is all very well. The direct method——

Mr. TILLMAN. Will the Senator allow me right there?

Mr. CHANDLER. The direct method would be to suspend immigration entirely for a certain period.

Mr. TILLMAN. Do you deny that there are many articles in this tariff bill upon which there is a prohibitive duty and that there will be absolutely no importations under the provisions?

Mr. CHANDLER. I understand that in all the duties in the bill, from the duty on cotton to the duty on cotton ties, it is a revenue measure.

Mr. TILLMAN. The Senator from Missouri, then, has labored in vain in trying to convince us to the contrary.

Mr. CHANDLER. They are all designed to fill up a Treasury that has been emptied under the Administration of the President of the Senator from South Carolina.

Mr. TILLMAN. Will the Senator allow me right there?

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from South Carolina?

Mr. CHANDLER. I am afraid the Senator will——

Mr. TILLMAN. I insist. I want to put myself straight in regard to Grover Cleveland.

Mr. CHANDLER. The Senator will either——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from South Carolina?

Mr. CHANDLER. The Senator will so intimidate or impoverish me that I shall not be able to go on with my remarks.

Mr. TILLMAN. The Senator from New Hampshire knows what it is, because he is a living evidence of it day by day, to bow to the behest of party, to be a party slave, to surrender his independence and his manhood in worshiping a name. I went to Chicago in 1892 at the head of the South Carolina delegation. We had passed before we left home a resolution in our State convention denouncing Grover Cleveland as a prostitute of Democracy——

Mr. CHANDLER. I do not yield to the Senator any longer for that kind of language to be used, Mr. President.

Mr. TILLMAN. I am only giving a little history——

Mr. CHANDLER. I can not consent——

The PRESIDING OFFICER. The Senator from New Hampshire declines to yield further.

Mr. CHANDLER. I can not consent to the Senator's speaking in that way of the late President of his party.

The PRESIDING OFFICER. The Senator from New Hampshire has the floor.

Mr. TILLMAN. If the Senator will permit me, I will continue——

The PRESIDING OFFICER. The Chair will remind the Senator from South Carolina that the Senator from New Hampshire has the floor, and can only be interrupted by his consent.

Mr. CHANDLER. I prefer to go on with the remarks I have to submit, and have this beneficent bill take the place of the bill of perfidy and dishonor which the Senator's late President allowed to become a law because he did not dare to veto it.

Mr. TILLMAN. Mr. President——

The PRESIDING OFFICER. The Chair will remind the Senator from South Carolina that under the rules he must through the Chair get permission to interrupt a Senator on the floor.

Mr. TILLMAN. I ask permission from the Senator from New Hampshire to continue my defense of my vote for Grover Cleveland.

Mr. CHANDLER. After I get through, the Senator will have ample opportunity.

Mr. TILLMAN. Please allow me now.

Mr. CHANDLER. If the Senator will speak of the late President Cleveland in the usual terms of respect with which he speaks of everyone, I will yield. [Laughter.]

Mr. TILLMAN. It is pretty hard to do so, but I will endeavor to reach up to the level of Senatorial dignity for once. I say that the South Carolina delegation went to Chicago instructed to oppose Grover Cleveland's nomination, and our convention passed resolutions denouncing his candidacy and his nomination, if made, in the terms I have spoken of.

We voted against him every time. We knew by intuition and by his behavior what was coming. We were four years ahead of our brethren from the South, who were there from nearly every State except ours, clamoring for the great Cleveland to be the leader of Democracy. But after he was nominated, having nowhere else to go, believing that it was dishonorable to go into a party convention and not abide the result, unless we got up and walked out, we went home and carried South Carolina for him by the biggest majority of any Southern State

Now, the blame rests on him and not on us that he prostituted his high office and betrayed his party; and I hope the Senator from New Hampshire in the future will twit those here who have been defending him, rather than me for having been a fool, and such a fool, once. [Laughter.] I have grown broader since then, and become more independent, and will never again while I live vote for a Presidential candidate who does not represent my principles.

The PRESIDING OFFICER. The Senator from New Hampshire will proceed.

Mr. CHANDLER. The sad fact remains that considering this subject of immigration, about which the Senator has been lecturing the Senate, a very wise and important bill for which the Senator voted was kept from becoming a law by the veto of President Cleveland. The President undoubtedly, now that the Senator from South Carolina is through with him, is gone and dead indeed; but for his acts, such as they were, good or bad, the Democratic party was responsible, and not a solitary Republican I ever knew or heard of was responsible for one jot or tittle of his deeds.

Now, Mr. President, if I can get the attention of the Senate to a point in connection with the Senator's amendment, it is this: That when an immigrant comes into this country, either a man alone, or a man and woman, or a man and wife with children, who go out on the prairies of the West or down into the now rapidly civilizing South to take a home there and to become a part of the communities to which they migrate, when they are admitted according to the existing laws upon our statute book to the blessings

of our citizenship, the worst thing that we can do when they enter the gates of Castle Garden or Ellis Island is to take $100 apiece from the pockets of each and every one of those immigrants.

The very best thing we could do with $100 of Government money would be to give it to each and every one of those immigrants, with which they may go to the place which they intend to make their homes, and there use this money in building their little houses, in developing their little farms, and in fitting themselves to enjoy the blessings and to perform the duties of American citizenship.

Mr. TILLMAN. Will the Senator from New Hampshire allow me there?

Mr. CHANDLER. If the Senator will ask a question and say nothing about Grover Cleveland——

Mr. TILLMAN. It is a question.

Mr. CHANDLER. Yes.

Mr. TILLMAN. Are there any more public lands left to which this man can go with the hundred dollars and settle on a homestead and build up a home?

Mr. CHANDLER. There are very few, although this country is not overpopulated yet. I have said that I will go as far as the Senator from South Carolina in a law to keep out immigrants——

Mr. TILLMAN. Will you go to——

Mr. CHANDLER. I will vote for this amendment if it would operate, for the time being, as a prohibition. But this is my point, and bright as the Senator is, he understands it; when an immigrant comes in with his family the worst possible tax that you can levy in any bill by Congress is a tax that takes a hundred dollars out of the pockets of the father of that family for every member of the family. He wants that money to prepare and adorn and make comfortable and beautify his home. That is the reason why I have voted and why I shall continue to vote against a large head tax as a method of excluding immigration.

Now, Mr. President, one word more and I am done.

Mr. TILLMAN. Will the Senator, then, join me in amending the amendment so as to prohibit all immigration of any kind?

Mr. CHANDLER. When the prolific Senator gets through his bill, which I am much in favor of, to make South Carolina a temperance State, and brings in a bill for the restriction of immigration, I will help him pass it.

Mr. TILLMAN. But, my dear sir, it ought to go in this tariff bill.

Mr. CHANDLER. Mr. President, there is a distinction between a human being coming into this country and a bale of goods, even if the Senator from South Carolina does not see it.

Mr. TILLMAN. The distinction——

Mr. CHANDLER. I can not yield any further to the Senator from South Carolina——

The PRESIDING OFFICER. The Senator from New Hampshire declines to yield further.

Mr. CHANDLER. Until I have made one more point; then I will yield the floor to him entirely.

Mr. President, the Senator's amendment has a tail to it that is very interesting. He has described the horrors of vile immigration; he has described the condition of the poor, miserable, degraded human beings who, he says, delve in the mines of the great mining State of Pennsylvania. Mr. President, there is great truth in the picture, although neither the State of Pennsylvania nor the nation is to blame for that condition of things. It is one that will be ameliorated as time passes.

But as it exists the Senator says that it is a horrible condition, and that it is being added to daily by the rush of immigrants into this country whom he proposes to keep out. And yet the Senator says that if this country will only adopt the free coinage of silver at 16 to 1, then he is willing that any may come in. All the degraded hordes, the horrible immigrants, this damning, degraded addition to our population, may come if the tenet of the party—the one party, the two parties, the three parties for aught I know——

Mr. TILLMAN. Four parties.

Mr. CHANDLER. If the tenet of the four parties that opposed the Republican party in the last Presidential election shall prevail and the free coinage of silver at the ratio of 16 to 1 shall become a part of the law of the land. Now, Mr. President, there is a most lame and impotent conclusion for you. Why, the whole picture of the Senator, all the horrors which he described and which he proved, is only the prelude to the lame and impotent and ridiculous conclusion that the immigrants shall only be excluded until the blessed day when free coinage at the ratio of 16 to 1 shall have dawned upon the American people.

Mr. President, I can say no more than this to show, I think, to the Senator himself the absurdity of his amendment, which, in the interest of the speedy passage of this bill, which we all want to get through with as soon as we can, I respectfully ask him to withdraw.

Mr. TILLMAN. Is the Senator through?

Mr. CHANDLER. Yes; I am through now.

Mr. TILLMAN. Mr. President, I shall only have a word to say in regard to the tail of this amendment upon which the venom—that is a bad word—I will say, rather, the incisive wit, the keen, scintillating brilliancy of my friend was exhausted. It seems to me that I recollect reading a speech carefully and elaborately prepared by a certain Senator from New Hampshire in favor of "bimetallism," delivered last spring, in which all of the acumen and wisdom and learning and historical research which he could bring to bear (and there is no man in this Chamber who excels him in these points) had been exhausted. And it seems to me that I recall certain sentences of dire wrong to humanity and a great trouble ahead for the human race unless this great consummation were wrought.

There is nothing in this amendment about how you shall get this coinage of silver at 16 to 1. You are obliged to take it, if you can get it, by international agreement, and I do not care. I will take it that way just as readily as by any other means. I will take it by international agreement, or I will take it by our own action independent of any other nation. But I say that if we had the free coinage of silver to-day, there would be no hungry men in America and no paupers and idle men standing on the streets begging for bread.

I say if we get it in the near future, the stunted, distorted growth which now confronts us, the paralysis of trade, the condition of servitude which exists in labor, would no longer exist, because the American farmer would get a fair price for his product, and he could then buy the products of the factories. The wheels of the machine shops and factories would be set humming, and every man in America would obtain a fair day's wages and not go begging for labor. That is what I meant by putting that tail on there, and the fact that it has stung the Senator from New Hampshire shows that he realizes it. But your party exigency and its platform forbid you to get up and acknowledge it. You know it. You realize that you could not emancipate labor from this thralldom if you would have——

Mr. CHANDLER. Mr. President, I rise to a question of order.

The PRESIDING OFFICER. The Senator from New Hampshire will state his question of order.

Mr. CHANDLER. I prefer that the Senator, instead of saying "you," would address his remarks to the Chair. He frightens me more than he is aware of when he speaks to me directly. [Laughter.]

The PRESIDING OFFICER. The Senator from South Carolina will proceed in order.

Mr. TILLMAN. Mr. President, as I do not have any pitchfork in sight, I do not see why the Senator has taken refuge behind the manly form of the Presiding Officer in that style. Of course, he is ridiculing me. I understand that, and my shoulders are broad enough to bear it; but he is in a hole—to use a slang phrase—and he knows it. The Republican party is committed to bimetallism. This only contemplates the possibility of getting you out of a dilemma by international agreement, with the certainty of the Democrats giving the country free coinage of silver in 1900, when the American laborer will have had the scales pulled from his eyes and will see that your sham promises of protection by a high tariff are Sodom apples and there is nothing in it for him but to come to starvation.

As long as the country had a bimetallic currency, we prospered. The evils of immigration and glutting the labor market did not cause any trouble. But the case is now different; we can never hope for prosperity until our financial policy is changed. Until it is changed there is danger in allowing a free influx of more European paupers to add to the distress in our cities and threaten the very life of the Republic.

The PRESIDING OFFICER. The question is upon the amendment proposed by the Senator from South Carolina [Mr. TILLMAN].

Mr. TILLMAN. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLARK (when his name was called). I again announce my pair with the junior Senator from Kansas [Mr. HARRIS]. In his absence I withhold my vote.

Mr. CULLOM (when his name was called). I have a general pair with the Senator from Delaware [Mr. GRAY]. In his absence I withhold my vote.

Mr. GEAR (when his name was called). I am paired with the Senator from New Jersey [Mr. SMITH].

Mr. BERRY (when the name of Mr. JONES of Arkansas was called). My colleague [Mr. JONES of Arkansas] is paired with the Senator from Maine [Mr. HALE]. I will state also that the Senator from New York [Mr. MURPHY] is paired with his colleague [Mr. PLATT of New York].

Mr. MALLORY (when his name was called). I am paired with the junior Senator from Vermont [Mr. PROCTOR]. If he were present, I should vote "nay."

Mr. SEWELL (when his name was called). I am paired with the Senator from Wisconsin [Mr. MITCHELL].

Mr. TILLMAN (when his name was called). I do not suppose this is a political question. I have a pair with the Senator from Nebraska [Mr. THURSTON], but I am bound to vote for my own amendment, and so I vote "yea."

Mr. WARREN (when his name was called). I again announce my pair with the junior Senator from Washington [Mr. TURNER]. He is not in the Chamber, and I do not know how he would vote if present. I therefore withhold my vote.

The roll call was concluded.

Mr. SPOONER (after having voted in the negative). I have a general pair with the Senator from Mississippi [Mr. WALTHALL], and I voted in his absence inadvertently. I am assured, however, that he would vote "nay," if he were present. I will allow my vote to stand.

The PRESIDING OFFICER [Mr. GALLINGER] (after having voted in the negative). The present occupant of the chair is paired with the Senator from Texas [Mr. MILLS], and therefore withdraws his vote, the Senator from Texas not having voted.

The result was announced—yeas 3, nays 48; as follows:

YEAS—3.

Butler,	Quay,	Tillman.

NAYS—48.

Allen,	Davis,	Lindsay,	Pettus,
Allison,	Elkins,	Lodge,	Platt, Conn.
Bacon,	Fairbanks,	McBride,	Pritchard,
Bate,	Faulkner,	McEnery,	Shoup,
Berry,	Foraker,	McLaurin,	Spooner,
Burrows,	Frye,	McMillan,	Teller,
Carter,	Hanna,	Mason,	Turpie,
Chandler,	Hansbrough,	Morgan,	Vest,
Chilton,	Hawley,	Nelson,	Wellington,
Clay,	Heitfeld,	Pasco,	Wetmore,
Cockrell,	Hoar,	Penrose,	White,
Daniel,	Kenney,	Perkins,	Wilson.

NOT VOTING—38.

Aldrich,	Gorman,	Martin,	Sewell,
Baker,	Gray,	Mills,	Smith,
Caffery,	Hale,	Mitchell,	Stewart,
Cannon,	Harris, Kans.	Morrill,	Thurston,
Clark,	Harris, Tenn.	Murphy,	Turner,
Cullom,	Jones, Ark.	Pettigrew,	Walthall,
Deboe,	Jones, Nev.	Platt, N. Y.	Warren,
Gallinger,	Kyle,	Proctor,	Wolcott.
Gear,	Mallory,	Rawlins,	
George,	Mantle,	Roach,	

So the amendment of Mr. TILLMAN was rejected.

Mr. WHITE. I desire to have printed an amendment which I intend to propose to the pending bill, with the references which are indorsed thereon.

The PRESIDING OFFICER. That order will be made, in the absence of objection.

Mr. ALLISON. I ask the adoption of the amendment which I send to the desk, on page 150, line 25. It is merely to place jewels for watches on the free list, in accordance with the decision of the Senate to-day.

The PRESIDING OFFICER. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. At the end of line 25, on page 170, after the word "bort," it is proposed to insert a semicolon, and to add:

All jewels for use in the manufacture of watches or clocks.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Iowa [Mr. ALLISON].

The amendment was agreed to.

Mr. CHILTON. I offer an amendment to the pending bill, which I desire to have printed.

The PRESIDING OFFICER. That order will be made, in the absence of objection.

Mr. KENNEY. I offer an amendment to the pending bill, which I wish to have printed.

The PRESIDING OFFICER. It will be so ordered, in the absence of objection.

EXECUTIVE SESSION.

Mr. ALLISON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After fifteen minutes spent in executive session the doors were reopened, and (at 5 o'clock and 45 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, June 30, 1897, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 29, 1897.

SECRETARY OF LEGATION.

Charles V. Herdliska, of the District of Columbia, to be secretary of the legation of the United States at Vienna, Austria, vice Lawrence Townsend, appointed envoy extraordinary and minister plenipotentiary to Portugal.

CONSULS-GENERAL.

John P. Bray, of North Dakota, to be consul-general of the United States at Melbourne, Australia, vice Daniel W. Maratta, resigned.

Church Howe, of Nebraska, to be consul-general of the United States at Apia and Nukualofa, Tonga, vice William Churchill, resigned.

CONSULS.

Louis A. Dent, of the District of Columbia, to be consul of the United States at Kingston, Jamaica, vice Quincy O. Eckford, resigned.

Hugo Donzelmann, of Wyoming, to be consul of the United States at Prague, Bohemia, vice Carl Bailey Hurst, appointed consul-general at Vienna.

Samuel S. Lyon, of New Jersey, to be consul of the United States at Osaka and Hiogo, Japan, vice James F. Connelly, resigned.

Rounsevelle Wildman, of California, to be consul of the United States at Hongkong, China, vice William E. Hunt, resigned.

SOLICITOR-GENERAL.

John K. Richards, of Ohio, to be Solicitor-General, vice Holmes Conrad, resigned.

PROMOTIONS IN THE ARMY.

Artillery arm.

Second Lieut. John Power Hains, Third Artillery, to be first lieutenant, June 17, 1897, vice Oyster, First Artillery, retired from active service.

Infantry arm.

Lieut. Col. William Henry Powell, Eleventh Infantry, to be colonel, June 27, 1897, vice Lyster, Ninth Infantry, retired from active service.

Maj. Clarence Edmund Bennett, Nineteenth Infantry, to be lieutenant-colonel, June 27, 1897, vice Powell, Eleventh Infantry, promoted.

Capt. Stephen Perry Jocelyn, Twenty-first Infantry, to be major, June 27, 1897, vice Bennett, Nineteenth Infantry, promoted.

First Lieut. Charles Hartwell Bonesteel, Twenty-first Infantry, to be captain, June 27, 1897, vice Jocelyn, Twenty-first Infantry, promoted.

Second Lieut. Edmund Luthur Butts, Twenty-first Infantry, to be first lieutenant, June 27, 1897, vice Bonesteel, Twenty-first Infantry, promoted.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 29, 1897.

CONSUL.

Soren Listoe, of Minnesota, to be consul of the United States at Rotterdam, Netherlands.

ASSISTANT ENGINEERS IN THE NAVY.

The following-named naval cadets, graduates of the Naval Academy, to be assistant engineers in the Navy:

Thomas M. Dick, of South Carolina.
Charles K. Mallory, of Tennessee.
Newton Mansfield, of Ohio.
James P. Morton, of Missouri.
Daniel M. Garrison, of New Jersey.
Franklin D. Karns, of Ohio.
Frederick N. Freeman, of Indiana.
John F. Marshall, jr., of Texas.
Darwin R. Merritt, of Iowa.
Ernest F. Eckhardt, of Wisconsin.
Edward H. Dunn, of Connecticut.

ENSIGNS IN THE NAVY.

The following-named naval cadets, graduates of the Naval Academy, to be ensigns in the navy:

Frank H. Brumby, of Georgia.
Frank P. Baldwin, of New Jersey.
William C. Davidson, of South Dakota.
Harris Laning, of Illinois.

David W. Todd, of California.
John V. Klemann, of New York.
William R. Cushman, of New York.
Henry V. Butler, jr., of New York.
Walter R. Gherardi, at large.
John R. Monaghan, of Washington.
James J. Raby, of Michigan.
James E. Walker, of North Carolina.
William H. Standley, of California.
Arthur T. Chester, at large.
Cassius B. Barnes, of Oklahoma.
Joseph C. Breckinridge, of Kentucky.
Albion J. Wadhams, of New York.
Kenneth M. Bennett, of New Jersey.
Edward H. Watson, of Kentucky.
Worth Bagley, of North Carolina.
Orlo S. Knepper, of Pennsylvania.
Michael J. McCormack, of Michigan.
Rufus Z. Johnston, jr., of North Carolina.

APPOINTMENTS IN THE ARMY.

The following-named cadets, graduates of the Military Academy, for appointment in the Army of the United States, to date from June 11, 1897:

To be additional second lieutenants, Corps of Engineers.

1. Cadet William Durward Connor.
2. Cadet John Calvin Oakes.
3. Cadet Louis Casper Wolf.
4. Cadet Henry Sims Morgan.
5. Cadet Sherwood Alfred Cheney.
6. Cadet Frederick William Altstaetter.
7. Cadet Harley Bascom Ferguson.

Artillery arm.

9. Cadet Robert Swepston Abernethy.
12. Cadet Edwin Oliver Sarratt.
13. Cadet Albert Jesse Bowley.
15. Cadet Bertram Charles Gilbert.
16. Cadet Lawrence Sprague Miller.
18. Cadet Winfield Scott Overton, jr.
20. Cadet Mervyn Chandos Buckey.

Cavalry arm.

11. Cadet Francis Horton Pope.
14. Cadet Matthew Elting Hanna.
17. Cadet George Edward Mitchell.
19. Cadet Pierce Ambrose Murphy.
21. Cadet Frederick Theodore Arnold.
24. Cadet James Noble Munro.
26. Cadet Earle D'Arcy Pearce.
27. Cadet William Stanley Valentine.
29. Cadet Henry Carpenter Smither.
30. Cadet Roy Beveridge Harper.
32. Cadet Thomas Arnett Roberts.
33. Cadet Edgar Alexander Sirmyer.
34. Cadet Frank Ross McCoy.
36. Cadet Chalmers Gaither Hall.
44. Cadet Clarence Richmond Day.
47. Cadet Willard Herman McCornack.
50. Cadet Seth Mellen Milliken.
52. Cadet John Carrington Raymond.

Infantry arm.

8. Cadet Charles Duval Roberts.
10. Cadet John Kirkpatrick Moore.
22. Cadet Frederick Edgar Johnston.
23. Cadet Claude Hamilton Miller.
25. Cadet Harold Benjamin Fiske.
28. Cadet Arthur Stewart Conklin.
31. Cadet John Hendricken Hughes.
35. Cadet George Willis Helms.
37. Cadet Rufus Estes Longan.
38. Cadet Frank Marion Savage.
39. Cadet Thomas Taylor Frissell.
40. Cadet Edward Anthony Roche.
41. Cadet William Mason Fassett.
42. Cadet Henry Magdeburg Dichmann.
43. Cadet Halstead Dorey.
45. Cadet George Franklin Baltzell.
46. Cadet Benjamin Martin Koehler.
48. Cadet James Francis Brady.
49. Cadet Hugh La Fayette Applewhite.
51. Cadet Edgar Thomas Conley.
53. Cadet Roderick Leland Carmichael.
54. Cadet Harry Gore Bishop.
55. Cadet Henry Abbot.
56. Cadet Andrew Moses.
57. Cadet Edgar Thomas Collins.
58. Cadet Fred Anderson Pearce.
59. Cadet Seaborn Green Chiles.
60. Cadet Lyman Mowry Welch.
61. Cadet Thomas Quinn Ashburn.
62. Cadet Sam Frank Bottoms.
63. Cadet Warren Sumner Barlow.
64. Cadet John Girardin Workizer.
65. Cadet Willard Douglas Newbill.
66. Cadet Charles Higbee Bridges.
67. Cadet Harold Edward Cloke.

SECOND LIEUTENANTS IN MARINE CORPS.

The following-named naval cadets, graduates of the Naval Academy, to be second lieutenants in the Marine Corps, from the 1st day of July, 1897, to fill vacancies existing in that grade, namely:

Philip M. Bannon, of Maryland.
Newt H. Hall, of Texas.

REGISTER OF THE LAND OFFICE.

Thomas A. Roseberry, of Susanville, Cal., to be register of the land office at Susanville, Cal.

POSTMASTERS.

W. Morton Mills, to be postmaster at Ladoga, in the county of Montgomery and State of Indiana.

S. W. Willey, to be postmaster at Hinton, in the county of Summers and State of West Virginia.

Francis Norwood, to be postmaster at Beverly, in the county of Essex and State of Massachusetts.

Elias E. Wesseler, to be postmaster at Rockport, in the county of Spencer and State of Indiana.

Theodore Bailey, to be postmaster at Portland, in the county of Jay and State of Indiana.

SENATE.

WEDNESDAY, *June 30, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

On motion of Mr. ALLEN, and by unanimous consent, the reading of the Journal of yesterday's proceedings was dispensed with.

CORRECTION.

Mr. RAWLINS. I find in the RECORD that upon the vote on the lead question yesterday I am recorded as voting in the negative. That vote was cast under a misapprehension of the question, and I simply desire to make that statement.

PETITIONS AND MEMORIALS.

Mr. GALLINGER presented the memorial A. T. Brown & Co., of Raymond, N. H., remonstrating against an increase in the present rate of duty on tanned skins for morocco, or a duty on raw goatskins; which was ordered to lie on the table.

Mr. ALLISON presented the memorial of James Bolling and 49 other citizens of Iowa, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

Mr. PERKINS. I present a petition wired me from the Chamber of Commerce of San Francisco, Cal., praying for the prompt annexation of the Hawaiian Republic. I move that the petition be printed in the RECORD and referred to the Committee on Foreign Relations.

The petition was referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

SAN FRANCISCO, CAL., *June 29, 1897.*

Hon. GEORGE C. PERKINS,
United States Senator, Washington, D. C.:

Kindly present following to Senate:

"*To the honorable Senate and House of Representatives, the Fifty-fifth Congress, Washington, D. C.:*

"Your memorialists, citizens of the Pacific Coast of the United States, respectfully but urgently petition your august body for the prompt annexation of the Hawaiian Republic. While it is true that Pacific Coast interests demand it, we respectfully plead for annexation on the broader ground of national policy, prestige, and commercial necessity. We protest against the possibility of the great stronghold in mid-Pacific being permitted occupation by any foreign power as a constant menace to our country.

"Every consideration of patriotism, national safety, and commercial interest demands prompt territorial annexation. If we object to Hawaiian annexation, we should consistently cede Alaska to Great Britain. But we are

confident that every intelligent American unbiased by prejudice or personal interest will support the policy of the Administration in the annexation of this friendly island Republic which has these many years sought to be incorporated with the American nation. As a political and commercial necessity we also pray that the United States Government will aid and facilitate the connection by cable of the Pacific Coast with this splendid new territory.

"Confident in the widsom and patriotism of our countrymen in Congress assembled, we subscribe ourselves,

"Your fellow-citizens,

"THE CHAMBER OF COMMERCE OF SAN FRANCISCO."

HUGH CRAIG, *President.*
WILLIAM M. MERRY, *Secretary-Treasurer.*

Mr. WHITE presented a petition of sundry citizens of California, praying for the enactment of legislation authorizing the President of the United States to appoint a commission as proposed by the Indianapolis (Ind.) monetary convention; which was referred to the Committee on Finance.

Mr. BACON presented the memorial of B. T. Teague and 51 other citizens of Georgia, and the memorial of C. D. Reamer and 52 other citizens of Georgia, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. TURPIE presented a memorial of the Bradley Fertilizer Company, of Boston, Mass., remonstrating against the imposition of a duty on burlap; which was ordered to lie on the table.

Mr. ROACH (for Mr. MURPHY) presented sundry memorials of citizens of New York, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. NELSON presented the memorial of H. Holbert and 48 other citizens of Minnesota, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

Mr. LODGE presented sundry memorials of citizens of Massachusetts, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. FAULKNER. I present the petition of George Hardman and 75 other citizens of Mount Zion, W. Va., praying for the enactment of a law restricting immigration. As a bill on this subject has already been reported from the committee and is now on the Calendar, I move that the petition lie on the table.

The motion was agreed to.

Mr. VEST presented sundry memorials of citizens of Missouri, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

REPORTS OF A COMMITTEE.

Mr. HANNA, from the Committee on Pensions, to whom was referred the bill (S. 2117) granting an increase of pension to Fannie Kautz, reported it with amendments, and submitted a report thereon.

He also, from the same committee, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (S. 2112) granting a pension to Jesse O. Davy;
A bill (S. 2115) granting a pension to Milton T. Bedford;
A bill (S. 2114) granting a pension to Rebecca E. Kutz;
A bill (S. 1454) granting an increase of pension to Mary Sprague;
A bill (S. 2258) granting a pension to Joshua Parker;
A bill (S. 141) granting an increase of pension to Capt. John W. Dodd;
A bill (S. 697) granting a pension to Abel S. Chase;
A bill (S. 139) granting an increase of pension to Florence W. Buskirk; and
A bill (S. 1614) granting a pension to John Amrein.

Mr. GALLINGER, from the Committee on Pensions, to whom was referred the bill (S. 1502) for the relief of C. S. Lobdell, of Parkersburg, Iowa, asked to be discharged from its further consideration and that it be referred to the Committee on Claims; which was agreed to.

Mr. SHOUP (for Mr. HANSBROUGH), from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (S. 156) to increase the pension of Capt. John H. Mullen;
A bill (S. 1480) granting an increase of pension to Lewis D. Baker;
A bill (S. 408) to restore a pension to Harriet M. Knowlton; and
A bill (S. 158) granting a pension to Peter Daly.

Mr. KYLE, from the Committee on Pensions, to whom were referred the following bills, reported them severally with an amendment, and submitted reports thereon:

A bill (S. 590) granting an increase of pension to Isabella H. Silvey, widow of Lieut. Col. William Silvey, deceased; and
A bill (S. 844) to grant a pension to Eli D. Walker.

Mr. KYLE, from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (S. 368) granting a pension to Jennie E. Burch;
A bill (S. 821) to increase the pension of Thomas J. Haughey;
A bill (S. 1534) increasing the pension of Lucivey J. Summers; and
A bill (S. 1532) to increase the pension of Capt. James B. Logan.

ACTS AND RESOLUTIONS RELATING TO PACIFIC RAILROADS.

Mr. LODGE, from the Committee on Printing, to whom was referred the resolution submitted by Mr. GEAR on the 25th instant, reported it with an amendment, and it was referred to the Committee to Audit and Control the Contingent Expenses of the Senate, as follows:

Resolved, That there be printed for the use of the Senate as a document 1,000 copies of all and singular the acts and resolutions of Congress, including the decisions of the Supreme Court relating thereto, relative to the Union Pacific Railroad Company and the Central Pacific Railroad Company and Western Pacific Railroad Company, and that the sum of $100, to be expended under the direction of the Committee on Printing, is hereby appropriated out of the contingent fund of the Senate for the work.

BILLS INTRODUCED.

Mr. KYLE introduced a bill (S. 2309) to correct the military record of George W. Sampson; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. MITCHELL introduced a joint resolution (S. R. 53) authorizing the Secretary of the Treasury to deliver to the mayor of the city of Milwaukee, for use in ornamenting one of the parks of that city, the Parrott rifled cannon and carriage recently used on the revenue cutter *Andrew Johnson;* which was read twice by its title, and referred to the Committee on Commerce.

Mr. HAWLEY introduced a joint resolution (S. R. 54) empowering the Secretary of War to purchase the bronze bust of Secretary of War Edwin M. Stanton for the War Department; which was read twice by its title, and referred to the Committee on the Library.

AMENDMENTS TO DEFICIENCY APPROPRIATION BILL.

Mr. THURSTON submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Select Committee on International Expositions, and ordered to be printed.

Mr. KYLE submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

NORTHERN LIBERTY MARKET CLAIMS.

Mr. COCKRELL submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the auditor of the supreme court of the District of Columbia and the Commissioners of the District of Columbia be, and they are hereby, requested to suspend further proceedings under the act of Congress "to provide for the payment of certain claims against the District of Columbia by drawback certificates," approved January 26, 1897, known as the Northern Liberty Market claims, until further action of Congress.

THE TARIFF BILL.

The VICE-PRESIDENT. The morning business appears to be closed.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Mr. QUAY. Before proceeding further with the consideration of the bill, I desire to enter a motion to reconsider the vote by which the amendment to paragraph 118 providing $1 per ton on manganese ore was agreed to. I shall not press the motion now. I desire to consult with the Committee on Finance before the bill passes from the Committee of the Whole.

The VICE-PRESIDENT. The motion to reconsider will be entered.

Mr. ALLISON. I ask now to recur to paragraph 7¼.

The SECRETARY. On page 3, after line 16, the Committee on Finance propose to insert as a new paragraph:

7¼. Bleaching powder, or chloride of lime, one-fourth of 1 cent per pound.

Mr. ALLISON. I wish to modify the amendment by inserting "one-fifth" in lieu of "one-fourth."

The SECRETARY. At the end of line 17, page 3, strike out "fourth" and insert "fifth;" so as to read:

7¼. Bleaching powder, or chloride of lime, one-fifth of 1 cent per pound.

The amendment to the amendment was agreed to.

Mr. VEST. What is the duty? Will the Secretary please read the paragraph as it now stands?

The SECRETARY. As modified the paragraph reads:

7½. Bleaching powder, or chloride of lime, one-fifth of 1 cent per pound.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee as amended.

The amendment as amended was agreed to.

Mr. VEST. I move to strike out the paragraph, so as to put it on the free list, where it was under the McKinley Act and where it is under existing law.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Missouri.

Mr. GRAY. Mr. President, before the vote is taken, I wish to say a few words on this matter, because it is one, I think, of some importance. It concerns a very widespread industry in this country. This tax on bleach is especially important to those of us who have in our States the industries that are particularly affected by this necessary raw material of their manufacture.

Bleach is used very largely, among other things, for the manufacture of pulp and for the manufacture of paper. That industry is an exceedingly important one and very widely diffused throughout this country. Those who are engaged in these industries view with no little concern the proposition to impose a tax on what has hitherto been free and subject them to a very heavy addition to the cost of producing their wares.

I am told, for example, by a single wood-pulp manufacturer in this country that this tax will mean an increase in expense to them of $20,000 a year. That means a very good profit upon the business. It means a necessary increase in the price of their paper, or a reduction in other directions in order to enable them to meet the increased cost. Bleach has always, or for a long time, been upon the free list, and with it so the industries dependent upon this important article have prospered as we might wish to see them prosper. I do not know that there have been any inordinate profits made, but the American manufacturer of paper, that has come to be one of the most important in modern civilization, controls the market in this country and is doing a large export business.

I understand that by reason of the cheapness of production in this country, which comes from this free raw material largely, more than one of the great London dailies is printed upon paper that is sent from this country, and our manufacturers are largely commanding that trade all over the world. The cheapness of the material from which wood pulp is made and the particular woods that are used for that manufacture are more abundant here than in Europe, and through that and through the modern economies that have come in the manufacture, and with all the raw materials cheap, they have been able to build up this industry to its present proportions. That means the employment of labor, and of skilled labor, and all the innumerable blessings that flow and diffuse themselves from a conservatively conducted and wholesomely growing industry.

I do not believe that in this, any more than in any other case it is right or just that the people who think that they can make the bleach for the United States should, in looking around at these prosperous and thriving industries scattered all over the United States from ocean to ocean, levy a tribute upon them because they are prosperous. It has occurred to some gentlemen that with the use of some English patents, largely controlled by English capital, they can, by a process that has never yet been anything more than an experiment, manufacture this bleach profitably to themselves and compel all the manufacturers of wood pulp and paper to buy from them and pay tribute to this protected industry. I do not think that is right. I do not think there is any justice in it in this case even from the protectionist point of view, because I say here, upon authority which I think is unquestionable, that there is no successfully established manufacture of bleach in this country, and certainly none has ever been made in sufficient quantities for commercial purposes to justify the imposition of a protective tax, and thus burden all the paper makers and pulp makers of the country for the benefit of these patented processes.

Mr. ALLEN. Was there ever any tax imposed on this article before?

Mr. GRAY. Never before. Bleach has always, I believe, been on the free list. I understand there are certain large paper manufacturers, notably in the State of Maine, where they manufacture the liquid chloride, which can not be transported, but can be used for bleaching their own manufacture of wood pulp and paper. There, I am informed, they use the chlorine gas in their own manufactures. Limestone is used merely as the base to carry the chlorine, and when so united I am told it can be used commercially and shipped from one country to another or across the ocean, but it has never been made in this country in a form in which it can be transported from place to place successfully or in quantities other than insignificant.

I think this is a matter too important to go over lightly. The Solvay process that these people have control of is patented in this country and patented abroad. It is protected on every hand in that way, and because they have never yet been able to successfully compete with the manufacture of chloride of lime that comes from abroad, and can not be so successfully made in this country, I do not think that they should be allowed to plunder these various industries in this fashion. You may talk about it on any principle you please, whether of free raw material or on the mere adjustment of a protective tariff; this is one of the arrangements that ought to be made in order to prevent a conspicuous case of hardship being worked by the passage of this bill.

Mr. BACON. Is it a raw material?

Mr. GRAY. Well, it is a raw material in the sense in which it is used in manufacture. I understand, of course, that one man's raw material is another man's finished product. I am not discussing the free raw material of the matter, but I do say that, on whatever ground the tax is placed, it is unfair to burden honest and legitimate industry as necessary as the matter of paper making. I am not now speaking of other industries that rely upon having an abundance of this material brought to them cheaply, but it is not fair that this great industry should be burdened without more justification than has ever been shown to me. I have here a note from a large paper-pulp maker in which he says:

The paper-pulp trades are shipping to-day to all points in the world. A duty on bleach means the abandonment of the foreign market.

Whether that is an extravagant assertion or not, it shows that these people, whom I know and can vouch for as respectable and honest people, are very much concerned about this matter, and though they might be mistaken in saying that it means the abandonment of the foreign market, it means a very onerous tax and a very important interference with their present business.

From this same authority I am informed that during the past five years bleach has been declining in price; that there are not 2 tons of bleach per day produced in the United States, while 175 tons daily are consumed; and that this bleach has been made only within the last three months. The experiment has been recently tried in West Virginia, and it could not in that time have influenced the price, which has come down almost one-half in the last five years, for there has not been a sufficient quantity made even experimentally to affect in the least the markets of this country. I understand there is some bleach made in Michigan. I do not know whether the Senator from Michigan [Mr. BURROWS] who sits opposite to me is interested in this tax or has any information about it. I should be glad to hear from him whether there is any bleach made successfully there for the commerce of this country. If the Senator has no objection to answering that question, I will be obliged to him.

Mr. BURROWS. I am not certain whether any is being made at this time, but I do know that capital is about to invest in the enterprise with a view to making bleach in our State. I know also, I will state, as I am on the floor, that we send annually abroad over $2,000,000 to a foreign syndicate for this bleach. It is stated, and I suppose it is beyond question, that with a slight protection upon this industry we can establish it in the United States at present. As I said, we are sending $2,000,000 abroad every year to the United Alkali Company of Great Britain, which has back of it a capital of $35,000,000, and we are dependent upon this foreign syndicate to furnish us with this very important ingredient in our manufactures. I have letters here showing that the manufacture of bleach can beyond all question be carried on in the United States if we can have a slight protection, and, as is shown by these letters, when they do establish the industry the product will be very much cheaper to the American people than ever before.

Mr. GRAY. Mr. President, that is the old story very skillfully told. It is for the protection of this as yet unborn infant that this tax is asked. We are coolly told now by the Senator from Michigan (and I suppose he sees nothing that is at all abhorrent to his sense of justice in the statement) that though there is no bleach made in this country at this time, yet if you will put this tax upon it and prevent the well-established industries and old industries that have been here for a hundred years, and that now command the market of the United States, from shipping this product from abroad, they will be able successfully to supply the bleach.

Mr. BURROWS. I am sure the Senator must have misunderstood me if he supposes I said none was being made in the United States. I said we have none comparatively manufactured in Michigan. The Senator asked about Michigan. Bleach is being made in the United States, as the Senator himself stated a moment ago.

Mr. GRAY. I understood they were preparing to make it in Michigan, and that was all, and I am confirmed in that statement by what the Senator has just said. I make the statement, on the authority I have mentioned, that there is no bleach successfully made for commercial purposes in the United States to-day; that it is all in preparation in anticipation of this tax, and they will make it if the United States will go into partnership with them and compel by this tax the paper makers and pulp makers and the linen makers and textile manufacturers of the country to pay this

increased price. It is the old story of raising pineapples under glass in Vermont if you give protection enough. Of course if we compel these people to buy their bleach in this way, by imposing this penalty upon them if they do not, you can support almost any industry. But I appeal to my friends on the other side, who believe in what they call a protection principle, whether they are not destroying the groundwork of justice upon which they claim that the system rests?

Mr. GALLINGER. If the Senator will permit me, of course we want accurate information on this point.

Mr. GRAY. Yes.

Mr. GALLINGER. In the establishment in Maine some of the citizens of New Hampshire have large investments. I think the capital stock is now $300,000 paid in, and it has been established some four years. Does the Senator mean to say that that establishment has not made any bleach for commercial purposes?

Mr. GRAY. Is that the Rumford Falls Company?

Mr. GALLINGER. Yes, sir.

Mr. GRAY. I know nothing, of course, of my own knowledge, but I have carefully inquired as to this matter. So far as I know by inquiring of those who are concerned to know, I am informed that they have not made it for commercial purposes in any quantity that justifies calling it a manufacture at all.

Mr. GALLINGER. I will say that that does not correspond with the information I have. But still perhaps the Senator knows better.

Mr. GRAY. I say I know nothing except from information.

Mr. TELLER. Will the Senator allow me to say a word? I understand the concern in Maine of which the Senator from New Hampshire speaks has invested a good deal of money in the attempt to make bleaching powder, but they have not up to the present time made a success of it; that it is a great financial loss, and the powders that they have been able to make have not been such as the people of the country who are using bleaching powders were willing to use. It has neither been a success in the character of material furnished nor in the amount, nor in a financial view, and it is practically a failure, I am advised, by those who know about the matter.

Mr. GALLINGER. I do not accept the statement of the Senator from Colorado, and in due time I shall try in a very few words to make it appear otherwise.

Mr. GRAY. That the Senator may know exactly the statements he has to deal with, I may say, in addition to what the Senator from Colorado has stated, and upon the authority of the letter which I hold in my hand, from a perfectly reliable source, that the Rumford Falls Company do not make commercial chloride of lime. They disintegrate salt by electricity and obtain the chlorine gas, but it can not be transported and is not what is commercially known as bleaching powder. The Niagara Falls plant is not yet in operation. That is the one that is going in under this Solvay process, and is to use the great water power of Niagara Falls. Some one has said that the pauper labor of Niagara Falls ought to be sufficient protection.

Mr. TELLER. The establishment there has a very small capacity.

Mr. GRAY. I do not know what the capacity is, but it has not yet gone into operation.

Mr. GALLINGER. They are going to invest, I understand, $1,500,000 at Niagara. I do not imagine that they would do that unless they had some hopes of success.

Mr. GRAY. Do the Rumford Falls Company make paper or pulp?

Mr. GALLINGER. I do not think they make paper.

Mr. GRAY. They make liquid gas for their own use, I understand, but the liquid gas can not be transported unless it is united with limestone, making chloride of lime, that being, as I said, merely the vehicle of transportation to make it commercially useful. That, I understand, has not been successfully done, for some reason, for climatic reasons, among others, and on the other side there is a character of limestone or facilities that we do not possess.

The Senator from Michigan, in stating just now that there was no successful manufacture of bleach in his State, but only a preparation for one, and the investment of money out of which to make this manufacture, also said that though they did not manufacture bleach there, they sent away some $2,000,000 from this country every year to buy bleach. If they send away $2,000,000 to buy bleach, it is because they can not get the same article in this country, and if they sent away $2,000,000, you propose to say that they must spend $3,000,000 for this article that now costs them only $2,000,000, in order that these nascent industries may try the experiment of levying this tribute upon the manufacturer. That is what it means. Now, is it right that instead of spending $2,000,000 by this increase of tax, as originally intended here, about $3,000,000 shall be levied? Is that a proper way to treat these old and long-established industries?

Mr. ALLISON. Mr. President, this whole matter, it seems to me, is in a nutshell. These bleaching powders are now imported from England, being manufactured by the United Alkali Works of England, having a very large capital. The English manufacturers united about 1883 or 1884 into one corporation and immediately raised the price of bleaching powders from a cent and a half or a cent to two cents and a half or two and a quarter cents. The Senator from Delaware just now stated that bleaching powders have come down in price recently. The average price now, I believe, is about a cent and a half a pound.

We put on here the rate of one-fifth of a cent upon bleaching powders, which is equivalent to 11 per cent ad valorem. If the United Alkali Company could jump the price up and down to the extent of a cent a pound, they will pay this fifth of a cent duty per pound in order to compete, as they are now competing, with our own people. It may be that there is not a large amount of bleaching powder now produced here, but it is produced, and it is being produced in larger quantities every month. There are seven or eight establishments that have the opportunity to produce it. The tax imposed is only 11 per cent.

Mr. TELLER. Will the Senator from Iowa tell us where they are producing this bleach?

Mr. ALLISON. Certainly.

Mr. TELLER. That is what I should like to know.

Mr. ALLISON. The Senator from Delaware has already stated that they are producing it at Saltville, W. Va.

Mr. GRAY. Oh, I beg pardon.

Mr. ALLISON. They are producing it at Syracuse. There are two establishments already completed in Detroit, where they are on a fair road to produce it, with natural facilities for its production. It is proposed to impose only 11 per cent, as a revenue duty, which will be paid by the Alkali Company of Great Britain. We need the revenue, and the Alkali Company of Great Britain ought to pay that duty.

Mr. JONES of Arkansas. I should like to ask the Senator from Iowa a question in this connection. Does the Senator believe that these people will manufacture this article with a protection of one-fifth of a cent per pound?

Mr. ALLISON. I think they will manufacture it without the protection of one-fifth of a cent.

Mr. JONES of Arkansas. Without any duty at all they will start to manufacture it?

Mr. ALLISON. I believe they will.

Mr. JONES of Arkansas. Then it is a pure gratuity?

Mr. ALLISON. No, sir; it is not a pure gratuity. It is to make the alkali company that has the absolute control of the production in Europe pay a little tribute into our Treasury if they want our market. That is all there is about it.

Mr. JONES of Arkansas. I should like to ask on what the Senator from Iowa bases his opinion that these people should ask for a protection of three-quarters of a cent instead of a fifth? If they can manufacture it without protection, if they can manufacture it successfully with one-fifth of a cent of protection, then the effort to get three-fourths of a cent on their part was reprehensible, and ought to be rebuked.

Mr. ALLISON. I am not responsible for that. The House put the duty at a fourth, and we have put it at a fifth.

Mr. JONES of Arkansas. It was three-fourths that they asked for. The House proposed to give them one-fourth, and the Senate committee proposed to reduce it to one-fifth of 1 cent.

Mr. ALLISON. That is all.

Mr. JONES of Arkansas. But they wanted three-fourths, and asked for it.

Mr. GRAY. Now, in regard to the manufacture of bleach, undoubtedly it is made across the water. The statement that I have before me says that 65 per cent is of English make and 35 per cent of bleach is made on the Continent.

Mr. TELLER. That is made principally in Germany.

Mr. GRAY. The Senator from Michigan made a statement, to which I called attention a moment ago, to the effect that about $2,000,000 a year is sent out of this country to buy bleach by the thriving pulp makers and paper makers in this country. Now we propose to make them pay a great deal more for that bleach in order that this experiment may be tried. It is not yet demonstrated, nor is there any hopeful outlook that it will be demonstrated, that bleach can be made in this country to compete with foreign bleach, or that it can be made at all without levying a very onerous charge upon the users of it in the various industries that must use it in order to be successful.

The price of bleach, as stated by this manufacturer, was, in 1892, 2¼ cents per pound, and it has steadily fallen in price until to-day it is 1½ cents per pound. There has been no jumping up and down that is deleterious to the market, as the Senator from Michigan stated, in this product. There has been a steady decrease in the price until it has got down to a cent and a half, and I suppose these gentlemen think they can not compete at 1¼ or 1⅛ cents a pound unless the Government gives them the benefit of its partnership. This paper was written in the latter part of May. It

says that "a cargo was shipped free on board from England to-day for 1⅛ cents a pound," less than a cent and a half a pound, and the tax of one-fifth of a cent a pound amounts to a considerable ad valorem. I have not stopped to calculate it.

Mr. ALLISON. It would be something less than 20 per cent at one and three-eighths.

Mr. GRAY. Something less than 20 per cent.

Mr. ALLISON. Fifteen per cent.

Mr. GRAY. When the manufacturers, as we are told, are struggling in order to maintain themselves in this country, when the margin of profits is exceedingly small, when there are certain manufacturers I know, and notably some of these wood-pulp makers, who have within the last few months only kept themselves going in order to keep their hands employed and not scatter the skillful workmen who are necessary to their business, a tax of 20 per cent means a good deal on this very important article. As I said, it amounts to one firm that I know of, a large pulp-making firm, to $20,000.

I know that anything I can say will have very little effect upon those who have made up their minds to push this tax through, but I want to call attention to it and let the country know that this thing is being done against a protest from sources that are worthy, to say the least, and are entitled to be heard. I have a protest from the paper manufacturers of Massachusetts, who say:

We, the undersigned paper manufacturers of Massachusetts, would respectfully represent that the imposing of a duty on bleaching powder would prove a great hardship to the paper industry of Massachusetts and of this country. The paper mills consume about 80 per cent of all the bleaching powder that is imported, and this article has been on the free list for a great many years. There have been as yet no successful attempts to manufacture this article here, and we do not feel that it is for the best interest of the country to tax this article of so much importance and used so extensively by us, and we sincerely trust you will use your best efforts to keep this article on the free list.

The Beebe & Holbrook Company (A. W. Esleeck, treasurer); William Reardon, superintendent Albion Paper Company; The Geo. C. Gill Paper Company (Geo. C. Gill, treasurer); Parsons Paper Company (Edward P. Bagg, treasurer); Nonotuck Paper Company (H. D. Bradburn, manager); Geo. R. Dickinson Paper Company (J. E. Clark, general manager); Linden Paper Company (Henry E. McElwain, treasurer); Newton Paper Company (Geo. A. Clark, treasurer); Excelsior Paper Company (A. W. Hoffman); Riverside Paper Company (W. N. Caldwell, treasurer); Franklin Paper Company (J. M. Ramage, treasurer); Norman Paper Company (James H. Newton, treasurer); Wauregan Paper Company (James H. Newton, president); Hampshire Paper Company (C. H. Southworth, treasurer; Valley Paper Company (C. R. Prescott, treasurer); Carew Manufacturing Company (C. H. Southworth, president); Chapin & Gould; Byron Weston Company; Eaton, Dikeman & Co.; Smith Paper Company (Wellington Smith); Mittineague Paper Company (H. A. Moses, treasurer).

All paper manufacturers of the State of Massachusetts. There are more than a thousand paper manufacturers scattered all over the United States, to say nothing of the wood-pulp manufacturers who supply them with their raw material and the other kindred industries that depend largely upon having these materials as they have had them heretofore. You are going to derange this industry in order to try an experiment. You are going to make them pay the cost of the experiment. We do not pay it. You do not even make the United States distribute the cost among all the people, but you make all these industries pay the cost of the experiment of these English patentees who, I am informed, own largely or are interested in the proposed works at Niagara Falls and in the Syracuse works, where they make it as a by-product out of the manufacture of salt.

Mr. President, as I said a while ago, there is not much practical result coming from these protests, but they ought to be made, nevertheless, in order to show the iniquity, the making of this sort of an experiment at the cost of the industries of this country.

Mr. GALLINGER. Mr. President, I regret to take a moment's time in the discussion of this matter, and yet some statements made by the Senator from Delaware [Mr. GRAY] can not go unchallenged in view of what I think is an important industry which deserves and should receive recognition by the Congress of the United States.

The Senator from Delaware says that there is no successfully established manufactory of bleach in this country. The Senator may have information that has not been available to the rest of us, but I have here a letter from a very distinguished citizen of my State, a man of the highest possible integrity, connected with our State agricultural college, in which he says that the Rumford Falls Company has a capital of $300,000, and that they are manufacturing bleaching powder under American patents. The Senator from Delaware says they are English patents.

Mr. GRAY. Both countries. Of course nobody undertakes to manufacture a patented article unless he gets a patent on both sides of the ocean.

Mr. GALLINGER. Certainly not. But the Senator from Delaware seemed to lay great stress upon the statement that they are operating under English patents.

Mr. GRAY. I did not intend to lay stress on that point.

Mr. GALLINGER. Then I misunderstood the Senator. My correspondent says they are operating under American patents. He says:

Fair profits seemed certain. Prices, however, greatly declined, and we have lost money almost continuously during the past four years.

My correspondent further calls attention to the fact that under the bill we are now considering the duty on salt, which is their raw material if there is any such thing as raw material, has been very largely increased, and that that is an added burden that they can not possibly stand.

On the point made by the Senator from Delaware, that no bleaching powder is made in this country, this gentleman says that in this one company they have "an output of over 300,000 pounds a month." Mr. President, I am bound to take the statement of Professor Parsons as being the statement of a fact when he says that they have a monthly output of over 300,000 pounds, which beyond a doubt could be very largely increased if sufficient protection is given to enable American manufacturers to compete with the United Alkali Company of Great Britain, which is a gigantic trust, and which can make prices high or low as it chooses to do. Professor Parsons says he is a very large stockholder in the company, and that he has not drawn a cent in dividends for four years, which I take for granted is an actual fact. The president of that company, a Boston gentleman of high standing, also makes some statements that ought to be put in the RECORD. He says:

We are using American salt at $1.35 per ton of 2,000 pounds at the mine, which with freight at $4 a ton from Livonia, N. Y., to our works made the cost $5.35 per ton of 2,000 pounds delivered at our works at Rumford Falls, Me. With English salt, as it is under Wilson bill, free, costing us $2.44 per ton of 2,240 pounds at Portland, Me., and freight $1.25 per ton or $3.70 delivered at the works, we have been rapidly increasing our output and getting ahead very slowly.

The Dingley bill proposes a duty of 8 cents per 100 pounds on salt, and to offset this we certainly should have a duty on bleach.

This gentleman says:

This is an infant industry—

Our friends on the other side ridicule some industries because they are not "infants." They say it is time to abandon protection in reference to them; but this certainly is an infant industry, and hence entitled to protection, even on the theory of our friends of the Democratic party.

Mr. GRAY. I said it was an unborn infant.

Mr. GALLINGER. Not at all. We do not accept that—

This is an infant industry, and with reasonable protection a few years would see all of the article consumed in the country made here. The trade is an important one and will not be given up by the foreign makers without a struggle, and the duty would not serve so much to increase the price as to protect a severe decline, as increased production here would mean a competition for the trade, which would result in lower prices.

I will not take the time to read the entire letter, but commend what I have read to the attention of the Senate.

The Senator from Delaware says that bleaching powder is raw material. Well, it may be, but I think it is no more a raw material than wood pulp is a raw material. It is raw material for the manufacturer of wood pulp, and wood pulp is raw material for the paper maker, and so on through the list.

The suggestion that the Senator makes, that we can not manufacture this article in the United States, is precisely the same suggestion that we have heard over and over again by equally as honest and equally as sincere friends of so-called tariff reform as the Senator from Delaware. The assertion that was made over and over again in this Chamber that we could not make any tin plate in this country is ringing in our ears now, and yet we have made it, and we do supply the American market, which we could not have done if we had not put a small duty upon it, as we propose to put a small duty upon bleach in this bill.

The Senator says that he knows a great paper concern that will lose $20,000 a year if this duty is imposed. I do not believe it will lose a cent. I do not believe that if we put 11 per cent ad valorem on this product, with this great trust in England with $35,000,000 capital back of it, that it will increase the cost of bleach one single farthing to the American consumer. But even if it does, it should not be forgotten that the Rumford Falls Company, in which concern American capitalists have invested $300,000, is losing $18,000 a year by not receiving any dividends upon their investments; and they ask, and properly ask, that they shall be given a little protection in this bill, which increases very largely the duty on salt, a product that enters into their manufacture. Without protection they will not only be driven to the wall, so far as profits are concerned, but will be absolutely driven out of business, and leave us in the hands of this great English trust, to make prices high or low as may best suit their purposes.

Mr. WHITE. Will the Senator from New Hampshire permit me to ask him a question?

Mr. GALLINGER. Certainly.

Mr. WHITE. I am not clear that I fully understood the letter which the Senator read, as there was some confusion in the Chamber at the time, but my impression is that one of the documents

read by the distinguished Senator from New Hampshire states that under free salt the manufacturer was able to get along fairly well, but the imposition of a tax upon salt, that being a raw material of their manufacture, has made it essential that a compensating duty should be imposed here. Am I correct in that regard?

Mr. GALLINGER. The Senator is right to this extent, that these gentlemen do argue that the imposition of the duty on salt will increase the price, and I presume that is so.

The statement the Senator makes that they have been getting along well is not quite accurate. They have been carrying on their works and employing their hands, but not making any money. They have been simply struggling along hoping for better times.

Mr. WHITE. I understood that they had made some reference to their ability to get along better under the Wilson law in consequence of free salt as an element of that bill. I thought I had heard something of that kind.

Mr. GALLINGER. I am not quite sure as to that. They are getting along poorly anyhow; but if salt is increased in price, and it may be slightly—I am not going to argue that—they will not only fail to make a profit, but they will have still harder times than they have now, and will be compelled to go out of business.

A single word more, Mr. President. I am interested in paper manufacture to the extent that there are very large pulp and paper mills in my own State, and I have been appealed to by these gentlemen to come to their rescue in helping to put bleach on the free list, but I declined to do so for the same reason that had I been here the other day I should have voted to impose a duty on hides, in opposition to the protest of many of the leather and boot and shoe manufacturers of New England.

I claim to be, if I understand the term correctly, a national protectionist; and while I am in favor of protecting one industry I am equally in favor of protecting another industry, whether it be in the East or the West or the South or the North.

The paper manufacturers, for whom the Senator from Delaware appeals, and who protest so earnestly, are asking for increased protection for their product, which we are going to give them, and which they deserve and ought to have. I am in favor of protecting the paper manufacturers, but I am not in favor of protecting them to the detriment and destruction of an American industry which is as promising as the manufacture of bleach in the United States.

That is my attitude on this question, and I trust that this small protection of 11 per cent ad valorem, one of the smallest ad valorem duties that can be found in this entire bill, may not be stricken out by the votes of Senators following the lead of my very courteous and distinguished friend the Senator from Delaware.

Mr. ALLEN. Mr. President, I simply wanted to observe that the doctrine of protection for protection's sake alone has never been more baldly stated than by the Senator from New Hampshire just now——

Mr. GALLINGER. I am in favor of it.

Mr. ALLEN. Except as it was stated the other day by the junior Senator from New Jersey [Mr. SEWELL], who said that a given article ought to be protected because the patents on it had expired. The Senator from New Hampshire puts his argument upon the basis that this industry, while it is getting along fairly well under existing law——

Mr. GALLINGER. If the Senator will permit me, it is not getting along at all.

Mr. GRAY. It does not exist.

Mr. ALLEN. Does it exist under the present law?

Mr. GALLINGER. It does exist.

Mr. GRAY. It does not exist; it is going to exist.

Mr. ALLEN. Very well; it may be brought into existence, if I may put it in that form.

Mr. GALLINGER. I want to be understood in this matter. I insist that we are making a very considerable amount of bleach in this country; 300,000 pounds a month are manufactured in one establishment in Maine, and while they are not making money enough to pay dividends to their stockholders, they are hoping that under this bill they will be sufficiently protected to make their enterprise fairly remunerative.

If the Senator from Nebraska will permit one further observation, which I neglected to make when I was on the floor before, I will say I am a protectionist for the sake of protection, if necessary, but primarily a protectionist for the sake of revenue; and if 11 per cent is put on this product, which now comes from a great foreign trust, and which if it was located in this country would horrify the soul of the Senator from Nebraska, it will give us a little revenue and help to pay the expenses of the Government.

Mr. ALLEN. I will ask the Senator this question: Suppose there were no need of levying a tax for revenue purposes, would the Senator still be in favor of levying a tax for protection alone?

Mr. GALLINGER. I will say that I would for a time, if I believed it would result in establishing an American industry.

Mr. ALLEN. An honest confession is good for the soul, it is said. Here we have a doctrine announced—I assume it is the doctrine of the Republican party, because I have heard it announced before—that Senators are willing to impose a tax upon the people of this country, not for revenue purposes, not because it may be needed for revenue, but because it will have the effect of transferring a portion of the property or money of one class of citizens into the pockets of another. Mr. President, if that is good constitutional law, then, whenever that rule is laid down and acted upon, there is nothing to stand between the citizen, the consumer, and absolute confiscation but the mere caprice of the Congress of the United States.

The Senator says he is in favor of protection for protection's sake alone.

Mr. GALLINGER. Under some circumstances.

Mr. ALLEN. Under some circumstances; and I infer under the circumstances presented here. The Senator is in favor of a protective tariff that will protect certain classes of people; but it strikes me very forcibly that a few days ago, when the senior Senator from Utah [Mr. CANNON] introduced an amendment to this bill which was to protect the farming class of this country, the Senator from New Hampshire voted against that amendment.

The Senator says there are two or three hundred thousand dollars capital invested in this enterprise in the United States somewhere; I do not know where, and it makes no difference for the purposes of this argument.

Mr. GALLINGER. If the Senator wants to know, that amount is invested in one company in the State of Maine.

Mr. ALLEN. In one company; but it makes no difference, for the purposes of this argument, whether it is in one company or a dozen companies. But the Senator did not consider the $17,000,000,000 invested in farms and farm animals and farm equipments a few days ago when he voted against the amendment of the Senator from Utah, nor did he consider——

Mr. GALLINGER. If the Senator will permit me, I take it he does not mean to argue that the proposition made by the Senator from Utah was in the line of tariff legislation, does he?

Mr. ALLEN. I do. Mr. President, I am arguing exactly that; and how convenient it is when you come to one of these unpleasant questions for some gentleman to rise and distinguish it from the particular case under consideration at the time. But what was the amendment of the Senator from Utah but a protective tariff to the farmers of this country?

It was declared by the author of this bill that the purpose of the bill was to raise several million dollars of surplus money, and when the Senator from Utah undertook to take a portion of that money and distribute it among the five or six million farmers of this country, who are largely consumers, the Senator from New Hampshire failed to recollect his teachings and his doctrines at that time, and voted against the amendment.

Everything in the nature of a manufactured article down to the point of a pin must be protected when it is found in the form of aggregated capital, while millions and millions of men and women and little children who are engaged in unprofitable agriculture to-day are driven from the doors of this Chamber and from the Capitol of the United States as though they were aliens and had no right here. Of course, Mr. President, they do not pay election bills; they are not subject to assessments when it comes time to raise a fund to elect United States Senators or a President or anything of that kind. They are the toiling millions, unorganized among themselves, and unprotected, except as they receive some substantial protection at the hands of patriotic men who are in the public service.

If it is a good thing for this bleaching enterprise to be protected, because by legislation we can set it on its feet and make the enterprise profitable to its stockholders, why was it not profitable, why was it not honorable and just, to vote some portion of the surplus taxes arising from this bill to the wheat producers and corn producers and the meat producers and the tobacco and cotton producers of this country, so that some portion of the benefits of the bill, if there are any benefits in it, may go to these classes as well as to other classes? It makes all the difference in the world as to whose ox is gored.

Here stands the Senator from New Hampshire pleading, as only he can plead, for a protective tariff, declaring, as only he can declare, in language that only he can use, in the interest of this little enterprise, while the bended backs of the millions of men engaged in agriculture and the millions of women and children, too, go daily past his sight without provoking even an expression of sympathy.

I ask you, Mr. President, if the principle applied by the Senator from New Hampshire to this chloride enterprise is a good principle, why was it not a good principle in the eyes of the Senator from New Hampshire a few days ago when he had an opportunity to apply it to the agricultural classes of our country?

Mr. GRAY. Mr. President, I owe, of course, an apology to the Senate for consuming even five minutes more of its time, but I can

only say that this proposed tax on bleaching powder is one of great importance to some of my constituents, and is viewed by them as an attack of a very serious character upon the industry in which they are engaged. Therefore I think that statement will justify me in consuming two or three more minutes of the time of the Senate.

The Senator from New Hampshire [Mr. GALLINGER] grounds his appeal for the imposition of this tax upon the fact, as stated by him and as believed by him, that there is an industry which, if not what might be called established, yet is one that will in the near future be so established as to produce, in the language of the Senator from Michigan [Mr. BURROWS] all the bleach that is necessary for the consumption of the paper makers of the United States.

I do not understand that even the statement made by the Senator from New Hampshire controverts what I have said upon the authority of my correspondent. It is true that this Rumford Falls Company manufactures bleach, but it manufactures it for its own use as a wood-pulp maker and a paper maker, and, as I take it, the making of wood pulp and paper is the principal part of their business, occupies the most of their attention, and is the object for which this large capital was mostly invested. So that the experiment of making bleaching powder by this company is a side experiment, so to speak, to their main business. While they make a liquid gas, as I said before, sufficient for their own use, they have not made it successfully for transportation, or, if at all, in such small quantities that it is too insignificant to form a part of the business of the country.

This proposed industry is not one that is to be thrown open to competition in the United States. It does not invite everyone who has either the capacity or the experience or the capital to enter into the business, and thus create a competition which will hereafter lower the price to the users of bleaching powder; but it is an experiment to be made under the protection of patents in England and in this country. It is to be made by those who already have large capital invested in bleaching-powder works.

I have before me now the English prospectus of the Castner-Kellner Company, which proposes to work under the English and American patents, and it says in the course of its long statement of this prospective industry to grow out of this new process which has been patented:

In further evidence of the value of these patents and processes, it may be stated that the Mathieson Alkali Works—

This is an American concern, in Rhode Island, I think—

have erected at their own cost an extensive plant for the working of the Castner process in America—

That is this protected process—

and that an agreement has been entered into between them and the Aluminium Company, Limited—

That is the English concern—

for the purchase of the Castner patents in the United States for the sum of £65,000, payable £30,000 in cash and £35,000 in shares, together with substantial royalties, to be paid upon the completion and satisfactory running of the plant and the production of certain specified results. A syndicate has also been formed in Austria, "The Consortium for Electro-Chemical Industry," for the working of the Kellner process, the works for which are now being erected at Golling, near Salzburg.

So that this process by which they are to establish this new industry is the offspring of an English syndicate, protected by patents across the water and in this country, and they will seek to control the whole of that business, and will control it, if it is established here successfully, whether it be in Michigan or at Niagara Falls, or in West Virginia, where an experiment has been made upon a small scale. So this is not the ordinary case of throwing open by a protective tariff a new industry for the competition of all the people of the United States, but it is to make a subsidy for a great moneyed syndicate, with hundreds of thousands of pounds of capital, to control an industry that is to levy tribute upon the great industries in whose behalf I have been speaking.

Mr. President, I intended when I was on my feet before to have printed the substance of a letter, which I hold in my hand, in regard to this whole matter. I will ask to have it printed in the RECORD, contenting myself with reading only the following paragraph:

The experimental plants for making bleach electrolytically have sprung up from time to time in England and on the Continent, and to a small extent only in this country; but so far none of these plants have demonstrated by actual output their ability to manufacture any considerable quantity commercially. I do not believe that 5 per cent of the bleach produced and consumed in the world is to-day made electrolytically.

And that is the process that they expect to employ if this tariff is put on this manufactured article in the United States.

The electrolytic process, which is now claiming the attention of those interested in the production of chemicals generally, is the Castner-Kellner process. This process is controlled by Brunner, Mond, of England, or Solvay, of Austria, and they have been for some time erecting a plant at Western Point, near Runcorn, England. They expected to have their product on the market a year ago, but so far have only made very insignificant quantities. This is the process which the Mathieson Alkali Company propose to use at Niagara Falls, etc.

I ask to have the entire letter printed in the RECORD.

The VICE-PRESIDENT. It will be so ordered, in the absence of objection.

The letter referred to is as follows:

NEW YORK, *May 23, 1897.*

MY DEAR COLONEL: Replying to your queries of this morning, I beg to advise you that there is between 50,000 and 60,000 tons—about 2,000 pounds each—of bleaching powder imported into the United States during the year, the quantity varying with the prosperity of the country. Probably about 65 per cent of all the bleach consumed in this country is made by the United Alkali Company; the other 35 per cent is divided about equally between the other English and continental makers. The number of paper mills in the United States now in operation is between 800 and 1,000, and they consume about 35 per cent of all the bleaching powder imported into this country. The number of paper mills now in operation in Canada is between 30 and 40 only, and they do not consume over 1,500 to 2,000 tons of bleach annually.

In case a duty is placed on bleaching powder, I wish to suggest the advisability of your securing some of the cheap water power and woodland in Canada; then you can continue your export trade of paper.

The processes under which bleach is now made are the "Weldon," "Deacon," and several electrolytic. In the "Weldon" process, which is the most used, the chlorine is liberated from the hydrochloric acid by mixing it with manganese oxide. In the "Deacon" process, chlorine is liberated from the hydrochloric acid gas at a high temperature by passing this gas over bricks that have been saturated in a solution of copper. In the electrolytic process, the chlorine is liberated directly from the brine by the action of the electric current.

The experimental plants for making bleach electrolytically have sprung up from time to time in England and on the Continent, and to a small extent only in this country; but so far none of these plants has demonstrated by actual output its ability to manufacture any considerable quantity commercially. I do not believe that 5 per cent of the bleach produced and consumed in the world is to-day made electrolytically. The electrolytic process which is now claiming the attention of those interested in the production of chemicals generally is the Castner-Kellner process. This process is controlled by Brunner-Mond, of England, or Solvay, of Austria, and they have been for some time erecting a plant at Western Point, near Runcorn, England. They expected to have their product on the market a year ago, but so far have only made very insignificant quantities.

This is the process which the Mathieson Alkali Company propose to use at Niagara Falls, they having purchased the right for the sole manufacture under this process in this country, and none of that produced by this process abroad to be shipped here, consequently, should this particular electrolytic process prove to be successful, which I consider very doubtful, as they have been trying to make bleach electrolytically since 1858, there will be a greater monopoly in the manufacture of this article than has ever existed or could possibly exist with the United Alkali Company. As you are well aware, this latter company has voluntarily reduced their prices month by month to all their friends with whom they had contracts if the market warranted such reduction, and during the past four or five years of depression in trade the price of this article has been reduced from one-half to five-eighths of a cent per pound.

The fact that only a small percentage of bleach is made outside of England either on the Continent or in this country, should prove conclusively that certain uniform climatic conditions are absolutely necessary for the successful production of a high-grade bleaching powder. Several attempts have been made during the past thirty-five or forty years to manufacture bleaching powder in this country by skilled experts, and if during certain periods, with an incentive of 12 or 14 cents per pound, nothing has been accomplished, I do not expect to see it accomplished now under low-ruling prices for bleaching powder.

THE JESSUP & MOORE PAPER CO.
S. M. SHARP, *Treasurer.*

Col. A. G. PAINE, *New York.*

Mr. GRAY. Mr. President, I am only here to ask that these great and important and old-established industries be not allowed to be preyed upon by this predatory syndicate, who are seeking to establish an industry not naturally, not at their own risk, not as capital ought to come in to improve the condition of mankind and build up industries; but by doing it at the risk of manufactures and industries already long established and no less worthy than themselves.

The paper makers, to whom the Senator from New Hampshire refers as having the benefit of protection in this bill, do not need that protection at all, and are not here in any large numbers asking for increased protection, but I am told by very responsible representatives of that industry that they do not need anything in the way of additional protection; that they can get along without any at all, for they are now sending abroad their product in competition with the paper makers of the world.

Mr. TURPIE. Mr. President, as the time is approaching when the sections of the bill relating to internal revenue are to be considered, in pursuance to previous notice, I shall address the Senate upon the subject of the amendment to the pending bill which I have heretofore offered, and I ask to have the amendment read.

The VICE-PRESIDENT. The amendment proposed by the Senator from Indiana will be read.

The SECRETARY. It is proposed to add to the bill the following as new sections:

SEC. —. That on and after the 1st day of January, 1898, and for five years thereafter, there shall be laid and levied a sum equal to the rate of 2 per cent of the value of every decedent's estate, as an inheritance, whether it be testate or intestate, which shall be paid by the executors, administrators, or trustees thereof, or by the heirs or distributees, devisees or legatees, when the value of such estate as an inheritance is $5,000 and upward, except where legacies or bequests are made to religious, charitable, educational, or other organizations which may by the laws of the State, Territory, or district in which the decedent was residing at the time of his death be exempt from taxation.

SEC. —. That it shall be the duty of the collector of internal revenue of the district wherein the decedent resided at the time of his death, within one year from the time of such death, to ascertain the value of the estate as an inheritance at the time of such death, and to enter and record in a book to be provided for that purpose a list of all estates affected by the foregoing section, and to note therein the name of the decedent, the name of the executor, administrator, trustee, heir, or distributee, legatee, or devisee being in

charge of or having an interest in the same, and to note in each case the value of the estate as an inheritance, and to record therein the amount of the impost levied according to the provisions of the foregoing section in each case.

SEC. —. That as soon as the amount of the impost is ascertained and recorded as in the foregoing section provided the collector shall send, by mail, to the person or persons liable for the payment thereof notice in writing of the amount of the same, with a demand for its payment. Any person aggrieved by the amount of such levy in any such case may, within thirty days after the receipt of the notice aforesaid, bring suit, without regard to the amount in question, in the district court of the United States to have the said levy set aside or reduced. Such suit shall be tried and determined in like manner as other civil causes in said court, and the district attorney of the United States shall appear therein for the Government; and in such suit the court is empowered to enter a judgment against the person who may have brought the same for the amount, if any, of the sum levied against him as may be determined in said cause, together with the interest thereon and penalty thereon, as provided in the section next following.

SEC. —. That if the amount of such levy be paid it shall be credited in the entry of the record aforesaid, and a receipt shall be given by the collector to the person making the payment. In case of the nonpayment of the same, unless the person liable for the same shall have brought suit to set aside or reduce the levy, the collector shall, within ninety days after the time of sending the notice by mail, as heretofore mentioned, notify the district attorney of the United States of the district, who shall, upon the receipt of such notice of nonpayment, bring suit on behalf of the United States in the district court of the United States, without regard to the amount of the same, for the payment thereof, against the person or persons liable under the foregoing provisions for the payment of the same, which suit shall be tried and determined as civil suits in other cases in said court; and upon recovery against the defendant 6 per cent interest shall be collected from the time of the commencement of such suit, together with 10 per cent in damages as a penalty for nonpayment. The lien of the judgment rendered in such case against the real estate of the defendant therein shall relate back to the time of the commencement of the suit, and take effect at such time.

SEC. —. That the Secretary of the Treasury is hereby authorized to make such rules and regulations and prepare such books, forms, and papers as may be necessary to carry into effect the provisions in this enactment, and a sum of money is hereby appropriated, out of any moneys in the Treasury, that may be sufficient to defray the expenses needed for that purpose, the said appropriation to be immediately available upon the passage of this act.

Mr. TURPIE. Mr. President, remonstrance, I think, might justly be made against certain language used by Senators upon the other side of the Chamber with reference to the financial condition of the Government. It has been represented that the Government is in embarrassed circumstances, that it is in a straitened state as to funds, and the words "insolvency" and "bankruptcy" have been used as descriptive of the condition of the public Treasury. Such language is very misleading and extravagant. It is wholly unwarranted and full of mischief. Such expressions destroy confidence; they are not calculated to restore it—confidence, that plant of slow growth, the growth of which all of us are attempting to foster and cherish.

I have here a daily paper issued by the Secretary of the Treasury. It is headed, "Statement of the condition of the United States Treasury and the receipts and expenditures of the Government on the 29th day of June, 1897"—yesterday. I find one column in this paper which reads as follows:

Available cash balance, including gold reserve, $235,506,756.98.

I find a star reference to what is known as the gold reserve, where it is set down at the sum of $100,000,000. Subtracting $100,000,000 from the available cash balance, there is left to-day $135,506,756.98. That is the present cash balance in the Treasury. Certainly the public Treasury, with such an available balance, can not be said to be insolvent or even to be threatened with bankruptcy.

The critic of the fisc, of the present financial condition, admits that there is a large surplus in the Treasury, and that to have an increase of taxation now there ought to be the strongest reasons, the highest possible emergency; but he asks the question, Where did the money come from? The Government may answer that question by saying, "It is wholly irrelevant; this balance is in the Treasury; the money is there; it is lawfully applicable to any requisition, and it is for use every day in paying such debts and demands as may be made upon the Treasury for payment." That is a complete answer to the charge of bankruptcy or insolvency.

The critic of the fisc, without stating his proposition, is still dissatisfied with the present financial condition, and since he has appeared three or four times on the opposite side of the Chamber with this grievance and has not stated it himself, I will state it. His complaint is that there is an annual deficit; that is, that the receipts per year do not equal the expenditures per year, and it is for the purpose of curing this condition that the present bill is introduced. The present bill is a joint product of two parties, one of whom procured the reversion of anticipated authority after the election in November last. This is the party in power. The other assumed the official insignia of office on the 4th of March last. This is the party in office. One of these, the party in power, is altogether mercenary. The other is wholly political. They are in close alliance; indeed a family compact has been made between them with respect to the subject of this bill—the levying of duties upon imports.

The bill now pending is an attempt to arrange the conflicting interests of those two parties. Neither of the two has the slightest anxiety about the financial condition of the Treasury. Neither of the two has the slightest anxiety about the annual deficit, except as it may be an ostensible excuse for the tariff protection movement. They leave to us as Senators the task of gleaning from this vast harvest of prohibitory duties perhaps enough money to meet the expenditures of the Government. We have had annual deficits before. We had one very lately under the operation of the McKinley Act, larger than the deficit of this year, and heretofore at different periods in the history of the Government we have had annual deficits. But we have never had a deficiency of that character which has been puffed into the gigantic proportions of the present deficiency now apparent. Hawaii must wait, Cuba must wait, pensions must wait, every interest of legislation must wait upon this annual deficit.

Now, sir, there are two methods of meeting the annual deficit. One is by decreasing expenditure. The other is by an increase of taxation. There was a Roman senator who had this question before him, chief ruler of the republic, a man skilled to rule, of consular dignity, one who was familiar with large amounts raised by taxation, one who was familiar with lavish expenditures, even more lavish than our own, and in addressing the Roman people and government upon the subject of the reduction of expenditures, he said that a very good source of revenue, a most excellent source of revenue, was to be found in parsimony, in sparing frugality, in economy in the public expenditures. He insisted that a sparing economy in the public expenditures was a real source of revenue, and a real substitute for taxation.

The maxim has been often quoted; it has been often approved; it has been more often approved than followed. I do not know, sir, what attention has been given by the majority of the Finance Committee to this maxim of Cicero. I suspect that very little attention has been given to it. I am of the opinion that if the majority of the Finance Committee had taken the same time, the same trouble, had bestowed the same labor, the same earnest effort, and had made use of the same secluded isolation of the Arlington with reference to the reduction of expenditures and appropriations, we might not have had the trouble of considering this bill at all. The annual deficit would have been made up by paring the excess and excrescences of appropriations.

But, Mr. President, I am free to admit also that even if the honorable and learned majority of the committee had formulated such a measure for the reduction of expenditures, as Congress is at present constituted it could not have become the law, and that is perhaps the reason why the attempt was not made. A habit of lavish expenditure grows like other habits. It grows by what it feeds upon. Looking at the history of appropriations since 1890 and at the future of appropriations for the next eight or ten years, largely controlled by advance engagements and contracts already made by which we are bound, it may be taken as a settled thing that the ordinary expenses of the Government will not be less than $450,000,000 per year. The present appropriation bills carry that amount, if not more. It is a very large sum of money, and as the reduction of expenditures seems to be impracticable, the only way to make both ends meet is by an increase of the revenue by additional taxation.

Now, sir, if it were possible to frame a revenue bill upon the model of the first tariff law passed in 1789, a strictly revenue bill extending the rates to such articles of commerce as had come into the world since that time, we might by such a bill raise revenue sufficient to meet the expenditures; but as the States are now represented in this Chamber and as the people are now represented in the other body it is impossible to frame a tariff bill of this character. It is impracticable to do so. It follows, then, that we must provide, if we would avoid the annual deficit, for raising $450,000,000 per year. That is one of the reasons why we should always have in circulation among the people of this country at least $450,000,000 of Treasury notes as full legal-tender money, based upon the taxing power of the Government of the United States, within the limitation of appropriation and expenditure.

Within that limitation, the four hundred and fifty millions of Treasury notes are based upon the taxing power of the Government, and this taxing power of the Government is itself a thing of value. It is worth more than any mine or mineral or ore. It dominates both gold and silver, as it dominates all other property. The legal dominion of this representative of the taxing power of the Government would have been to-day manifest and apparent if it had been declared and asserted instead of having been abandoned and abdicated by those in charge of the affairs of the Treasury in the last twelve or fifteen years of our history. But let that pass.

I think it extremely doubtful, with the probabilities against the predicate, that under this bill, founded as it is only upon tariff and excises, you can raise $450,000,000 of revenue per year. I do not believe it can be done. With the present depressed state of prices and of values, the problem as presented to us contains an almost insurmountable difficulty. It is very certain that a bill founded as this is upon high protective and prohibitory lines of

tariff will not furnish that aliquot portion of the revenue which, added to the sum from other sources, will produce $450,000,000 a year. I do not care how you arrange or rearrange the tariff on protective lines discarding revenue. I do not care what disposition you make of rates and semirates always at the elevated grade. Unless revenue be made the principal end and object of the tariff bill, you will find forever that the blanket is too short withal, that the blanket is too narrow withal, to cover the *corpus delicti*, the body of the annual deficit.

I am not alone in this view. I listened very closely to the speech of the honorable Senator from Rhode Island [Mr. ALDRICH] when he opened the budget on this occasion, and I expressly noted it with reference to his declarations about how much revenue the bill would raise. He made no statement except with respect to the internal-revenue portion of the bill. He thought the increased rates on tobacco and spirits would bring $35,000,000. He made no estimate of the tariff rate only to say that the tariff rates as they came from the House would not afford sufficient revenue, and that they must be modified in order to furnish the portion necessary. With respect to a declaration founded upon figures or calculated upon any estimates as to how much the tariff portion of the bill would bring into the Treasury, he spoke one hour and a half and said nothing, with great particularity of detail. That is one of my reasons for thinking that the annual deficit is not at all provided for by the anticipated passage of the bill.

I have noticed also very closely the remarks of the learned and honorable Senator from Iowa [Mr. ALLISON], very desultory remarks, speaking six or eight or ten times a day here during the debate, as became his office, as became his duty representing, in the absence of the Senator from Rhode Island, the majority of the committee upon the bill, but I have nowhere noticed in the remarks of the honorable Senator from Iowa any approach, any approximate effort, to estimate the amount that the bill would yield to the Treasury upon the tariff rates. I feel certain that if confidence were on the other side with respect to the amount of the revenue product we would have had some evidence of it, some declaration of it by those in charge of the bill, not only mere verbiage, but a detail of facts and figures from which we might realize that the annual deficiency was to disappear to trouble us no more.

I noticed another evidence in support of the opinion I have announced. I notice that the honorable and learned Senator from Pennsylvania [Mr. QUAY] very early in the discussion introduced an amendment to the bill. He is a very conservative, thoughtful member of this body, certainly a friend of protection, certainly in the most complete amity with the majority of the committee in this case. He introduced an amendment to tax all the articles on the free list 10 per cent. Sir, we have had a free list under all the tariff laws of the Government except the first, and there was in that no basket clause, and there was a larger free list than has ever been since. Yet what is the emergency, what is the calamity, what is the exigency which induces the honorable Senator from Pennsylvania to offer an amendment making the free list not free, unless he entertains the opinion, as I do, that the tariff rates in the bill are insufficient for the purpose of the production of revenue?

Besides those special circumstances, I wish to call the attention of the Senate to particular considerations. In the internal-revenue clauses, which we are about approaching, there are two amendments, one for an increased tax on beer, one for an increment of taxation upon tobacco. Mr. President, certainly the increased tax on beer is not a satisfactory exaction. That article is already under heavy taxation, whether it be specific or ad valorem. It is one of the few articles that the war tax has been continued on from the beginning down to this day. It has always been the same. We have had remonstrances against this increase from all sorts and conditions of men and from every section of the Republic.

I do not think it would have been seriously suggested—I do not know what disposition is going to be made of it—I do not dream that it would have been printed as a part of the bill unless the majority of the committee entertained the opinion that the tariff rates would fall short, and that the shortage must be made up by an increased tax upon beer. I might say the same with reference to the unsatisfactoriness of the exaction upon tobacco. Both of those rates are odious. Is it possible that a great political party just come into power would have assumed the responsibility to suggest and to continue the suggestion to this time of an additional tax upon beer and tobacco if the majority of the committee had informed them and were themselves confident that the tariff rates would yield sufficient revenue?

Besides this, the bill proceeds upon the assumption that increasing the rates must increase the revenue, an enormous fallacy, supported by no experience, contradicted, if you will allow me the expression, by common sense. The managers and proprietors of the best show on earth had their day of commencement, their time of beginning. They had the very best opinion of their exhibition, and they may have thought and seriously thought it was worth $5 to admit a man to see it, and they may have tried that price for the first two or three days, but they would not operate long under such a tariff before discovering that to increase revenue they must reduce the rate; before discovering that by charging 50 cents or a dollar for admission they would make more money out of the exhibition than by charging four or five.

What will be the effect of the increase, the excessive increase of taxation upon imports? It must necessarily affect exports. It must necessarily reduce exports. These two act and react upon each other. It must lessen the demand for cotton, for wheat, for corn, for all the cereals, the true surplus of our country. It must lessen and reduce the price of those great commodities of international exchange. It must consequently leave the people less able to pay the rates of taxation than they are at present. I do not think there has been a bill drafted in the history of the Government which commits so large and unprovoked a spoliation upon the commerce of the world as the bill we are to-day considering. The decrease of exports and the failing market for our cereals may be considered the compensatory duties which will follow the passage of this enactment.

I do not mean those compensatory duties so often named by the honorable and learned Senator from Iowa. The honorable and learned Senator from Iowa uses the term "compensatory duties" as a graceful, delicate euphonism by which to conceal the compound larcenies found in almost every section of the bill. What I am speaking of in relation to compensatory duties refers to the great law of retaliation. The bill is a declaration of commercial war against France, Germany, and Italy, and the schedules against the republics of South America and against the trade and traffic with South America are even more severe and more exacting than those against the continent of Europe.

Mr. President, it has been thought to be a singular thing in the history of commerce that for almost a century the great traffic and trade of the republics of South America have been carried on across the South Atlantic with the old monarchies and countries of Europe, and that we of the United States get a meager moiety of it. It is the consequence of high protective-tariff legislation. In this bill we make it almost a penal offense for any man to conduct trade or traffic with the republics of South America. Its schedules are especially aimed at that trade. We talk of liberty of the seas. The seas themselves, the high seas, are tainted with this virus of so-called protection. What is the use of talking about the establishment of commercial fleets? You can invent no motor, steam or electricity, you can invent no such power as will be enabled to overcome the power of domestic avarice. No vessel can navigate against that. These consequences will certainly follow the passage of this enactment.

I call your attention, Mr. President, to the fact that the mere increase of the rates of duties has never increased revenue. Free trade brings no revenue. High prohibitive duties bring no revenue. Here the two extremes meet. The effect is the same. Between these two extremes there is a golden mean, a midway, a middle path. This middle path our country took from 1846 to 1861, fifteen years, an era of unexampled growth and progress in all arts and industries, an era of light taxation and general welfare. When, under the impetus of a great war, an overwhelming emergency, the United States left the policy of low tariff, moderate rates, and adopted the first war tariff, with high rates and excessive duties, did we stop there?

If Congress had simply passed that act and gone no further, had simply passed the war tariff, we would have had no addition to the revenue. The war tariff was accompanied in the same Congress by an act issuing $50,000,000 of Treasury notes, by another issuing $75,000,000 of Treasury notes, by another issuing $150,000,000 of Treasury notes, full legal-tender money, and hundreds of millions of dollars of Treasury notes circulated in the country during the whole period of the war, while they were collecting these taxes under the first high tariff, and it was out of this abundance that the Government gathered its income sufficient to maintain the Army in the field and to prosecute the war to a successful conclusion.

What prospect have we now of an increase in the volume of Treasury notes? Has the party which lately came into power made any such proposition? Is there any measure pending, or has it been mentioned that along with this, the highest tariff ever enacted in the country, there is to be an increase of the volume of money? None whatever. What increase of the volume of money have we to-day? Only that afforded by the free coinage of gold, more than countervailed by the exports of gold coin. The population of this country is increasing every year. The per capita of specie in it must be decreasing annually by the same rule. The per capita is decreasing, getting smaller and smaller every year. More taxes and less money seems to be a very curious programme of preparation for the good time that is said to be coming. Even the planting of the flag in the far Pacific—even that will not afford relief or rescue to our people beset with a sea of troubles and asked only to pay more taxes as a remedy.

The increase of the rates of tariff taxation without a corresponding increase in the volume of legal-tender money, of Treasury notes or coin, will be certain to bring upon us a larger deficiency than that which is now apparent. It will be certain to renew and repeat the annual deficit. It is for these reasons, sir, that the minority of the committee have in good faith presented the amendment just read. We have presented it with the best intentions, in hope perhaps that it may help to eke out that deficiency which is certain to come under a bill framed entirely upon duties and excises, and we offer it specially as a substitute for the increased rates of taxation proposed by this bill against beer and tobacco.

We offer this amendment. It is a tender. It remains with the discretion and judgment of the majority of the committee to accept it or to decline it. I may state, and I have the pleasure of stating to the honorable and learned Senator from Iowa, that this amendment has no reenforcement of expert opinion behind it. I know how much the honorable Senator has been perplexed by the specifics, the ad valorems, the differentials of tariff expert judgment and opinion. He will enjoy the consideration of a measure which has nothing behind it except merit.

The following of the dogma and practice of what is called protection has forced us face to face with the present emergency. It may be that the framers of the Constitution foresaw this emergency and foresaw it as the result of a legitimate policy of protection.

I do not believe that; but however the case may be concerning it, the framers of the Constitution have not confined taxation to duties and excises alone. This bill is constructed simply upon those two methods.

The Constitution of the United States has no pleonasm, it has no tautology, and it abstains from repetition. When two words are used, two things are meant, two distinct, separate, and independent things. It has said:

The Congress shall have power to lay and collect taxes, duties, imposts, and excises.

Direct taxes have not often been resorted to, for reasons to be hereafter given; but although they have not been much used, we have the power to lay and collect them. Duties have been resorted to every year of the Government from the first session of Congress down to the present time. Excises have been resorted to more than taxes, but I recollect for years and years when there were no Federal excises, not a dollar of tax on any domestic product, and that was not in what are known as bad times. Imposts were not heard of. They were once used during the war of 1812, and they were used in the late war—taxes upon persons and upon administrators and executors, as provided in the pending amendment. But the fact that either of these methods of raising revenue has fallen into disuse is no forfeiture of the power by Congress. Here is an armory having within it four stores or resources of the taxing power, all of which or either of which Congress may use upon a proper occasion.

Direct taxes have not been often resorted to because they have to be apportioned according to population among the different States under the census. This apportionment as a mathematical problem is not a very difficult one, but as a legislative problem it has been found to be one of extreme difficulty, for the reason that States having the largest population, and therefore having the largest apportionment of taxes for payment, and having the largest delegations in Congress, are always dissatisfied with the apportionment, and there are always a larger number of delegations dissatisfied with the apportionment than are content with it. Therefore, except in the presence of a great emergency—except in the presence of an overwhelming exigency—no direct taxes have ever been laid.

I should have thought from the opinion I find here sometimes expressed about this annual deficit of $28,000,000 for this year that this emergency exceeds everything we ever had, and there would be a proposition here from the majority of the committee to proceed to direct taxation. But in that I have been disappointed. A majority of the committee seem anxious to give a very large political meaning to this yearly deficit, but they diminish its financial significance under their mode of dealing with it to a mere bugbear.

The framers of the Constitution foresaw this obstacle to the collection of revenue. They foresaw the difficulty in the way of the apportionment of direct taxes. They therefore provided three other methods under the rule of uniformity, not of apportionment, in order that the trouble of the taxgatherer might be in some degree alleviated, and that the revenue of the Government might be supplied without resorting to the almost impracticable method of direct taxation.

Now, the rate of imposts fixed by the amendment is not a rate upon property as such. It is not a rate upon estates. It is not a rate upon the value of estates. It is a charge upon persons; a specific charge levied upon particular persons; a specific charge levied upon particular persons related to or having an interest in the function of succession, testate or intestate, incident to death. Two per cent is not laid, but a sum equal to that amount is levied. Thus the rate is made indirect, in the circumstance of the levy as well as in that of the payment. The only use of the per cent upon the value of the estate of inheritance is to afford an instrumentality for ascertaining the equivalent of value by measuring the quantity of the aggregate, the rate, just as an inspector under the excise measures the gallons in the barrel and ascertains the proof of the spirits before him. In this way certitude and uniformity are provided for in the collection of this impost from those liable thereto. Although the amount is not fixed in any particular case, the proportion is fixed in all cases.

We observe all around us every day the working of the rules of succession, and it is a matter of such common observation that we sometimes forget that it is an operation of law, an effect of government—a very marked operation of law a very notable effect of government in the highest degree of civilization. Rules of succession are not made in the natural state. They are not known to savages and uncivilized tribes. They are not known to men in a condition of servitude. The prince in an absolute despotism, upon hearing of the death of a man of substance, takes what he wishes, and leaves what he wishes, if he leaves anything, to the relatives of the decedent.

The great American common law of descent, that children shall take share and share alike, is not a law of nature. It did not come by nature. It is the result of strife for centuries, and it has been wrested from power, from privilege, from prerogative, from feudal tenure and tradition; and we clearly have the moral, the constitutional right to take from the beneficiaries thereof a slight contribution for the support of that government under which these beneficent rules obtain.

It may be said, sir, in objection to this amendment, that it provides for double taxation. Mr. President, there are very few men or things that escape taxation twice. Double or cumulative taxation can not possibly be any valid objection to the method of collecting the revenue. We all pay, in the first place, local taxes to the county, the city, the State of our residence. On that we are taxed once. We all pay federal taxation under bills like that now pending, for our supplies, for food, for shelter, for raiment, and, as in the case of a man engaged in the business of distilling, for example, paying an excise tax upon the same property for which he was formerly taxed, triple taxation. And if he is interested in selling, retail or wholesale, he pays another excise, quadruple taxation. And he pays also an excise to the State and to the county for transacting the same business, and to the city, so that the same man may be taxed seven times, eight times, upon the same property and with reference to the same business.

Neither courts nor legislatures have for the last three centuries listened with any patience to the objection that a mode of raising revenue proposes to make double or cumulative taxes. This is a cumulative tax, and so are all the others except the primary tax imposed by the State or city. It may be said this is a tax upon accumulations; that it is a tax on industry, on skill, on diligence. This is all true. So is every other tax a tax on accumulation; so is every other tax an exaction upon skill, upon diligence, upon industry. Taxes must reach those who have and keep; not those who have not.

But I ask your attention, Mr. President, to the disproportion of taxes at present on accumulation. The great mass of accumulations are very small, small in value, large in the aggregate. Take the day laborer. His accumulations, on which he is taxed and will be taxed under the pending bill, are his household and kitchen furniture, his clothing for his wife and children, his daily wages. Those are his accumulations, and they are taxed. If you go to the large accumulations of thousands and millions accumulated under this protective system, an owner will be found; sometime death will touch some person interested in a trust. Sometime death will divide and distribute the estate of such a possessor. It is such accumulations as this that are reached by a rate on inheritances.

There is no just proportion of the present tax upon accumulations. The poor man pays out of his necessity. Out of his poverty he pays the tariff taxes and others levied. The owner of millions in the way of accumulations pays the same tax, but he pays out of his abundance without a thought, without a fear, without knowing it.

Now, we say, let us impose upon these massive accumulations some just burden in proportion to the benefits that their owners have received under the protection and kindly offices of the Government. I will say nothing now about special legislation, but under the protection and auspices of the Government they have accumulated these fortunes, these vast amounts. Why should they not contribute a trifle at least for the support of the Government under which they live?

No writer upon the subject of taxation has laid down any other maxim than that taxes ought to be apportioned in accordance with the benefits received from the government under which the possessor lives, and all taxes are apportioned and have been laid

agreeably to that opinion. Take the State tax everywhere, take the city tax everywhere, take the county tax everywhere; they are laid in exact proportion to the amount of accumulation, large or small, as they may be. So that this opinion of all authors is reenforced by the practice of mankind, and it enforces the contributions upon accumulations in proportion to the benefits received.

Contrast this rate of inheritance with some of the rates in the pending bill. Contrast it with the high rates levied upon common window glass, cement, white lead, salt, wool, lumber, blankets, flannels, and shawls. Take, for example, window glass taxed in two brackets at from 107 to 115 per cent, prohibitory; intended to be prohibitory.

It may be said, however, that this is an unfair comparison and that a glass tax is a part of the tariff law, while the inheritance rate, if adopted, will belong to the branch of internal revenue. Let us look at that proposition for a few minutes. What is the tariff? It is a tax levied upon goods imported from other countries into ours. This glass tax is nominally levied as a tariff. It is claimed sometimes that the foreigners pay the tariff taxes.

The foreigners certainly will not pay this tariff on common window glass. They do not handle the goods. They do not see the goods. They know nothing about them. What really is this glass tax? It is a tax imposed upon articles of domestic manufacture. It is a tax imposed for the benefit of the owners or manufacturers of common window glass against every man who wishes to use or to buy it. It makes it very much in the nature of an excise, for an excise is a tax upon domestic products.

But, sir, I think I may be allowed to call it a left-handed excise. There is one very great difference between the glass tax and the excise. The excise tax is levied upon spirits, tobacco, and other articles which are subjected to it, and goes directly into the Treasury, less the cost of collection. The tax levied upon glass goes directly to the manufacturer of glass. Not a dollar of it goes into the Treasury. It is a left-handed excise. It is like the awkward ball that never reaches its destination. It is like the ball held in the hand of the pitcher, held fast, which he seems to want to pitch away from him, but his whole movement is a feint, and the ball never reaches the bat.

Now, the Democratic party say that a tax imposed upon any article in such a way as to interfere with the compact between the seller and buyer, to raise the price, except for the sake of revenue, except in the interest of the Treasury, is unjust, is unwarranted. The very reason for a tax law is revenue. When the revenue ceases, when the reason of the law ceases, the law ceases with it. This sort of tax is often called in this Chamber tribute. It is a tribute very near akin to pillage. It is a pillage of the many not rich. It is a pillage of the many not incorporated. It is taking away the crust and crumb from Lazarus that Dives may fare more sumptuously.

There are a great many specimens of left-handed excises in this bill. One of the most extraordinary is in the wool schedule. We all know that enough wool has been imported into the country to answer the manufacturing demand for one year; that it has been imported free of duty under the present law; and yet the taxes on blankets, flannels, shawls, women's and children's dress goods are in this bill laid upon the express assumption that the supply of wool on hand has paid duty at the rate imposed by this bill—10 cents per pound—and that this free wool is not free. So that hundreds of thousands of dollars of taxes will be levied and collected from the people upon this wool, not a penny of which will go into the National Treasury. This whole enormous amount will be handed over in a lump sum and as a mere gratuity to the corporations engaged in the manufacture of woolen fabrics.

I know, sir, it is said that these excessive rates upon woolen goods are proposed for the purpose of improving the woolen industry and improving the breed of sheep, and of increasing the quantity of the wool product in the United States. I do not believe that, but if I did believe it I would prefer the health, the safety, the comfort, the happiness of the women and children of this country to the interest of sheep or shepherd, and especially to any interest of the wolf, the wolf in sheep's clothing, who would use the hand of the taxgatherer to strip from the child in his cradle the mantle or blanket so necessary to its growth and nurture.

We have not, Mr. President, been entirely forgetful of the welfare of the animal kingdom in the United States. We have a branch of administration called the Bureau of Animal Industry. After many years of careful and costly experiment we have succeeded in reaing one kind of animals to absolute perfection. They are the tariff swine—the highly protective prohibitive tariff swine. They are gross feeders, with voracious appetite. They devour our substance with impunity. They think of making no return except a small compensatory duty derived from a slight tax upon the infant industry of bristles.

It is such exactions as these, sir, these gross, unlawful, unwarranted abuses of the taxing power, these clouds without rain, these wells without water, these rates without revenue, which show very clearly that pelf, not patriotism, is the principal component material of the schedules in the pending bill. Such exactions are contrary to the plainest dictates of justice, and will bring down upon their authors the condign punishment due to such offenses.

I appeal to Senators that they may seriously note one of the minor advantages of justice, its commercial value, if they care nothing for its greater attribute. It pays far better than any other quality in the administration of public affairs, as injustice is the most expensive and costly exercise of power. A people grow rich and opulent; how well to do that nation becomes, and all the men and women who inhabit the land, when they feel that the burdens of taxation are fairly distributed and are borne in just proportion.

What vast wealth of affection, age after age, is accumulated for that form of government wherein what is right is deemed always expedient. How selfish, sordid, and ignoble is an appeal to the citizen that offers by law special favors to a part, to any part, of the community which are denied to the whole? What is protection but a bribe, and what have bribes to do with justice? What gains can protection, so called, bring to the few which are not losses to the many?

Consider the effect of this policy upon the elective franchise, upon the vote and the voter. The ballot should be an expression of the conscience and judgment, unbribed and unbought, upon the great public questions submitted to its arbitrament, and especially it should be free from the taint of private interest or personal gain. We require that of a juryman in the ordinary court, and more especially the voter should be free from any motive of personal gain or private interest.

An election controlled by the self-styled policy of protection bids men forego and blot from their memories every consideration of public interest, every thought of national income, impelling them to combine only for the particular advantage of those who may be successful in this debasing conflict. Debauched by this intense temptation, many yield to its allurements. Others are willing to follow the lead of Mammon even up to the dead line of monopoly—the dead line of monopoly, where importations are forbidden, where competition is barred, and where the incorporated protected manufacturer absolutely controls the price of wares and wages.

This power of control is one to which no free man should be subjected, and which no free government should permit or allow. This is not taxation; it is tyranny, it is despotism—the despotism of the trusts, enforced through the imperial reigning dynasty of the yeas and nays.

One of the worst results of this false and vicious system so long embedded in the form of law is that it now assumes the mask and semblance of legitimacy. The public needs and the revenues of the Treasury are wholly subordinated to local and private interest and to corporate gains. The banditti of the syndicates are allowed to impose taxes merely for their own aggrandizement.

We have such a thing as vested rights, and it seems there must needs be vested wrongs. This is one of them—one of the lowest, one of the most degraded of vested wrongs. Of course in a country subjected, permanently subjected, to these conditions, parties must perish; all parties must perish. Factions only will survive. Factions will fight each other as wild beasts for their prey, until there is an end of even the forms of liberty.

Much has been said about differentials in this discussion. The giant differential in the pending bill is protection itself. This differential is begotten by the perversion of the lawmaking power, and it can flourish only in the decay of justice. It is this gross irrational superstition, miscalled protection, which proposes to reverse the maxim of Jefferson so that it shall read: Special privileges to all who can procure them, equal rights to none.

The pretense is made that protection is designed to encourage American industry. Can not industry be cheered to its work save by unjust burdens placed upon others—burdens grievous to be borne, imposed by that sort of skill and craft which prefers a majority on the roll call to justice and fair dealing? The promoters of this measure propose to give by its enactment a certain percentage, a particular advantage, to a corporation engaged in such a manufacture of a particular article, and they propose to give to another corporation a certain other percentage and advantage. They propose to give one trust a subsidy boon or bounty of such a form; to another trust the same; they propose to give the whole unblessed family of trusts, gifts, unwholesome, uncanny gifts, and out of this unclean mass of bribes and gifts they expect to distill the pure waters of life, of long life, health, and prosperity for our people. Vain expectation! You might as well hope to enjoy the pleasures of paradise amidst the burning marl and flaming mansions of the lost.

In offering this amendment, we do not wish to be understood as in the least degree approving the scheme or the policy of the pending bill.

We stand by the ancient landmarks of the Democratic party. We are unwilling to see the landmarks removed. I will not pronounce the malediction. Its recital is needless. We adhere with unfaltering faith to the tenets of our ancient Democratic

creed, founded, as they are, upon the letter of the Constitution and imbued with its potent beneficent spirit.

It is written that Congress is empowered "to lay and collect duties." We believe this is a joint act of power thus granted, not several, or joint and several. Duties are to be laid, and the same duties are to be collected. It is not competent to lay duties which are not to be collected any more than it is lawful to collect duties which are not laid. Laying and collecting can not be dissevered. They must, as they are placed in the Constitution, go hand in hand. To lay duties with the purpose not to collect them, at such rates and in such form as that they shall be and must be uncollectible, is to disregard the first law of the Government and to make private ends superior to the public necessities. It is to invite all those evil consequences which corruption incites, which no sophistry can allay. The people of the United States can not rightfully be taxed save for the benefit of all, and under no circumstances for the benefit of a less number.

When the interests of the public Treasury are alone consulted in laying taxes upon the citizen, what a strong and broad foundation is laid for our well-being!

The ballot is no longer in the market. The voter does not ask, "How shall I gain something for myself by voting?" but "How shall all be best aided by my action?" The franchise is then what our forefathers made it, what the justice of the Constitution intended it should be.

It is restored to its original state of purity, of dignity, and of sovereign independence.

Our fathers thought highly of justice as an element of political life and action. They thought, with the celebrated Burke, that justice was itself a great standing policy, so much so that any departure from it lay under the suspicion of being no policy at all.

They declared in the grand preface to the Constitution that "to establish justice" was one of the objects of the creation of this form of government. We have, it is true, a Department of Justice, but this is only a technical name for that branch of the public service. This by no means implies that every other department is not to be controlled by justice in its action.

The courts in this very Department so named have often decided that the laying of taxes is very much within our discretion. They will not inquire what motives induced the legislature to select particular objects or articles or persons as subjects of taxation; all this is remitted to the Congress—to the Senate as a part of the lawmaking power.

We, as Senators, have thus a very wide province wherein we are ourselves charged with the administration of justice, even in a much larger sense than any judicial tribunal. Our responsibility is yet more grave, the consequences of our errors more far-reaching. The demand upon us in the exercise of this power, for the purest faith and the highest integrity of purpose, is one of the necessities of our position.

FRANCHISE OF THE MINTS.

We are not to content ourselves with even the best revision of the tariff or the most excellent reform of the law of Federal taxation. To establish justice, other and greater reforms are needed.

The highest law of the land declares "that the Congress shall have power to coin money and regulate the value thereof," meaning "the current coin of the United States," as mentioned in a following section. The people of the several colonies and States during the Colonial and Revolutionary periods had this power and exercised it. The States under the Articles of Confederation had this power to coin money of silver and gold and exercised it, and the States did not surrender this power to the General Government until 1789. It was an absolute surrender of such power, not for the purpose of destruction or abatement, but of being further used by a greater power of more extended jurisdiction—the Congress of the United States.

The grant is exclusive, since it is also written:

No State shall coin money or make anything but gold and silver coin a tender for the payment of debts.

It would have been a thing strange and anomalous to form a government for a great nation without giving it the power to coin money and regulate its value, or without the power to declare what should be a legal tender. There is no such defect in our form of government. All these powers are granted, and the kind of money to be coined and valued as the only legal tender is designated "gold and silver coin," "current coin of the United States."

It is yet, therefore, much stranger, more anomalous, that the governments of other nations should in any manner control the coinage, value, or legal tender of the money made under our own act, and more strange than all that we should refuse to exercise the constitutional power so granted to us.

These powers were granted for use and exercise, not to be vitiated or destroyed either as to the two metals to be coined, their legal-tender function, or their value.

Only three years after the organization of the Government the Congress passed a law providing for the free coinage of gold and of silver, providing also that the silver as well as the gold coin in dollars so made, the current coin of the United States, should be a lawful tender in all payments whatsoever. This was interpretation contemporaneous—a necessary, imperative, and primary construction of the organic law. The law is not changed to this day. It will take the votes of three-fourths of the States to change it. How many States of this Union would vote to make gold the only legal tender?

The power thus granted and used to coin money of silver as well as gold, to fix its value and legal-tender quality, is expressed in the same language as to its grant, and is set forth in the same section as the power "to lay and collect taxes, duties, excises, and imposts."

It is not said anywhere that Congress shall coin money; it is not said anywhere that Congress shall lay taxes. The power to do both is given in the same words, and this power devolves the duty upon us to obey the language and the spirit of both these grants. Both powers are of binding obligation, are continuous and perpetual in their operation, and as long and as constantly as we levy taxes and collect them we ought to maintain the free coinage at the mints of both metals.

We have no more power or right to abandon the free coinage of silver than we have to cease the free coinage of gold. We have no more constitutional right to abandon the coinage of both metals at the existing ratio as a lawful tender in all payments than we have to cease the levy and collection of taxes for the support of the Government.

Let us be prepared to do our duty. Let us obey the Constitution and return to the law of our fathers.

It is true that the direst terms of prediction and prophecy, wholly unsupported by fulfillment, have been used to depict the consequence of our obedience—the obedience of Congress to the Constitution of the United States.

But we know to a certainty without consulting prophecy what have been the consequences of disobedience.

The present condition of the country shows that this disobedience has brought death, commercial dearth, and death into our world, and has filled every portion of the Republic with increasing distress and disaster.

Let us reestablish constitutional justice so long overthrown. Let us again restore the franchise of the mint.

The unbought second thought of the people will gladly welcome such a consummation. We may then under that benign policy, even under this tariff act of 1897, with all its faults, possibly gather enough funds to supply the needs of Government. We may not only cure the present deficit, but shall thus have the most certain safeguard against its recurrence.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Indiana [Mr. TURPIE].

Mr. ALLISON. I understand the Senator from Indiana does not desire to press a vote upon his amendment at this time.

Mr. TURPIE. No; I am willing that it shall be considered hereafter.

The VICE-PRESIDENT. The Senator from Missouri [Mr. VEST] has moved to strike out paragraph 7½ as amended by the committee. The orderly procedure will be to take the vote on inserting paragraph 7½.

Mr. ALLISON. I hope the vote will be taken in that form. The paragraph is not yet in the bill, I understand.

The VICE-PRESIDENT. The paragraph is not yet in the bill.

Mr. JONES of Arkansas. The question is on the adoption of the amendment, as I understand.

The VICE-PRESIDENT. It is.

Mr. JONES of Arkansas. The Senators in favor of incorporating paragraph 7½ in the bill will vote "yea?"

Mr. ALLISON. Yes.

Mr. JONES of Arkansas. There is no objection to the vote being taken in that way.

The VICE-PRESIDENT. The Chair will put the question on the adoption of the committee amendment as it has been amended, which is to insert the new paragraph 7½. Those who are in favor of that motion will vote "yea."

Mr. TELLER. I want to say a word or two on that question. The Senator from New Hampshire [Mr. GALLINGER] rather challenged the statement I made with reference to the output of bleaching powder in the State of Maine from a concern which he mentioned. I am not certain that I was accurate in my statement, but I gave the best authority that I could get for it.

According to the Senator's statement, the establishment referred to is making only enough bleaching powder to supply the market of this country for about twelve days; that is, their yearly output would supply the demand for about twelve days.

I am informed by those who profess to know that there is no successful manufacture of bleaching powder in the United States, and that there never has been a successful one; that is to say, there has never been one that has been commercially successful and which at the same time has produced a good article. The article produced in this country, according to the statements made to me of people who use it very largely—and it is used very largely

in the State of Colorado and in all the other mining States in the reduction of gold ores—is that the American product has never been satisfactory, and that the only product that has been satisfactory was that furnished from either Germany or England. I do not know why this is so, and do not pretend to say, but there is no manufacture of this article that I know of now in the United States which can be called a success.

The Senator from Michigan [Mr. BURROWS] stated that it was in contemplation to start a factory in the State of Michigan. I suppose they have all the ingredients necessary for making bleaching powder in Michigan, and they have had them since the early settlement of the country, and I understand they are about to start a factory at Niagara Falls, which will produce, I think, about 25 tons a day. Of course that would be a pretty large factory compared with any in existence that I know of for the manufacture of this article, but that factory is not yet in existence, and whether it will be a success or not depends upon the question of whether the English patent, which has been referred to by the Senator from Delaware, is a success or not. If that should prove to be a success, then there will be 25 tons a day manufactured. The amount used in the United States, according to my information, is about 150,000 tons.

Mr. President, this article enters not only into the manufacture of paper, as stated by the Senator from Delaware, but it enters into the manufacture of textiles of various kinds and the manufacture of cloths. It is used in several large reduction works of gold ore in the United States; and there is one system of reduction in which it is used very largely. It is very largely used in the State of Colorado, although I am not able to say as to the exact quantity which is used there.

I have here a letter from one of the leading reduction works, and I have also some telegrams from other reduction works in Colorado, protesting against a duty on this material.

As this bill came from the House of Representatives this article was on the free list, in paragraph 578, as follows:

Lime, chloride of, or bleaching powder.

The committee have not given us any reason up to the present time why it should be put upon the dutiable list, except the very unsatisfactory statement that somebody was going to start a factory in Michigan, and that possibly a factory would be established at Niagara Falls. My correspondent from Colorado says:

First. That the use of bleaching powder is such an imperative necessity of an important branch of metallurgical industry in Colorado that the imposition of a duty will work a hardship on established industry in this State, as well as in other Western States.

Second. That there is at present practically no American industry of this sort to protect.

Third. That the price which now obtains in our market is such as to already permit the profitable manufacture of bleaching powder in this country.

Fourth. That it appears the chief object of the proposed duty is to advance the interests of a patent process not yet in practical operation.

That is the process the Senator from Delaware referred to.

Mr. President, I do not intend to take up any time except to say that there has been no reason given why this article should be protected. I am a believer in producing everything in this country that we can produce, and not buying it abroad, but I do not believe that this duty will do anything more than raise the price to the American consumer, though possibly it may encourage the people who have been referred to, who have a patent process which is of a very doubtful character, I am informed, though I am not qualified, perhaps, to speak technically upon that subject.

I speak now upon this subject simply from the intercourse I have had with men in my State who are using this article, and because of the letters I have received

If the committee could assure me that there was a bare possibility that this would become one of the industries of the country, I would not object to putting the article upon the dutiable list; but I understand the effort to make this powder has been going on in this country for a number of years, and, so far as I have been informed, every effort has been a failure, I may say, both commercially and as to the quality of the article produced.

I think, according to the Republican doctrine of protection, we ought not to put a duty upon this article, unless there is some reason to suppose the duty will foster and encourage its production, because it is apparent to everybody that manufactured articles, such as I have mentioned, will be more or less hampered and embarrassed by the raising of the price in consequence of the duty.

If the committee are prepared to show us that there is a fair prospect of properly making this article in this country, I should not object to the proposed duty; but my informant, who is a man qualified to speak upon this subject, assures me that the only articles of this character which have been found satisfactory are those of either German or English production. Our own product has not been satisfactory, and will not be, unless there is a different method of production, which I suppose is now perhaps anticipated by these two patents—I do not know as to that—but unless there is something of that kind the article will not be produced in this country to the satisfaction of the consumer.

The VICE-PRESIDENT. The question is on inserting paragraph 7½ as it has been amended.

Mr. JONES of Arkansas. I call for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I am paired with the senior Senator from New Jersey [Mr. SMITH], but I transfer that pair to the Senator from Maine [Mr. HALE], who is paired with the Senator from Arkansas [Mr. JONES], which will leave the Senator from Arkansas and myself at liberty to vote. I vote "yea."

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER], and therefore withhold my vote.

The roll call was concluded.

Mr. ALLEN. I inquire if the Senator from New Hampshire [Mr. CHANDLER] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. ALLEN. I am paired with that Senator, and therefore withhold my vote.

Mr. SPOONER. I inquire if the Senator from Mississippi [Mr. WALTHALL] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. SPOONER. I have a general pair with that Senator, and therefore withhold my vote.

Mr. HANSBROUGH. I am paired with the senior Senator from Virginia [Mr. DANIEL], and therefore withhold my vote.

Mr. PLATT of New York. I am paired with the senior Senator from New York [Mr. MURPHY]. If he were present, I should vote "yea."

Mr. PRITCHARD (after having voted in the affirmative). I inquire if the junior Senator from South Carolina [Mr. MCLAURIN] is recorded as having voted?

The VICE-PRESIDENT. The junior Senator from South Carolina has not voted.

Mr. PRITCHARD. Then I withdraw my vote, as I am paired with that Senator.

Mr. DEBOE (after having voted in the affirmative). I withdraw my vote, as I am paired with the Senator from South Dakota [Mr. PETTIGREW], who is not present.

Mr. MANTLE. I desire to state that the Senator from Utah [Mr. CANNON] is paired with the Senator from Rhode Island [Mr. ALDRICH]. That pair will stand upon this vote, as the Senator from Utah, if here, would vote against the amendment.

Mr. BURROWS (after having voted in the affirmative). I inquire if the senior Senator from Louisiana [Mr. CAFFERY] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. BURROWS. Then I withdraw my vote, as I am paired with that Senator.

Mr. SHOUP (after having voted in the affirmative). I inquire if the senior Senator from California [Mr. WHITE] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. SHOUP. I am paired with that Senator, and withdraw my vote.

The result was announced—yeas 30, nays 27; as follows:

YEAS—30.

Allison,	Gallinger,	McEnery,	Quay,
Carter,	Gear,	McMillan,	Sewell,
Clark,	Hanna,	Mason,	Thurston,
Cullom,	Hawley,	Nelson,	Wellington,
Elkins,	Hoar,	Penrose,	Wetmore,
Fairbanks,	Jones, Nev.	Perkins,	Wilson.
Foraker,	Lodge,	Platt, Conn.	
Frye,	McBride,	Proctor,	

NAYS—27.

Bacon,	Faulkner,	Mallory,	Rawlins,
Bate,	Gray,	Mantle,	Roach,
Berry,	Harris, Kans.	Mills,	Stewart,
Butler,	Heitfeld,	Mitchell,	Teller,
Chilton,	Jones, Ark.	Morgan,	Tillman,
Clay,	Kenney,	Pasco,	Vest.
Cockrell,	Lindsay,	Pettus,	

NOT VOTING—32.

Aldrich,	Davis,	McLaurin,	Smith,
Allen,	Deboe,	Martin,	Spooner,
Baker,	George,	Morrill,	Turner,
Burrows,	Gorman,	Murphy,	Turpie,
Caffery,	Hale,	Pettigrew,	Walthall,
Cannon,	Hansbrough,	Platt, N. Y.	Warren,
Chandler,	Harris, Tenn.	Pritchard,	White,
Daniel,	Kyle,	Shoup,	Wolcott.

So the amendment as amended was agreed to.

Mr. ALLISON. I ask now to return to paragraph 86, passed over last evening.

The SECRETARY. Paragraph 86 as amended reads as follows:

Plaster rock or gypsum, crude, $1 per ton; if ground or calcined, $1.50 per ton; pearl hardening for paper makers' use, 20 per cent ad valorem.

Mr. BUTLER. Mr. President, gypsum is used for fertilizer to no little extent. In Virginia, North Carolina, South Carolina, and other States it is used for top-dressing, especially for grass, pease, potatoes, etc. It is delivered at our seaport towns from Nova Scotia at about $2 per ton. If a duty of $1.50 a ton is placed on it, then, of course, we will be forced to pay $3.50 per ton. Our Western friends ask for this duty because they have deposits in

their States. But they are thoroughly protected by distance. Transportation rates are about 1 cent per ton per mile. Therefore 100 miles distance amounts to a protection of all they ask.

In the South we can never use the land plaster from the Western States on account of these freight rates. If this duty is put on, we will continue to get this fertilizing material from Canada and be forced to pay more for it. The farmer gets nothing out of this tariff bill, and should not thus be taxed for the benefit of a very few. This material is now on the free list. It was on the free list in the McKinley bill; it has been on the free list for over sixty years, and should always stay on the free list.

Mr. President, I move to strike out paragraph 86 and put this article on the free list.

The PRESIDING OFFICER (Mr. GALLINGER in the chair). The question is on agreeing to the motion of the Senator from North Carolina to strike out paragraph 86.

Mr. VEST. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. DEBOE (when his name was called). I am paired with the Senator from South Dakota [Mr. PETTIGREW].

Mr. PLATT of New York (when his name was called). I am paired with the senior Senator from New York [Mr. MURPHY].

Mr. PROCTOR (when his name was called). I am paired with the junior Senator from Florida [Mr. MALLORY].

The roll call was concluded.

Mr. GEAR. I transfer my pair with the Senator from New Jersey [Mr. SMITH] to the Senator from Maine [Mr. HALE], and will vote. I vote "nay."

Mr. HANNA (after having voted in the negative). Has the junior Senator from Utah [Mr. RAWLINS] voted?

The PRESIDING OFFICER. The Chair is informed that he has not voted.

Mr. HANNA. I will withdraw my vote, being paired with that Senator.

Mr. BURROWS (after having voted in the negative). I am paired with the senior Senator from Louisiana [Mr. CAFFERY]. I do not see him in the Chamber, and therefore withdraw my vote.

The result was announced—yeas 24, nays 30; as follows:

YEAS—24.

Bacon,	Faulkner,	Martin,	Teller,
Bate,	Gray,	Mills,	Tillman,
Berry,	Jones, Ark.	Mitchell,	Turpie,
Butler,	Kenney,	Morgan,	Vest,
Clay,	Lindsay,	Pasco,	Walthall,
Cockrell,	McLaurin,	Pettus,	White.

NAYS—30.

Allison,	Gear,	Nelson,	Spooner,
Baker,	Hoar,	Penrose,	Stewart,
Cullom,	Jones, Nev.	Perkins,	Thurston,
Elkins,	Lodge,	Platt, Conn.	Wellington,
Fairbanks,	McBride,	Pritchard,	Wetmore,
Foraker,	McMillan,	Quay,	Wilson.
Frye,	Mantle,	Sewell,	
Gallinger,	Mason,	Shoup,	

NOT VOTING—35.

Aldrich,	Daniel,	Harris, Tenn.	Platt, N. Y.
Allen,	Davis,	Hawley,	Proctor,
Burrows,	Deboe,	Heitfeld,	Rawlins,
Caffery,	George,	Kyle,	Roach,
Cannon,	Gorman,	McEnery,	Smith,
Carter,	Hale,	Mallory,	Turner,
Chandler,	Hanna,	Morrill,	Warren,
Chilton,	Hansbrough,	Murphy,	Wolcott.
Clark,	Harris, Kans.	Pettigrew,	

So the motion was rejected.

Mr. PLATT of Connecticut. Is the paragraph completed?

The PRESIDING OFFICER. It is completed.

Mr. PLATT of Connecticut. The next paragraph is 88. When this paragraph was under consideration before, ground fuller's earth had been put at $3 a ton, and the Senator from South Dakota [Mr. PETTIGREW] thereupon moved to make unwrought fuller's earth $2 a ton. I have had some conference with the Senator from South Dakota, and I desire that the amendment already adopted may be changed so that it will read as I send it to the desk. I will say that that is satisfactory to the Senator from South Dakota and has the approval of the majority of the Finance Committee.

The PRESIDING OFFICER. The amendment as proposed to be modified will be read.

Mr. JONES of Arkansas. Is this a substitute for the paragraph?

Mr. PLATT of Connecticut. No.

The SECRETARY. It is proposed to amend the amendment so as to read:

Fuller's earth, unwrought and unmanufactured, $2 per ton; wrought or manufactured, $4 per ton.

The PRESIDING OFFICER. Without objection, the vote by which the amendment was agreed to will be reconsidered, and the question is on agreeing to the amendment to the amendment.

Mr. JONES of Arkansas. Let us understand where it occurs. I do not know where it comes in.

Mr. PLATT of Connecticut. At the end of the paragraph.

The SECRETARY. At the end of paragraph 88 it is proposed to insert:

Fuller's earth, unwrought and unmanufactured, $2 per ton; wrought or manufactured, $4 per ton.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. PLATT of Connecticut. I desire, on behalf of the committee, to amend paragraph 88, in line 19, by striking out "fifty" and inserting "twenty-five;" and in line 21 by striking out "$3" and inserting "$2.50."

The SECRETARY. In line 19, paragraph 88, it is proposed to strike out "fifty" and insert "twenty-five;" and in line 21 it is proposed to strike out "$3" and insert "$2.50;" so as to read:

Asphaltum and bitumen, crude, if not dried or otherwise advanced in any manner, $1.25 per ton; if dried or otherwise advanced in any manner, $2.50 per ton.

The amendment was agreed to.

Mr. VEST. I simply wish to call attention to the fact that the last two items, upon which the duty is put at $1.25 and $2.50, were on the free list under the McKinley Act and are there under existing law. Now it is proposed to put this enormous duty upon the articles.

As to fuller's earth, as a matter of course the Senator from South Dakota is satisfied, because it is all he asked. It seems now that a compromise has been effected between the little factory in Connecticut, of which the Senator from South Dakota spoke so eloquently the other day, and the raw material without consulting the consumers of the country at all.

Mr. QUAY. It seems to me that the duty proposed by the committee on asphalt is entirely too high. I suggest to the Senator in charge of the bill, instead of $2.50 a ton, to make it $1.50 per ton.

Mr. ALLISON. The whole matter will be in conference and can be dealt with after more careful examination.

Mr. JONES of Arkansas. What is under consideration?

Mr. QUAY. The duty upon asphalt.

Mr. GRAY. What paragraph?

Mr. QUAY. Paragraph 88, lines 21 and 22, crude asphalt. It ought not to be over $1.50 per ton on the crude, and on the dried or otherwise advanced, $1. I think that would be a fair duty and ought to be submitted to, because it is purely a revenue duty. It is a tax upon the streets of every town in the United States that uses asphalt, and no one is protected under it.

Mr. GRAY. They can stand it better than the poor man referred to by the Senator from Delaware [Mr. GRAY].

Mr. QUAY. I trust the Senator from Iowa will see the propriety of reducing the duty.

Mr. ALLISON. I regret I can not.

Mr. QUAY. I suppose I have to submit for the present.

Mr. SEWELL. I call the attention of the Senator from Iowa to the concluding part of the paragraph, bauxite. Was it not the intention to restore that?

Mr. ALLISON. It has been restored.

Mr. PLATT of Connecticut. The paragraph is now completed, is it not?

The PRESIDING OFFICER. The Chair so understands.

Mr. ALLISON. And it has been agreed to?

The PRESIDING OFFICER. It has been agreed to.

Mr. VEST. Has the paragraph been adopted? I should like to take a vote on the paragraph. Let us have the yeas and nays.

The PRESIDING OFFICER. Does the Senator from Missouri move to strike out the paragraph?

Mr. VEST. I ask for the yeas and nays on agreeing to the increases.

Mr. ALLISON. On the adoption of the paragraph?

Mr. VEST. On the adoption of the paragraph.

The PRESIDING OFFICER. The yeas and nays are demanded on the adoption of the paragraph as amended.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BURROWS (when his name was called). I am paired with the senior Senator from Louisiana [Mr. CAFFERY].

Mr. CLARK (when his name was called). I am paired with the junior Senator from Kansas [Mr. HARRIS].

Mr. PLATT of New York (when his name was called). I wish to announce for the day my pair with the senior Senator from New York [Mr. MURPHY].

Mr. TILLMAN (when his name was called). I have a general pair with the Senator from Nebraska [Mr. THURSTON]. He has voted, which leaves me at liberty to vote, but I have consented to pair with the Senator from South Dakota [Mr. PETTIGREW] who is absent. I therefore withhold my vote.

The roll call was concluded.

Mr. WARREN. I again announce my pair with the junior Senator from Washington [Mr. TURNER].

Mr. WHITE. Upon this vote I am paired with the Senator from Utah [Mr. CANNON]. If he were present, I should vote "nay."

Mr. WELLINGTON. I desire to inquire if the Senator from North Carolina [Mr. BUTLER] has voted?

The PRESIDING OFFICER. The Chair is informed he has not voted.

Mr. WELLINGTON. Being paired with that Senator, I withhold my vote.

Mr. GEAR. I transfer my pair with the Senator from New Jersey [Mr. SMITH] to the Senator from Maine [Mr. HALE], and I will vote. I vote "yea."

Mr. ALLEN. Has the Senator from New Hampshire [Mr. CHANDLER] voted?

The PRESIDING OFFICER. The Chair is informed that he has not voted.

Mr. ALLEN. Being paired with that Senator, I withhold my vote.

The PRESIDING OFFICER. The Chair will take the liberty to announce a pair between the Senator from North Carolina [Mr. PRITCHARD] and the Senator from South Carolina [Mr. MCLAURIN].

The Secretary recapitulated the vote.

Mr. QUAY. I understand the vote just taken is upon the adoption of the paragraph as amended. That vote has not been taken usually with paragraphs during the last week. It is not the usual course.

The PRESIDING OFFICER. The Chair has not yet announced the result. That is the question, however.

Mr. QUAY. That is the vote. It seems to me that is not a proper vote at the present. If it is, I would ask the gentlemen in charge of the bill whether it concludes amendment after we have passed out of Committee of the Whole?

The PRESIDING OFFICER. The Chair will venture to suggest that in its opinion the motion was not a proper motion to make, although as to two or three former paragraphs in the bill a similar motion was made and entertained. The motion should have been to strike out the paragraph, inasmuch as after the amendments to the House paragraph had been agreed to it was practically completed. Hereafter if the present occupant happens to be in the chair, he will insist upon the motion being made in that form.

Mr. ALLISON. The matter will be open in the Senate, as a matter of course.

The result was announced—yeas 36, nays 22; as follows:

YEAS—36.

Allison,	Frye,	Lodge,	Proctor,
Baker,	Gallinger,	McBride,	Sewell,
Carter,	Gear,	McMillan,	Shoup,
Cullom,	Hanna,	Mantle,	Spooner,
Davis,	Hansbrough,	Mason,	Stewart,
Deboe,	Hawley,	Nelson,	Teller,
Elkins,	Hoar,	Penrose,	Thurston,
Fairbanks,	Jones, Nev.	Perkins,	Wetmore,
Foraker,	Kyle,	Platt, Conn.	Wilson.

NAYS—22.

Bacon,	Daniel,	Mallory,	Roach,
Bate,	Faulkner,	Martin,	Turpie,
Berry,	Gray,	Mills,	Vest,
Chilton,	Jones, Ark.	Mitchell,	Walthall.
Clay,	Kenney,	Morgan,	
Cockrell,	Lindsay,	Pettus,	

NOT VOTING—31.

Aldrich,	George,	Morrill,	Smith,
Allen,	Gorman,	Murphy,	Tillman,
Burrows,	Hale,	Pasco,	Turner,
Butler,	Harris, Kans.	Pettigrew,	Warren,
Caffery,	Harris, Tenn.	Platt, N. Y.	Wellington,
Cannon,	Heitfeld,	Pritchard,	White,
Chandler,	McEnery,	Quay,	Wolcott.
Clark,	McLaurin,	Rawlins,	

So the paragraph as amended was agreed to.

Mr. HOAR. I desire to suggest that the difference is merely as to the mode of statement, and in parliamentary bodies it is sometimes put one way and sometimes the other. For instance, in the House of Commons, if there is a motion to strike out, the question is, Shall the paragraph stand? So it is the same thing as a motion to strike out.

The PRESIDING OFFICER. Practically.

Mr. ALLISON. In connection with paragraph 164, amended a few days ago, it is necessary to make some amendments to paragraph 125. Therefore at this time I propose the amendments which I send to the desk, and I wish to call the attention of the Senator from Alabama [Mr. PETTUS] to the fact that this is the paragraph to which he alluded the other day.

The SECRETARY. On page 34, paragraph 125, line 8, after the word "steel," it is proposed to insert "not otherwise provided for in this act;" in the same paragraph, line 24, insert after the word "made" the words "steel bands or strips untempered, suitable for making band saws, 3 cents per pound and 20 per cent ad valorem; if tempered or tempered and polished, 6 cents per pound and 20 per cent ad valorem."

The PRESIDING OFFICER. Without objection, the first amendment to the paragraph will be considered as agreed to.

Mr. PETTUS. There was a motion made by the Senator from Georgia [Mr. BACON]. He was here a moment ago. I desire his presence. He was here and his attention was called to it, and I presume he will be back in a moment. He moved to put cotton ties on the free list, or something to that effect.

Mr. ALLISON. The second amendment offered by the committee has not yet been agreed to.

The PRESIDING OFFICER. Without objection, the second amendment will be considered as agreed to. It is agreed to.

Mr. ALLISON. A few days ago the Senator from Alabama called my attention to an amendment which had been proposed, or notice given of its proposal, respecting cotton ties. As we are now at this paragraph, it might be well to consider that question.

Mr. PETTUS. If the Senator will allow me, I desire to postpone it until the Senator from Georgia can be heard from. He made the motion.

Mr. ALLISON. I ask that paragraph 125 may now be read as it stands in the bill, with all the amendments which have been agreed to respecting it.

The PRESIDING OFFICER. Paragraph 125 will be read as it stands amended.

The Secretary read as follows:

125. Hoop, band, or scroll iron or steel, not otherwise provided for in this act, valued at 3 cents per pound or less, 8 inches or less in width, and less than three-eighths of 1 inch thick, and not thinner than No. 10 wire gauge, five-tenths of 1 cent per pound; thinner than No. 10 wire gauge and not thinner than No. 20 wire gauge, six-tenths of 1 cent per pound; thinner than No. 20 wire gauge, eight-tenths of 1 cent per pound: *Provided*, That hoop or band iron, or hoop or band steel, cut to length, or wholly or partly manufactured into hoops or ties, barrel hoops of iron or steel, and hoop or band iron or hoop or band steel flared, splayed, or punched, with or without buckles or fastenings, shall pay one-tenth of 1 cent per pound more duty than that imposed on the hoop or band iron or steel from which they are made; steel bands or strips untempered, suitable for making band saws, 3 cents per pound and 20 per cent ad valorem; if tempered or tempered and polished, 6 cents per pound and 20 per cent ad valorem.

Mr. PETTUS. I desire to be informed as to the amendment proposed by the Senator from Georgia. It is on record.

Mr. CLAY. My colleague has been called away for a few minutes. I know the Senator from Iowa——

Mr. ALLISON. If the Senator prefers that it should be passed over, we will go on with something else.

Mr. CLAY. I should be glad to have it passed over, because I know my colleague desires to be heard upon his amendment.

Mr. WHITE. If the Senator from Iowa will permit a suggestion, wherever a motion has been made to put an article on the free list, it appears the readier way to determine the whole subject would be to vote directly as to whether the article should or should not go upon the free list, because if we settle the question affirmatively, it will go upon the free list and then its elimination from the rest of the bill is a mere pro forma matter. It can be more readily disposed of in that way than by first taking a vote on the paragraphs and thereafter taking a vote upon placing the article in the free list, as we now have to do with reference to three or four.

We have already stricken three or four articles from the paragraphs in the dutiable list. It would be better to test the sense of the Senate by moving to put articles on the free list when it is reached.

Mr. JONES of Arkansas. The item of cotton ties has already been stricken out of the bill and a motion is pending to insert them in the free list as paragraph 517½.

Mr. ALLISON. But I had the paragraph read for the purpose of showing the Senator that cotton ties had not been stricken out. I had the paragraph read as it now stands in the bill.

Mr. WHITE. It appears to me the difference is quite immaterial.

Mr. ALLISON. I know it is.

Mr. WHITE. I believe we have made some mistake in procedure in following the policy of eliminating the matter from a certain paragraph, because then in any event we must afterwards have a vote to put it on the free list, whereas if we had voted to put it on the free list directly when that was reached, the other could be considered purely pro forma to eliminate it from the dutiable list. We have several examples of that kind which are hereafter to be reached.

Mr. ALLISON. I ask the Senate to proceed to paragraph 238.

Mr. PETTUS. Before we leave paragraph 125, I desire distinctly to understand what is the condition of the amendment proposed by the Senator from Georgia to put cotton ties on the free list.

Mr. SPOONER. It was passed over.

The PRESIDING OFFICER. The Chair is informed that it was passed over.

Mr. PETTUS. Has anything been done to its prejudice? That is what I want to know.

Mr. ALLISON. If that amendment is pending, it will be passed over. If it is not pending, it can be offered later. I hope that will be satisfactory to the Senator from Alabama. I ask that the committee amendment to paragraph 238 be stated.

The SECRETARY. In paragraph 238, page 71, line 8, after the word "Beans," strike out "fifty" and insert "forty;" so as to make the paragraph read:

238. Beans, 40 cents per bushel of 60 pounds.

The amendment was agreed to.

Mr. GRAY. Has the paragraph as amended been agreed to?

Mr. ALLISON. The Chair rules that it is not necessary to be voted on unless there is a motion to strike out. I now ask the Secretary to turn to paragraph 251.

The VICE-PRESIDENT. The Chair will suggest that he is informed that all the amendments of the committee to paragraph 251 were agreed to with the exception of the last amendment, which is now pending.

Mr. ALLISON. Let the amendment be stated.

The SECRETARY. On page 73, line 14, paragraph 251, after the word "act," strike out "forty" and insert "twenty-five;" so as to make the paragraph read:

251. Seeds: Castor beans or seeds, 25 cents per bushel of 50 pounds; flaxseed or linseed and other oil seeds not specially provided for in this act, 25 cents per bushel of 56 pounds; poppy seed, 15 cents per bushel; but no drawback shall be allowed upon oil cake made from imported seed, nor shall any allowance be made for dirt or other impurities in any seed; seeds of all kinds not specially provided for in this act, 25 per cent ad valorem.

The PRESIDING OFFICER. The question is on the amendment proposed by the committee, which has just been read, to strike out "forty" and insert "twenty-five."

The amendment was agreed to.

Mr. ALLISON. The next item is paragraph 206.

The PRESIDING OFFICER. The Secretary will read the paragraph.

Mr. ALLISON. I understand that paragraph 206 has been agreed to with the exception that when the last proviso was read I stated that the committee might possibly have some amendment to propose. I merely give notice now that we have no amendment to propose and that the paragraph will be disposed of accordingly.

Mr. GRAY. The committee amendment is to strike out that proviso?

Mr. ALLISON. No; we restore it.

Mr. JONES of Arkansas. The paragraph is not restored, I understand.

Mr. ALLISON. We withdrew, or, rather, the Senate disagreed to, all our amendments proposed as a substitute for that paragraph.

Mr. JONES of Arkansas. And then amended the text of paragraph 206 as it came from the House.

Mr. ALLISON. Which left the paragraph to stand as in the original text, and that was amended, as is known, and then the consideration of it was passed over because I gave notice that we might, perhaps, strike out the last proviso.

Mr. JONES of Arkansas. And now the proposed action of the committee is to leave the proviso as it came from the House?

Mr. ALLISON. Yes; to leave in that proviso.

Mr. JONES of Arkansas. I am opposed to the proviso remaining in the bill, and I will state the reason in a very few words.

The PRESIDING OFFICER. If the Senator from Arkansas will suspend a moment, the Secretary will read the proviso of paragraph 206 now under consideration.

The SECRETARY. Paragraph 206, page 64, line 12, after the word "produced," the proviso is as follows:

Provided, That nothing herein contained shall be so construed as to abrogate or in any manner impair or affect the provisions of the treaty of commercial reciprocity concluded between the United States and the King of the Hawaiian Islands on the 30th day of January, 1875, or the provisions of any act of Congress heretofore passed for the execution of the same.

Mr. JONES of Arkansas. It would be entirely useless for me to make any motion to amend the proviso, but I will state that I believe there should be notice given for the abrogation of the treaty with the Hawaiian Islands. The reason for adopting the treaty, in the first place, was that the people of the United States would by reason of not putting a duty on Hawaiian sugar have sugar somewhat cheaper than it would be with the tariff. The operation of the treaty remits the duties to the amount of millions of dollars.

I understand there is a contract between the sugar producers of the Hawaiian Islands and the sugar refiners in the United States, by which the agreed price to be paid to the producers of Hawaiian sugar by the refiners in the United States is the New York price for sugar less one-quarter of a cent. In other words, sugar is bought abroad and brought into New York and the tariff is paid on the sugar, thereby increasing its value. The price paid to the Hawaiian sugar producers is only one-quarter of a cent under the New York price of duty-paid sugar, so that the sugar producers get the whole amount of the tariff tax less one-quarter of a cent, which goes to the refiners; and the American consumers get none whatever. The millions of dollars which are remitted under the operation of the treaty are divided between the refiners and the Hawaiian sugar producers; and the American people pay just as much for sugar as they would if the full amount of the tax was paid. For that reason I am opposed to the continuance of this system.

The PRESIDING OFFICER. The question is on agreeing to the proviso just read.

Mr. WHITE. Although the committee has made no indication of the reasons actuating its members, or rather the majority of the members of the Committee on Finance, yet I assume that the motive for the withdrawal of their proposition is the pendency of the proposed Hawaiian annexation treaty. Am I right in that regard, I will ask the Senator from Iowa?

Mr. ALLISON. As I understand the situation, when the matter was up some days ago I gave notice that we might wish to make an amendment to that paragraph respecting the abrogation of the treaty or its modification in some way. The committee had not then prepared any amendment in that direction. Now, as there is a treaty supposed to be pending, there seems to be an added reason why we should not make any change, and therefore no amendment is to be offered. I submit that unless some amendment is offered the paragraph is already disposed of.

The PRESIDING OFFICER. The Chair would so rule, having been informed by the clerks——

Mr. WHITE. Mr. President, if this point is made for the purpose of preventing discussion, I presume I can offer an amendment.

The PRESIDING OFFICER. That would be in order, the Chair would rule.

Mr. ALLISON. I make no question about that.

Mr. WHITE. I do not propose to be foreclosed from making a remark on the matter.

Mr. ALLISON. I hope the Senator does not so regard it. I only intended to ascertain the exact status of the question.

Mr. WHITE. Yes, sir; I have been trying to do so without very much success.

Mr. President, the Senator from Rhode Island [Mr. ALDRICH], who has been unfortunately detained from the Chamber, presented the original Senate report, which has been so sadly emasculated and so fearfully treated since his departure. He made an address representing his committee associates, and from which there was no dissent by any one upon the other side of the Chamber. His announcement was to all intents and purposes the official declaration of the Republican majority here. He there said:

The committee will also prepare and present an amendment to the House provisions in regard to the Hawaiian treaty. The existing commercial treaty between the United States and the Government of these islands provides for the free admission of raw sugars, the product of the islands, into the United States. If this treaty should remain in force, it would result in giving a bounty to the Hawaiian sugar producers amounting to more than $8,000,000 per annum. It was not contemplated, when the original treaty was made or when it was extended, that any possible advantage of this kind could ever result from its terms to the people of the Sandwich Islands.

The effect of this bounty would undoubtedly be to stimulate enormously the production of sugar in the Hawaiian Islands. While we can not fairly abrogate a treaty of this kind with a friendly country without notice, we believe that negotiations should at once be entered into looking to such a modification of the treaty as will reduce the bounty to be paid Hawaiian sugar producers to a reasonable sum, and the committee will present an amendment looking in this direction at an early day.

There should be no difficulty in securing through the treaty-making power such modifications of the treaty as will be satisfactory to both countries without injury to either. It certainly can not be expected that the United States will continue for any length of time to pay a bonus of seven or eight millions of dollars per annum as an inducement to any foreign country to trade with us. I assume there will be no difficulty in securing proper modifications of the treaty so that it will not be necessary for the Government of the United States to give the one year's notice of the abrogation of the treaty which is provided for by its terms.

Like many other promises made at that time, and no doubt made in good faith, there has been no realization. On the contrary, the programme has been altered, and the train is proceeding in a contrary direction. Our friends have abandoned their position.

Mr. President, in my judgment it would be utterly unfair in any event to abrogate the Hawaiian treaty without notice; and while I do not believe that the existing treaty is a fair one to the people of the United States, I would be unwilling to disregard it. I agree with the Senator from Arkansas that notice of abrogation should be given, and I would cheerfully vote for a treaty with the Hawaiian Islands of a nature really reciprocal, a treaty giving and taking in fair proportions. But if it is to be the policy, especially of the other side of the Chamber (because we know that Senators there who do not believe in this annexation scheme at all have to some extent given assurance that they will acquiesce as a matter of party policy), that this scheme is to go through in the end, I agree that it would be unwise now to give any attention to the preparation of a new treaty or the abrogation of existing arrangements.

If we are to embark in the business of annexing these islands 2,000 miles from our shores, having a population of 1,900 American men, 1,100 American women, 31,000 full-blood natives, 8,000 half bloods, 24,000 Japanese, 21,000 Chinese, 15,000 Portuguese, etc., altogether aggregating 109,000, and being for the most part nonassimilative—if this is our purpose, if we are to engage in business of this sort, I agree it is utterly futile now to attempt to abrogate or to modify any treaty with Hawaii. While I did intend to urge upon the Senate the necessity of a notice of abrogation, so that there might be a new treaty negotiated that would be fair to all, yet,

under the circumstances prevailing, it appears to me that there is nothing to do but to follow the Senator from Iowa and preserve the present status for the time being.

The PRESIDING OFFICER. Paragraph 206 is completed.

Mr. MORGAN. I present an amendment to the pending bill, and ask to have it printed.

The PRESIDING OFFICER. That order will be made.

Mr. PLATT of Connecticut. Now, paragraph 394 is, I think, the next.

The PRESIDING OFFICER. The amendment of the committee to paragraph 394 will be stated.

Mr. WHITE. Paragraph 281 contains a matter which I called to the attention of the committee, and which the committee promised to investigate. I will mention it now, if the Senator from Connecticut will turn to it, for the consideration of the committee. My attention has been called to it by a member of the Board of General Appraisers of the United States.

It will be observed that cocoa butter or cocoa butterine is upon the dutiable list. If it is the policy to tax cocoa butterine, then cocoanut oil should be included with it, because the experts of the Department (I quote Mr. Sharretts, the president of the General Board of Appraisers) state that it is utterly impossible to distinguish one from the other. They are used for the same purpose; they are practically indistinguishable, and the courts have so held. Some use can be made commercially of the imposition of a tax upon cocoanut oil, because cocoanuts are largely imported into this country, and the oil can be made from them. There is no reason why there should be any discrimination. I call the attention of the Senator from Connecticut to the matter, as I am told by the Treasury experts that it is impossible to draw the distinction. Whatever treatment one receives should be accorded to the other.

Mr. PLATT of Connecticut. We shall make a memorandum of the matter and it will be considered.

Mr. WHITE. If the Senator will kindly do so.

Mr. PLATT of Connecticut. We have not considered it. Perhaps cocoanut oil is on the free list under paragraph 603. I would rather the consideration of it might be postponed.

Mr. WHITE. Very well. If the Senator from Connecticut will look into the matter, he will find that an examination will verify the conclusion which I have reached.

The next paragraph passed over was paragraph 394, on page 137, after line 15, which the Committee on Finance proposed to strike out, in the following words:

394. Surface-coated papers, plain, embossed, or marbled, 3 cents per pound and 10 per cent ad valorem; if printed, or covered with metal or its solutions, or with gelatin or flock, 3 cents per pound and 20 per cent ad valorem; parchment papers, and plain basic photographic papers for albumenizing, sensitizing or barita coating, 2 cents per pound and 10 per cent ad valorem; manufactures of surface-coated or parchment papers, 10 per cent ad valorem in addition to the foregoing rates on the same papers; lithographic prints from stone, zinc, aluminum, or other material, bound or unbound (except cigar labels and bands, lettered or blank, music, and illustrations when forming a part of a periodical or newspaper and accompanying the same, or if bound in or forming part of printed books), on paper or other material not exceeding eight one-thousandths of an inch in thickness, 25 cents per pound; on paper or other material exceeding eight one-thousandths of an inch and not exceeding twenty one-thousandths of an inch in thickness, and exceeding 35 square inches cutting size in dimensions, 12 cents per pound; prints exceeding eight one-thousandths of an inch and not exceeding twenty one-thousandths of an inch in thickness and not exceeding 35 square inches cutting size in dimensions, 10 cents per pound; lithographic prints from stone, zinc, aluminum, or other material, on cardboard or other material, exceeding twenty one-thousandths of an inch in thickness, 9 cents per pound; lithographic cigar labels and bands, lettered or blank, printed from stone, zinc, aluminum, or other material, if printed in less than ten colors, but not including labels printed in whole or in part in bronze or metal leaf, 20 cents per pound; if printed in ten or more colors, and including labels printed in whole or in part in bronze, but not including labels printed in whole or in part in metal leaf, 25 cents per pound; if printed in whole or in part in metal leaf, 40 cents per pound.

And to insert in lieu thereof:

394. Surface-coated papers not specially provided for in this act, 2½ cents per pound and 15 per cent ad valorem; if printed, or wholly or partly covered with metal or its solutions, or with gelatin or flock, 3 cents per pound and 20 per cent ad valorem; parchment papers and plain basic photographic papers for albumenizing, sensitizing, or baryta coating, 2 cents per pound and 10 per cent ad valorem; albumenized or sensitized paper or paper otherwise surface coated for photographic purposes, 30 per cent ad valorem.

Mr. PLATT of Connecticut. On page 13, line 17, the committee propose, after the word "papers," to insert a comma, and strike out the word "and" and insert in lieu thereof "2 cents per pound and 10 per cent ad valorem," and a semicolon; so as to read:

Parchment papers, 2 cents per pound and 10 per cent ad valorem; plain basic photographic papers, etc.

The amendment to the amendment was agreed to.

Mr. PLATT of Connecticut. In line 19, paragraph 394, after the word "coating," I move to strike out "two" and insert "three;" and in the same line, before the words "per centum," to strike out "ten" and insert "twenty."

The PRESIDING OFFICER. The amendment proposed by the Senator from Connecticut to the amendment of the committee will be stated.

The SECRETARY. In paragraph 394, page 134, line 19, after the word "coating," it is proposed to strike out "two" and insert "three;" and in the same line, before the words "per centum," to strike out "ten" and insert "twenty;" so as to read:

Plain basic photographic papers for albumenizing, sensitizing, or baryta coating, 3 cents per pound and 20 per cent ad valorem.

The amendment to the amendment was agreed to.

Mr. PLATT of Connecticut. I ask that the vote by which paragraph 395c was agreed to may be reconsidered informally, in order that an amendment may be proposed.

Mr. JONES of Arkansas. I should like to know the condition of paragraph 394.

The PRESIDING OFFICER. The question is upon agreeing to paragraph 394 as amended.

Mr. JONES of Arkansas. The committee's amendment.

The PRESIDING OFFICER. The amendment of the committee as amended.

Mr. JONES of Arkansas. I shall not undertake to discuss this proposition, as I know but little about it; but I hold in my hand a letter addressed to the Senator from West Virginia [Mr. FAULKNER] from a person engaged in this business. It seems to present the case very fully, and I will ask that it be inserted in the RECORD as part of my remarks.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The paper referred to is as follows:

NEW YORK, *June 10, 1897.*

DEAR SIR: In the discussion of Schedule M, paragraph 394, of the tariff bill we wish to draw your valued attention to the following facts:

It has been the custom for the American manufacturers, in their statements to the Committee on Ways and Means, to make assertions for which they had no foundation, undoubtedly relying on the want of knowledge by the committee as to the true facts to help their case. In the letter of a committee of the manufacturers of surface-coated papers is the following: "The consequence of these fraudulent undervaluations has been that more than 25 per cent of our manufacturers have had to close their works, and the rest of them have been working at a loss to themselves and their workmen, all hoping that relief from the present distress might be granted by our representatives."

There has not been one single instance in which a failure or suspension can be traced, either directly or indirectly, to foreign competition. There have been, unfortunately, losses in the paper business, but this one particular branch certainly could not hope for immunity from the general depression or of a divine interposition in their favor as against all others. It is to be regretted that the price of coated paper is as it is to-day, but there are lower prices in every grade of paper to which foreign competition is not a party than there are where it enters. In the case of "friction white," a pound of which is not imported, the price, by reason of domestic competition, has reached a point at which it is admitted that no mill can sell at a profit, and far below what it would be possible for us to make it on the other side. "Enamel book," which is a surface-coated paper and not imported, is virtually in the same state as are the friction papers, showing that instead of being a detriment, foreign competition is virtually a stimulant, since it regulates indirectly the number of operating mills here and prevents the overstocked market.

In support of this contention, Vernon Bros. & Co., in their letter to the Committee on Ways and Means, referring to tissue and copying paper, and their desire to have the duty remain as it now stands, take the same ground, yet are inconsistent enough to advocate the increase of duty on surface-coated papers. If this applies to tissues, it would most certainly apply to other grades. Crocker, Burbank & Co., in their letter to the Committee on Ways and Means, claim that "raw stock" has been cheaper here than in Germany, and as this is one of the principal items and cost of surface-coated papers, it goes far to equalize the so-called difference of "cheap foreign labor." This, however, is not taken into consideration, but we are taxed under the new bill practically 60 per cent on an article of which the base is admitted, by one of our largest and most prominent manufacturers, to be cheaper here than in Germany.

Regarding the contention of undervaluation, for the stoppage of which the specific duty is urged, the only evidence which can possibly be given is that of the said "committee of the manufacturers of surface-coated papers of the United States," whose convincing and overwhelming evidence is in the fact that a foreign mill, for the protection of their accredited agent, or, more properly speaking, firm dealing in their goods, and thereby having the sole selling right for the United States, refused to give direct quotations. Inasmuch as we individually are concerned, we should refuse to have business dealings with a firm who, after we had created a market for their goods, had dispensed with our services and given quotations and sold direct to the consumer. What the abovesaid committee has considered an evidence of undervaluation was simply an evidence of the integrity and honor of the foreign in contradistinction to the domestic mills.

Permit us, on this same point, to give you the views of one of the largest dealers in surface-coated papers in the United States. In speaking of the effect of a high tariff, inasmuch as it concerned the dealer, he said: "I am a protectionist as far as legitimate protection and general interests will allow, but the effect of a prohibitory tariff on papers would ultimately result in wiping out the dealer or 'middleman,' since there is not a good-sized order on which the domestic mills are not willing to quote direct. If they were allowed their own way, they would wipe us entirely out of existence, without any benefit to themselves, and our only safety is in the protection that the foreign market affords." This is the view of a dealer who has suffered by the home competition, and the effect which he fears will be the effect in all lines. Unfortunately, as yet we do not seem to realize that the gradual "getting rid" of the smaller dealer is responsible for the many unemployed, and that the inducement, "direct from the maker to the consumer," is a detriment which no cheapening or lowering of prices can equalize.

Mr. Ethan Allen Doty gave a comparative schedule of duties, as per the present, and the duties proposed by his committee. We give you, as Exhibit A, a copy of his schedule, and as Exhibit B, a schedule of other grades, completing his list, as he, most undoubtedly by an oversight, neglected the cheaper and more commonly used papers, giving simply those which are of little or no demand. As Exhibit C, we give you the schedule as according to the rate of a Senate bill. Schedule M, paragraph 394, and will point out its many, to say the least, peculiarities.

In Bracket A, of which grade probably three-fourths of the importation consists, there is a differenc of 21 per cent in favor of a better grade of paper, giving practically or nearly the same duty as now on a grade of goods which are made in this country, and on the cheaper grade, which are not made in this country, an additional duty of 26 per cent. You will find the same discriminating features in Brackets B and C. In Bracket D the duty upon the same classification ranges from 40 to 70 per cent. In the "White D-D" the foreign price is 4½ cents f. o. b. Hamburg; the domestic price for American goods is 5½ cents f. o. b. almost anywhere. Thus you are asked for an additional 40 per cent protection on an article which even at the present prices and duty the American mills are selling far below the price which any foreign competition would warrant. In Bracket H, the range is from 29 to 50 per cent duty, and this on a grade of goods which are not manufactured in this country and on which there can not be possibly any reason for an increased duty for "protection."

Therefore in the summary you will find that in every instance the discrimination has been against the cheaper grade, that which is used on boxes that go to the "poor American mechanic and laborer" (for G. O. P. campaign purposes only), whom and in whose favor all tariff measures are formed.

If you will compare Exhibit B, or the completion of Mr. Doty's schedule, with the bill as it even now stands, you will find that the discrimination is even still more marked and that the "protection" on the cheaper flints is 81 per cent and the discrimination 41 per cent, and that in Bracket B the discrimination is 58 per cent, with the duty 109 per cent on an article which the freight rate alone would not allow us to compete on, and in Bracket H the discrimination is 33 per cent. It most certainly seems that this could not have been an oversight on the manufacturers' part, for with their knowledge and practical ideas they most undoubtedly could, if they had wished, present a bill that would have given a more even rate of duty and still at the same time have possessed some of the specific features which they claim is not only requisite but absolutely necessary for the protection of the Government.

In conclusion, we wish to draw your attention to parchment paper, on which the proposed duty is 2 cents per pound and 10 per cent ad valorem. We quote from the letter of the Patterson Parchment Paper Company to the Committee on Ways and Means:

"Parchment paper is of two kinds or grades, or paper made in imitation of and possessing the qualities of parchment in greater or less degree.

"First, vegetable parchment paper, or parchment paper, is the result of the action of sulphuric acid on 'unsized' or cotton paper.

"Two processes are involved: (a) Making the waterleaf paper of all cotton rags; (b) parchmentizing the waterleaf in sulphuric acid.

"The double operation, the character and quantity of material required, and the inutility of the waste make this an expensive paper to manufacture.

"Second, parchmine, or No. 2 parchment, is a peculiarly sized paper, made directly upon the paper machine. On account of cheaper labor, the German manufacturers have made a constantly decreasing price in the United States; they maintain prices in Europe at about 10 to 11 cents per pound, which, considering their cheaper labor and materials, is a fair market price for the paper there.

"At present, last prices quoted by their agents and importers here, viz, 9½ cents, f. o. b. New York, less 2 per cent thirty days, the influence of the German competition has been so great that three American manufacturers have been driven out of the business, viz:

"A. G. Elliot & Co. built the mill of the Philadelphia Parchment Company at Rose Glen, near Philadelphia, capable of making 8,000 pounds of paper per day; were obliged to retire from the business in 1892, after having lost, it is reported, $60,000. They have since become the principal importers of German parchment.

"C. A. Rudolph & Co., whose mill was located in Manayunk, Philadelphia, capable of making 4,000 pounds of paper per day, closed up and retired from business in 1893, and lost the value of their plant.

"A parchment-paper company in Ohio, capable of making 2,000 pounds of paper per day, was likewise driven out of business in 1894. All of these parties were forced out of the manufacture by the lowering of prices."

In support of our "contention" we would submit, first, the statement of Crocker, Burbank & Co., one of the most prominent and largest makers of "raw stock" in this country, that raw stock is cheaper here than in Germany, and therefore that as the labor which is required in the mere parchmentizing is of but a proportionately exceedingly small figure, and that, raw stock cheaper, consequently the "American laborer" does not need a "protection" of 40 per cent, but that the real protection would be that given the consumer by reason of an open market and even competition, which he would have under a practically free rate on parchment paper. The inference to be drawn from their statement in regard to foreign prices would be that American mills were selling at above 11 cents, whereas the fact is that American prices in most instances are practically 10 cents, and the only reason foreign goods can find a market at a trifling advance in price is by reason of their superiority.

There can be no comparison as far as competition is concerned between parchmine or No. 2 parchment at 9½ cents and No. 1 parchment, and as for the theory that the firms mentioned were driven out of business by reason of these prices, or rather by reason of the 9½-cent price, it is rather absurd, since this is 1897 and the claim is that those prices given are present prices and that Elliot was "driven" out of business in 1892, Rudolph & Co. in 1893, and the unknown company in 1894. Rudolph & Co., we believe, became tired of the business before they really knew whether they could make an article which was satisfactory and the consuming trade would use.

In regard to the "unknown" the general trade's memory for names is not more retentive than is that of the Paterson Parchment Paper Company and Glen Mills Paper Company. A. G. Elliot & Co. say, "We were not forced out of the business by reason of the prices or losses, but by reason of mismanagement of our mill and because our increasing jobbing interests compelled us to attend to them and did not allow of the time necessary to the successful running and supervision of our mill. The losses in connection therewith were more due to the fact of having to introduce a new article, and in the introduction of which we, as well as the American manufacturers, are now reaping the benefit."

In regard to Mr. Elliot's present position in the matter, attached find Exhibits D and E—D a circular letter, and E a letter to one of his representatives.

In conclusion, herewith we state our belief and contention that the present duties are more than sufficient and requisite for the "protection" of home industry, and that any higher duties will be simply to encourage an unwarranted shutting out of supplies, thereby encouraging unwarranted building of domestic mills, resulting finally in a glutted market and ruinously low prices.

Hoping that you will do all that you can for a just and equitable schedule, we remain, most honorable sir,

Most respectfully, yours,

MANUEL KNAUTH & Co.,
By FRANCIS X. GOVERS.

Hon. CHARLES FAULKNER,
Washington, D. C.

EXHIBIT A.

SCHEDULE SUBMITTED BY MR. ETHAN ALLEN DOTY, MANUFACTURER, NEW YORK CITY.

Mr. Ethan Allen Doty, of Doty & Scrimgeour, of New York City, in transmitting the memorial of the manufacturers of surface-coated papers printed above, inclosed the following schedule and comparison:

Schedule showing difference of duty collected on the various fine grades of surface-coated papers at the present rate of duty, and the rate proposed by the American manufacturers.

Grade of paper.	Cost in Europe per ream.	Dutiable value in United States.	Present rate of duty.	Amount collected at present.	Weight per ream.	Proposed 5 cents per pound.	New duty, 25 per cent ad valorem.	Amount to be collected as proposed.
	Marks.		*Per ct.*		*Lbs.*			
Fancy printed, common	10.00	$2.40	30	$0.72	34	$1.70	$0.60	$2.30
Fancy printed, fine	19.20	4.60	30	1.38	35	1.75	1.15	2.90
Gold paper, ordinary	31.00	7.44	30	2.232	17	.85	1.86	2.71
Gold paper, fine	34.00	8.16	30	2.448	17	.85	2.04	2.89
Silver paper, ordinary	21.00	5.04	30	1.512	14	.70	1.25	1.96
Silver paper, fine	36.00	8.64	30	2.592	21	1.05	2.16	3.21
Gold-vein paper	40.00	9.60	30	2.88	32	1.60	2.40	4.00
Gelatin paper	114.00	27.36	30	8.208	50	2.50	6.84	9.34
Flock paper	*113.00	22.60	30	6.78	51	2.55	5.65	8.20
Total		95.84		28.752				37.51
Average to our ream		10.65		3.19				4.17

*Francs.

Increase of duty per ream, 98 cents, or 9.20 per cent.

EXHIBIT B.

Table of duties on surface-coated papers, as per proposed amendment, at 5 cents per pound.

EXHIBIT D.

[A. G. Elliot & Co., paper warehouse, 30, 32, and 34 South Sixth street.]

PHILADELPHIA, ——— —, *1897.*

Hon. ——— ———.

DEAR SIR: We would respectfully ask for a reduction in the clause stating, "Manufactures of paper not otherwise provided for, 35 per cent," to the old and satisfactory rate of 20 per cent that existed prior to and in the Wilson tariff, for the reason that all the principal lines of paper are provided for under special duties, and what few goods may come under the clause "not otherwise provided for" would be barred out, with no advantage to domestic manufacturers and to the injury of the United States Government by want of revenue.

To make the duty prohibitory is to deprive the market of a stimulus that goods of a foreign make always give. We have but to refer to Mexico to see the effect of excessive rates of duty. There the home manufacturer has no incentive to improve his product, as his customers are compelled to take anything his mills produce.

Whilst strongly favoring protective duties, we as strongly deprecate unreasonable prohibitory rates. Under the present and former rates of 20 per cent on "Manufactures of paper not otherwise provided for," few or none objected, and the paper industry has prospered until large quantities of different grades are weekly exported.

To satisfy one or two parties, the rate under the Dingley bill is advanced 75 per cent, an increase uncalled for and exceedingly unjust. We therefore most earnestly protest against this great advance, believing if enacted the reverse of benefit will result to the paper trade and the Government will be deprived of a reasonable revenue.

Just rates, as stated, stimulate our manufacturers and, by encouraging fair quantities to be imported, give revenue to the Government, whilst excessive or prohibitory duties are demoralizing on all sides.

We would further urge that, if it is deemed best, the specific duty on parchment paper be 2 cents per pound, without the additional 10 per cent, but much prefer the present 30 per cent rate, which meets all requirements.

Very truly, yours,

——— ———.

EXHIBIT E.

PHILADELPHIA, *May 10, 1897.*

Hon. ——— ———,

Washington, D. C.

DEAR SIR: Referring to our former protest on the proposed duty on parchment papers, we again respectfully urge that in making the duties specific at 2 cents per pound the extra 10 per cent be omitted.

At this rate, which is equivalent to the ad valorem duty under the McKinley bill, American manufacturers will be protected and the Government have a revenue from those desiring to use foreign papers.

Whilst strongly favoring protective duties, we as strongly deprecate unreasonable prohibitory rates, and trust that the present and former rates of 20 per cent on manufactured paper not otherwise provided for be continued, to which few or none object; and the paper industry has prospered until large quantities of different grades are weekly exported.

At the earnest solicitation of many customers, we would ask that the 2½ cents per pound specific duty on surface-coated papers be continued and the 15 per cent ad valorem stricken out. One of our customers in the South writes:

"The new duty is so excessive and prohibitory that, if enacted, it will compel us to close our establishment on fine goods, while the Government of the United States will be deprived of at least $1,000,000 revenue from imported papers. My people are all Democrats, and not in very good favor with the present Administration, though as gold Democrats they materially helped to elect the Republican President."

Trusting that your valuable aid will be given to the reasonable consideration of this branch of the paper industry, we are, with assurances of respect,

Yours, truly,

——— ———.

The PRESIDING OFFICER. The question is on the amendment of the committee as amended, inserting a new paragraph as a substitute for paragraph 394.

The amendment as amended was agreed to.

The PRESIDING OFFICER. Does the Senator from Connecticut ask to have the vote reconsidered by which paragraph 395c was adopted?

Mr. PLATT of Connecticut. I do, in order that the amendment which I send to the desk may be considered.

The PRESIDING OFFICER. Without objection, the vote by which the paragraph was adopted will be regarded as reconsidered, and the amendment proposed by the Senator from Connecticut will be stated.

The SECRETARY. It is proposed to add at the end of the committee's amendment inserting paragraph 395c "all Jacquard designs of one-line paper, or parts of such designs, finished or unfinished, 35 per cent ad valorem; all Jacquard designs cut on Jacquard cards, or parts of such designs, finished or unfinished, 35 per cent ad valorem."

The PRESIDING OFFICER. The question is on the amendment of the Senator from Connecticut to the amendment of the committee.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question recurs on the adoption of the amendment of the committee inserting paragraph 395c as amended.

The amendment as amended was agreed to.

Mr. PLATT of Connecticut. I wish also to reconsider the vote by which paragraph 395e was placed in the bill, so that I may present an amendment to it.

The PRESIDING OFFICER. Without objection, the vote whereby paragraph 395e was agreed to will be regarded as reconsidered.

Mr. PLATT of Connecticut. In behalf of the majority of the Committee on Finance, I propose the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from Connecticut to the amendment will be stated.

The SECRETARY. It is proposed to add at the end of paragraph 395e, already adopted on the report of the Finance Committee, a semicolon, and the following:

Envelopes of parchment, or imitation parchment or tissue paper, for inclosing photographs, 40 cents per 1,000 and 15 per cent ad valorem.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The question recurs on the adoption of paragraph 395e as amended.

The paragraph as amended was agreed to.

Mr. PLATT of Connecticut. Now, I move to insert a new paragraph, to be called paragraph 395g.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to insert as a new paragraph the following:

395g. All fancy paper boxes, made of paper, or of which paper is the component material of chief value, or if covered with surface-coated paper, 45 per cent ad valorem.

The amendment was agreed to.

Mr. ALLISON. Has the paper schedule been disposed of, Mr. President?

The PRESIDING OFFICER. It has been disposed of.

Mr. ALLISON. The next paragraph passed over is paragraph 405, and I ask that that may be now taken up.

The PRESIDING OFFICER. That will be the order, in the absence of objection.

The Secretary read the amendments proposed by the Committee on Finance to paragraph 405; which were, in line 9, after the word "coal," to strike out "bituminous;" in line 13, after the word "bushel," to strike out the semicolon and the word "coke" and insert:

Provided, however, That the duty on coal and shale shall be 60 cents per ton, and on coal slack or culm, 15 cents per ton, when imported from any country, colony, or dependency that does not impose upon coal or coal slack or culm higher rates of duty than those named in this proviso. Coke.

So as to make the paragraph read:

405. Coal and shale, 75 cents per ton of 28 bushels, 80 pounds to the bushel; coal slack or culm, such as will pass through a half-inch screen, 30 cents per ton of 28 bushels, 80 pounds to the bushel: *Provided, however*, That the duty on coal and shale shall be 60 cents per ton, and on coal slack or culm, 15 cents per ton, when imported from any country, colony, or dependency that does not impose upon coal or coal slack or culm higher rates of duty than those named in this proviso. Coke, 20 per cent ad valorem.

Mr. ALLISON. The committee instruct me to modify the amendment by striking out the paragraph and inserting what I send to the Secretary's desk. We propose to strike out the paragraph merely for convenience, so as to get a complete paragraph without including the proviso before recommended by the committee.

The PRESIDING OFFICER. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. It is proposed to strike out paragraph 405 and in lieu thereof to insert:

405. Coal, bituminous, and all coals containing less than 92 per cent of fixed carbon, and shale, 67 cents per ton of 28 bushels, 80 pounds to the bushel; coal slack or culm, such as will pass through a half-inch screen, 15 cents per ton of 28 bushels, 80 pounds to the bushel; coke, 20 per cent ad valorem.

The PRESIDING OFFICER. The question is on the amendment, in the nature of a substitute, submitted by the Senator from Iowa [Mr. ALLISON] in behalf of the committee, for paragraph 405.

Mr. FAULKNER. Mr. President, I do not desire to detain the Senate with reference to this subject, but I desire to have incorporated in the RECORD, as part of my remarks, without reading

it, to show the advantage of the duty imposed by the Wilson law to the coal interests of my State, an editorial from the leading Republican paper of the State, the Wheeling Intelligencer of June 15.

The PRESIDING OFFICER. Without objection, that order will be made.

The article referred to is as follows:

TRIUMPH OF WEST VIRGINIA COAL.

There are many people in West Virginia who, though they realize the rapid advancement that is being made in the development of the coal industry of the State, and are posted upon the vast extent of the territory, the richness of the coal veins, and the important place the State occupies as a producer, are not wholly aware of the triumphs that are being achieved by our product in the outside world.

As already stated in the Intelligencer, the statistics of coal production in the United States last year showed West Virginia to be third in the list of States, and is hustling Ohio very close for second place. Our production last year was almost 13,000,000 tons, the exact figures being 12,876,296, valued at $8,336,685. This was an increase of a million and a half tons over the previous year, in spite of the general business depression.

So much for our progress in point of production. It is very gratifying to all West Virginians; but in this connection we desire to call attention to a fact which is not generally known outside of the coal trade with regard to the reputation held by certain of our coals abroad, which insures a future enormous market for them, a market which has hitherto been controlled by foreign coals.

It may not, for instance, be known by many that Pocahontas coal, mined in the Pocahontas region in this State, enjoys the unique distinction of being the only coal in the world that has been officially indorsed by the Governments of both Great Britain and the United States as the best steam fuel now mined. Heretofore the Cardiff coal, mined in Wales, has had that distinction, but the rapid exhaustion of the Cardiff fields and the relative cost of Cardiff and American coals have caused the British Government to look into the possibilities of the British coal trade in South America being supplanted by the American product.

The British ambassador at Washington, who has, at the direction of his Government, made a thorough investigation, reported more than two years ago that for steam vessels the West Virginia coals were equal to, if not superior to, the Cardiff product, and in a report made by Mr. Arthur Peel to Sir Julian Pauncefote it was stated that if favorable freight rates could be secured on American coal the foreign (South American) coal markets, held by the English shippers, might soon be flooded with supplies from the fields of Virginia and West Virginia.

This admission promises much for the industry in this State. Added to this testimony as to the quality of these coals is the fact that the Cramp Ship Building Company are using our fine steam coals exclusively on the Government cruisers built by them, and by order of the Secretary of the Navy in 1889 they were used on all trial trips. Since that time they have helped the builders of Government vessels to earn millions of dollars in bonuses for speed exceeding that stipulated in the contracts.

The great markets lying south of us waiting for the entry of our superior coals and the opportunities awaiting our shippers are just now being discussed more than ever in connection with the subject of the upbuilding of our American shipping interests, and the two subjects are almost inseparable.

With a proper protective tariff, which will make it possible for West Virginia coals to meet in competition with foreign coals at the seaboard, and a line of American vessels sailing under our own flag between this country and the countries of South America, the West Virginia coal industry will have opened up to it a great market rich in possibilities. We are practically only at the beginning of a development which means prosperity in the future for all our people.

Mr. ALLEN. I should like to ask the Senator from Iowa what reason there is for taxing coal?

Mr. ALLISON. What is the necessity for that tax?

Mr. ALLEN. What is the necessity for taxing coal?

Mr. ALLISON. The same necessity that there is for a tariff bill, to protect and care for the coal producers of our own country, and to provide revenue from duties on the coal imported. There has, I believe, always been a duty upon coal. This is, with the exception of one or two instances, a lower duty than has generally been imposed upon bituminous coal. The present duty is 40 cents a ton, which is here increased to 67 cents.

Mr. ALLEN. Mr. President, I call the attention of the Senator from Iowa and of the Senate to the fact that the duty on coal does not protect; that is, it does not protect the class of people who are supposed to be protected by a tariff of this kind. There are constant strikes in the coal regions of the United States. I believe there is a strike going on now in Pennsylvania, or at least there is one threatened. There was one in existence last year, and there has been one in existence every year since I can remember anything about the coal regions.

The poorest paid class of people, and the people who live the poorest, who have the poorest accommodations in this country, are those who are engaged as operatives in mining coal. If the report read by the senior Senator from South Carolina [Mr. TILLMAN] yesterday respecting the condition existing in the coal regions of Pennsylvania is to be believed, there is a condition existing there worse than ever existed during the days of chattel slavery in this or in any other country. In fact, all the information which comes to us through the press and through other channels is to the effect that the poorest paid laborer in the United States is the coal laborer; that protection does not protect him in the price of his wages, and whatever benefit there may be in a tariff of this kind inures to the coal baron, rather than to the man who bears the heat and burden of the day in obtaining coal from the mines.

Mr. President, two years ago I left this Chamber on my road home, I think about the 14th of August, stopping for a time at a little town over in Pennsylvania a half hour or more, while the train lay there, and I saw fully five or six hundred men sitting around the depot and depot grounds in entire idleness. On inquiry I found that they were men who were engaged in striking, coal miners who had been on a strike from the 1st day of May of that year until that time. They talked a variety of languages. I do not think that at the Tower of Babel there could have been more languages spoken than were spoken there. They were a class of people who showed absolute poverty and dependence. Upon inquiry I found that these men had been upon a strike, as I say, since the 1st of the preceding May, and the ground of their strike was that they wanted some money for their work. They were receiving, as I understood, from 45 to 50 cents a day for their labor, some of them possibly more; but in the entire year, as I was told by a citizen of that village, not one out of twenty ever received in actual money as much as $5.

His pay came to him entirely through the pluck-me store, that was located near the mines and owned by the mining company, where these poor fellows were compelled to pay 100 per cent more for what they consumed in the form of boots and shoes and clothing and food than that required to be expended by a like class of people at independent stores. That was the bone of their contention, that they should have some money at least for their labor, and not be compelled to take their pay in checks issued upon those stores.

My information went further, Mr. President. It went to the extent that any other store or any other company that honored those checks was boycotted. The checks would not be honored at another store. So the poor, innocent victim of this system of payment, and this system of rapine, was forced by circumstances to go to the company's store and expend his check, and pay whatever they saw fit to charge him for the article he purchased.

My information, Mr. President, went further than that, and I think I am correct, and I think a Senatorial investigation would develop the truth of what I state. They were Huns and Slavs and of various nationalities. They were picked up in the ports of Europe and shipped to this country under a contract to labor, in violation of the statutes of the United States. They were brought from their homes in Europe to the mountains of Pennsylvania for $13 a head, all told—a great deal less than you can ship an American hog from here to Europe, or not any more at least than would be required to ship an American hog to Europe.

When they were placed upon the roll of the company, they were not placed there by name; they had no name so far as the company was concerned; they were simply marked No. 1, No. 2, No. 3, and so on, up into the hundreds, and whenever one of those poor fellows succumbed to disease, or to stress of circumstances, which he could not withstand, and fell by the wayside and died, he was thrown into a hole and roughly covered, and No. 1 or No. 2, as the case might be, was marked off the slate.

Mr. President, an investigation of the coal-mining region of this country will produce exactly that result; and it seems to me the grimmest kind of sarcasm for my distinguished and honorable friend from Iowa to say this tax is imposed for the purpose of protecting the coal miner. There is nothing upon the face of this earth in the nature of law that can protect him, unless there shall be a revolution in the sentiment of the American people.

These men are being brought here every year by the thousands and tens of thousands in open and flagrant defiance of the laws of our country. They are being brought here by contractors, and the American laborer, whom these laws are supposed to protect, or for whose protection they were enacted, is being driven into the street as a tramp because he can not compete with the wages that are received by these mine operatives.

Why, under those circumstances, exclude coal from elsewhere and levy upon the poor people of the Atlantic Seaboard and other portions of the United States a tariff in addition to the original cost of the coal, and compel every fireside in the thirteen million and a half homes of the United States to pay tribute to a few owners of coal mines? There is no sense in it; there is no excuse for it; there is no reason to support it, excepting the bare reason that friends are to be rewarded in a bill of this kind.

Mr. KYLE. I should like to ask the Senator from Nebraska whether or not the transportation question does not cut quite a figure in this matter?

Mr. ALLEN. I think it may cut quite a figure. I do not doubt that at all.

Mr. KYLE. I should like to ask what the mine owner gets out of the coal—in other words, how much is the coal placed on board the cars for?

Mr. ALLEN. The coal miner gets probably all the coal is worth. I understand the miner of anthracite coal in Pennsylvania gets about $1.45 a ton for his coal, put on board of the cars, and that coal, I may say to the Senator from South Dakota, costs his people and my people $10 or $10.50 a ton when we come to consume it. Therefore the transportation question is quite important.

Mr. KYLE. Is it not also further true that the soft coal, the bituminous coal, is placed on board the cars for about 90 cents or $1 a ton at our Eastern mines, and sold in our section of the country at from $7 to $10 a ton?

Mr. ALLEN. I think that is true; but that is simply a part and parcel of the scheme by which the people are to be fleeced. Because the transportation companies overcharge the people living in the interior of the United States for transporting coal is no reason why the man who owns the mine should be awarded a higher price for his coal by reason of tariff taxation under the false pretense that he wants it to protect the man who does the work. We do not protect him at all. There is not a coal miner in the United States to-day who does not become a pauper within thirty days after he quits work. The cheapest labor that can be found, the labor that will take the least for the work performed, is the labor employed in this kind of an enterprise.

The status of the man and his family counts for nothing. He may live in a hovel, he may live in a hole dug in the ground, as many of them do; he may be a veritable beast of burden, as thousands of them are, and yet his condition does not appeal to the sympathy or the manhood of the man who employs him. Yet we are asked to vote a tax—and I presume we shall do it—under these circumstances, with these poor, shivering, hovering human beings, scarcely above an animal, many of them having a bare animal existence, struggling to keep soul and body together—we are asked to vote a tax upon coal to increase the wages of the American laborer in the coal mines over those of the European laborer.

Why not begin at the right place? Why not exclude this class of laborers from the coal mines under the laws of the United States prohibiting the importation of contract labor? At Ellis Island and the other places where the laborers are landed, the laws are not enforced. You might as well take every inspector from Ellis Island and elsewhere. It would be economy upon the part of the Government to do so, for they do not earn their salaries.

The moment they undertake to enforce the law, some influential contractor says to the officer, "Be a little careful, or I will see that your official head comes off." The result is that laborers are permitted to come into the United States in violation of the law and come in contact with legitimate American laborers. Yet my good friend from Iowa says all that is done is done because the coal industry of the United States or the coal laborers of the United States must be protected. God help the laborers and their children from that kind of protection!

Mr. VEST. Mr. President, as I understand this proposed amendment, it makes an entire revolution in the taxation upon coal. It puts anthracite coal upon the dutiable list, although a cursory examination of the paragraph would not leave that impression. I have not the amendment before me, but my recollection of it is that there is a duty of 67 cents upon all bituminous coal and all coal having less than 92 per cent carbon, which would include anthracite coal.

Mr. ALLISON. On coal containing less than 92 per cent of fixed carbon the duty proposed is 67 cents a ton.

Mr. VEST. That puts a duty upon anthracite coal.

Mr. President, I wish to inquire, if I may, respectfully, why this duty is imposed? According to the statistics of imports and exports we exported from this country, in 1896, $5,717,246 worth of anthracite coal, and we imported in all $345,963 worth. We exported in the same year of bituminous coal $4,928,816 worth and imported $3,523,725 worth. I should like to inquire, if we exported from the country nearly $6,000,000 worth of anthracite coal and brought in but $350,000 worth, why we should put this duty upon anthracite coal?

Mr. WHITE. I think I can state to the Senator from Missouri the reason for this programme, of which he is justly making criticism, regarding anthracite coal. Anthracite coal is to some extent brought to the Pacific Coast in ballast by vessels that come for other purposes—procuring wheat, etc. No anthracite coal is produced on the Pacific Coast. It is of course very useful and more useful than bituminous coal for certain purposes; and the design is to exclude the anthracite coal, so that more bituminous coal may be burned. That is the idea.

Mr. VEST. I was about to read from the testimony of Mr. J. W. Harrison, of California, representing, as he states in his testimony, all the coal interests of the Pacific Slope. He states here exactly what the Senator from California has stated upon the floor of the Senate. He says not one bushel of anthracite coal is produced upon the Pacific Slope. He further declares that the bituminous coal produced there is of an inferior quality; and when frankly asked why he proposed to put on this duty—the same duty, as he said, upon anthracite that was imposed upon bituminous coal—he said it was in order to exclude the Welsh coal, not because it competed with any anthracite coal upon the Pacific Slope, but in order to force the people of that coast, the manufacturers and shipowners, to use the inferior coal of California or to do without it altogether.

Mr. STEWART. There is no coal of any account produced in California.

Mr. VEST. Well, all coal, I will say, or at least all the bituminous coal, in Washington and Oregon and some little in California, of an inferior quality; but in order to force the people there, the steam vessel owners and manufacturers, to use this inferior coal we have put this duty now at 67 cents upon anthracite coal, when they have none of that coal on the Pacific Coast at all. Mr. Harrison was asked by Mr. PAYNE, of the Committee on Ways and Means of the House of Representatives, if he had traveled 3,000 miles to protect the anthracite coal of Pennsylvania, and he replied that he was not foolish enough for that.

He knows that Pennsylvania is asking for no such protection. The Senators from Pennsylvania, who are representing that State, will answer for that State and tell you they want no such protection. This whole movement is in perfect harmony with the entire tariff scheme, and that is to exclude a superior foreign product in order to force the American consumer to take an inferior one and put money in somebody's pocket when it ought not to go there. That is the whole of it. If any Senator has any interest in this matter or in the peculiarities of the tariff scheme, let him read the testimony of Mr. Harrison. I do not exaggerate when I say it is the plainest, baldest, most naked attempt to rob the people who are forced to buy coal to make steam in their manufactories and upon their steam vessels upon the Pacific Slope, in order that a few owners of inferior bituminous coal mines may charge what they please because those people are forced to buy that coal or to do without it.

Mr. President, in order to make the matter entirely plain, I will ask my friend the Senator from California to read a communication from his own constituents.

Mr. WHITE read as follows:

SAN FRANCISCO, CAL., *March 22, 1897.*

DEAR SIR: For four years we have prayed persistently and courteously to all who might afford us relief to let us make our fight for a living on equal terms with imported coal, but there has not been a word of encouragement offered from any source.

During the past few years the importation of Welsh anthracite coal has been steadily increasing until it is now about 100,000 tons per annum, used almost wholly for steam and water-gas plants. No advocate of Welsh anthracite coal claims that it needs the discrimination of free admission. They do claim, no matter what the price, it will find a ready sale.

We claim that our existence as miners depends upon our having an even chance; therefore if there is a reason why we should not be heard when we ask that the word "bituminous" be eliminated from the tariff, we are entitled, as good Americans, to know that reason. We have petitioned the Ways and Means Committee to give us the relief with all the force we could command.

If we are correctly informed, the proposed bill increases the duty on bituminous coal to 75 cents and leaves anthracite on the free list. This makes the situation worse by offering a further premium to foreign anthracite collieries to come and help themselves.

There are vast fields of anthracite in China, Mexico, and elsewhere, which will eventually displace the Welsh.

We are offering to the world the pitiful spectacle of Americans pleading for the same advantages as are bestowed upon foreigners by the United States Congress. Think of it!

Not one pound of this coal is used by persons in circumstances ordinary or worse. Every pound of it is used by people in circumstances better than ordinary; therefore we are driven to take this view, viz:

We see no way of getting this desired relief except through the kind services of Americans who will interest themselves in our behalf to the extent of asking Representatives from their districts to support the amendment, when it comes up, placing anthracite on an equality with bituminous coal.

Will you help us to the extent of writing to-day to Senators and Representatives from your district, urging them to support the proposed amendment?

Yours, respectfully,

Eureka Coal Company, Empire Coal Company, Pittsburg Coal Mining Company, San Joaquin Valley Coal Mining Company, California Coal Mining Company, Carmello Land and Coal Company, Elsinore Coal Company, of California.

Great Northern Coal Mining and Mineral Company, Black Diamond Coal Mining Company, Cedar River Coal Company, Eureka Coal Company, American Coal Company, Seattle Coal and Iron Company, Green River Coal and Coke Company, John Kangley & Co., Navy Coal and Mining Company, Snoqualmie Coal and Coke Company, Alta Coal Company, Northern Pacific Coal Company, Ellensburg Coal Company, North Leavenworth Coal and Coke Company, Pacific Investment Company, Onimette Coal Company, Reed & Co., South Prairie Coal Company, Tacoma Coal and Coke Company, Wilkeson Coal and Coke Company, Connor Coal and Iron Company, Day Creek Coal Company, Skagit Cumberland Coal Company, Deer Creek Coke and Coal Company, Fairhaven Land Company, Skykomish Consolidated Coal and Iron Company, Northwest Coal and Transportation Company, Blue Canyon Coal and Mining Company, John Thomas, Rocky Ridge Coal Company, of Washington.

Beaver Hill Coal Company, Bandon Block Coal Company, Butte Coal Company, Oregon Coal and Navigation Company, Coquille Coal Company, of Oregon.

And all mines of Montana, Nebraska, Nevada, New Mexico, North and South Dakota, Utah, Wyoming, and Colorado.

Mr. VEST. I call attention to the fact that nowhere in the communication read by the Senator from California is it asserted that a single bushel or pound of anthracite coal is produced on the Pacific Slope. The petition, for it is not an argument, is to the effect that the anthracite coal shall be excluded from the country, because they say it is of superior quality and used by people more than ordinarily well off. In other words, the people who make gas for the cities of California, Washington, Oregon, and the

consumers of gas in those cities are to be remitted to the inferior bituminous coal that is found there, to be a discomfort by night, in order to put money into the pockets of the people who sent the paper here. They speak of the importation from China, and of a thousand tons coming in from Wales. I have read the official statement, which I have before me. Nearly $350,000 worth of anthracite coal came in in 1896, and we exported nearly $6,000,000 worth. Does that show a necessity for an exclusive tax or for a tax to handicap the importation of this necessary article?

The increase upon coal is a wrong and outrage. Under the 40 cents tax of the Wilson Act the coal interests of this country have prospered as much as any other interest. There has been general depression, and of course the coal interests did not escape, but the fact that the coal miners control the American market and export the enormous amount I have stated is sufficient evidence that there should be no increase in the tax. We now have the pitiful reduction from 75 to 67 cents, an increase of tax upon both bituminous and anthracite, and the addition of anthracite coal to the dutiable list. I ask for the yeas and nays on the amendment.

Mr. PERKINS. Mr. President, I desire to say only a word or two in reply to the distinguished Senator from Missouri [Mr. VEST], in relation to the desire of the coal dealers, the coal-mine owners of the Pacific Coast, to exclude anthracite coal from importation into the Pacific Coast States because it is of a superior quality. He presents his argument in a very ingenious manner, and I can not permit it to pass without one word of my own personal knowledge which I can offer in testimony, I believe, to refute the logic of his argument.

I will take the State of California alone. Last year it imported about 1,400,000 tons of foreign coal. Of that quantity 150,000 tons of anthracite coal came from Swansea and Wales. Until 1880 it had been admitted as bituminous coal. No one thought of calling coal that came from England and Wales anthracite coal. It was semibituminous. Finally some of our enterprising coal merchants had an analysis of it made. They found it went as high as 82 per cent of fixed carbon; some of it as high as 88 per cent. They appealed it to the courts, and the courts held it was anthracite coal; that any coal that went above 81 per cent of fixed carbon was anthracite coal. Under that ruling the general appraisers issued an order that the coal might be had free of duty.

Now, that anthracite coal was not furnished to the consumer for one shilling a ton less than the bituminous coal. It was the 1,400,000 tons of bituminous that fixed the value in the market, and whether the duty should be 40 cents or 50 cents or 67 cents a ton is an abstract proposition which it is not necessary to consider at this time. But if bituminous pays that duty, then anthracite should pay the duty, otherwise it is a bounty, so to speak, that is given to the shipowner or the mine owner or the mine broker or the merchant who sells the coal. The consumer does not receive the coal for one cent less a ton. Therefore it is only right and just that it should contribute the same duty for revenue purposes to this Government that bituminous coal contributes.

Of the 150,000 tons imported into California last year, 98 per cent came in foreign ships, English-built ships. They received the benefit of the 40 cents a ton last year, and they will have 67 cents a ton under the pending bill. They find it so lucrative an enterprise that already there is afloat more than 160,000 tons of anthracite coal, and in that ratio this year we will receive into our States from Swansea and other ports in Wales at least 350,000 tons of coal which will pay no duty unless the amendment prevails.

Therefore I say to my friend the Senator from Missouri that it is no advantage to the people, but the benefit accrues wholly to the shipowners or the mine owners, and our Government loses the revenue. There is no reason whatever, and I reiterate it again and again, why anthracite coal should not pay the same duty that bituminous coal pays. The committee in their wisdom have said we will fix the rate at 92 per cent carbon; and I desire to say, parenthetically speaking, that all under 92 is really semibituminous. It is not anthracite, and any chemist who makes an analysis of it under all the authorities we have upon the subject-matter will say it is not really anthracite coal as interpreted by those who are familiar with the subject.

Therefore anthracite coal will really come in free if the amendment is adopted, but we claim that it is semibituminous, and yet the courts and appraisers have held that it is anthracite. We bow in submission to the decree of the courts. So the committee have wisely offered the amendment, and I trust my friend the Senator from Missouri will see the justice of it and vote for it and still have anthracite as it will be upon the free list.

Mr. VEST. As to whether coal having 92 degrees of carbon is anthracite, my information comes from the testimony of a constituent of the Senator from California, Mr. Harrison, who states that he is a coal broker and that he has received a cargo of coal from China, anthracite coal, at 91 and 92 per cent of carbon. He calls it anthracite coal, and I have no doubt the committee intended when they put in the limit of 92 per cent of carbon to mean that anthracite coal should be taxed.

The Senator from California who has last spoken complains that British vessels bring the coal and carry a return cargo. Let him blame the system under which that is possible. Let him do away with his present navigation laws, which have brought down the carrying trade of the United States to 10 per cent of our entire commerce. I have not seen the figures lately, because it is not a very gratifying thing for an American citizen to examine, but the last time I saw the Statistical Abstract in regard to the carrying trade I think a little over 10 per cent of the entire commerce of this country was carried in American bottoms.

Mr. ALLEN. Twelve and three-tenths per cent.

Mr. VEST. That is a little higher than I thought it was. Taking the statement of the Senator from Nebraska, we carry 12 per cent of all the commerce of the United States under the American flag because an American citizen is not permitted, under the navigation laws, a relic of barbarism, as they used to say, of slavery, to buy a vessel where he can buy it the cheapest, and then put it under the flag of his country.

I am not responsible for the statement that anthracite coal is superior to that upon the Pacific Coast. Here is Mr. Harrison's statement, who represented all these coal interests. He was asked by the Ways and Means Committee of the other House whether bituminous coal is mined in Washington and Oregon. He answered:

> Yes; but inferior grades.

He then goes on to speak of a manufactured coal that comes in from China, which he said has 88 degrees of carbon in it. The question was then put to him:

> If that is so, why are you not benefited by leaving anthracite coal on the free list?

Said Mr. Harrison:

> Well, it has been a disturbing factor there. [Laughter.] It is going to be a dangerous article.
>
> Mr. DOLLIVER. Do the American coast producers of bituminous coal want the duty on bituminous left as it is?
>
> Mr. HARRISON. I have the name of every man who produces coal in California, Oregon, and Washington here.
>
> Mr. HOPKINS. What do they want on bituminous coal?
>
> Mr. HARRISON. Forty cents a ton.
>
> Mr. DOLLIVER. They are satisfied with the present duty?
>
> Mr. HARRISON. Yes, sir.
>
> Mr. DOLLIVER. Their representatives have made an opposite showing here.
>
> Mr. HARRISON. We are satisfied with 40 cents a ton. Here is a statement of everybody that has a mine that does any business in San Francisco.
>
> Mr. HOPKINS. You represent here, then, do you, the operators of the coal mines of the Pacific Coast?
>
> Mr. HARRISON. Yes, sir.

He then goes on and repeats that they want only 40 cents a ton, and yet the committee gives 67.

Mr. JONES of Arkansas. In view of what has been said so well by the Senator from Missouri, I will not detain the Senate by making any argument, but I will ask permission to read only a half page of a remonstrance from a number of coal companies, protesting against any increase in the rates on coal. It is addressed to Senators and Members of the House of Representatives, and is signed by General Hocking Coal Company, by James W. Ellsworth, president; Toledo and Ohio Central Fuel Company, by J. S. Morton, president; Columbus and Hocking Coal and Iron Company, by J. O. Moss, president; M. A. Hanna & Co.; Baltimore and Ohio Coal Company, by F. A. Pendergast, secretary; Pittsburg and Wheeling Coal Company, by W. R. Woodford, president, and many others, thirty or forty in number.

The gentlemen say:

> The Dominion of Canada is our best and practically our only foreign market for coal, purchasing from us 4 tons for every ton sold us, the difference increasing to 20 tons purchased of us to 1 ton sold if British Columbia is excluded, the exportation to Canada for the year ending June 30, 1896, being 1,370,856 tons of anthracite of a total exportation of 1,374,381 tons, and 1,075,109 tons of bituminous coal of a total exportation of 2,246,284 tons.
>
> If a duty of 75 cents, or even 60 cents, is placed upon coal, as proposed in the pending tariff bill, it is certain that the Dominion of Canada will adopt a tariff on American coal which will largely curtail our export trade on anthracite coal, which is now admitted to Canada free, and greatly reduce our exports of bituminous coal, and have a paralyzing effect upon a wide and important range of employment, including the mining and carrying trade.

I will not detain the Senate by reading the remainder of the protest, but I will insert it in the RECORD as a part of my remarks.

The remainder of the protest is as follows:

> If our rate of duty may remain at 40 cents on coal, there is assurance that the Dominion Government will provide for reciprocity in this behalf.
>
> Now, therefore, we, the undersigned coal producers, miners, and carriers, do most emphatically protest against the increase in the tariff rate on coal proposed in the pending bill; but to the end that the Canadian demand for American coal may be increased, and a liberal trade policy fostered, which will waken into activity our industries, we do most urgently petition that a reciprocal clause may be inserted in the pending tariff bill wherein same relates to coal, to the effect that whenever the President shall be satisfied that the Parliament of the Dominion of Canada, or other competent authority, has fixed a rate of duty collectible on bituminous coal produced in and imported from the United States into Canada, not exceeding 75 cents nor less than 40 cents per ton, he may make proclamation of the fact, and after the

date of such proclamation the duty collectible on all coal imported into the United States from the Dominion of Canada shall not exceed the rate mentioned in said proclamation so long as said rate of duty is maintained by the said Dominion.

Very respectfully.

(Original petition signed as follows:)

General Hocking Coal Co. (by James W. Ellsworth, president); Toledo and Ohio Central Fuel Co (by J. S. Morton, president); Columbus and Hocking Coal and Iron Co. (by J. O. Moss, president); M. A. Hanna & Co.; Baltimore and Ohio Coal Co. (by F. A. Pendergast, secretary); Pittsburg and Wheeling Coal Co. (by W. R. Woodford, president); Turney and Jones Company (by T. W. Guthrie, secretary); Wills Creek Coal Co. (by B. F. Berry, vice-president); Columbus, Hocking Valley and Toledo R. R. Co. (by N. Monsarrat, receiver); Toledo and Ohio Central Railroad Company (by Stevenson Burke, president); Columbus, Sandusky and Hocking R. R. Co. (by W. E. Guerin, president); Cleveland, Lorain and Wheeling Rwy. Co. (by W. R. Woodford, general manager); Pennsylvania Company (by James McCrea, vice-president); Black Diamond Coal and Coke Company (by J. H. Earnshaw, general manager); Wheeling and Lake Erie Coal Company (by Myron T. Herrick, president); Pennsylvania Coal and Iron Co. (by —— Zerby, president); Wheeling and Lake Erie Railroad Company (by Myron T. Herrick, receiver); New York and Cleveland Gas Coal Co. (by W. P. D'Armit, president); Osborn, Sager & Co.; The Young & Harrington Coal Company (by T. E. Young, president); W. P. Rend; Pittsburgh, Fairport and Northwestern Dock Co. (by G. E. Tener, vice-president); Pittsburgh and Chicago Gas Coal Company (by D. W. Van Eman, general manager); Pittsburgh Consolidated Coal Company (F. L. Robbins, general manager); Oak Ridge Coal Company, Limited (by G. W. Schlenderberg, treasurer); Erie Railroad Company (by E. B. Thomas, president); Hillside Coal and Iron Company; Blossburg Coal Company; Northwestern Mining and Exchange Co. (by James T. Gardiner, vice-president); Delaware and Hudson Canal Company (by R. M. Oliphant, president); Delaware, Susquehanna and Schuylkill R. R. Co. (by Alfred Walter, president); Baltimore and Ohio Railroad Company (by John K. Cowen, receiver); Pennsylvania Coal Company (by M. S. Thorne, vice-president); New York, Ontario and Western Railway Co. (by T. P. Fowler, president); Lehigh and Wilkesbarre Coal Company (by J. R. Maxwell, president); New York, Susquehanna and Western Railway Co. (by A. L. Hopkins, president); Philadelphia and Reading Coal and Iron Company (by Joseph S. Harris, president); Lehigh Coal and Navigation Company (by Lewis T. Rily, president).

The interests whose names are signed hereto represent not less than the number of men and mines set opposite their names, aggregating not less than 840,000 men, and under the regular ratio of 1 to 5 showing 1,700,000 people directly and indirectly dependent upon this interest. This does not include the clerical forces, which aggregate many thousand in addition.

Mr. JONES of Arkansas. In this connection, I also present a number of extracts from newspapers, some beginning as far back as the first of last year, giving detailed accounts of an organization among the coal companies to handle the output of the coal mines in their own interest, and the subsequent advancement in prices as the result of the "gentlemen's agreements," as they are understood to be. I ask that they may be inserted in the RECORD as a part of my remarks.

The articles referred to are as follows:

[From the New York Press, January 31, 1896.]

THAT COAL CORNER A FACT NOW—ALL MUST HELP PAY FOR THE BLACK DIAMOND WHICH MORGAN ADDS TO HIS CORNER—OUTPUT RESTRICTED—PRICES TO BE RAISED—COAL BARONS BOW BEFORE THE AUTOCRAT OF THE CORNER OFFICE, WHO HAS WORKED HIS WILL.

J. Pierpont Morgan, dealer in corners, now stands in another one, and no one has the power to oust him.

Press readers already know that his gold corner was followed by preparations for one in coal.

He has it now.

Preliminaries to raise the price of coal to every householder who consumes it were completed yesterday at a meeting of the coal presidents. Mr. Morgan wasn't there, but Mr. Morgan's men were.

Naturally the first step was to restrict the output. This was done. In allotting the percentages of production, the railroad for which Mr. Morgan is acting as physician—the Reading—didn't get the worst of it.

Mr. Morgan isn't in the corner office for his health.

This present coal combination is the most gigantic ever formed. By agreement the annual output is restricted to 40,000,000 tons a year.

To-day the sales agents will meet and raise prices. To the masses of the people this means directly more than a corner in gold. It means 50 cents, and perhaps $1, added to the price of every ton of coal they buy.

The coal barons are losing no time. The agreement will take effect to-morrow.

The head of the corner office, where gold corners and coal corners and bankrupt railroads are dealt in, has won another victory from the people.

Now let purses be opened to pay this autocrat the demands which soon will be made to enrich by $4,000,000 his broken-down concern—the Reading Railroad.

WARNING WAS TIMELY.

The readers of the Press have been warned in time, and if they have followed the advice given by it they will be independent of the close corporation of the railroad presidents, which formally has decided to squeeze the public.

The presidents of the railroads and the coal companies which control the coal output of the country met again yesterday in the Central Building in Liberty street to hear the report of the committee of three—the Morgan committee—on the proportion of mining which should be allowed to each road. This idea of determining the output which each coal road shall have is only preliminary to the increase in the price. The coal presidents agreed at the previous meeting that they first should restrict the mining before deciding on an increase.

GOOD BARGAIN FOR MORGAN.

The first meeting of the presidents was an unsatisfactory one, inasmuch as Mr. Harris, spokesman for J. Pierpont Morgan, demanded for the Reading system, of which he is president, considerably more than the other presidents were willing to concede. This demand was merely a piece of diplomacy on the part of Mr. Harris, for the result as shown gives the Reading people more than 1 per cent more output than was allotted to it under the agreement of a year ago.

That agreement was broken by the railroads, which went to work on their own hook and mined as they pleased. The public benefited accordingly, and, as a result, was able to purchase coal at reasonable rates. This was one of the best evidences of what competition will do in the way of reducing prices.

PUBLIC MUST SUBMIT.

The coal presidents always have longed for a close combination which would control both output and values, and make the people, who pay 70 per cent of the coal bills, pay tribute to them. Advantage has been taken of the present hard times and poor business in railroad lines by the Morgan combination to put through the coal deal. Mr. Morgan has on his hands a sick railroad system. This system puts out annually more than one-fifth of the coal mined. Why should it, in his mind, do so without making a large profit? Therefore the combination was made. The public was the easiest and best source of revenue, and therefore the public must pay.

FIGURES OF TWO YEARS.

The railroads lately have been mining as they pleased. Here is a table showing just what each railroad produced in the last two years:

	Tons.
The total output of anthracite coal for 1895 was	46,545,760
Total for 1894	41,391,199
Increase	5,154,561

Summary for 1895, as carried by the various railroads.

	Tons.
Philadelphia and Reading	9,905,059
Lehigh Valley	7,360,454
Central of New Jersey	5,388,194
Delaware, Lackawanna and Western	6,120,260
Delaware and Hudson	4,347,843
Pennsylvania Railroad	5,025,645
Pennsylvania Coal Company	1,746,832
Delaware, Susquehanna and Schuylkill	1,905,784
New York, Lake Erie and Western	1,820,098
New York, Susquehanna and Western	1,492,244
New York, Ontario and Western	1,424,407
Total	46,545,760

Summary for 1894, as carried by the various railroads.

	Tons.
Philadelphia and Reading	8,289,088
Lehigh Valley	6,424,676
Central of New Jersey	4,847,885
Delaware, Lackawanna and Western	5,997,989
Delaware and Hudson	3,997,050
Pennsylvania Railroad	4,727,579
Pennsylvania Coal Company	1,705,197
Delaware, Susquehanna and Schuylkill	1,653,368
New York, Lake Erie and Western	1,660,827
New York, Susquehanna and Western	726,169
New York, Ontario and Western	1,372,365
Total	41,391,199

LIMITING THE OUTPUT.

The agreement which was reached yesterday was merely a ratification of the report of the committee of three. This committee reported that the coal-canal roads should decide to mine only in accordance with the allotment determined by it. This allotment is as follows:

	Per cent.
Delaware, Lackawanna and Western	13.35
Delaware and Hudson	9.60
Pennsylvania Railroad	11.40
Reading	20.50
Lehigh Valley	15.65
Jersey Central	11.70
Pennsylvania Coal Company	4
Erie	4
Ontario and Western	3.10
Delaware, Susquehanna and Schuylkill	3.50
Susquehanna and Western	3.20

It will be seen by this allotment that Mr. Morgan's road gets more than one-fifth of the entire output.

The announcement of the result was received with cheers on the exchange and in the offices of the various bankers. Reading stock immediately began to start upward and all of the coal stocks had a boom.

HOW TO RAISE THE PRICES.

The next thing to be done, after curtailing the output at the basis of 40,000,000 tons, will be to increase the price, and there is a disagreement among the sales agents of the various roads as to whether the selling figure shall be raised 50 cents or $1 a ton. The sales agents are the men who boss the prices, and they generally boss the presidents where coal is concerned. The sales agents will meet to-day, and the result is likely to be that coal will be from 50 cents to $1 a ton higher to-morrow than it now is.

The output agreement begins on Saturday and the higher-price agreement, if it goes through, will begin on the same day.

Great is the corner office!

[From the Iron Age, February 6, 1896.]

THE ANTHRACITE AGREEMENT.

The eleven companies and their allied interests distributing anthracite coal from the mines on January 30 reached an agreement in the matter of civil trade government and an apportionment of tonnage to control their operations for eleven months, beginning February 1, 1896. It is an end that has been in view, and, it may be said, striven for for over a period of a year and a half. It was consummated with very little friction and so suddenly as to create the belief that the banking community at the right moment brought all the influence it possessed to bear.

The agreement is now in force. It apportions outputs as follows: Reading, 20.5; Lehigh Valley, 15.65; Jersey Central, 11.7; Lackawanna, 13.35; Delaware and Hudson, 9.6; Pennsylvania Railroad, 11.4; Pennsylvania Coal, 4; Erie, 4; Ontario and Western, 3.10; Coxe Bros., 3.50, and Susquehanna and Western, 3.20. A permanent board of managers was appointed, as follows: President Maxwell, of the Jersey Central, chairman; Presidents Thomas, of the Erie; Wilbur, of Lehigh Valley; Harris, of the Reading, and Walters, of Coxe Bros.' road, the Delaware, Susquehanna and Schuylkill.

This body is empowered to serve as a check upon the different interests, settle all disputes, and act in an advisory capacity. Among other things, it will have cognizance of tonnage returns, which are to be handled by a new bureau established in New York. It will organize a uniform system of reporting, and among other things it will see that all coal mined and not used at the breaker or not sold for local consumption is accounted for. This lack of uniform returns has enabled the juggling of figures in the past that has prevented one interest from knowing exactly what its competitor was doing. The system of contracts, which never was of any use except to the consumer, will be abolished as far as possible after orders now on the books of the companies are cleaned up. This new departure will prevent much of the demoralization that has been one of the curses of the trade. It is understood that the presidents will leave the question of prices to their sales agents, who, in addition, will fix the tonnage month by month. The theory on which the matter will be handled is, in effect, that if the tonnage allotments are not exceeded, each interest will be forced to sell coal at the market price in order to fare as well as its competitors. It can not offset any loss incurred by underselling through an increase in production.

The sales agents met pursuant to orders on Friday, the day following the agreement, fixed the production for February at 2,500,000 tons, and made a circular of prices, which, on a basis of free burning coal, f. o. b., was as follows: Broken, $3.25; egg, $3.50; stove, $3.75; chestnut, $3.50. The last circular was made on October 24 and was 40 cents higher per ton on domestic sizes and 50 cents per ton higher on broken. Friday's circular was from 20 to 30 cents above the prices current the day previous. Western prices were reaffirmed, as follows: Buffalo, gross tons, broken, $4.15; other sizes, $4.40. Chicago and other Western lake points, net tons, broken, $5.25; other sizes, $5.50.

It is possible that the agreements reached by the presidents may be reduced to writing. If this be the case, there will be no reference to prices. The argument is advanced that the agreement can not be made in form of a contract, owing to the laws on the subject, and that in any other written form it could be broken as easily as if it were verbal.

This leads to the questions as to how it will be enforced and what there is back of it. It is well known that in the midsummer, when all hope of a settlement by arbitration was abandoned through Reading's refusal to arbitrate its difference of about one-half of 1 per cent, and when stove coal was selling at less than $2.80 per ton, the coal stocks were high and strong. This created a belief that a clique of bankers, already largely interested in the properties, were attempting to secure control of the leading companies. In this connection it is suggested that nothing in the way of a settlement was attempted until the success of the Reading reorganization was assured. If there is a power beneath the surface sufficiently great to dictate the anthracite policy, it is reasonably certain that the agreement reached last week will continue in force. On the other hand, if it is based upon the flimsy promise of a number of fickle presidents, it is doomed to failure. The financial community, without knowing anything definite, is inclined to the former theory.

The effect of close cooperation would be to restore the price of coal to a higher figure and keep it there. The average for the year 1895 on stove coal, the chief size, was not far from $3 per ton. This is 60 cents below the average of 1894, and considerably less than $1 below the average of 1893. If coal could be advanced on domestic sizes over $1 per ton, it would about restore prices to the average of previous years. It would enable companies like the Lackawanna, who for the year ended December 31 reported earnings on the stock of 5.17 per cent, to restore their net income to an amount commensurate to the dividends paid. In the year 1894 the Lackawanna earned 6.24 per cent on its stock, and in 1893, 11.1 per cent. To the companies whose financial necessities are more or less pressing it would mean salvation. It would insure the success of the Reading reorganization. In a word, it would mean from 50 cents to $1 per ton more than was realized in 1895 on, say, the production of that year, which was 46,500,000 tons in round numbers.

The demoralized prices of 1895 were not in any sense a boon to the consumer of domestic coal. Actual returns show that with the exception of one or two centers, notably Brooklyn, the consumer paid about as much for his fuel as in previous years. The middlemen and retailers reaped the benefit.

The difference between the percentages allotted for 1896 and the amount returned in 1895 permits of an interesting comparison. Reading lost 0.97; Lehigh Valley, 0.16, and Coxe Bros., 0.61; Jersey Central gained 0.14; Lackawanna, 0.19; Delaware and Hudson, 0.26; Pennsylvania Railroad, 0.61; Pennsylvania Coal, 0.25; Erie, 0.09; Ontario and Western, 0.04, and Susquehanna and Western, 0.18.

[From Bradstreet's, January 2, 1896.]

A SOFT-COAL POOL.

A dispatch to the Philadelphia Ledger says: "Coincident with the movement for the formation of an ironclad agreement among the anthracite-coal companies, a somewhat similar plan is said to be on foot for the combination of the bituminous interests shipping to tide water. It is probable that the new soft-coal pool will go into effect some time in March. The main idea is a central selling agency to handle the total products of the mines. They embrace shippers over the Baltimore and Ohio, Pennsylvania, Norfolk and Western, Chesapeake and Ohio, Beech Creek, and Reading. The new agreement will bind the members not to cut rates in any way whatever. The advance in rates, it is said, will probably not be more than 50 cents a ton, but many curtailments in expenses will be put into effect."

[From the Philadelphia Record, November 12, 1895.]

POOLING SOFT-COAL BUSINESS—BITUMINOUS OPERATORS ARE MUCH INTERESTED IN THE PROPOSED PLAN.

Evidence of the interest which bituminous-coal operators are manifesting with regard to the proposed pooling of their business was furnished by the large number of prominent mine owners who attended the meeting at the Waldorf, in New York, last week. The call for this meeting was sent out by President Walbridge, of the American Coal Company, and the seventy operators who responded included the largest producers of soft coal in Pennsylvania, Maryland, Virginia, and West Virginia.

The meeting was merely a preliminary one. The utmost harmony prevailed, and all present recognized the necessity for forming some combination whereby an allotment of the tonnage could be made, production kept within the lines of consumption, and a tariff of prices agreed upon which should be binding upon all, and thus do away with the ruinous competition which has for months characterized the trade.

Such a course has long been suggested and advocated by the various railroads transporting the coal from these and different regions, but it was not until confronted with the probability of a demand from the miners for increased wages at the beginning of the coal year in April next, and also an increased freight rate, that the real seriousness of the situation manifested itself and brought the operators together.

The situation was thoroughly discussed by the meeting, but no action was taken beyond appointing a committee of five to prepare some plan for the future government of the operators which will bring about the results desired. This committee consists of Samuel Castner, representing the Pocahontas region; William D. Kelley, representing the Beech Creek district; C. B. Orcutt, representing the Chesapeake and Ohio region; A. G. Yates, the Rochester and Pittsburg; and E. J. Berwind, the Pennsylvania or Clearfield region. The meeting was purely an operators' meeting, and none of the railroads interested in the transportation of bituminous coal were represented.

[From Bradstreet's, May 2, 1896.]

HIGHER COAL PRICES.

The Philadelphia Press this week says:

"The Philadelphia and Reading Coal and Iron Company yesterday issued a circular announcing that an advance of 25 cents a ton would be made in all sizes of coal on and after this date. The advance has been made at Port Richmond and at Port Liberty. The changes at Port Richmond are:

	Broken.	Egg.	Stove.	Chestnut.
Hard white ash	$3.35	$3.60	$3.75	$3.50
Free white ash	3.25	3.50	3.75	3.50
Shamokin	.....	3.75	4.00	3.60
Schuylkill red ash	.....	3.75	4.15	3.75
Lorberry	.....	3.75	4.15	3.75
Lykens Valley	4.25	4.60	4.75	4.50

"The new prices at Port Liberty are:

	Broken.	Egg.	Stove.	Chestnut.
Hard white ash	$3.60	$3.85	$4.00	$3.75
Free white ash	3.50	3.75	4.00	3.75
Shamokin	.....	4.00	4.25	3.85
Schuylkill red ash	.....	4.00	4.40	4.00
Lorberry	.....	4.00	4.40	4.00
Lykens Valley	4.50	4.85	5.00	4.75

"At about this time every year there is considerable talk afloat about the railroad companies in the East going to secure all the coal needed from Canada. Last week bids were asked from all the bituminous-coal companies, and it appears that the bids from the coal companies of Pennsylvania, Maryland, Virginia, and West Virginia were rejected on the ground that the coal could be bought cheaper from the Canadian operators.

"The coal companies of the States mentioned are united, and the business is conducted under the name of the Bituminous Coal Association. This association was organized a few months ago for the protection of the bituminous-coal trade, as for the past few years bituminous coal has been sold at such a price that has not been profitable either for the operator or the miner. This year the price has been advanced, and the operators have so far stuck together.

"The refusal of the bids by the New England roads is not likely to be taken seriously by the operators here, as it is well known that the mines in Nova Scotia have not the facilities at present for supplying any large demand, and if a large lot of coal was ordered from them it would have a tendency to increase water rates, which would, of course, add to the cost of the coal. A number of the bituminous operators were seen yesterday, and they all unite in saying that there is little fear of Nova Scotia coal supplanting ours."

Circulars issued at New York by the Lackawanna and the Lehigh Valley companies intimate the advance in the price of anthracite coal. Each coal-producing company will make a general advance of 25 cents per ton, to take effect May 1. Following is the new schedule: Grate, per ton, $3.50; egg, $3.75;

chestnut, $3.75, and stove, $4. The circulars of the Pennsylvania, Delaware and Hudson, and Erie and other companies were to be out before the end of the week. The aggregate anthracite output for April will reach about 3,000,000 tons, which is about the same as April, 1895, although the output for April last year was, by agreement, restricted to 2,400,000 tons.

[From Bradstreet's, January 11, 1896.]

The bituminous-coal miners of Indiana decided on Wednesday to demand an advance in the mining scale from 60 to 63 cents, to take effect April 1, the date when the Pittsburg district price is to be advanced from 64 to 70 cents. The operators will refuse to grant the advance.

[From the New York Journal, May 5, 1897.]

RIOT MUTTERINGS BY COAL MINERS—TWENTY-FIVE HUNDRED MEN OUT ON STRIKE IN EAST TENNESSEE—OTHERS TO FOLLOW SOON—HEAVY CUTS IN WAGES ALL ALONG THE LINE IS LIKELY TO RESULT IN BLOODSHED—STRIKERS TO BAR OUTSIDERS—AN 18 PER CENT REDUCTION AFFECTS THE REGION FROM CHATTANOOGA TO SOMERSET, AND GRAVE TROUBLE IS EXPECTED.

CHATTANOOGA, TENN., *May 4.*

All signs point to a repetition of the Rock Creek riots of a few years ago, unless the troubles now brewing between miners and coal-mine owners in upper East Tennessee and southern Kentucky are speedily adjusted. Already disheartened by the struggles to live and support their families on the present wages, the diggers of coal have been subjected to another heavy cut.

MEN OUT AND IDLE.

More than 2,500 men are now out at Jellico, Glenmary, Robbins, and Helenwood, and others are expected to follow because of a reduction of 18 per cent in wages. The men say they are being pressed upon and crowded beyond the limit of endurance, and assert that trouble will follow any attempt to replace them with cheap labor. But the mine owners have held meetings recently at Lexington, Louisville, Nashville, and Cincinnati, where a general reduction was agreed upon. The owners also declare that they will stand by the schedule laid down.

The strikers know that the rich deposits of coal in those regions must be taken out, and that if they refuse to do the work outsiders will be brought in to man the mines. Such measures have been tried before in various parts of the country, and, as the strike records show, with always the same result—bloodshed.

The diggers involved in the present trouble are no different from their brothers in other mining districts. They say they will not stand quietly by and see the bread taken from the mouths of their wives and babies. The strike leaders have threatened to make it pleasant for the men who come with the intention of taking their places, and these rough citizens of the mining villages know well how to run these little entertainments. The strikers are holding meetings and laying out the campaign under the direction of able leaders. As yet the owners have not attempted the importation of miners, but the first installment of outsiders is sure to precipitate trouble. Great excitement prevails in the villages, and the feeling is spreading from one end of the region to the other.

The indications are that every mine between Chattanooga and Somerset, Ky., will be abandoned before the end of the week.

[From the Philadelphia Record, April 17, 1897.]

MINERS' STARVATION WAGES—25 CENTS FOR A SEVEN-HOUR DAY—DECEPTIVE SCALES.

PITTSBURG, PA., *April 16.*

"Dante's Inferno is a mild place compared to the homes of the miners in the Pittsburg district," was the expression of a member of the legislative committee after a day's trip among mines on the Pittsburg, McKeesport and Youghiogheny Railroad. Seven grown persons and 3 children were found crowded in a shed 12 by 18 feet, for which the boarding boss was charged $6 a month rent by the firm of Osborn & Saeger. All the miners said they had not made more than 50 cents a day, and had only worked an average of three days a week all winter.

CLEARED 25 CENTS IN SEVEN HOURS.

Miners seen issuing from the mine when asked how much they had earned that day responded that they had worked from 5 o'clock in the morning until noon and had cleared 25 cents.

At Morgan, Moore & Bain's mines the majority employed were foreigners. The shanties, which cost the mining companies about $125 to $150 to build, are rented for $14 a month, which is deducted from the miner's pay. The miners are compelled to buy all their stuff from company stores, where fancy prices are charged, so they seldom received any cash.

ALLOWED 1,100 POUNDS ON 3,000.

At the Banning mine of Morgan, Moore & Bain, Senator Saylor discovered that the scales were wrong. The cars should hold from 2,500 to 3,000 pounds of coal, but instead the men were only credited with 1,100 pounds. The superintendent apologized, and said he had ordered the scales repaired several days ago. "In the meantime you are only giving the miners the weight indicated on the broken scales," interjected the Senator.

Senator Milleisen, of Mechanicsburg, a member of the committee, is quite a double for President McKinley. The foreigners at the mines were told that the President of the United States, in the person of Senator Milleisen, was inquiring into their condition, and they stood about in awe, with their mouths open and hats off, saluting his excellency.

The committee has subpœnaed the mine operators to appear before it next Monday.

[From the New York Times, April 12, 1897.]

AFFECTS 10,000 MINERS—TENNESSEE COAL AND IRON COMPANY PROPOSES TO REDUCE WAGES.

BIRMINGHAM, ALA., *April 11.*

The labor situation in the Birmingham district has become very serious since yesterday morning. Upon invitation, the Tennessee Coal, Iron and Railway Company's coal miners in the Blocton district met the officials of the company in conference at Blocton yesterday 1,000 strong. President Nat Baxter, jr., proposed a reduction in wages of 12½ per cent, giving as his reason that large export coal contracts depended on it.

If the reduction were accepted, the men, he said, would get steady work; if not, such as the company could give in the face of the failure to secure contracts hinging on close margins. Mr. Baxter asked that the reduction become effective June 1 if possible; if not then, by July 1 at least, when the present contract with the miners expires. The miners will decide whether or not to accept the cut and give reply in a day or so. They do not seem to be disposed to accept the cut. Ten thousand miners are affected, the Tennessee Company's wage scale governing the district, and they themselves employing 7,000 miners.

[From the Lexington (Ky.) Herald, May 5, 1897.]

A WAGE CUT OF 10 PER CENT DECIDED UPON BY THE BOARD OF DIRECTORS OF THE GLEN MARY MINING COMPANY AT A MEETING HELD YESTERDAY—THE NEW SCALE IS SENT TO THE MINERS, AND IT WILL LIKELY BE ACCEPTED.

As foreshadowed in the Herald, the directors of the Glen Mary Coal Mining Company met here yesterday to take steps regarding the future operation of the mines. The meeting was held in the private office of the Second National Bank immediately after the close of business. Present were Messrs. J. W. Appleton, president of the company; J. P. Shaw, secretary and treasurer; F. P. Clute, general manager; Hiram Shaw, J. T. Slade, and other directors.

The object of the meeting was to form a new wage scale, made necessary by the employment of convicts in other mines operated by the State of Tennessee. After due deliberation the directors issued a proclamation making a reduction of 10 per cent, and setting forth the reasons therefor. This reduction applies to the salaried officers and all employees. The official seal of the company was placed on the proclamation, and it was sent to the miners.

* * * * * * *

If the miners should refuse to accept the new scale, Mr. Clute says the mines will most positively be shut down, as the company would lose money by making contracts according to the old scale of prices. Over 3,000 miners will be affected if it becomes necessary to close down all of the mines.

At the meeting of the board of directors it was decided to deed an acre of ground to the Episcopal church at Glen Mary, for the erection of a house of worship. Quite a number of Lexington people are interested in the company, and the result of the pending negotiations will be watched with interest.

[From the New York Times, March 3, 1897.]

REDUCING ITS EXPENSES—THE LEHIGH AND WILKESBARRE COAL COMPANY CUTTING WAGES.

HAZLETON, PA., *March 2.*

The Lehigh and Wilkesbarre Coal Company to-day inaugurated a system of retrenchment at all of their mines in this vicinity. The reduction affects all inside and outside laborers, foremen, and engineers, and ranges from 8 to 25 per cent. Foremen who were paid $100 are cut to $75, and from this down the reduction ranges until it reaches 8 per cent.

The Lehigh Valley Coal Company has also notified its Southside employes that a reduction in wages would be made, but nothing definite in this direction has yet been done.

[From the Sheboygan (Wis.) Telegram, April 5, 1897.]

STRIKE OF IOWA COAL MINERS.

OTTUMWA, IOWA, *April 5.*

Three leading coal companies cut the price of mining coal from 70 cents to 60 cents. The miners of the Whitebreast Company at Keb and Chisholm, John L. Evans's men at Avery, and the Chicago and Iowa Company's men at Cedar mines, about 600 in number, struck. Other companies paying 70 cents will cut, and probably as many more men go out.

[From the Chicago Chronicle, March 7, 1897.]

BELLE PLAINE, IOWA, *March 6.*

All the miners employed in the coal mines at Boonesboro, a suburb of Boone, went out on a strike last night, refusing to submit to the reduction in the scale from 85 cents to 70 cents. The strike affects about 300 men, but it is not believed the strike will be of long duration. Many men are applying for the positions filled by the strikers, and the company will experience no trouble in procuring plenty of men to start the works Monday morning.

—

BRAZIL, IND., *March 6.*

The block coal operators and the miners of this district met here to-day for the purpose of discussing a 5-cent reduction. After a short discussion, the miners accepted the 5 per cent cut, which will bring the scale to 65 cents per ton. This cut is to take effect the 15th of this month and continue until May 1, when the new scale will be made.

Mr. WHITE. Mr. President, there are two or three facts connected with this matter which I think ought to be stated. In the first place, it is true that there is no first-class bituminous coal produced in the State of California. There is some bituminous coal produced there, but it is of an inferior quality. Of that there is no doubt, I presume, among those who consume it. It is indeed a notorious proposition. It may perhaps be considered a great misfortune that we have not been able to discover thus far any absolutely good bituminous coal within the confines of the State, although we have a good many coal mines producing an inferior article. There is a large amount of coal imported from Vancouver and Australia, and when this question was before the Senate in 1894 I estimated that out of a total duty of $800,000 paid to the Government of the United States the Pacific Coast paid $600,000. So far as the payment of duty is concerned, it is largely a local levy. It will nearly all come out of that part of the United States.

I observe from an inspection of the hearings before the Ways and Means Committee that placing anthracite upon the dutiable list is not only by any means in the interest of the coal miners of the Pacific Coast, but it is also favored by the coal miners of British Columbia, and the reason of that is obvious. It is rather a ludicrous situation, but nevertheless it is true. The bringing in of anthracite coal, the supply of fuel of that character, naturally does affect the demand for the local product, and to a large extent the product of British Columbia is local. It must pay duty, but is near by, and so it largely becomes the interest of the British Columbia producer as well as the producer in the United States that this coal shall be excluded, and they do not hesitate to say so. Although they are good and loyal citizens of the Queen, still this is one duty and perhaps the only one in the entire bill which will meet with the concurrence of Her Majesty's subjects.

I favored placing coal upon the free list before. I should like to have it upon the free list now, if it were possible. As has

been shown, 40 cents a ton is enough, and I do not see why under this tariff we should go any further. Besides, if the coal that is brought from Europe is of a superior quality, I think our people ought to have the advantages of it in those lines needing superior coal. They may get it, but they must pay a duty upon it. It does not come into conflict with any Eastern interest. Of course no anthracite coal from the East reaches the coast.

Mr. WILSON. When the Wilson bill was passed and reduced the rate on coal from 75 to 40 cents a ton, was there any reduction in the price of coal to the California consumer?

Mr. WHITE. There was.

Mr. WILSON. For how long?

Mr. WHITE. The rates were always quoted lower.

Mr. WILSON. It lasted about four months.

Mr. WHITE. It may be that a combine was made. I do not know. Coal may have gone up for other reasons.

Mr. WILSON. The only advantage was to place in the hands of the British Columbia coal miners the difference in the tariff rates, amounting to about $400,000.

Mr. WHITE. That statement is absolutely inconsistent with the other statement made by the Senator from Washington, because if the price of coal kept up, then of course the local producer had his market. The only injurious effect which the imposition of the duty could have upon the local producer would be the diminution of the price, so that the other coal might get in. If the price was not diminished, there could have been no loss. It is impossible to avoid that conclusion.

If it is true, as stated by the Senator, that there was no falling off in the price, then the status quo was preserved, so far as the trade went, and if there was a cutting down of the price and the local producer was injured, then of course the consumer got the benefit of it.

Mr. WILSON. The difference between 40 and 75 cents was given to the British Columbia coal miner, to the Comax mine and other mines, which work Chinese laborers, as the Senator well knows. We can not compete with them. That is the point.

Mr. WHITE. I recollect that a very short time ago there was an importation of laborers, I believe they were colored laborers, to a mine in the State of Washington, and there was a riot there, which the Senator will remember, or a great disturbance, because of that importation.

Mr. WILSON. We had some riots in the State of Washington. They had some also in the State of California.

Mr. WHITE. Yes; but I am speaking of the coal matter. The Senator is in the business of evasion, evidently. We may have riots anywhere, and I did not make the remark in censure of Washington. Any community is subject to a riot. Whatever there may be as to whether the consumer pays this or whether he does not, I will not attempt to discuss that oft-gone-over argument, but I do say that the state of the record is such as not to justify this imposition, and that it is a peculiar nature of the case that it is an imposition virtually levied upon one community.

I desire to inquire whether the amendments of the committee are now before the Senate, or whether the adoption of the paragraph as amended is the question before the Senate?

The PRESIDING OFFICER. The Chair will state to the Senator from California that the committee have proposed a substitute for the entire paragraph, and that is now to be voted upon.

Mr. WHITE. I desire to move an amendment to the substitute.

The PRESIDING OFFICER. On the pending question the yeas and nays have been ordered. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. SMITH] to the Senator from Maine [Mr. HALE], and vote "yea."

Mr. MALLORY (when his name was called). I am paired with the junior Senator from Vermont [Mr. PROCTOR]. If he were here, I should vote "nay."

Mr. MARTIN (when his name was called). I am paired with the Senator from Montana [Mr. MANTLE]. If he were here, I should vote "nay."

Mr. THURSTON (when his name was called). I have a general pair with the senior Senator from South Carolina [Mr. TILLMAN]. If he were present, I should vote "yea."

Mr. WALTHALL (when his name was called). I am paired with the Senator from Wisconsin [Mr. SPOONER]. Otherwise I should vote "nay."

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER]. If he were here, I should vote "yea."

Mr. WHITE (when his name was called). On this vote I am paired with the Senator from Utah [Mr. CANNON]. Were he present, I should vote "nay" and he would vote "yea."

The roll call was concluded.

Mr. CLARK. I am paired with the Senator from Kansas [Mr. HARRIS]. If he were present, I should vote "yea."

Mr. BATE. I desire to state that my colleague [Mr. HARRIS of Tennessee] is unable to be in the Chamber, and is paired with the senior Senator from Vermont [Mr. MORRILL].

Mr. BURROWS. I announce my pair with the senior Senator from Louisiana [Mr. CAFFERY]. I make the announcement for the day.

The result was announced—yeas 31, nays 24; as follows:

YEAS—31.

Allison,	Foraker,	Lodge,	Quay,
Carter,	Frye,	McEnery,	Sewell,
Chandler,	Gallinger,	McMillan,	Shoup,
Cullom,	Gear,	Mantle,	Teller,
Davis,	Hanna,	Nelson,	Wellington,
Deboe,	Hawley,	Perkins,	Wetmore,
Elkins,	Hoar,	Platt, Conn.	Wilson.
Fairbanks,	Jones, Nev.	Pritchard,	

NAYS—24.

Allen,	Clay,	Kenney,	Morgan,
Bacon,	Cockrell,	Kyle,	Pasco,
Bate,	Faulkner,	Lindsay,	Pettus,
Berry,	Gray,	McLaurin,	Rawlins,
Butler,	Heitfeld,	Mills,	Turpie,
Chilton,	Jones, Ark.	Mitchell,	Vest.

NOT VOTING—34.

Aldrich,	Hale,	Murphy,	Thurston,
Baker,	Hansbrough,	Penrose,	Tillman,
Burrows,	Harris, Kans.	Pettigrew,	Turner,
Caffery,	Harris, Tenn.	Platt, N. Y.	Walthall,
Cannon,	McBride,	Proctor,	Warren,
Clark,	Mallory,	Roach,	White,
Daniel,	Martin,	Smith,	Wolcott.
George,	Mason,	Spooner,	
Gorman,	Morrill,	Stewart,	

So the amendment of the committee was agreed to.

Mr. WHITE. I move to strike out "sixty-seven" and insert in lieu thereof "forty."

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. Strike out "sixty-seven" where it occurs and insert "forty;" so as to read:

Coal, bituminous, and all coals containing less than 92 per cent of fixed carbon, and shale 40 cents per ton of 28 bushels, etc.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from California.

The amendment was rejected.

Mr. WHITE. I move to add at the end of the paragraph the following proviso:

Provided, That on all coal imported into the United States, which is afterwards used for fuel on board vessels propelled by steam and engaged in the coasting trade or in the trade with foreign countries, and which are registered under the laws of the United States, a drawback shall be allowed equal to the duty imposed by law upon such coal, and shall be paid under such regulations as the Secretary of the Treasury shall prescribe.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from California.

Mr. WHITE. Mr. President, the paragraph to which this amendment is proposed is that which deals with the duty on coal. Under the act of 1883, 22 Statutes at Large, 511, there was the following provision:

Coal, bituminous, and shale, 75 cents per ton of 28 bushels, 80 pounds to the bushel. A drawback of 75 cents per ton shall be allowed on all bituminous coal imported into the United States which is afterwards used for fuel on board of vessels propelled by steam which are engaged in the coasting trade of the United States, or in the trade with foreign countries, to be allowed and paid under such regulations as the Secretary of the Treasury shall prescribe.

Afterwards an amendment was incorporated into the law by an act to be found in the statutes of 1885–1887, volume 24, Statutes at Large, as follows:

That the provision of Schedule N of "An act to reduce internal-revenue taxation, and for other purposes," approved March 3, 1883, allowing a drawback on imported bituminous coal used for fuel on vessels propelled by steam, shall be construed to apply only to vessels of the United States.

When the McKinley bill was enacted, there was contained therein a provision in the general drawback clause which it was supposed retained this exemption, and the district court of the United States for the northern district of California in a case brought by the United States so held. That cause was appealed to the circuit court of appeals in the ninth circuit, and the judgment was affirmed. It then went to the Supreme Court of the United States, and in 1896, in an opinion to be found in volume 163 of the United States Reports, page 499, it was determined in United States *vs.* Allen that the McKinley Act by implication repealed this drawback provision, and that the general drawback phraseology of that enactment was not sufficient, notwithstanding the rule against repeals by implication, to maintain the status which had existed before the passage of the McKinley law.

The object of this amendment is to restore to American shipping the benefit of the provisions of the act of 1883, which were supposed to be continued in all subsequent tariff enactments. It is simply to return to the condition which was then adopted with the approval of Congress and with the general approval of the people, and which was disturbed, indirectly and unintentionally,

as I believe everyone familiar with the legislation of that time will admit.

It has been argued that this provision should be placed in the free list in connection with paragraph 504, but that relates to the exemption of ships' stores and has no relation to this clause. If it were operative at all upon coal used for fuel, then there would be no necessity for a drawback clause, because the free list needs no drawback.

I submit this matter. I have already attracted the attention of the various members of the majority of the Committee on Finance to the subject. But if it will embarrass the proceedings this evening to proceed further with reference to it, I will suggest to the Senator having the bill in charge that the subject be carefully examined and taken up, if possible, to-morrow and disposed of.

Mr. PLATT of Connecticut. What was the paragraph the Senator referred to in the free list?

Mr. WHITE. Paragraph 504 of the free list, page 169. It read, according to the House provision:

Coal, anthracite, and coal stores of American vessels, but none shall be unloaded.

The committee propose to amend it so that it will read:

Coal stores of American vessels, but none shall be unladen or discharged.

Now, it is proposed to put a drawback provision there. It would be manifestly out of place because the original part of the paragraph is operative; everything is on the free list; and hence it should come in at the place indicated by me, to wit, in this paragraph.

Mr. ALLISON. I hope the Senator will allow that to be passed over until to-morrow, to be taken up in the morning.

Mr. WHITE. Very well.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from California will be passed over.

Mr. ALLISON. I desire at this time to offer an amendment to section 3, in order that it may be printed.

Mr. BURROWS and Mr. WHITE. Let the amendment be read.

The PRESIDING OFFICER. The Secretary will read the proposed amendment.

The SECRETARY. It is proposed to strike out section 3 and to insert in lieu thereof the following:

SEC. 3. That whenever the President of the United States, with a view to secure reciprocal trade with foreign countries, shall, within the period of two years from and after the passage of this act, enter into commercial treaty or treaties with any other country or countries concerning the admission into any such country or countries of the goods, wares, and merchandise of the United States and their use and disposition therein, deemed to be for the interests of the United States, and in such treaty or treaties, in consideration of the advantages accruing to the United States therefrom, shall provide for the reduction during a specified period not exceeding five years of the duties imposed by this act, to the extent of not more than 20 per cent thereof upon such goods, wares, or merchandise as may be designated therein of the country or countries with which such treaty or treaties shall be made as in this section provided for, or shall provide for the transfer during such period from the dutiable list of this act to the free list thereof of such goods, wares, and merchandise, being the natural products of such foreign country or countries and not of the United States, or shall provide for the retention upon the free list of this act during a specified period not exceeding five years of such goods, wares, and merchandise now included in said free list as may be designated therein, and when any such treaty shall have been duly ratified and public proclamation made accordingly, then and thereafter the duties which shall be collected by the United States upon any of the designated goods, wares, and merchandise from the foreign country with which such treaty has been made shall, during the period provided for, be the duties specified and provided for in such treaty and none other.

Mr. ALLISON. I ask the Senate to proceed to paragraph 415.

Mr. BACON. I should like to offer an amendment in lieu of the amendment I now have pending. I have an amendment pending to this effect, that there shall be added a clause to be known as paragraph 517½, to put on the free list cotton ties of iron or steel of any thickness for baling cotton, cut to lengths, punched or not punched, with or without buckles. I wish to add to that:

Bags or sacks made from plain woven fabrics suitable for grain sacks and bagging for cotton, gunny cloth, and similar fabrics suitable for covering cotton.

Mr. WHITE. Will the Senator from Georgia please read the last clause again?

Mr. BACON. I propose to add:

Bags or sacks made from plain woven fabrics suitable for grain sacks, and bagging for cotton, gunny cloth, and similar fabrics suitable for covering cotton.

Of course the Senator will offer any suggestion as to the phraseology that he sees proper.

I desire to state that the Senate has already acted upon the matter of bags for grain and bagging for cotton by an amendment offered by the junior Senator from Alabama [Mr. PETTUS], under which they were stricken from the dutiable list, but they have not yet been put upon the free list, and if the matter were to remain as it now is, they would of course go under the basket clause. I offer this in lieu of the original amendment, so that the whole provision may be received as one amendment.

Mr. PETTUS. I suggest to the Senator from Georgia that there was another amendment. I offered the amendment in reference to bagging and bags. The Senator from Arkansas offered another amendment, which carried, and struck out jute and the preparations of jute. It seems to me that they should all go together.

Mr. BACON. I should be very glad to have the suggestion of the Senator incorporated as an amendment to the amendment.

Mr. PETTUS. They were all stricken out on the same day, the last on the motion of the Senator from Arkansas.

Mr. ALLISON. I did not quite hear the suggestion of the Senator from Alabama.

Mr. PETTUS. My suggestion is that jute and jute butts were stricken out of the dutiable list on the motion of the Senator from Arkansas, and they might well be incorporated in this amendment, putting them on the free list along with bags or sacks, etc.

Mr. ALLISON. Jute and jute butts are now on the free list, I will say to my friend. They are not on the dutiable list, and have not been for a good many years. The clauses that have been voted on already would be remitted, of course, to the basket clause of the dutiable list if they are not specifically put upon the free list, and I have no objection to making a basket provision covering all these things, so that the question may be settled by one vote.

Mr. PETTUS. I will ask the Senator from Iowa to consent that they go on the free list. The Senate has already voted on them for that purpose.

Mr. ALLISON. Jute and jute butts are already on the free list.

Mr. PETTUS. I will confine my request to the amendment offered by the Senator from Georgia [Mr. BACON].

Mr. ALLISON. Very well.

Mr. PETTUS. They have already been stricken from the dutiable list. Now I ask the Senator to consent that they be put on the free list.

Mr. ALLISON. I could not do that very well, in view of the close vote, but I will agree that the question may be voted on, as suggested by the Senator from Georgia. Of course there will be no objection to that.

Mr. WHITE. I suggest to the Senator from Alabama that there may have been a caucus ad interim.

Mr. ALLISON. I assure the Senator from California that there has not been.

Mr. PETTUS. I hope there has not been. The Senate voted to strike them off the dutiable list for the purpose of putting them on the free list, as announced at the time the motion was made. That having been decided upon, I hope the Senator from Iowa will consent that they shall go on the free list.

Mr. ALLISON. I have no power to do that, and inasmuch as the vote was a very close one, I think we had better try it over again and see whether they can be put on the free list. I am not permitted to consent to so radical a change as is suggested by the Senator from Alabama.

Mr. BACON. I do not understand that the Senate now has the free list under consideration, and consequently it is not now immediately in order.

Mr. ALLISON. Not now, but we shall reach the free list very soon. There is no objection to the amendment of the Senator from Georgia being offered now and considered when we reach it. I ask the Senate to go to paragraph 415.

The next paragraph passed over was paragraph 415, on page 149, which was read, as follows:

415. Feathers and downs of all kinds, including bird skins or parts thereof with the feathers on, crude or not dressed, colored, or otherwise advanced or manufactured in any manner, not specially provided for in this act, 15 per cent ad valorem; when dressed, colored, or otherwise advanced or manufactured in any manner, including quilts of down and other manufactures of down, and also dressed and finished birds suitable for millinery ornaments, and artificial or ornamental feathers, fruits, grains, leaves, flowers, and stems or parts thereof, of whatever material composed, not specially provided for in this act, 50 per cent ad valorem.

Mr. ALLISON. In line 20, page 149, I move, in behalf of the committee, to strike out "fifteen" and insert "twenty-five;" so as to read:

Feathers and downs of all kinds, including bird skins or parts thereof with the feathers on, crude or not dressed, colored, or otherwise advanced or manufactured in any manner, not specially provided for in this act, 25 per cent ad valorem.

The amendment was agreed to.

Mr. ALLISON. I will ask if any change has been made in line 25?

The VICE-PRESIDENT. No change has been made.

Mr. ALLISON. Paragraph 425 is the next paragraph passed over.

Mr. JONES of Arkansas. I ask the Senator to allow that paragraph to go over for the present.

The VICE-PRESIDENT. Does the Senator from Arkansas refer to paragraph 425?

Mr. JONES of Arkansas. Yes; I should be glad to have it passed over until to-morrow. [A pause.] I withdraw the request.

The Committee on Finance proposed to amend paragraph 425, on page 151, line 11, after the word "set," by striking out "15 per cent ad valorem;" and on page 152, line 1, after the word "set," by striking out "twenty" and inserting "all the foregoing, ten;" so as to make the paragraph read:

425. Diamonds and other precious stones advanced in condition or value from their natural state by cleaving, splitting, cutting, or other process, and not set, imitations of diamonds or other precious stones, composed of glass or paste, not exceeding an inch in dimensions, not engraved, painted, or otherwise ornamented or decorated, and not mounted or set, all the foregoing, 10 per cent ad valorem.

Mr. ALLISON. In line 20, page 151, I move to insert "10 per cent" instead of "15 per cent."

The SECRETARY. It is proposed to amend the committee amendment by striking out, in line 20, after the word "set," "fifteen" and inserting "ten;" and then to restore the words "per cent ad valorem."

The VICE-PRESIDENT. Unless objection is made, the committee's amendment is disagreed to, and the Senator from Iowa moves to insert "ten" in lieu of "fifteen;" so as to read "10 per cent ad valorem."

The amendment was agreed to.

Mr. ALLISON. I ask that the amendment on page 152, line 1, be disagreed to.

The SECRETARY. In line 1, page 152, after the word "set," strike out "twenty" and insert "all the foregoing, ten."

The amendment was rejected.

Mr. ALLISON. There is no further amendment to that paragraph.

The next paragraph passed over was paragraph 443, page 159, which the Committee on Finance proposed to strike out, as follows:

443. Paintings in oil or water colors, pastels, pen and ink drawings, and statuary, not specially provided for in this act, 25 per cent ad valorem; but the term "statuary" as used in this act shall be understood to include only such statuary as is cut, carved, or otherwise wrought by hand from a solid block or mass of marble, stone, or alabaster, or from metal, and as is the professional production of a statuary or sculptor only.

Mr. ALLISON. I ask that the Senate disagree to the amendment striking out that paragraph. When that is done, in behalf of the committee, I will move to insert "thirty" instead of "twenty-five."

The VICE-PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The VICE-PRESIDENT. The Senator from Iowa moves to amend the paragraph. The amendment will be stated.

The SECRETARY. In line 12, after the word "act," strike out "twenty-five" and insert "thirty;" so as to make the paragraph read:

443. Paintings in oil or water colors, pastels, pen and ink drawings, and statuary, not specially provided for in this act, 30 per cent ad valorem; but the term "statuary," as used in this act, shall be understood to include only such statuary as is cut, carved, or otherwise wrought by hand from a solid block or mass of marble, stone, or alabaster, or from metal, and as is the professional production of a statuary or sculptor only.

The amendment was agreed to.

Mr. JONES of Arkansas. I ask the Senator from Iowa if he does not think that that increase in that rate would be more likely to prevent importations than to increase revenue?

Mr. ALLISON. I hope it will increase revenue.

Mr. JONES of Arkansas. The experience of the Government upon those articles I do not think justifies that hope.

Mr. ALLISON. It may be delusive, but we must find revenue from some source. I move to insert at the end of the paragraph, in line 17, a comma, and the following:

And shall not include the pedestal or structure on which such statuary may be mounted or placed.

The amendment was agreed to.

Mr. WHITE. I desire to inquire of the Senator from Iowa the reason of that amendment? There seems to be rather an illegitimate separation of the two articles.

Mr. ALLISON. The object is to segregate the pedestal from the work of art.

Mr. WHITE. The amendment has that appearance; but I mean, is there any particular object in connection with the revenue, which the Senator has in view? Is there any particular reason why the work of art should be assessed at that rate and the other article not: in other words, what is the rationale of the amendment, if I may inquire?

Mr. ALLISON. I think the Senator will see the real point in this amendment. It is to segregate from the work of art the pedestal on which it rests, and that will place the pedestal under another clause in the bill at 50 per cent.

Mr. VEST. Let me ask the Senator from Iowa a question. A great many of the finest works of art in marble are in one piece; the pedestal and the statue are cut out of one block. How is the Senator going to make this tax operate in such a case?

Mr. ALLISON. I was not aware of that. I suppose that would be an objection.

Mr. VEST. That is the case.

Mr. ALLISON. Then I would say in the amendment, "where they are separate pieces."

Mr. VEST. That is the case. Many of the finest works of art in Europe are made out of one block. In fact, the first-class sculptors pride themselves upon that fact. I can not see how a custom-house officer could separate the pedestal from the statue.

Mr. JONES of Arkansas. They could saw it off. [Laughter.]

Mr. ALLISON. If the Secretary will return the amendment, I think I may be able to modify it so as to cover the point suggested by the Senator from Missouri [Mr. VEST].

Mr. WHITE. I presume, as the Venus of Milo lost her arms, that the separation referred to by the Senator from Missouri [Mr. VEST] can be accomplished. [Laughter.]

Mr. ALLISON. I do not think there will be any great difficulty about the matter. If there is, we can arrange it in conference. I shall not offer any modification at present.

Mr. SEWELL. I suggest to the Senator from Iowa that under the present law the pedestal is taxable, while the work of art itself is free.

The VICE-PRESIDENT. The next paragraph which was passed over will be read.

The SECRETARY. The Committee on Finance reported to strike out paragraph 444, on page 159, line 18, as follows:

444. Peat moss, $1 per ton.

Mr. ALLISON. The committee now recommend that that be disagreed to.

Mr. VEST. What became of paragraph 443? Was that passed over?

Mr. ALLISON. It was not passed over. I stated that if there was found to be any difficulty we might arrange it later on or in conference.

The VICE-PRESIDENT. Unless objection is made, the report of the committee recommending the striking out of paragraph 444, which has been read, will be disagreed to, and the paragraph will stand as it came from the House of Representatives. The Chair hears no objection, and it is so ordered.

The next paragraph which was passed over was paragraph 445, which the Committee on Finance reported to amend, in line 19, on page 159, after the words "pencils of," to insert "paper or;" so as to read:

Pencils of paper or wood filled with lead or other material, and pencils of lead, 50 cents per gross.

The amendment was agreed to.

The next amendment was, in paragraph 445, line 20, before the word "cents," to strike out "fifty" and insert "forty;" so as to read:

Forty cents per gross.

Mr. ALLISON. I ask to modify that amendment by inserting "forty-five" in lieu of "forty."

The SECRETARY. It is proposed to amend the committee amendment by striking out "fifty" and inserting "forty-five;" so as to read:

Forty-five cents per gross.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment of the Committee on Finance was, in paragraph 445, line 21, before the words "per centum," to strike out "thirty" and insert "twenty."

Mr. ALLISON. I wish to modify that amendment by striking out "thirty" and inserting "twenty-five."

The SECRETARY. In line 21 of paragraph 445, before the words "per centum," it is proposed to strike out "thirty" and insert "twenty-five;" so as to read:

Pencils of paper or wood filled with lead or other material, and pencils of lead, 45 cents per gross and 25 per cent ad valorem.

The amendment as modified was agreed to.

The next amendment of the Committee on Finance was, in the same paragraph, Lne 21, after the words "slate pencils," to strike out "4 cents per 100" and insert "covered with wood, 35 per cent ad valorem; all other slate pencils, 3 cents per 100."

The amendment was agreed to.

Mr. ALLISON. Paragraph 452 was passed over, I think, at the request of the Senator from New Jersey [Mr. SEWELL], who had some difficulty about salicylic acid. That paragraph, I believe, has already been amended so as to exclude salicylic acid.

The VICE-PRESIDENT. It was passed over at the request of the Senator from California [Mr. WHITE].

Mr. SEWELL. I understand that salicylic acid has been restored to the dutiable list.

Mr. ALLISON. It has been restored to the dutiable list and taken from the free list. That is my recollection of it.

Mr. SEWELL. That is correct.

Mr. WHITE. I did not understand the Senator from Iowa.

Mr. ALLISON. I say that since paragraph 452 was passed over, salicylic acid has been restored to the dutiable list by a specific

vote, and then the word "salicylic" was stricken from paragraph 452 of the free list.

Mr. WHITE. So the idea of the Senator from Iowa is that the vote placing salicylic acid upon the dutiable list renders it unnecessary to take another vote now?

Mr. ALLISON. Yes. We took a separate vote at that time, and thereby arranged the objectionable feature of this paragraph. So, if there is no further amendment to be offered, I hope that the paragraph will stand.

Mr. JONES of Arkansas. The word "salicylic" comes out of paragraph 452, does it?

Mr. WHITE. Yes.

Mr. ALLISON. I ask that the paragraph be read as it stands.

The Secretary read as follows:

452. Acids: Arsenic or arsenious, benzoic, carbolic, fluoric, hydrochloric or muriatic, nitric, oxalic, phosphoric, picric or nitro-picric, prussic and silicic, and valerianic.

Mr. ALLISON. Is paragraph 452 now disposed of?

The VICE-PRESIDENT. It was disposed of on the 26th instant. Without objection, the amendments to the paragraph are agreed to.

Mr. ALLISON. My attention is called to two "ands" in line 20, and I ask that the first "and" may be stricken out and a comma inserted after the word "prussic."

The VICE-PRESIDENT. That amendment will be made, in the absence of objection.

The next paragraph passed over was paragraph 456, on page 162, where the Committee on Finance, in line 5, after the word "anthracin," reported to strike out the words "including naphthazarin black" and to insert "and all fast black coal-tar dyes;" so as to make the paragraph read:

456. Alizarin, natural or artificial, and dyes derived from alizarin or from anthracin, and all fast-black coal-tar dyes.

Mr. ALLISON. I wish to modify the amendment by striking out all after the word "anthracin;" that is, not only striking out the words the committee originally proposed, but also striking out the words "and all fast black coal-tar dyes."

The VICE-PRESIDENT. Without objection, the amendment will be considered as agreed to, striking out, all after the word "anthracin," in line 5.

Mr. VEST. What does the Senator propose to do with the fast black coal-tar dyes—to put them under the basket clause, or to put a duty upon them?

Mr. ALLISON. They will go to the basket clause with the duty there provided They will go under chemical compounds, and will all be dutiable.

The next paragraph which was passed over was paragraph 460, beginning in line 11, on page 162, as follows:

460. Any animal imported specially for breeding purposes shall be admitted free: *Provided*, That no such animal shall be admitted free unless pure bred of a recognized breed, and duly registered in the book of record established for that breed: *And provided further*, That certificate of such record and of the pedigree of such animal shall be produced and submitted to the customs officer, duly authenticated by the proper custodian of such book of record, together with the affidavit of the owner, agent, or importer that such animal is the identical animal described in said certificate of record and pedigree. The Secretary of the Treasury may prescribe such additional regulations as may be required for the strict enforcement of this provision.

Mr. ALLISON. I call the attention of the Senator from Texas [Mr. CHILTON] to the amendment which he offered to this paragraph some days ago. The committee have considered the amendment, and they think it a wise amendment to adopt.

The VICE-PRESIDENT. The amendment referred to by the Senator from Iowa, which was offered by the Senator from Texas [Mr. CHILTON], to insert a proviso in line 21, on page 162, paragraph 460, has already been adopted.

Mr. ALLISON. I did not know that.

Mr. CHILTON. That was agreed to several days ago.

The VICE-PRESIDENT. The Chair understands the Senator from Arkansas [Mr. JONES] desires to offer an amendment.

Mr. JONES of Arkansas. Will the Secretary read paragraph 460 as it stands?

The VICE-PRESIDENT. There is no change made in the paragraph except the amendment proposed by the Senator from Texas. The Secretary does not appear to have the amendment proposed by the Senator from Arkansas.

Mr. JONES of Arkansas. My proposition was to insert the provision that was in the Wilson bill on this subject.

The VICE-PRESIDENT. It has not been sent to the Secretary's desk.

Mr. MILLS. It is in this bill. Will the Senator from Pennsylvania [Mr. QUAY] refer me to the particular paragraph about cattle?

The VICE-PRESIDENT. Paragraph 373 of the Wilson law.

Mr. QUAY. I did not understand the remark of the Senator from Texas directed to me a moment ago.

Mr. MILLS. It was with reference to the cattle provision. I was asking in what paragraph of the bill it was to be found, as the Senator is familiar with it.

Mr. QUAY. It is to be found, as the committee have placed it, in the free list. I thought it properly ought to go with the paragraph relating to the duty on cattle; but the committee differ with me. It does not matter, so far as the result is concerned, where it goes.

Mr. MILLS. I want to call it up and have it acted upon now. It reads as follows:

Cattle, horses, sheep, or other domestic animals which have strayed across the boundary line into any foreign country, or have been or may be driven across such boundary line by the owner for temporary pasturage purposes, together with their increase, may be brought back to the United States free of duty under regulations to be prescribed by the Secretary of the Treasury.

Mr. QUAY. I understand the committee are ready to adopt the amendment.

Mr. ALLISON. The committee do not recommend its adoption, but they are perfectly willing it shall be voted upon now if the Senator from Texas offers it.

Mr. QUAY. Then let us take the vote upon it.

The VICE-PRESIDENT. The Secretary will read the amendment proposed by the Senator from Texas [Mr. MILLS].

The SECRETARY. At the end of paragraph 460 it is proposed to insert:

Cattle, horses, sheep, or other domestic animals which have strayed across the boundary line into any foreign country, or have been or may be driven across such boundary line by the owner for temporary pasturage purposes, together with their increase, may be brought back to the United States free of duty under regulations to be prescribed by the Secretary of the Treasury.

Mr. QUAY. I move the adoption of the amendment, Mr. President.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Texas [Mr. MILLS], which has been read.

The amendment was agreed to.

Mr. JONES of Arkansas. The Senator from Iowa inquired of me if this was the exact language of the Wilson law. The word "temporary" is in the amendment as proposed, but it is not in the law now. There is that difference.

Mr. ALLISON. I think the word "temporary" ought to be there.

The VICE-PRESIDENT. That word is in the amendment.

Mr. JONES of Arkansas. As the Senator asked me the question, I wanted him to know exactly what is proposed. The word "temporary" weakens the provision.

Mr. ALLISON. I simply stated that the committee did not recommend it. They feared that there might be some confusion under it, unless there were some better regulations than those proposed by the Senator from Texas.

Mr. JONES of Arkansas. The word "temporary" will cover it. There is no difficulty in the administration of it now, as I understand.

Mr. MILLS. "Temporary" will do.

The VICE-PRESIDENT. The paragraph as amended will be agreed to, in the absence of objection.

The Secretary read paragraph 463½, which the Committee on Finance proposed to insert as a new paragraph, as follows:

463½. Antitoxin.

Mr. ALLISON. I hope that amendment will be disagreed to, and I call the attention of the Senator from California to it. On examination the committee, in their judgment, think it is not wise to adopt the amendment.

Mr. WHITE. I should like to understand the reasons for it. Antitoxin is a medicine of great value. It has been found to be most necessary in the treatment of that dire disease, diphtheria. The Board of General Appraisers of the United States, located at New York, held that it was not dutiable, coming under the general designation of vaccine virus; but the United States district court held as the blood of the horse was used in preparing the medicine antitoxin, and as the blood of the horse had nothing to do with vaccine virus, and was not connected with it, that it was a different substance. Both are used for the purpose of counteracting or preventing or curing disease.

It appears to me utterly irrational to exclude from the market such an article as antitoxin, or to place any impediment, indeed, upon its general use in the cheapest way. It does not come under any of the provisions justifying the collection of a duty. If there should be exemptions as to anything, it should be as to an article of that character: but I presume there is some one engaged in the business of making it less easy to cure diphtheria, and such programme needs encouragement.

I certainly will not withdraw the amendment. I stated the facts at the time I made the motion, and the amendment was deliberately incorporated in the bill, and can only be removed, as I have said, at the suggestion of some interest affected.

Mr. ALLISON. Do I understand that it is part of the bill now.

Mr. WHITE. It was adopted.

The VICE-PRESIDENT. The Chair understands it was agreed to on the day it was submitted.

Mr. WHITE. Yes, sir; I stated the facts and referred to the

decision of the court, which was rendered by Judge Wheeler, and which I can get in a moment.

Mr. ALLISON. I do not wish to go back to it. I only wish to say that there are a number of manufacturers in this country and there are a great number of boards of health who manufacture antitoxin, who have told the committee that much of what is imported is spurious and imperfect; and that it is much better to have it carefully examined and have a small duty upon it.

Mr. WHITE. If that were so, then it should apply to vaccine virus or any other medicine. If there is any board of health in this country engaged in manufacturing antitoxin, which board of health desires to impose a duty upon it, that board of health ought to be summarily ejected from office and be compelled to pursue their selfish and robbing vocation without drawing a salary from the public.

Mr. PLATT of Connecticut. I do not understand that this matter was agreed to. Certainly it has been published in the list of paragraphs which were passed over, and it is to be found in that list, on page 47, which was prepared by the Secretary.

The VICE-PRESIDENT. The Chair understands the provision was first inserted and then passed over for further action.

Mr. WHITE. Does the Senator desire to refer to the RECORD?

Mr. PLATT of Connecticut. I understand "antitoxin" was inserted; that then it was passed over for further action, and now comes up.

Mr. JONES of Arkansas. If it was inserted, that is all we want.

Mr. PLATT of Connecticut. It is like a great many other paragraphs which have been passed over for further consideration.

Mr. WHITE. It was incorporated in the bill at the time, as I remember distinctly.

The VICE-PRESIDENT. The next paragraph passed over will be stated.

The Secretary read the amendments proposed by the Committee on Finance to paragraph 470, on page 164, which were, in line 4, after the words "United States," to insert "(except articles upon which an internal-revenue tax is levied);" in line 7, after the word "means," to strike out "casks, barrels, carboys, bags, and other vessels of American manufacture exported filled with American products, or exported empty and returned filled with foreign products, including shooks when returned as barrels or boxes; also quicksilver flasks or bottles, of either domestic or foreign manufacture, which shall have been actually exported from the United States;" in line 16, after the word "Treasury," to strike out "but the exemption of bags from duty shall apply only to such domestic bags as may be imported by the exporter thereof, and if any such articles are subject to internal tax at the time of exportation, such tax shall be proved to have been paid before exportation and not refunded;" in line 22, after the word "made," to strike out "the reimportation of which is hereby prohibited except upon payment of duties equal to the drawbacks allowed;" and in line 1, on page 165, after the word "law," to strike out "*And provided further*, That when manufactured tobacco which has been exported without payment of internal-revenue tax shall be reimported, it shall be retained in the custody of the collector of customs until internal-revenue stamps in payment of the legal duties shall be placed thereon;" so as to make the paragraph read:

470. Articles the growth, produce, and manufacture of the United States (except articles upon which an internal-revenue tax is levied), when returned after having been exported, without having been advanced in value or improved in condition by any process of manufacture or other means; but proof of the identity of such articles shall be made, under general regulations to be prescribed by the Secretary of the Treasury: *Provided*, That this paragraph shall not apply to any article upon which an allowance of drawback has been made, or to any article manufactured in bonded warehouse and exported under any provision of law.

Mr. ALLISON. The committee made several recommendations of changes in this paragraph. It is substantially the paragraph of the law of 1890, with a slight modification made in 1894. The general plan of the committee as respects this paragraph was decided upon at an early stage in the consideration of the bill. The committee now propose to withdraw all the amendments to this paragraph and allow it to stand as it stands in the law of 1894, but recommend, in line 11, after the word "shooks," there be inserted the words "and staves."

The VICE-PRESIDENT. In the absence of objection, the amendments heretofore proposed by the committee to the paragraph will be rejected.

Mr. WHITE. If the Senator from Iowa will permit a suggestion, the portion of this paragraph in regard to the drawback upon bags will not read, I think, harmoniously unless the bill is changed in its present appearance in relation to bags. Bags have been removed from the position in the dutiable list in which they were originally placed; and of course, without further action, they will go into the basket clause. Those who believe that they should not be dutiable will, at the proper time, offer an amendment upon that subject; and if they do not change their opinion, of course they will go on the free list, and it will not be necessary to have a drawback upon them.

Mr. ALLISON. That is true; but the bagging paragraph will be reached very soon. I suggest to the Senator that we dispose of this and then modify it.

Mr. MILLS. What is the paragraph?

The VICE-PRESIDENT. Paragraph 470. The Senator from Iowa suggests that the amendments of the committee be disagreed to. Is there objection? The Chair hears none, and they are disagreed to.

The SECRETARY. After the word "shooks," in line 17, it is proposed to insert "and staves."

The VICE-PRESIDENT. Without objection, the amendment will be considered as agreed to. The paragraph is open to amendment.

Mr. ALLISON. The next paragraph printed in the text is 473¼.

The SECRETARY. The following amendment was passed over:

473¼. Bagging for cotton, gunny cloth, and all similar material suitable for covering cotton, composed in whole or in part of hemp, flax, jute, or jute butts.

Mr. PETTUS. I desire to propose an amendment.

Mr. WHITE. If agreeable to the Senator in charge of the bill, I would personally prefer that the provision regarding bagging should go over until to-morrow. There are some matters in connection with it which I have not at hand at this moment.

The VICE-PRESIDENT. Does the Senator from Alabama consent?

Mr. WHITE. Of course I am friendly to placing it upon the free list. If the Senator from Iowa has no objection I should like to have it go over.

Mr. ALLISON. I have no objection if it is agreeable to the Senator from Alabama. It is an important amendment.

Mr. WHITE. Very important.

Mr. ALLISON. The revenue is affected to the extent of six or seven million dollars, and we ought to consider it with great care.

Mr. WHITE. It strikes me the Senator from Iowa is unduly alarmed about that.

Mr. ALLISON. I am not alarmed at all.

Mr. WHITE. I retract the statement, for, judging by the bill, I have no reason to assume that the absence of revenue alarms the Senator from Iowa.

The VICE-PRESIDENT. The paragraph will go over.

The Secretary read as follows:

476¼. Bauxite or beauxite, crude, not refined or otherwise advanced in condition.

Mr. ALLISON. I ask that the amendment be disagreed to, as the article has already been placed upon the dutiable list.

The amendment was rejected.

The Secretary read as follows:

493¼. Burlaps and bags for grain made of burlaps.

Mr. ALLISON. That is a kindred amendment. It was not reported by the committee, but offered by an individual Senator.

Mr. GRAY. Let it go over with the other paragraph.

Mr. ALLISON. It may go over with the other paragraph.

The VICE-PRESIDENT. There being no objection, that will be the order.

Mr. ALLISON. Paragraph 495¼, bleaching powder, I believe, is an amendment offered by the Senator from Delaware [Mr. GRAY]. Inasmuch as we have already taken a decisive vote upon the question, unless the Senator from Delaware desires a further vote——

Mr. GRAY. Let us vote on it.

Mr. ALLISON. Very well.

The VICE-PRESIDENT. The Secretary will report the amendment.

The SECRETARY. It is proposed to insert as a new paragraph:

495¼. Bleaching powder.

The amendment was rejected.

The SECRETARY. The committee report an amendment to insert as a new paragraph:

500a. Charcoal.

The amendment was agreed to.

The VICE-PRESIDENT. The next passed-over amendment will be stated.

The SECRETARY. In paragraph 504 the Committee on Finance reported an amendment, to strike out, in line 3, after the word "coal," the comma and the words "anthracite, and coal;" so as to make the paragraph read:

504. Coal stores of American vessels, but none shall be unloaded.

Mr. ALLISON. I ask that the paragraph may be passed over, in order that it may be considered to-morrow morning in connection with the amendment suggested by the Senator from California.

Mr. ALLEN. What has become of paragraph 500b?

The VICE-PRESIDENT. That is an amendment proposed by an individual Senator, and not by the committee

Mr. ALLISON. Paragraph 500b has already been disposed of. It has been struck from the bill.

The SECRETARY. The next passed-over amendment of the committee is to strike out paragraph 505, in the following words:

505. Coal tar, crude, and pitch of coal tar, and dead or creosote oil. Aniline and derivatives, toluidine and derivatives, xylidine, cumidine, binitrotoluole, binitrobenzole, benzidine and derivatives, tolidine and derivatives, dianistidine, naphtole and derivatives, naphtylamine and derivatives, benzaldehyde, benzyl chloride and derivatives, phtalic acid and derivatives, and resorcine. None of the derivatives referred to above, however, shall include any coal-tar dyes or colors.

And to insert in lieu thereof the following:

505. Coal tar, crude, pitch of coal tar, and products of coal tar known as dead or creosote oil, benzol, toluol, naphthaline, xylol, phenol, and cresol.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the committee.

The amendment was agreed to.

Mr. MILLS. The Senate is not passing regularly over the free list.

Mr. ALLISON. We are simply taking up the passed-over items.

Mr. MILLS. I wish to offer some amendments after the committee get through.

Mr. ALLISON. Very well; that will be in order.

The VICE-PRESIDENT. The next amendment is paragraph 517½, proposed by the Senator from Georgia [Mr. BACON].

Mr. BACON. As that is a kindred subject to the one already passed, I suggest to the Senator from Iowa that it also go over until to-morrow morning.

The VICE-PRESIDENT. If there be no objection, it will go over.

Mr. QUAY. Mr. President, I have been absent from the Chamber for a moment. I desire to inquire what was done with paragraph 500a?

Mr. GRAY. It was agreed to.

Mr. ALLISON. It was agreed to.

The VICE-PRESIDENT. The paragraph was agreed to.

Mr. QUAY. What was done with paragraph 505?

Mr. ALLISON. It was agreed to.

Mr. QUAY. I have been gravely misinformed with respect to the disposition of the committee as to both of these items. That is all I have to say.

Mr. ALLISON. I do not understand the Senator.

Mr. QUAY. I say I have been very gravely misinformed as to the intention of the committee with respect to both of these items.

Mr. ALLISON. What does the Senator from Pennsylvania desire about them?

Mr. QUAY. My understanding was that charcoal was to go upon the dutiable list, and that paragraph 505 was to be stricken out, and those articles were to go under a revenue duty of 20 per cent.

Mr. ALLISON. If the Senator desires that the paragraphs be passed over, I shall be glad to have it done.

Mr. QUAY. It is not worth while to pass them over if the committee has agreed as to what disposition it will make of them. We all stand confined and imprisoned by the steel pact of the Republican caucus. If you gentlemen know what you are going to do, we might as well dispose of the paragraphs now.

Mr. WHITE. I suggest that this is scarcely a case for obtaining a decree of specific performance.

Mr. QUAY. Let the paragraphs be passed over for the present.

Mr. ALLISON. I ask that they may be passed over.

Mr. JONES of Arkansas. They have been agreed to.

The VICE-PRESIDENT. The paragraphs will be passed over.

Mr. ALLISON. By unanimous consent they may be considered as passed over. I ask unanimous consent to that effect.

The VICE-PRESIDENT. Paragraphs 500a and 505 will be passed over.

Mr. BACON. If the Senator from Iowa will permit me, as the Senator from Alabama [Mr. PETTUS] has introduced a separate amendment covering the question of grain sacks and cotton bagging, I will withdraw that part of the amendment which I offered this afternoon, in order that there may not be two amendments pending at the same time to the same effect. So the amendment which I will consider as pending will be the original amendment, which relates solely to the question of cotton ties, the matter of cotton bagging and of grain sacks being covered by the amendment offered by the Senator from Alabama.

The VICE-PRESIDENT. The Secretary will report the Senator's amendment, which will be laid over.

The Secretary read as follows:

517½. Cotton ties of iron or steel, of any thickness, for baling cotton, cut to lengths, punched or not punched, with or without buckles.

The VICE-PRESIDENT. The amendment will be printed.

Mr. ALLISON. It goes over?

Mr. FAULKNER. Yes, sir.

Mr. ALLISON. Paragraph 525 has not been disposed of.

Mr. VEST. I offered an amendment to the paragraph.

Mr. ALLISON. I believe it has not been finally disposed of.

The SECRETARY. Paragraph 525 as amended reads as follows:

Diamonds and other precious stones, rough or uncut, and not advanced in condition or value from their natural state by cleaving, splitting, cutting, or other process, including miners', glaziers', and engravers' diamonds not set, and jewels to be used in the manufacture of clocks and watches, and diamond dust or bort.

Mr. ALLISON. It was my purpose to insert the words "and jewels for use in the manufacture of watches or clocks" at the end of the paragraph, after the word "bort." I think it would be a little more convenient to have it that way, but I do not see any practical objection to its insertion where it is.

Mr. VEST. I ask that the paragraph may again be read.

The Secretary read as follows:

525. Diamonds and other precious stones, rough or uncut, and not advanced in condition or value from their natural state by cleaving, splitting, cutting, or other process, including miners', glaziers', and engravers' diamonds not set, and jewels to be used in the manufacture of clocks and watches, and diamond dust or bort; and jewels for use in the manufacture of watches or clocks.

Mr. VEST. The Secretary has jewels for watches and clocks in twice.

Mr. ALLISON. Jewels for the manufacture of watches and clocks is inserted twice there. I suggest that it be taken out in one place.

Mr. VEST. Why not add it at the end of the paragraph, after the word "bort," as I did in the amendment I offered? Say "and jewels to be used in the manufacture of clocks and watches."

Mr. ALLISON. That is, in line 25?

Mr. VEST. Yes.

Mr. ALLISON. It is in twice now.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to add at the end of the paragraph the words:

And jewels to be used in the manufacture of clocks and watches.

The VICE-PRESIDENT. Without objection, the amendment will be considered as agreed to.

Mr. ALLISON. There should be a comma after the word "bort."

Mr. VEST. Strike out the period and put in a comma.

Mr. ALLISON. The amendment which I offered will be stricken from the paragraph.

The VICE-PRESIDENT. The Secretary will read the paragraph as it now stands.

The Secretary read as follows:

525. Diamonds and other precious stones, rough or uncut, and not advanced in condition or value from their natural state by cleaving, splitting, cutting, or other process, including miners', glaziers', and engravers' diamonds not set, and diamond dust or bort, and jewels to be used in the manufacture of clocks and watches.

The VICE-PRESIDENT. The amendment has been agreed to.

The Secretary read as follows:

530. Emery ore.

Mr. ALLISON. Paragraph 530 stands.

The Secretary read as follows:

532a. Farina.

Mr. ALLISON. I ask that the paragraph may be passed over.

The VICE-PRESIDENT. It will be passed over.

Mr. ALLISON. I ask that 532b, which has been agreed to, may be reconsidered and struck from the free list, as we have already made the article dutiable in another paragraph.

Mr. JONES of Arkansas. What is that?

Mr. ALLISON. 532b.

The VICE-PRESIDENT. The amendment will be stated.

The Secretary read as follows:

532b. Fashion plates, engraved on steel or copper or on wood, colored or plain.

The VICE-PRESIDENT. The question is on agreeing to the amendment which has been read.

The amendment was rejected.

Mr. ALLISON. I believe I offered on behalf of the committee paragraph 534½. I withdraw the amendment.

Mr. VEST. What is the amendment?

The VICE-PRESIDENT. The amendment will be stated.

The Secretary read as follows:

534½. Fence posts.

The VICE-PRESIDENT. Without objection, upon suggestion of the committee, paragraph 534½ is withdrawn.

The next passed-over committee amendment was to insert the following as a new paragraph:

535½. Fish, fresh, frozen or packed in ice (except salmon), caught in the Great Lakes or other fresh waters by or for American fishermen or citizens of the United States.

Mr. ALLISON. That paragraph may be agreed to.

The amendment was agreed to.

The next passed-over amendment was to insert the following as a new paragraph:

537½. Floor mattings, manufactured from round or split straw, including what is commonly known as Chinese matting.

Mr. ALLISON. That is an amendment offered by a Senator.

The VICE-PRESIDENT. The Senator from Missouri [Mr. VEST] offered the amendment.

Mr. ALLISON. We are ready to have it disposed of.

Mr. VEST. We voted to put these articles upon the free list. Does the Senator from Iowa want another vote?

The VICE-PRESIDENT. It was passed over.

Mr. VEST. We voted it out of the dutiable list, for I made the motion and called for the yeas and nays.

Mr. WHITE. It would have been much simpler to have voted directly upon the question of placing the articles upon the free list; but we did not, and hence the necessity of having another vote. I suggest it is too late this evening for a vote, and that the paragraph may be passed over.

Mr. ALLISON. Let it be passed over.

The VICE-PRESIDENT. The paragraph will be passed over.

The Secretary read as follows:

546. Grease and oils (excepting fish oils), such as are commonly used in soap making or in wire drawing, or for stuffing or dressing leather, and which are fit only for such uses, and not specially provided for by name in this act.

Mr. ALLISON. In line 4, after the word "oils," I move to insert "excepting fish oils."

The VICE-PRESIDENT. The Secretary states that the amendment has already been agreed to.

Mr. ALLISON. It has been agreed to. I ask now that the paragraph may be read as it stands.

The Secretary again read the paragraph.

Mr. ALLISON. Paragraph 547½, gunny bags, will go over.

The VICE-PRESIDENT. Paragraph 547½, at the suggestion of the Senator from Iowa, will go over.

Mr. ALLISON. It goes over as a part of a contested amendment. I also ask that paragraph 550 may go over. It must be modified so as to meet the amendment already made with respect to cattle hides.

The VICE-PRESIDENT. Without objection, it will be passed over.

The next passed-over amendment of the committee was, in paragraph 558, page 174, line 8, after the word "indigo," to insert "whether natural or artificially prepared;" so as to make the paragraph read:

558. Indigo, whether natural or artificially prepared.

Mr. ALLISON. I ask that the committee amendment may be disagreed to.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the committee.

The amendment was rejected.

The next passed-over amendment was to insert as a new paragraph:

581½. Iron ore.

Mr. ALLISON. That, I believe, has been settled by agreeing to a paragraph in the dutiable list imposing 40 cents a ton. I ask the Senate to disagree to the amendment.

The VICE-PRESIDENT. Without objection, the amendment will be rejected.

The Secretary read as follows:

578. Lime, chloride of, or bleaching powder.

Mr. ALLISON. That is to be stricken out.

The VICE-PRESIDENT. The line will be stricken from the bill.

The SECRETARY. The next passed-over amendment is one proposed by the Senator from California, as follows:

581½. Magnesia, sulphate of, or Epsom salts.

Mr. ALLISON. I ask that the paragraph may be passed over.

Mr. HOAR. What has become of paragraph 581?

Mr. ALLISON. It was disposed of.

The VICE-PRESIDENT. It has not been disposed of.

Mr. ALLISON. I ask that it may be.

The VICE-PRESIDENT. The paragraph will be considered as agreed to.

Mr. VEST. What was the amendment just agreed to?

Mr. ALLISON. I ask that paragraph 581½ may be passed over. I think it is already on the dutiable list.

The VICE-PRESIDENT. Paragraph 581½ will be passed over, at the suggestion of the Senator from Iowa.

The Secretary read as follows:

584. Manganese, oxide and ore of.

Mr. ALLISON. That is to be passed over.

The VICE-PRESIDENT. If there be no objection, the paragraph will be passed over.

Mr. ALLISON. Let us go to paragraph 592.

The SECRETARY. The Committee on Finance report an amendment, to strike out paragraph 592, in the following words:

592. Mineral salts obtained by evaporation from mineral waters, when accompanied by a duly authenticated certificate and satisfactory proof, showing that they are in no way artificially prepared, and are only the product of a designated mineral spring.

Mr. ALLISON. I ask that the committee amendment may be disagreed to.

The VICE-PRESIDENT. Without objection, the amendment of the committee is disagreed to. It is disagreed to, and paragraph 592 stands.

The next paragraph passed over was paragraph 603, on page 177, which the Committee on Finance proposed to strike out, as follows:

603. Oils: Amber, crude or rectified, ambergris, anise or anise seed, aniline, cajeput, caraway, cedrat, chamomile, civet, cocoanut, enfleurage grease, fennel, jasmine or jasimine, juglandium, juniper, mace, neroli, or orange flower, nut oil or oil of nuts not specially provided for in this act, olive oil or olive oil foots imported expressly for manufacturing or mechanical purposes and fit only for such use, palm, thyme, origanum red or white, valerian; and also spermaceti, whale and other fish oils of American fisheries, and fish and all other articles the products of such fisheries; petroleum, crude or refined: *Provided*, That if there be imported into the United States crude petroleum, or the products of crude petroleum produced in any country which imposes a duty on petroleum or its products exported from the United States, there shall be levied, paid, and collected upon said crude petroleum or its products so imported 40 per cent ad valorem.

And in lieu thereof to insert:

603. Oils: Almond, amber, crude and rectified ambergris, anise or anise seed, aniline, aspic or spike lavender, bergamot, cajeput, caraway, cassia, cinnamon, cedrat, chamomile, citronella or lemon grass, civet, fennel, jasmine or jasimine, juglandium, juniper, lavender, lemon, limes, mace, neroli or orange flower, enfleurage grease, nut oil or oil of nuts not otherwise specially provided for in this act, orange oil, olive oil for manufacturing or mechanical purposes fit only for such use and valued at not more than 60 cents per gallon, ottar of roses, palm and cocoanut, rosemary or anthoss, sesame or sesamum seed or bean, thyme, origanum red or white, valerian; and also spermaceti, whale, and other fish oils of American fisheries, and all fish and other products, of such fisheries; petroleum, crude or refined: *Provided*, That if there be imported into the United States crude petroleum, or the products of crude petroleum produced in any country which imposes a duty on petroleum or its products exported from the United States, there shall in such cases be levied, paid, and collected a duty upon said crude petroleum or its products so imported equal to the duty imposed by such country.

Mr. ALLISON. I ask that paragraph 603 may be passed over. It is an important amendment.

The VICE-PRESIDENT. No objection being made, the paragraph will be passed over.

The next paragraph passed over was paragraph 606½, on page 179, which the Committee on Finance proposed to insert as a new paragraph, as follows:

606½. Paintings, in oil or water colors, original drawings and sketches, and artists' proofs of etchings and engravings, and statuary, not otherwise provided for in this act; but the term "statuary" as used in this act shall be understood to include only professional productions, whether round or in relief, in marble, stone, alabaster, wood, or metal, of a statuary or sculptor, and the word "painting" as used in this act shall not be understood to include such as are made wholly or in part by stenciling or any other mechanical process, nor any article of utility.

Mr. ALLISON. I ask that that amendment may be disagreed to. We have just placed these on the dutiable list.

The amendment was rejected.

Mr. VEST. I could not hear the Senator from Iowa. What did we do with that paragraph?

Mr. ALLISON. I asked that paragraph 606½ might be disagreed to, as we have this day put these articles upon the dutiable list.

Mr. JONES of Arkansas. Where?

Mr. ALLISON. In paragraph 443.

Mr. VEST. They can not be taken off the free list without a yea-and-nay vote.

The VICE-PRESIDENT. The Chair will remind the Senator from Missouri that two amendments were made to paragraph 443.

Mr. ALLISON. Has the amendment inserting paragraph 606½ been disagreed to?

The VICE-PRESIDENT. The Chair is waiting for the Senator from Missouri.

Mr. VEST. Let it go over. I want to look at it.

Mr. ALLISON. Let it be passed over.

The VICE-PRESIDENT. It will be so ordered.

Mr. ALLISON. The next paragraph is 607½, the amendment offered by the Senator from Arkansas.

The Secretary read as follows:

607½. Paris green and london purple.

Mr. JONES of Arkansas. I presume there is no objection to that.

Mr. ALLISON. I will allow it to go in anyway, and we will see what becomes of it later.

The VICE-PRESIDENT. Without objection, the amendment is agreed to, and paragraph 607½ is adopted.

The SECRETARY. The next paragraph passed over is on page 180, after line 19, as follows:

615. Plaster rock, or gypsum, and terra alba, crude and not calcined, ground or otherwise advanced from the natural state.

Mr. ALLISON. In line 20 I move to strike out "Plaster rock, or gypsum, and;" and in the same line, after the word "alba," to strike out the words "crude and not calcined, ground or otherwise advanced from the natural state;" so as to read:

615. Terra alba.

The amendment was agreed to.

The SECRETARY. The next paragraph passed over is paragraph 619, on page 181. The Committee on Finance propose to amend, in line 4, after the word "Potash," by striking out "carbonate of" and inserting "crude, or 'black salts;' carbonate of potash, crude or refined; hydrate of, or caustic potash, not including refined in sticks or rolls;" so as to make the paragraph read:

619. Potash, crude, or "black salts;" carbonate of potash, crude or refined; hydrate of, or caustic potash, not including refined in sticks or rolls; nitrate of potash or saltpeter, crude; sulphate of potash, crude or refined, and muriate of potash.

Mr. ALLISON. I ask that this amendment may be agreed to and then the paragraph passed over.

The SECRETARY. At the end of the paragraph insert the words "and cyanide of potassium."

The VICE-PRESIDENT. The Chair understands that the amendments have been agreed to.

Mr. ALLISON. The amendment just read by the Secretary is not an amendment of the committee. It is an amendment offered by some Senator.

The VICE-PRESIDENT. It was offered by the Senator from Nevada [Mr. STEWART].

Mr. ALLISON. I ask that that paragraph be passed over.

The VICE-PRESIDENT. If there be no objection, the amendment of the committee will be agreed to and the paragraph will be passed over.

Mr. MILLS. Is it decided to go on beyond 5 o'clock?

Mr. ALLISON. We will go on just a few moments longer.

The next paragraph passed over was paragraph 622½, on page 182, which the Committee on Finance proposed as a new paragraph, as follows:

622½. Regalia and gems, statues, statuary, and specimens or casts of marble, bronze, alabaster, or plaster of paris, where specially imported in good faith for the use of any society incorporated or established solely for religious, philosophical, educational, scientific, or literary purposes, or for the encouragement of the fine arts, or for the use or by order of any college, academy, school, or seminary of learning in the United States, or any State or public library, and not for sale; but the term "regalia" as herein used shall be held to embrace only such insignia of rank or office or emblems as may be worn upon the person or borne in the hand during public exercises of the society or institution, and shall not include articles of furniture or fixtures, or of regular wearing apparel, nor personal property of individuals.

Mr. ALLISON. I ask that paragraph 622½ may also be passed over for the time being.

The VICE-PRESIDENT. There being no objection, paragraph 622½ will be passed over.

Mr. ALLISON. Paragraph 622½ being passed over, paragraph 628 comes next. I move to amend the amendment of the committee at their request by striking from the amendment the words "beet," "radish," and "spinach."

The VICE-PRESIDENT. The Secretary will first state the amendment of the committee.

The SECRETARY. The Committee on Finance propose to amend paragraph 628, on page 183, line 5, by inserting after the word "Anise" the words "beet, canary;" in line 6, before the word "cotton," by inserting "cauliflower, coriander;" in line 7, after the word "hoarhound," by inserting "mangel-wurzel;" in the same line, after the word "mustard," by inserting "radish:" in line 8, after the word "or," by striking out "bene" and inserting "bean;" in the same line, after the word "bean," by striking out "sugar beet" and inserting "spinach;" in the same line, after the word "spinach," by striking out "mangel-wurzel;" in line 9, after the word "seed," by striking out the comma and the word "and" and inserting a semicolon and the words "bulbs and bulbous roots, not edible;" so as to make the paragraph read:

628. Seeds: Anise, beet, canary, caraway, cardamom, cauliflower, coriander, cotton, cummin, fennel, fenugreek, hemp, hoarhound, mangel-wurzel, mustard, radish, rape, St. John's bread or bean, spinach; sorghum or sugar cane for seed; bulbs and bulbous roots, not edible; all flower and grass seeds; all the foregoing not specially provided for in this act.

Mr. ALLISON. Now I ask that the word "beet" be struck out from the first amendment.

The VICE-PRESIDENT. Beet, radish, and spinach.

Mr. ALLISON. "Beet, canary."

The SECRETARY. After the word "Anise," in line 5, it is proposed to insert "beet, canary."

Mr. ALLISON. That is to be disagreed to.

Mr. WHITE. I should like to inquire of the Senator from Iowa whether it is designed to put a duty on beet seed.

Mr. ALLISON. It is not. This is not sugar-beet seed.

The VICE-PRESIDENT. Without objection, the amendment is disagreed to.

The SECRETARY. In line 5, after the word "cardamom," insert "cauliflower, coriander."

Mr. ALLISON. That ought to be agreed to.

The VICE-PRESIDENT. Without objection, the amendment is agreed to.

The SECRETARY. In line 7, after the word "hoarhound," insert "mangel-wurzel."

The amendment was agreed to.

The SECRETARY. In line 7, after the word "mustard," insert "radish."

Mr. ALLISON. "Radish" is to be stricken out.

The VICE-PRESIDENT. Without objection, the amendment is disagreed to.

The SECRETARY. In line 8, after the word "or," strike out "bene" and insert "bean."

The amendment was agreed to.

The SECRETARY. In line 8, after the word "bean," strike out "sugar beet."

Mr. ALLISON. Let that be disagreed to.

The VICE-PRESIDENT. Without objection, the amendment is disagreed to.

Mr. MANTLE. Do I understand that the committee are striking out "sugar beet" from the free list?

Mr. ALLISON. We are putting it on.

Mr. MANTLE. You do not propose to put a duty on it?

Mr. ALLISON. By disagreeing to our amendment it remains on the free list.

The VICE-PRESIDENT. It leaves it on the free list. The amendment is disagreed to.

The SECRETARY. In line 8, after the words "sugar beet," insert the word "spinach."

Mr. PLATT of Connecticut. That is to be disagreed to.

The VICE-PRESIDENT. Without objection, the amendment is disagreed to.

The SECRETARY. In line 8, after the words "sugar beet," strike out "mangel-wurzel."

Mr. ALLISON. That should be agreed to and left as it came from the House.

The VICE-PRESIDENT. It has once been inserted in line 7.

Mr. ALLISON. Yes; that is above. It should be stricken out here.

The amendment was agreed to.

The SECRETARY. In line 9, after the word "seed," strike out the comma and the word "and" and insert a semicolon and the words "bulbs and bulbous roots, not edible."

Mr. ALLISON. And then add to it "and not otherwise provided for."

The SECRETARY. And in line 10, after the word "edible," it is proposed to insert the words "and not otherwise provided for."

The VICE-PRESIDENT. Without objection, the amendment is agreed to.

Mr. TELLER. Now let the paragraph be read as amended.

The VICE-PRESIDENT. The Secretary will read the paragraph as now amended.

The Secretary read as follows:

628. Seeds: Anise, caraway, cardamom, cauliflower, coriander, cotton, cummin, fennel, fenugreek, hemp, hoarhound, mangel-wurzel, mustard, rape, St. John's bread or bean, sugar beet, sorghum or sugar cane for seed; bulbs and bulbous roots, not edible and not otherwise provided for; all flower and grass seeds; all the foregoing not specially provided for in this act.

Mr. ALLISON. That is all right.

The VICE-PRESIDENT. The paragraph stands amended as read.

The next paragraph passed over was paragraph 636, on page 184, which the Committee on Finance proposed to insert as a new paragraph, as follows:

636½. Skins of all kinds, raw (except sheepskins with the wool on), and hides not specially provided for in this act.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Committee on Finance.

The amendment was agreed to.

The next paragraph passed over was paragraph 646, on page 185, as follows:

646. Sulphur, lac or precipitated, and sulphur or brimstone, crude, in bulk; sulphur ore as pyrites, or sulphuret of iron in its natural state, containing in excess of 25 per cent of sulphur, and sulphur not otherwise provided for.

Mr. ALLISON. It is the purpose of the committee to recommend that crude sulphur be placed upon the dutiable list at 50 cents a ton. The committee are not quite ready to present that amendment and make this paragraph accord with it. So I ask that it be passed over for the evening.

The VICE-PRESIDENT. There being no objection, paragraph 646 will be passed over.

The Secretary read the next paragraph passed over, paragraph 650, page 185, which the Committee on Finance proposed to amend, in line 20, after the word "tea," by striking out "and tea;" so as to read:

650. Tea plants.

Mr. ALLISON. I ask that that may be passed over, because we have not yet dealt with it on the dutiable list.

The VICE-PRESIDENT. The paragraph will be passed over.

The next paragraph passed over was paragraph 666, on page 187, which the Committee on Finance proposed to strike out, as follows:

666. Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall only include such articles as actually accompany and are in the

use of, and as are necessary and appropriate for the wear and use of such persons for the immediate purposes of the journey and present comfort and convenience, and shall not be held to apply to merchandise or articles intended for other persons or for sale; and in case the persons thus arriving are citizens or residents of the United States, the articles exempted shall not exceed $100 in value, nor shall the exemption apply to residents of other countries entering the United States more than once in each year: *Provided, however*, That all the wearing apparel and other personal effects of residents of the United States, so returning, as may have been taken by them out of the United States to foreign countries, and which have not been advanced in value or improved in condition by any process of labor or manufacture in such countries, shall be admitted free of duty, without regard to their value, upon their identity being established under appropriate rules and regulations to be prescribed by the Secretary of the Treasury.

And in lieu thereof to insert:

666. Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall only include such articles as actually accompany and are in the use of, and as are necessary and appropriate for the wear and use of such persons, for the immediate purposes of the journey and present comfort and convenience, and shall not be held to apply to merchandise or articles intended for other persons or for sale.

Mr. ALLISON. That paragraph may lead to some debate.

Mr. COCKRELL. It will be very apt to lead to debate.

The VICE-PRESIDENT. Without objection, the paragraph will be passed over.

Mr. ALLISON. I ask that paragraph 655, line 2, page 186, be stricken out, those articles having been placed on the dutiable list.

The Secretary read as follows:

655. Tonquin, tonqua, or tonka beans.

The VICE-PRESIDENT. Without objection, the amendment striking out paragraph 655 is agreed to.

Mr. ALLISON. In paragraph 668, line 21, page 187, I move to insert, after the words "pulp woods," the words "deal ends," putting deal ends on the free list.

The SECRETARY. Amend the committee amendment in paragraph 668, page 187, line 21, after the words "pulp woods," by inserting the words "deal ends;" so as to read:

Wood: Logs and round unmanufactured timber, including poplar and other pulp woods, deal ends, firewood, etc.

The amendment to the amendment was agreed to.

Mr. ALLISON. I ask that paragraph 668 may be passed over, because we have modified the dutiable list in regard to this subject. There are one or two things here in the paragraph that will have to be looked into. I ask that it may go over until to-morrow.

The VICE-PRESIDENT. Paragraph 668 will be passed over, in the absence of objection.

Mr. JONES of Arkansas. I suggest to the Senator that a paragraph be added numbered 642½, incorporating the paragraph in the present law, as follows:

Stamps: Foreign postage or revenue stamps, canceled or uncanceled.

Mr. ALLISON. Has the Senator his amendment ready?

Mr. JONES of Arkansas. That is all there is of it, to insert as paragraph 642½ what I have read. It would be a proper place for it to come in, I think, on page 184, inserting the word "Stamps," then add a colon and the words, "Foreign postage or revenue stamps, canceled or uncanceled."

Mr. PLATT of Connecticut. It is the same language as in the present law, I understand.

Mr. JONES of Arkansas. It is the same.

Mr. CULLOM. Let it go in.

Mr. ALLISON. All right. I do not object, Mr. President.

The VICE-PRESIDENT. Without objection, the amendment is agreed to and the new paragraph is adopted.

Mr. ALLEN. I wish to submit an amendment to paragraph 666.

Mr. LODGE. What became of paragraph 668?

The VICE-PRESIDENT. It was passed over.

Mr. ALLEN. I want to submit an amendment to paragraph 666, that it may go over with the amendment. It is to insert, after the word "convenience," in line 16, the words "not exceeding $100 in value."

Mr. MILLS. That all goes over.

The VICE-PRESIDENT. The Senator from Nebraska proposes an amendment to be considered at the time paragraph 666 is taken up.

Mr. ALLISON. Very well.

Mr. ALLEN. Let it be passed over with the paragraph.

The VICE-PRESIDENT. The amendment will be passed over with the paragraph.

Mr. ALLISON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After eighteen minutes spent in executive session the doors were reopened, and (at 5 o'clock and 30 minutes p. m.) the Senate adjourned until to-morrow, Thursday, July 1, 1897, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate June 30, 1897.

LIBRARIAN OF CONGRESS.

John Russell Young, of Pennsylvania, to be Librarian of Congress, as provided for by an act of Congress approved February 19, 1897.

SUPERINTENDENT OF LIBRARY BUILDING AND GROUNDS.

Bernard R. Green, of the District of Columbia, to be superintendent of the Library building and grounds, as provided for by an act of Congress approved February 19, 1897.

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Francis B. Loomis, of Ohio, to be envoy extraordinary and minister plenipotentiary of the United States to Venezuela, vice Allen Thomas, resigned.

CONSULS.

Henry Bordewich, of Minnesota, to be consul of the United States at Christiania, Norway, vice Gerhard Gade, resigned.

John C. Caldwell, of Kansas, to be consul of the United States at San Jose, Costa Rica, vice Harrison R. Williams, resigned.

Philip C. Hanna, of Iowa, to be consul of the United States at Trinidad, West Indies, vice William C. Foster, resigned.

Louis Lange, jr., of Illinois, now vice and deputy consul of the United States at Annaberg, to be consul of the United States at Bremen, Germany, vice George Keenan, resigned.

Joseph J. Stevens, of Indiana, to be consul of the United States at Plymouth, England, vice Thomas W. Fox, resigned.

JUDGE OF UNITED STATES COURTS IN INDIAN TERRITORY.

John R. Thomas, of Illinois, to be judge of the United States courts in the Indian Territory, as provided for by the act of Congress approved June 7, 1897 (Indian appropriation act).

COLLECTORS OF INTERNAL REVENUE.

Thomas J. Yandell, of Kentucky, to be collector of internal revenue for the second district of Kentucky, to succeed Joshua D. Powers, resigned.

John W. Yerkes, of Kentucky, to be collector of internal revenue for the eighth district of Kentucky, to succeed Charles H. Rodes, removed.

PROMOTION IN THE ARMY.

General officer.

Col. Henry Clay Merriam, Seventh Infantry, to be brigadier-general, June 30, 1897, vice Carlton, retired from active service.

CONFIRMATIONS.

Executive nominations confirmed by the Senate June 30, 1897.

LIBRARIAN OF CONGRESS.

John Russell Young, of Pennsylvania, to be Librarian of Congress.

SUPERINTENDENT OF LIBRARY BUILDING AND GROUNDS.

Bernard R. Green, of the District of Columbia, to be superintendent of the Library building and grounds.

CONSULS-GENERAL.

John P. Bray, of North Dakota, to be consul-general of the United States at Melbourne, Australia.

Church Howe, of Nebraska, to be consul-general of the United States at Apia and Nukualofa, Tonga.

CONSUL.

Hugo Donzelmann, of Wyoming, to be consul of the United States at Prague, Bohemia.

PROMOTION IN THE MARINE CORPS.

Frank L. Denny, captain and assistant quartermaster, United States Marine Corps, to be quartermaster of said Corps, with the rank of major.

PROMOTIONS IN THE NAVY.

Naval Cadets Stuart F. Smith, of Pennsylvania, and William G. Groesbeck, of Ohio, to be assistant naval constructors.

Asst. Engineer John H. Rowen, to be a passed assistant engineer.

RECEIVER OF PUBLIC MONEYS.

Alfred H. Taylor, of Cedarville, Cal., to be receiver of public moneys at Susanville, Cal.

MARSHAL.

Clarence W. Ide, of Washington, to be marshal of the United States for the district of Washington.

COMMISSIONERS.

William Ryan, of Rathdrum, Idaho, to be a commissioner to examine and classify lands within the land-grant and indemnity land-grant limits of the Northern Pacific Railroad Company, in the Cœur d'Alene land district in Idaho.

Thomas A. Davis, of Malad, Idaho, to be a commissioner to examine and classify lands within the land-grant and indemnity

land-grant limits of the Northern Pacific Railroad Company, in the Cœur d'Alene land district in Idaho.

George A. Black, of Fairhaven, Wash., to be a commissioner to examine and classify lands within the land-grant and indemnity land-grant limits of the Northern Pacific Railroad Company, in the Cœur d'Alene land district in Idaho.

POSTMASTERS.

Edward Hall, to be postmaster at Havre de Grace, in the county of Harford and State of Maryland.

W. W. James, to be postmaster at Monterey, in the county of Monterey and State of California.

C. E. Gross, to be postmaster at Boonville, in the county of Cooper and State of Missouri.

SENATE.

THURSDAY, *July 1, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. MITCHELL, and by unanimous consent, the further reading was dispensed with.

IMMIGRATION BUILDINGS AT ELLIS ISLAND, NEW YORK.

The VICE-PRESIDENT laid before the Senate the following communication from the Secretary of the Treasury; which was read, and referred to the Committee on Immigration:

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., June 30, 1897.

SIR: This Department has the honor to acknowledge the receipt of a resolution of the Senate of the United States, dated June 29, 1897, directing the Secretary of the Treasury to transmit to the Senate, as soon as possible, a statement of the general plan for the reconstruction of the immigration buildings at Ellis Island, New York Harbor.

The Department begs to state that no general plan for the reconstruction of said buildings has been formulated by the Department. The matter is under consideration, and as soon as a satisfactory plan shall have been agreed upon the Department will be pleased to comply with the directions contained in the resolution herein referred to.

Respectfully, yours,

L. J. GAGE, *Secretary.*

To the PRESIDENT OF THE SENATE.

JUDGMENTS OF THE COURT OF CLAIMS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of the 29th ultimo, a list of judgments of the Court of Claims rendered since the date of the last report up to and including the date of adjournment of the court on June 24, amounting to $56,953.98; which, with the accompanying papers, was referred to the Committee on Appropriations, and ordered to be printed.

CLAIMS OF WICHITA INDIANS.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting a letter from the Commissioner of Indian Affairs relative to the claims of the Wichita and affiliated bands of Indians; which, with the accompanying papers, was referred to the Committee on Indian Affairs, and ordered to be printed.

NORTHERN LIBERTY MARKET CLAIMS.

The VICE-PRESIDENT laid before the Senate a communication from the Commissioners of the District of Columbia, transmitting, in response to a resolution of the 21st ultimo, further information relative to the proceedings taken by the auditor of the supreme court of the District of Columbia and the Commissioners under "An act to provide for the payment of certain claims against the District of Columbia by drawback certificates," approved January 26, 1897; which, with the accompanying papers, was referred to the Committee on the District of Columbia, and ordered to be printed.

MEMORIALS.

Mr. HOAR presented a memorial of sundry citizens of Massachusetts, remonstrating against any increase in the present rate of duty on tanned skins for morocco, or a duty on raw goatskins; which was ordered to lie on the table.

Mr. MORGAN presented the memorial of A. H. Spire and sundry other citizens of Alabama, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

REPORTS OF COMMITTEES.

Mr. THURSTON, from the Committee on the Judiciary, to whom was referred the bill (S. 2138) to give the consent of Congress to a compact entered into between the States of South Dakota and Nebraska respecting the boundary between said States, reported it without amendment.

Mr. NELSON, from the Committee on Commerce, to whom was referred the joint resolution (S. R. 53) authorizing the Secretary of the Treasury to deliver to the mayor of the city of Milwaukee, for use in ornamenting one of the parks of that city, the Parrott rifled cannon and carriage recently used on the revenue cutter *Andrew Johnson*, reported it with an amendment.

CHINESE EXCLUSION.

Mr. LODGE. I report from the Committee on Printing certain papers which were referred to it, together with a letter of the Secretary of the Treasury, in reply to a resolution of the Senate of May 17 relative to the alleged illegal entry into the United States of certain Chinese persons, and ask that they be referred to the Committee on Immigration and be printed.

The VICE-PRESIDENT. That order will be made, in the absence of objection.

CUMBERLAND SOUND IMPROVEMENT.

Mr. PASCO. I am authorized by the Committee on Commerce to report a joint resolution, and I shall ask unanimous consent tomorrow morning that it may be then taken up and considered.

The joint resolution (S. R. 57) making an appropriation of $50,000 for sluicing and dredging at the entrance of Cumberland Sound was read twice by its title.

Mr. PASCO. I shall ask leave also in the morning to file a written report to accompany the joint resolution; and I ask that the joint resolution may be printed in the RECORD as well as separately.

The VICE-PRESIDENT. It will be so ordered, in the absence of objection.

The joint resolution is as follows:

Resolved by the Senate and House of Representatives, etc., That the sum of $50,000, or so much thereof as may be necessary, be, and the same is hereby, appropriated for sluicing and dredging at the entrance to Cumberland Sound, in accordance with the revised project of improvement of 1895, but nothing herein contained shall be so construed as to increase the limit of cost of such improvement beyond the amount fixed by the act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, approved June 3, 1896, which authorizes a continuing contract for such work.

BILLS INTRODUCED.

Mr. MITCHELL introduced a bill (S. 2310) amendatory of sections 3339 and 3341 of the Revised Statutes of the United States, relative to internal-revenue tax on fermented liquors; which was read twice by its title, and referred to the Committee on Finance.

Mr. ALLEN introduced a bill (S. 2311) to provide for the better instruction of the militia, and for other purposes; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. TELLER introduced the following bills; which were severally read twice by their titles, and referred to the Committee on Public Lands:

A bill (S. 2312) to grant a tract of land in the District of Alaska to the Woman's Home Missionary Society of the Methodist Episcopal Church;

A bill (S. 2313) to authorize the entry of land for reservoir purposes;

A bill (S. 2314) for the relief of Charles M. Larsh, of Denver, Colo.; and

A bill (S. 2315) for the relief of Mrs. Emma D. Larsh, of Denver, Colo.

Mr. TELLER introduced a bill (S. 2316) to declare the jurisdiction of circuit courts of the United States in certain cases; which was read twice by its title, and referred to the Committee on the Judiciary.

Mr. McBRIDE introduced a bill (S. 2317) for relief of M. J. Gilstrap; which was read twice by its title, and referred to the Committee on Pensions.

He also introduced a bill (S. 2318) granting pensions to certain officers and enlisted men of the Life-Saving Service and to their widows and minor children; which was read twice by its title, and referred to the Committee on Pensions.

Mr. HAWLEY introduced a bill (S. 2319) granting an increase of pension to Edward S. Lyon; which was read twice by its title, and referred to the Committee on Pensions.

Mr. FORAKER introduced a bill (S. 2320) for the relief of A. J. Sampson; which was read twice by its title, and, with the accompanying papers, referred to the Committee on Military Affairs.

Mr. ALLEN introduced a joint resolution (S. R. 55) authorizing the Secretary of Agriculture to prepare a report, from the data in the possession of the Department, showing the average fluctuation from year to year in farm prices; which was read twice by its title.

Mr. ALLEN. I ask that the joint resolution may lie on the table, subject to call.

The VICE-PRESIDENT. The joint resolution will lie on the table.

Mr. LODGE introduced a joint resolution (S. R. 56) authorizing the printing of 1,000 additional copies of Plates I to LX, inclusive, of the atlas accompanying the Official Records of the War of the Rebellion, for the use of the War Department; which was read twice by its title, and referred to the Committee on Printing.

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. O. L. PRUDEN, one of his secretaries, announced that the President had on the 30th ultimo approved and signed the joint resolution (S. R. 50) authorizing foreign exhibitors at the Transmississippi and International Exposition, to be held in the city of Omaha, in the State of Nebraska, during the year 1898, to bring to the United States foreign laborers from their countries, respectively, for the purpose of preparing for and making exhibits.

AMENDMENT TO DEFICIENCY APPROPRIATION BILL.

Mr. WARREN submitted an amendment intended to be proposed by him to the general deficiency appropriation bill; which was referred to the Committee on Appropriations, and ordered to be printed.

IMMIGRATION BUILDINGS AT ELLIS ISLAND, NEW YORK.

The VICE-PRESIDENT laid before the Senate the following message from the President of the United States; which was read, and, on motion of Mr. CULLOM, referred, with the accompanying papers, to the Committee on Appropriations, and ordered to be printed:

To the Congress of the United States:

On the 15th ultimo all the buildings of the immigration station at Ellis Island, New York, excepting the heating plant and lighting apparatus, were destroyed by fire.

I transmit herewith a letter from the Secretary of the Treasury, which states the fact and explains the need of rebuilding.

In order that there may be no delay in this important work, I recommend that an appropriation be made at once of $600,000, the sum estimated by the Secretary of the Treasury as required for this purpose.

WILLIAM MCKINLEY.

EXECUTIVE MANSION, *July 1, 1897.*

THE TARIFF BILL.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government, and to promote the industries of the United States.

Mr. ALLISON. I ask the Senate to go back to paragraph 443. I ask unanimous consent to reconsider the vote taken yesterday, and that this paragraph may be stricken out.

The VICE-PRESIDENT. The Senator from Iowa moves to reconsider the action of the Senate yesterday on paragraph 443, page 159, imposing a duty on paintings in oil or water colors, etc.

Mr. ALLISON. I ask unanimous consent to reconsider the vote in order that I may move to strike out the paragraph.

The VICE-PRESIDENT. Is there any objection to a reconsideration? The Chair hears none, and the vote of yesterday is reconsidered.

Mr. ALLISON. I move to strike out the paragraph.

The VICE-PRESIDENT. Without objection, it is agreed to.

Mr. TELLER. I desire to make an inquiry of the chairman of the committee. It is quite apparent that we are approaching the conclusion of this bill so far as the Senate is concerned, and we are doing so rather rapidly. If we may rely upon statements in the public press, the committee expect to report here what may be called an antitrust measure.

The report, I do not know how well founded, is that the subject-matter has been referred to the Republican members of the Judiciary Committee by the Republican caucus for the purpose of having a proper amendment formulated. It is a very important subject, and if the committee propose to formulate a measure of that kind and bring it before the Senate, I think, in justice to the Senate, they ought to bring it in at once. They can hardly expect a matter of that kind to be passed over in haste, as we have been going over some portions of the bill. Whether it will be an effective measure and of any value will depend entirely upon how it is drafted. I think the committee should give us that provision in time, that we may have some opportunity to investigate and consider it. I understand that has been done in the case of the reciprocity clause. I do not know whether it has been formally offered or not by the committee.

Mr. WHITE. Yes.

Mr. TELLER. But I saw it in the public press.

Mr. ALLISON. It is in the RECORD this morning.

Mr. TELLER. That is not so difficult a question to deal with as the antitrust question. I should like to inquire of the Senator from Iowa whether we are likely to have that amendment presented before we shall be called upon to vote on it?

Mr. ALLISON. I do not know what condition that particular amendment is in. The Committee on Finance have not prepared any amendment. I understand that such an amendment has been drafted, but by whom I am not prepared to say at this moment.

Mr. TELLER. I understood from the press and from rumors I have heard about the Chamber that the Republican caucus had authorized the preparation of such an amendment, and that the committee would adopt it as theirs and present it to the Senate. I suppose it will come here in some shape. What I wanted to emphasize to the Senator in charge of the bill is that he shall not delay it until the last minute, and then insist that we shall vote upon it, because that can not be done.

Mr. ALLISON. I assure the Senator from Colorado that there is no such purpose. Certainly an amendment of such importance should be fairly and fully considered, and notice of it given. That is the way I consider it.

Mr. WHITE. We are unable to hear the Senator from Iowa.

Mr. ALLISON. The Senator from Colorado is speaking of an antitrust amendment, and states that he does not wish that it shall be considered at the last moment without proper time being given to its consideration, and I agree with him in what he says.

Mr. WHITE. I supposed that the antitrust amendment had been dropped. I understood that there was such an amendment in course of preparation which had been found too drastic to harmonize with the situation, and that the entire matter had been ignored. I suppose, however, that must be left to the future to solve. I understood that to be the case. I think the Senator from Colorado will not be very much disturbed about the antitrust amendment.

Mr. TELLER. The trouble with the Senator from California and myself is that neither of us is a member of the Republican caucus.

Mr. ALLISON. Yes; that is one trouble.

Mr. TELLER. And therefore we are proceeding somewhat in the dark.

Mr. ALLISON. The Senator from California [Mr. WHITE] yesterday offered an amendment to paragraph 405. The committee has considered——

Mr. JONES of Arkansas. Before taking up that paragraph, I should like to ask the Senator from Iowa a question. I have marked on my bill that paragraph 441 was passed over. I may perhaps be mistaken about that paragraph.

Mr. ALLISON. That, I think, has been agreed to.

Mr. JONES of Arkansas. I asked that it might be passed over. I was out of the Chamber when it was taken up, and I asked that it be reconsidered and passed over, and I have so marked it on my bill.

Mr. ALLISON. Very well, if the Senator wishes, it can be reconsidered.

Mr. JONES of Arkansas. No; but I think the fact is as I have stated it. At any rate, I shall not detain the Senate by any discussion of the matter.

I hold in my hand a protest sent to the members of the Finance Committee of the Senate by a firm claiming to be the largest manufacturers of this article in the United States, the American Cocoa Matting Company, protesting against any increase in the rate of taxation. Twenty per cent was the rate under the Wilson Act, and this bill, I believe, raises it to 50 per cent or 55 per cent or 60 per cent, or somewhere there. These people, who are the largest manufacturers in the United States, set out at length the reasons why they protest against any increase whatever in the rate. It is useless to undertake to change it—I am perfectly aware of that fact—but I will move to strike out "6 cents per square yard" and insert "20 per cent ad valorem."

The Secretary read as follows:

441. Matting made of cocoa fiber or rattan, 6 cents per square yard; mats made of cocoa fiber or rattan, 4 cents per square foot.

Mr. JONES of Arkansas. I send the statement made by these parties to be inserted in the RECORD as a part of my remarks, and I ask for a vote upon the amendment.

The statement referred to is as follows:

To the honorable members of the Finance Committee of the Senate of the United States for the Fifty-fifth Congress, Senate Chamber, Washington, D. C.:

A petition by the largest manufacturers of cocoa or coir matting and mats in the United States that the present existing duty of 20 per cent ad valorem upon both the matting and the mats be maintained.

We, the undersigned, are the largest manufacturers of cocoa matting and mats in the United States. We employ more than double the number of employees at our factory than all the other manufacturers of these goods in the United States. We are, therefore, more vitally interested in maintaining the home market than any other person can possibly be.

The McKinley Act, notwithstanding our earnest protest, changed the then existing duty (which the Wilson Act restored) from a 20 per cent ad valorem duty upon the cocoa matting and mats, and imposed for the first time a specific duty, to wit, of 12 cents a square yard upon the matting and 8 cents a square foot upon mats, as proposed in the present bill before Congress.

We were then, as we are now, the largest employers of free labor in the manufacture of cocoa matting and mats in the United States, and if anyone was to suffer, we would suffer most of all if our product manufactured here was not protected against foreign importations.

The present duty of 20 per cent ad valorem is equivalent to a specific duty of 3 cents per square yard upon the matting. England and Germany are both very large manufacturers of matting and mats, and we manufacture here every grade of matting and mats which it is possible to make upon a power loom. In both England and Germany, as here, cocoa yarn made from the husk of the cocoanut, the raw material from which both the mattings and mats are wholly made, is imported free of duty. We therefore, as home manufacturers, are upon the same footing as to raw material as the foreigner, and yet not a single dollar's worth of these goods was imported into this country from any European country under the Wilson Act, proving conclusively that foreign countries could not compete with the home manufacturer in our markets under the Wilson Act.

But, to be absolutely exact in our statements, we give the actual cost of manufacture in our factory in India and in our factory in Brooklyn, N. Y.:

	Cents.
Cost of manufacture in our factory in India.....per square yard...	2.5
Duty paid on last invoice, in September, 1890 .....do....	2.8
	5.3
Cost of manufacture in our Brooklyn factory.....do....	4.75
Leaving a protection margin of .....do....	.55

To this margin (fifty-five hundredths of a cent per square yard) of protection must be added the cost of extra freight, insurance, and the other items of expense incident to a foreign invoice, which further increase the cost of the imported beyond the cost of the domestic goods.

So that the conclusion is irresistible that the American workman and the home market is now, with a 20 per cent ad valorem duty, absolutely protected against the foreign manufacturer.

There is a small amount of high-priced matting imported by us. The importations of this matting are insignificant, the average annual importations for the last six years being only 1,586 rolls. One workman can make 9 rolls per week or 468 rolls per year, so that four men, working full time, would make more than the entire importation. Consequently, even if the imported were substituted by the domestic, the benefit to labor would only be to the extent of four workmen. Even this benefit was not derived during the working of the McKinley bill, for importations continued as usual, as the above figures show, the only difference being that the consumer was obliged to pay advanced prices for the article he wanted, and no one was benefited.

Again, one workman in our Brooklyn (N. Y.) factory makes 9 rolls of matting of 60 yards per roll each week, making 540 yards per week. The actual duty paid on last shipment of 2.8 cents per yard, as appears above, alone amounts to a protection of $15.12 per week upon the labor of one man.

Now, if the present duty of 20 per cent ad valorem be advanced to 12 cents per square yard, as proposed in the bill before Congress, this would amount to a protection of $64.80 per week upon the labor of one workman.

For such an advance or for any advance in the duty there can be no justification or reason.

The revenue derived by the Government upon the small importations is unimportant. The total duty paid last year on the cocoa matting and mats amounted to only $3,167. The question, therefore, is one of protection to the home manufacturers and not of revenue to the Government.

We are the only people importing these goods into the United States, and the small importations, coupled with the fact that we are unable to sell a dollar's worth of imported goods to the large and leading jobbers who handle large quantities of like goods, such as Marshall Field & Co., of Chicago, Samuel Cupples Woodenware Company, and Trorlicht, Duncker & Renard Company, St. Louis, Mo., and many others, demonstrates that the imported goods are not a disturbing factor in the trade. On the contrary, they are higher priced than the domestic. Indeed, if the importations were stopped by a sufficient increase in the tariff, it would not cause the employment of a single additional free workman in the manufacture of these goods, as more than twice as many convict laborers are employed in this country in their manufacture than free workmen.

The product of the prisons would take the place of the imported goods, just as it is now driving the product manufactured by American free workmen out of the market, so that the Government would lose what little revenue is now derived from the importation without employing a single additional free workman, and if any goods were imported, the consumer would be obliged to bear the additional burden of purchasing the goods at an advanced price.

The importation of cocoa mats is so small that it is not worth while taking up your valuable time discussing it, the annual importations for more than ten years last past being only 720 dozen per year.

Cocoa matting does not and can not take the place of carpets.

Cocoa matting is used for certain purposes for which carpets are not adapted and can not successfully and economically be used. It must not be confounded in the mind with Chinese and Japanese mattings, which are made from straw, and with the many beautiful varieties of which we are all familiar. These Chinese and Japanese mattings are used to a very large extent as floor coverings in place of carpets, because they are cheap, clean, cool, and attractive in appearance, while the cocoa matting is hard, coarse, and rough, and can only be used in stores, public places, and vehicles, where great durability is required, and where carpets never have been and never will be used.

In conclusion:

I. The duty as proposed in the so-called Dingley bill, now before Congress, amounts to more than two, and almost three, times the entire cost of manufacturing matting in this country.

II. On mats it amounts to as much as the price at which a large part of the mats made in this country are sold.

III. These goods do not conflict or in any way come in competition with the carpet industry.

IV. England and Germany are both large manufacturers of these goods, and yet neither of these countries for the twenty years last past has sent a dollar's worth of these goods to this country under a 20 per cent ad valorem duty. Therefore the 20 per cent ad valorem duty is sufficient protection.

V. Every roll of matting imported into this country comes from our own factory in India, and we only import the highest-priced goods, the present 20 per cent ad valorem duty being absolutely prohibitive on the medium and low-priced grades.

As shown in the above statement, the present 20 per cent ad valorem duty, equivalent to 2.8 cents per square yard (and this was the actual amount paid by us in last invoice), added to 2.5 cents, the actual cost of making in our foreign factory, is fifty-five one-hundredths of a cent per square yard more than the entire cost of manufacture in the United States. It is therefore impossible for any foreign manufacturer to undersell us in the home market.

As the present 20 per cent ad valorem duty more than covers the difference between the cost of manufacture here and abroad, we respectfully and earnestly urge upon your honorable committee that a higher duty be not imposed upon cocoa mats and matting.

Dated New York City, N. Y., March 17, 1897.

Respectfully submitted.

AMERICAN COCOA MATTING COMPANY,
Per JOS'H WILD & CO.
DARRAGH & SMAIL.

The VICE-PRESIDENT. The amendment proposed by the Senator from Arkansas to paragraph 441 will be stated.

The SECRETARY. After the word "rattan," page 158, line 26, strike out "6 cents per square yard" and insert "20 per cent ad valorem."

Mr. TELLER. What is the present duty?

Mr. ALLISON. Twenty per cent ad valorem.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Arkansas.

The amendment was rejected.

Mr. JONES of Arkansas. I move the same amendment as to the second clause, striking out "4 cents per square foot" and inserting "20 per cent ad valorem."

The SECRETARY. After the word "rattan," in line 1, page 159, strike out "4 cents per square foot" and insert "20 per cent ad valorem."

The amendment was rejected.

Mr. ALLISON. Now, I will take the liberty to modify somewhat the amendment of the Senator from California [Mr. WHITE] to paragraph 405. I ask that the modification proposed be read.

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. Insert, after the word "bushel," in line 13, page 147, paragraph 405, the following proviso:

Provided, That on all coal imported into the United States which is afterwards used for fuel on board vessels propelled by steam and engaged in trade with foreign countries or in trade between the Atlantic and Pacific ports of the United States, and which are registered under the laws of the United States, a drawback shall be allowed equal to the duty imposed by law upon such coal, and shall be paid under such regulations as the Secretary of the Treasury shall prescribe.

Mr. WHITE. The amendment which was suggested by me has been modified by the committee in this respect, that the amendment as originally proposed referred to the coasting trade or trade with foreign countries. The committee has eliminated the coasting trade, but has provided that the provision shall apply to trade between the Pacific and Atlantic seaboards. I understand that to be the situation. The amendment as proposed by me was in effect identical with the law which we assumed was prevailing when the Wilson Act was passed, and which was supposed to be in existence after the McKinley bill had been enacted.

This is a discrimination against coasting trade other than the trade between the Atlantic and Pacific seaboards, and I do not see why it should be thus limited. I prefer to have coal absolutely free, but not being able to get it absolutely free, I am desirous that it shall be made so as far as possible. I wish to inquire of the committee why it is that a discrimination has been made with reference to the coasting trade, thus differentiating the provision from the former law, which was repealed unintentionally and by implication?

Mr. ALLISON. The only reason is that the coasting trade is exclusive as respects our own vessels, and we thought it should stand on a par with all other business interests on the coast. Of course the condition is different as respects foreign trade, and as respects also the trade between the Atlantic and Pacific coasts around the Horn. We thought this was a just and equitable and a fair provision, and I hope the Senator from California will be satisfied with it.

Mr. WHITE. There seems to have been no criticism of the provision as it stood in the old law. It appears to me that this is restricting it greatly. I prefer to take a vote upon the amendment offered by me, and will move to amend the amendment of the committee by including the coasting trade and the trade with foreign countries, in lieu of the phraseology now proposed, referring to the trade between the Atlantic and Pacific ports and trade with foreign countries.

Mr. ALLISON. The Senator must remember that since the law to which he alludes was passed in 1883 very different conditions have arisen as respects the production of coal on the Pacific Coast.

Mr. WHITE. I call the attention of the Senator from Iowa to the fact that that law was amended in 1886 and contained the same provision as amended. It simply was restricted to vessels of the United States. There is no difference in the condition of the coast in regard to coal except that there has been some more taken out of the ground since that date. I offer what I send to the desk as a substitute for the amendment proposed by the Senator from Iowa.

The VICE-PRESIDENT. The substitute proposed by the Senator from California will be read.

The SECRETARY. It is proposed to substitute the following:

Provided, That on all coal imported into the United States which is afterwards used for fuel on board vessels propelled by steam and engaged in the coasting trade or in the trade with foreign countries, and which are registered under the laws of the United States, a drawback shall be allowed equal to the duty imposed by law upon such coal, and shall be paid under such regulations as the Secretary of the Treasury shall prescribe.

Mr. WHITE. It appears to me that the coal interests, which have succeeded in obtaining what I consider an unjust discrimination in their favor, ought to submit to at least this small provision, which is but a reenactment of the law which so long prevailed. As far as it goes, I think it ought to be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from California as a substitute for the amendment of the Senator from Iowa.

The amendment was rejected.

Mr. CLARK. I should like to ask the Senator from Iowa if in his judgment the amendment he proposes will not foreclose the American coal producer from supplying vessels flying the American flag plying between this country and other countries, or between the Atlantic and Pacific ports in this country?

Mr. ALLISON. The object of the amendment is to place our shipping on the Pacific coast upon an equality with vessels engaged in foreign trade as respects coal. I do not know that the effect of it would be to give them the use of foreign coal so far as the foreign trade and that trade is concerned.

Mr. CLARK. It applies to the Atlantic coast as well?

Mr. ALLISON. It applies to the Atlantic coast and Pacific coast trade.

Mr. PERKINS. I will state to my friend from Wyoming that, as I understand, the amendment simply applies to steam vessels engaged in the coasting trade between ports on the Atlantic and ports on the Pacific coast, which must necessarily round Cape Horn or pass through the straits of South America, and which are of course in competition in a measure with foreign vessels. The coasting trade proper, as my friend is aware, belongs to vessels of American build or of American register; and they have the exclusive privilege of our coasting trade. It is much more expensive of course to operate them, but yet we have better rates on them than the rates which prevail in the foreign trade. When vessels are engaged in the foreign trade they must compete with foreign-built vessels, vessels that it costs less money to construct, vessels that are operated for a less sum of money by reason of lower wages and lower rates of coal. I think the committee amendment is a very proper and wise one in that respect.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Iowa on behalf of the committee.

Mr. WELLINGTON. I ask the Senator from Iowa to postpone the consideration of this amendment. I do not understand that it is all right, and I should like to have a postponement of it. There has been, I understand, no agreement as to the adoption of the amendment. I consider it a blow at the American coal trade as I understand it now, and until there be some explanation given I shall feel bound to oppose it.

Mr. WHITE. If the Senator from Maryland will permit me, I will suggest that if it is a blow at the American coal trade a much severer blow was directed against that trade by the act of 1883, which is broader than this provision, making it extend to the coasting trade generally. As I had occasion to remark, it was supposed that that law was still in existence until the Supreme Court of the United States reversed the decision below and held that it had been repealed by implication.

Mr. WELLINGTON. I will say to the Senator from California that we propose to make a better bill at this time than the act of 1890.

Mr. WHITE. I may remark that it is too late for the accomplishment of any such roseate view.

Mr. WELLINGTON. I do not so understand it.

Mr. SEWELL. I understand that this proposition was voted down a few moments ago and was so declared by the Chair.

The VICE-PRESIDENT. The vote taken was on the substitute of the Senator from California [Mr. WHITE]. The question is now on agreeing to the amendment proposed by the Senator from Iowa [Mr. ALLISON]. The Senator from Maryland asks that the amendment may lie over.

Mr. ALLISON. If the Senator from California does not wish to press it this morning, I am willing that it shall lie over until to-morrow.

The VICE-PRESIDENT. If there is no objection, the amendment will be passed over.

Mr. SEWELL. I desire to call the attention of the Senator from Iowa to another part of the coal schedule which seems to me to be entirely inconsistent. I should like to have that reconsidered and lie over. The rate as fixed for bituminous and other coal in the bill is 67 cents a ton. Under the McKinley Act the rate was 75 cents a ton and 30 cents a ton for culm, which was thought to be the proper proportion. Under the pending bill it is 67 cents for coal and 15 cents for culm, being a 10 per cent reduction from the House bill or from the McKinley Act on the one class of coal and a 50 per cent reduction on the other.

Personally, I was not in favor of the highest rate on coal. I thought 50 cents would do. But I am entirely opposed to reducing the culm to 15 cents. I think it is out of all proportion to the higher rate, and I predict that if it is imposed you will have all the coal imported into the United States from Canada, both on the east and west coasts, as culm. Looking at it from a purely business standpoint, the change can be made from coal to culm, where it does not exist as culm, for 10 cents a ton, and the coal imported into this country, instead of coming in at 67 cents a ton, will all come in at a cost of 25 cents a ton. I think if the Senator would allow this matter to be reconsidered and come up for consideration with the other portion of the paragraph he would see that the proportion of 15 cents to 67 cents is not a business one and ought not to prevail.

Mr. ALLISON. I have seen a good many things in working on this bill one day that have been seen otherwise the next. This matter was disposed of yesterday, as I supposed, finally. But so far as I am concerned, I am perfectly willing that the whole question of coal shall be reconsidered and passed over.

Mr. SEWELL. I ask that that be done.

The VICE-PRESIDENT. Without objection——

Mr. VEST. Do I understand the Senator from Iowa to agree that this whole paragraph shall go over? Do I understand the Senator to agree to that suggestion?

Mr. ALLISON. Very well, then. Senators around me object to its postponement. I ask that the paragraph may be disposed of now in all its phases.

Mr. GRAY. That is right.

Mr. VEST. That is right. Mr. President, I was asked several times yesterday and the day before, "When do you Democrats propose to allow us to finish this bill?" Now, we are assisting as much as we can, consistent with a sense of duty, in passing the bill as soon as possible, and here the coal schedule has come up, and this is the fourth time it has been passed over. For one I insist that we shall take it up and dispose of it.

Mr. ALLISON. All right.

Mr. SEWELL. If the Senator from Iowa would allow it to go over for further consideration, I should be very glad, or I will move an amendment in regard to the rate on culm, if he will agree to it. I do not think this matter was properly considered. I do not think that many gentlemen here, after a thorough knowledge of the subject, will agree to it.

The VICE-PRESIDENT. The Chair understands that the whole paragraph is open to amendment while it is under consideration. There is one amendment now pending—that offered by the Senator from Iowa—and other Senators may offer such amendments as they see fit.

Mr. FAULKNER. Question!

Mr. ALLEN. Let the amendment of the Senator from Iowa be read.

The VICE-PRESIDENT. The question is on the amendment of the Senator from Iowa.

Mr. VEST. Let it be read.

The SECRETARY. Add, after the word "bushel," page 147, line 18, the following proviso:

Provided, That on all coal imported into the United States which is afterwards used for fuel on board vessels propelled by steam and engaged in trade with foreign countries or in trade between the Atlantic and Pacific ports of the United States, and which are registered under the laws of the United States, a drawback shall be allowed equal to the duty imposed by law upon such coal, and shall be paid under such regulations as the Secretary of the Treasury shall prescribe.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Iowa.

Mr. WILSON. Do I understand that this amendment is offered by the Senator from Iowa?

The VICE-PRESIDENT. It is, on behalf of the committee.

Mr. WILSON. If it is agreeable to the Senator from Iowa, I should like to have some explanation of it. I was not in when he offered it. I supposed that, after several weeks, we had pretty well settled the question of coal, but it seems to me that we are continually pressing forward to a nonsettlement of the question. If amendments are to be offered on the coal question, in which I am deeply interested, I can not refrain perhaps from offering some amendments that will be beneficial to the particular section of the country from which I come. This matter was brought up suddenly yesterday. I have not had time to consider it and I do not know anything about it. We have had so many changes in the coal schedule that I hardly know where we are going to arrive when we get through with the provision.

Mr. ALLISON. The question of the use of coal by American vessels in the foreign trade and by American vessels in the trade between the Atlantic and the Pacific coasts has been under consideration all the time in this schedule. The phraseology had not been agreed to. It was well known that the law of 1883 and the law of 1890, as well as the law of 1894, allowed this privilege, but by some decision of the Supreme Court in 1896 the privilege was taken away.

The Senator from California on this side of the Chamber [Mr. PERKINS] offered an amendment some time ago which is practically the amendment the committee agreed to present this morning as respects the use of coal in foreign trade and in the trade between the Atlantic and Pacific ports. Yesterday, when the coal schedule was up, the Senator from California on the other side of the Chamber [Mr. WHITE] offered an amendment covering the foreign and coastwise trade. I stated at the time that I thought the provision too broad, and that if the Senator would allow it to lie over until this morning, the committee could examine it and make a report upon it. This morning we have reported the amendment in hac verba proposed by the Senator from California

nearest me [Mr. PERKINS], and I did not for a moment suppose that there was the slightest objection to placing our American vessels engaged in the foreign trade upon an equality with foreign vessels as to the supply of coal. That is all there is to the amendment.

Mr. WILSON. I have no particular objection to placing our own vessels engaged in the foreign trade on an equality. What I am trying to arrive at is that we ought not to give away so much that there will be nothing left of the coal schedule. We have introduced a good many new features, it seems to me, in the way of culm, etc., and I do not want anything adopted if I can help it if it is going to entirely destroy what I think is a necessary or reasonable tariff on coal.

Mr. ALLEN. I wish to offer an amendment to the amendment. I move to insert after the words "United States," in line 5, the words "or which may be used by inhabitants of the United States."

The VICE-PRESIDENT. The Secretary will state the amendment offered by the Senator from Nebraska to the amendment of the Senator from Iowa.

The SECRETARY. Insert after the words "United States," in line 5 of the amendment, the words "or which may be used by inhabitants of the United States."

Mr. ALLEN. I do not know that the amendment is entirely symmetrical. The purpose of it is, however, to put the vessels and the people of the United States upon terms of exact equality. I will ask the Secretary to read the amendment as it now stands.

The VICE-PRESIDENT. The Secretary will read the amendment as it will read if the amendment of the Senator from Nebraska [Mr. ALLEN] be adopted.

The Secretary read as follows:

Provided, That on all coal imported into the United States which is afterwards used for fuel on board vessels propelled by steam and engaged in trade with foreign countries or in trade between the Atlantic and Pacific ports of the United States——

Mr. ALLEN. Right there I think I will move the amendment.

The Secretary continued the reading, as follows:

or which may be used by inhabitants of the United States, and which are registered under the laws of the United States, a drawback shall be allowed equal to the duty imposed by law upon such coal, and shall be paid under such regulations as the Secretary of the Treasury shall prescribe.

Mr. PLATT of Connecticut. Does the Senator mean registered inhabitants or registered vessels?

Mr. ALLEN. The one is in just as bad a position as the other. The coal seems to follow the registration in the first instance; and my amendment is to the effect that the coal brought into this country and used by the people of this country in their private houses shall be as free as the coal used by vessels plying between the different ports of the United States. If the amendment is not satisfactory to the honorable Senator from Connecticut, if he will give me about two minutes, I will put it in form, so that it will be satisfactory.

Mr. PLATT of Connecticut. I merely suggested that I did not think the amendment came in the right place, that it did not read right.

Mr. ALLEN. That may be true, possibly, but this thing has been rushed so rapidly that I did not have a chance to perfect the amendment. Let the Secretary put it in form.

Mr. CLARK. Will the Senator from Nebraska yield for a question?

Mr. ALLEN. Certainly.

Mr. CLARK. I will ask the Senator from Nebraska if the effect of his amendment means free coal?

Mr. ALLEN. Yes; that is what it means. It means free coal to the people of the United States as well as to the vessels that are plying along the coast; and it occurs to me that there are a great many people in the United States who need free coal much more than these great vessels need it; and if the bill is to be an equitable bill, and distribute a shower of blessings upon the people of the United States, the blessings ought to fall upon the just as well as upon the unjust. The people out in the prairie States and the people who are scattered throughout the length and breadth of this land, many millions of whom are very poor, are entitled to be warmed by free coal, if they can get it, and certainly the equities in their behalf are much stronger than they are in behalf of these great vessels.

I ask that the Secretary now read the amendment in the form in which it has been placed.

The Secretary read the amendment as proposed to be amended, as follows:

Provided, That on all coal imported into the United States which is afterwards used by the inhabitants of the United States, or for fuel on board vessels propelled by steam and engaged in trade with foreign countries, etc.

Mr. ALLEN. That covers it.

Now, I ask the Senator from Connecticut [Mr. PLATT], or the Senator from Iowa [Mr. ALLISON], whoever has this matter in charge, to accept the amendment I have offered. If the Senator from Connecticut says he can not do it, then I should like to know why he can not?

If these great vessels—and I appeal now particularly to the sense of right and propriety of the honorable Senator from Connecticut, whom I know to be a just man—are entitled to free coal, these vessels which are carrying millions and millions of dollars' worth of merchandise, and making millions of profit in the course of a few years—I want to know from the honorable Senator if he does not think the poor inhabitants of the interior of the United States, who are making a struggle for a livelihood, and whose existence is but a bare animal existence, are not entitled to a like advantage and a like right?

Mr. PLATT of Connecticut. Mr. President, I think the question of whether we shall put our ships, so far as we can, on an equality with foreign ships in the carrying trade is entirely a different question from the question as to whether our people shall have free coal. I think that the coal industry of the United States deserves and should receive the care of Congress, and I have always felt—although, perhaps, in my section there is quite a sentiment in favor of free coal—that the coal industry of this country was entitled to protection, and so I have uniformly voted for a duty on coal. I do not think the amendment which has been offered raises at all the question of free coal. It is simply a question of whether American ships engaged in foreign commerce or in commerce between the Pacific and Atlantic ports shall have the same facilities in this respect that foreign ships have.

Mr. ALLEN. I should like to ask the Senator, as he says the coal industry ought to have some protection, does he not believe that the consumers should receive some protection, too?

Mr. PLATT of Connecticut. Oh, Mr. President, I believe that where we have to raise revenue the burden of the revenue, if it is a burden, has to be distributed among the people.

Mr. ALLEN. Yes, Mr. President, and there is the ending of the whole argument. The people who are scattered, who are unorganized, the millions, the masses, must be plucked from year to year and from decade to decade to subsidize steamship companies and other great corporations and other forms of aggregate wealth. I have heard the Senator from Connecticut proclaim on this floor repeatedly, dozens of times, that he was in favor of protection because he believed it was the best policy for the American people and because the American people received protection under a proper protective-tariff act, and yet he stands here confessedly willing to place a tax of 67 cents a ton upon all the coal the American people, the American farmers and laborers, use; and he is willing to give that coal absolutely free to a few steamships.

The Senator says he wants to put these ships upon an equality with the ships of other nations. Why not put the American people upon an equality with the people of other nations? England is not charging a tax upon coal to the consumers of that article in that Kingdom or in any of its provinces. Why not give the American people coal free? The truth is, the Senator from Connecticut can not answer the proposition, and does not pretend to answer it. He simply has the power here, the mere machine power, to vote this tax upon the people, and he proposes to do it and take the consequences. It is not a question of justice or injustice. The position can not be justified for a moment, and the honorable Senator from Connecticut understands it can not be justified; and yet he proposes, or his party proposes, to hoodwink these people constantly into the support of a policy of this kind.

Mr. PLATT of Connecticut. I simply desire to say, without discussing this subject further, that I believe that with a fair protection to all the industries of the United States no consumer will suffer to the extent of one penny.

Mr. CLARK. Mr. President, before this amendment is voted upon, I desire to call the attention of the Senator from Nebraska [Mr. ALLEN] to the fact that he assumes in all these debates that a protective tariff is of no benefit to the man who actually does the labor.

I desire to call his attention to certain intemperate language which he is inclined at times to use in debate. He made the statement in open Senate yesterday—and I would be glad to have him correct it, because I can not believe he meant it—that there was no coal miner in the United States of America who did not become a pauper within thirty days after his employment ceased. I call his attention to the fact that it must be within his knowledge that hundreds of the good citizens of his own State, not paupers in any sense of the word, are employed winter after winter in the coal mines of my State, where they receive remunerative wages, and they at least believe that there is some benefit to the coal miner in a protective tariff upon American coal.

Mr. ALLEN. Oh, Mr. President, there is nothing whatever in that.

Mr. CLARK. I ask the Senator if he insists upon his statement made yesterday?

Mr. ALLEN. I do.

Mr. CLARK. That there is no coal miner in the United States

but who becomes a pauper within thirty days after he ceases his labor in the mine?

Mr. ALLEN. Yes; I mean to say that is true, and I mean to reaffirm it. I am not speaking, and was not speaking yesterday, about the men who leave their farms in the winter time and go into the coal mines for the purpose of earning a living for their families. I mean the man who, if I may use the expression, is a professional coal miner, whose occupation is that of a coal miner.

Mr. CLARK. I will ask the Senator from Nebraska, when he was talking yesterday as to the wage which the coal miners receive, if he had then, or has now, any definite knowledge of the daily or monthly wage of the ordinary coal miner in the Western mine?

Mr. ALLEN. Mr. President, there is something of an insult in the question and in the manner in which it is put, and I do not think I——

Mr. CLARK. I asked the question because the Senator from Nebraska put a direct brand, a direct insult, upon thousands of good citizens of my own State by his intemperate language yesterday, and I have the right to ask it.

Mr. ALLEN. What is the wage, as the Senator seems to know so much about it?

Mr. CLARK. I ask the Senator, in view of his statement yesterday, whether he made that statement with a knowledge of what the actual wage of the ordinary coal miner really is?

Mr. ALLEN. I was speaking yesterday of what was told me were the wages of a certain class of coal miners in Pennsylvania.

Mr. CLARK. Then I understand the Senator in his remarks yesterday did not mean to apply it in the broad sense that the RECORD gives it—that there was no coal miner in the United States but what became a pauper within thirty days after his employment ceased?

Mr. ALLEN. I do mean to say that there is no professional coal miner of the class of which I was speaking yesterday—that is, contract laborers who are brought from the Slav ports of Europe here——

Mr. CLARK. Does the Senator——

Mr. ALLEN. Let me finish my answer. Do not interrupt me until I invite you to do so.

As to this class of people who are brought here as contract laborers, and who depend from day to day and from year to year upon the coal mining for a livelihood, I did say, and I say now, and I defy any gentleman to dispute it, that they do become paupers within thirty days after they are thrown out of their occupation, and are subjects of public charity.

Mr. CLARK. Then I ask the Senator if he excepts the coal miners of my State and other Western States from the category in which he placed them yesterday?

Mr. ALLEN. I did not think of the Senator nor of his State, and was not speaking with reference to it at all.

Mr. CLARK. I am glad the Senator modifies his statement of yesterday.

Mr. ALLEN. They were the furthest conceivable from my thoughts at that time.

Mr. CLARK. I will call the Senator's attention, however, to the exact language he used. He said:

> There is not a coal miner in the United States to-day who does not become a pauper within thirty days after he quits work.

Mr. ALLEN. Oh, yes; I know what language I used.

Mr. CLARK. I understand now the Senator does not mean that?

Mr. ALLEN. I do not know what the Senator understands. I am not responsible for what he understands.

Mr. CLARK. I ask the Senator whether he adheres to that statement or whether he modifies it?

Mr. ALLEN. As applied to the class of people I was discussing, I do adhere to it.

Mr. CLARK. Then the Senator adheres to the language that all of the coal miners of the United States become paupers within thirty days after they are thrown out of employment?

Mr. ALLEN. I was speaking, as I said yesterday, about a certain class of coal miners who were brought into Pennsylvania and into the Eastern States.

Mr. BUTLER. Will the Senator allow me?

Mr. ALLEN. Just wait a moment.

Mr. BUTLER. Very well.

Mr. ALLEN. I was not talking about the State of the Senator from Wyoming. I was not thinking about it. I was speaking about a certain class of people brought in here as contract laborers from Europe, and in speaking of them I did say—and I reaffirm it—that among that class of coal miners there is not one of them who, when thrown out of his occupation, is not a pauper in every conceivable sense within thirty days after he has left the mines.

Mr. CLARK. That is not what the Senator said yesterday; that is not what is to be inferred from what he said.

Mr. ALLEN. That is what I say now.

Mr. CLARK. I am glad the Senator modifies it.

Mr. ALLEN. I mean to say—and I will say it so loudly that the Senator can hear it if he wants to—I say that in the mines of the State from which the Senator comes they have got a certain class of this kind of labor, too.

Mr. CLARK. I say when the Senator makes that statement he is making a statement which is absolutely without foundation in fact; that there is not one contract laborer, so far as my knowledge goes—and I know every coal mine in the State—not one contract laborer within the State of Wyoming to-day, and there is not one white person in the State of Wyoming to-day mining coal who gets more or less than another mining a like character of coal in a like place.

Mr. ALLEN. It was but a few years ago that we were required to indemnify some Chinese who had been injured out in the Wyoming coal mines.

Mr. CLARK. Yes.

Mr. ALLEN. And they seemed to have occupied those mines to quite an extent. It may be possible that they have gone now—I do not know; but my understanding is that a portion of them are there yet, and that they are contract laborers who were brought there for that specific purpose.

Mr. WILSON. Will the Senator from Nebraska allow me?

Mr. ALLEN. Certainly.

Mr. WILSON. I wish to correct one statement the Senator has made in regard to contract laborers. In the State of Washington the only contract labor we have any knowledge of is that over on the British Columbia side. The Senator perhaps is not aware that the coal miners in British Columbia are principally Chinese, who are employed at a very much less daily rate of wage than coal miners on the American side; and it is those laborers in British Columbia that we are seeking to be protected from.

The Senator, of course, is not in favor of Chinese labor, but he is indirectly, and perhaps unthinkingly, making a very strong defense in behalf of the Chinese producing the coal that is used upon the Pacific Coast.

I have here letters not only from coal companies, but from organizations that are owned by the miners themselves, seeking and asking and demanding protection against this Chinese labor upon the British Columbia side, which is only paid 75 cents and a dollar a day, and I know the Senator would not be in favor of that.

Mr. ALLEN. Mr. President, I will submit——

Mr. BUTLER. If the Senator will allow me, as so much is being said about contract labor in coal mining, I wish to submit a form of contract which the miners in the mines in Pennsylvania, Ohio, Indiana, and other States are now forced to sign, and ask that it be read.

The VICE-PRESIDENT. Does the Senator from Nebraska yield for that purpose?

Mr. ALLEN. I yield for the reading of the paper sent up by the Senator from North Carolina.

The VICE-PRESIDENT. The Secretary will read as requested, in the absence of objection.

The Secretary read as follows:

Articles of agreement made and entered into this —— day of ——, A. D. 189-, by and between ——, of ——, party of the first part, and the Moon Run Coal Company, party of the second part.

Witnesseth, that for and in consideration of the covenants and agreements made herein by said second party, the said first party hereby agrees to and with said second party as follows, to wit:

That he will enter the employ of said second party as a miner, cutter, driver, or loader of coal at its mine situated in Robinson Township, Allegheny County, Pa., and will continue as such until the expiration of his service as hereafter provided, and that he will well and faithfully perform his duties in conformity with the rules and regulations of said company operating said mine, and that he will mine, cut, drive, or load coal at a rate of wages based upon the rate of — cents per ton of 2,000 pounds for pick mining for coal over a 1¼-inch screen, with nothing to be paid for coal dropping through said screen, until ——, 189-, and thereafter so long as he shall remain in the employ of said coal company, at a rate of wages based upon a charge for pick mining as low as that paid by any other operator at any of their mines in the "thin vein" district of the Pittsburg coal seam.

Should said party of the second part at any time during the term of this contract wish to mine 3-inch coal, then the pay may be computed on the basis of —— cents per ton of 2,000 pounds for coal over a 3-inch screen, with nothing to be paid for coal dropping through said screen; and if "run of mine," then the pay may be computed at the scale now in force at their mine.

And in further consideration as aforesaid, and for the better securing the performance of this contract by me, the party of the first part, I hereby agree that the said Moon Run Coal Company shall and they are hereby authorized and directed to retain any and all moneys which may be due me, if I should quit their employ without giving reasons satisfactory to the superintendent for leaving work, and said sum shall become and be the absolute property of said company as liquidated damages for my failure to perform the terms of my employment, without further claim or demand by me for the payment of the same or any part thereof.

It is mutually understood and agreed between the parties hereto that should any dispute arise between them as to the basis under this agreement the party of the first part will continue work until the basis can be determined by arbitration, as follows: Each party shall elect an arbitrator, and the two, if unable to agree, shall select a third, and the decision of a majority of the three so chosen shall be the basis, and binding upon both parties hereto.

In consideration of the foregoing the Moon Run Coal Company do hereby agree to employ said —— —— at the compensation and upon the terms and conditions above specified from this date as steadily as the conditions of trade, car supply, etc., will permit, until ——, 189-, and thereafter until said second party shall give the said first party two weeks' notice of the termination of this contract.

It is further agreed that all supplies or rent furnished the party of the first part at his request on credit of the party of the second part shall constitute full or part payment, as the case may be.

In witness whereof the said —— —— and the Moon Run Coal Company have hereunto set their hands and seals this — day of ——, 189—.

—— ——. [SEAL.]
—— ——. [SEAL.]

Witness —— ——.
Check No. ——.

Mr. BUTLER. There is a combination between the owners of these mines. They get together and make an agreement that all their operatives shall sign a drastic and unjust contract like that which has been read. They force the operatives to accept lower wages and then force them to allow the mine owners to reserve 10 per cent of their wages, which is forfeited under certain conditions. It is infamous. The poor miner gets no protection under the tariff. He is at the mercy of a combination of mine owners.

Mr. President, here is a special dispatch to the Ohio State Journal from Pittsburg, Pa., taken from a Republican paper, which certainly presents a very strong case for the mine operative.

Mr. ALLEN. I hope the Senator will not take up my time to read that.

Mr. BUTLER. I shall not read the article, but will ask that it may be printed in the RECORD. It is dated Pittsburg, Pa., April 9. It shows the condition of the coal miners and how they have been treated. It shows that when they have taken out from 24,000 to 27,000 pounds of coal, several of the companies have only credited them with fifteen or sixteen thousand pounds, refusing the men the right to have a check weighman on the tipple to keep their accounts. These facts were developed by the investigation in Pennsylvania by the legislature. I ask that the article which I send to the desk may be inserted in the RECORD.

The VICE-PRESIDENT. That order will be made, in the absence of objection.

The article referred to is as follows:

MINERS COMPLAIN—UNFORTUNATE STATE OF AFFAIRS IN PITTSBURG DISTRICT—THOUSANDS OF FAMILIES IN AN ALMOST STARVING CONDITION.

[Special to Ohio State Journal.]

PITTSBURG, PA., *April 9.*

The investigation of the legislative committee into the condition of the miners of the Pittsburg district brought a shocking state of affairs to light to-day. About twenty miners from various parts of the district were heard, and these testified that all sorts of schemes were practiced to beat them out of their miserable pittances. None of them had earned more than $16 a month since the first of the year, and the majority far less. Many testified they were compelled to deal at company's stores, where they were charged more than the market price. Store bills were deducted from their pay, as was the rent, the majority renting shanties from coal operators, who charged them exorbitant rents for hovels costing scarcely $50. The screens at the coal tipples were weak and let coal through, and what fell through the screen they were not paid for, yet the operators sold the same at a fair price.

Coal miners stated that from thirty years' experience in loading cars they knew the cars held from 24,000 to 27,000 pounds, yet several companies only credited them with 15,000 and 16,000 pounds, refusing the men the right to have check weigh men on the tipple to keep their accounts. One witness testified he had earned $15 since Christmas and had nothing to eat that day, yet he had a wife and six children to support. The mines were all crowded with diggers. Where 50 men could work a mine and make fair wages, 150 to 200 are crowded into the pit. Ironclad contracts were offered in evidence, showing the men signed away all rights to secure a job which would pay them less than $15 a month.

Mr. ALLEN. I have but little further to say upon this very important question, for it certainly is important to the consumers of coal in this country.

I want to repeat, and I want to emphasize, and I want to italicize, if I can, the fact that the coal miners of this country are the poorest paid class of laborers we have; and I want to emphasize the further fact that the law of the United States against the importation of contract laborers is absolutely and unqualifiedly set at defiance; that the owners of these coal mines bring from any port of Europe they see fit any class of laborers they see proper; that these laborers come under a contract to labor in this country, and they pass the inspection office by some means—I do not know how—but they come into this country by the thousands and by the hundreds of thousands.

I want, Mr. President, to repeat, that the great body of coal miners in this country—and I am not speaking now of American citizens, but of that class of people who are brought here under a system of contract labor—become paupers within thirty days of the time they are thrown out of their occupation. In fact, not one out of a hundred of them ever leaves his employment with a cent in his pocket, and the very contract, which is the consummation of infamy itself, which was just read here, shows conclusively that it is the policy of those companies to rob their operatives of every dollar they make. Who before ever heard of a contract that said that an employee should not leave the service of his employer without his consent?

Mr. BUTLER. I want to say to the Senator from Nebraska that when that outrageous contract was forced upon the workmen in the mines there was a general reduction of the wages of the miner from 69 to 60 cents.

Mr. ALLEN. I do not doubt that, nor do I doubt that many of these miners—and I speak now from having conversed with them—when they take 2,200 or 2,300 pounds of coal out of the mines, receive credit for but 1,400 or 1,500 pounds, and are robbed in that way. I have been told that repeatedly by miners who have been employed in the Eastern coal mines, and yet they do not dare to protest, or if they do protest, they are turned out of employment and their wives and their children and they themselves must starve. There is a choice, sir, between being a tramp and a subject of public charity, with some slight spark of manhood left, or of being a chattel slave of some one of these coal companies.

Mr. President, this can not always continue. The time will come in the history of this country when the American people will rise up in their might, and they will change this condition; they will change it not only among the American miners, but they will change it among all classes of people. We are simply laying up wrath against the day of judgment. The time will come when those who abuse this power and who oppress and wrong their fellow-beings will be brought to an account for it; the time will come, Mr. President, when those who grant special favors to these great steamship companies and to every organization of that kind, and refuse the same privileges to the poor farmer or laborer, who is compelled to expend the last cent he has got to keep himself and his family warm, will be brought to an account for that, too.

Now, Mr. President, if this be treason, I am perfectly willing that the Senator from Wyoming should make the most of it.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Nebraska to the amendment of the committee.

The amendment to the amendment was rejected.

The VICE-PRESIDENT. The question recurs on agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. SPOONER. I send to the desk an amendment which I intend to offer to the bill. I ask that it may be read and printed.

The VICE-PRESIDENT. The Secretary will read the amendment intended to be offered by the Senator from Wisconsin.

The Secretary read as follows:

SEC. —. That within —— days after the passage of this act the Secretary of the Treasury shall designate (and may from time to time change said designation) three of the general appraisers appointed or to be appointed under the provisions of section 12 of the act entitled "An act to simplify the laws in relation to the collection of the revenues," approved June 10, 1890, not more than a majority of the number designated as aforesaid to belong to the same political party, who shall exercise the powers and perform the duties hereinafter prescribed, in addition to those now or from time to time to be devolved upon them by law.

First. They shall thoroughly investigate the condition of the industries of the country upon whose products, manufactured or otherwise, duties are imposed by law, taking a single schedule or a group of cognate or interdependent schedules at a time, to be designated in writing from time to time by the Secretary of the Treasury, and likewise the condition of the industries of other countries manufacturing or producing goods, wares, or merchandise sold in competition with similar products of this country, including especially the difference in labor cost, and other elements or factors entering into and bearing upon the matter of competition, and generally all information which in their judgment should be considered in imposing rates of duty, both with regard to obtaining revenue therefrom and with regard also to equalizing conditions between the competitive products of every kind of this and other countries, and in determining what products of other countries should be admitted to this country free of duty.

Second. They shall also carefully analyze the duties imposed by the various schedules of this act, and of such tariff acts as shall be from time to time enacted, for the purpose of ascertaining and reporting any errors of classification, inequalities of rates imposed upon different elements or articles which enter into manufactured products, and such manufactured products, what duties are necessary by way of compensation for other duties, what duties should be specific, ad valorem, or compound, and generally information in their judgment necessary for the correction of any inequalities, inconsistencies, or other defects of any kind in the schedules so examined.

Third. They shall from time to time make report to the Secretary of the Treasury of the information obtained by such investigation and otherwise, with their recommendations thereon. Each said report shall be signed by all of said designated appraisers who agree to the same; and if any thereof shall dissent from said report, either as to the inferences drawn by the majority from the facts obtained in said investigation or as to its recommendations, wholly or in part, it shall be their duty to make, sign, and transmit to the Secretary of the Treasury a minority report, stating in full the reasons for their dissent, and embodying their own recommendations. They shall also make such further kindred investigations as the Secretary of the Treasury may from time to time direct.

SEC. —. That the general appraisers designated by the Secretary of the Treasury, as hereinbefore provided, may, for the purposes of their investigation, with the approval of said Secretary, visit any part of the United States, and said Secretary may from time to time direct one of their number to visit foreign countries for like purposes.

SEC. —. It shall be the duty of the Secretary of the Treasury, whenever he shall receive from said designated general appraisers reports upon any schedule or group of schedules, as aforesaid, to cause to be printed by the Public Printer 1,000 copies of the same, together with all statistics and evidence submitted therewith, and to furnish two copies of each said report, majority and minority, to each member of the House of Representatives and of the Senate.

It shall also be the duty of the Secretary of the Treasury to communicate the same to Congress in the month of December in each year, with his recommendations in the premises.

The VICE-PRESIDENT. The amendment will be printed.

Mr. ALLISON. The next amendment undisposed of is paragraph 473½, cotton bagging.

The Secretary read as follows:

473½. Bagging for cotton, gunny cloth, and all similar material suitable for covering cotton, composed in whole or in part of hemp, flax, jute, or jute butts.

Mr. WHITE. I desire to inquire whether it is the intention to bring this matter up separately from bags for grain. I presume if the Senator from Iowa would accept the vote which has already been had, the test vote upon this matter, we might let the clause be incorporated in the bill, for the Senate at least voted with the intention of incorporating it in the free list. Is it the intention of the Senator from Iowa to have another vote upon the proposition, with debate upon it?

Mr. ALLISON. I certainly want a vote. I do not care for the debate. These cognate amendments, three or four in number, involve five or six million dollars of revenue. Therefore it is an important question.

Mr. JONES of Arkansas. How do they involve five or six million dollars of revenue? I should be glad to have the Senator from Iowa make an explanation of that. All the cotton bagging used in this country is made here; practically none is imported, and the only effect of the duty is to enable the domestic manufacturers to increase their prices outrageously and unreasonably and to charge exorbitant prices.

Only a few years ago, by an arrangement made among the cotton-bagging manufacturers in the United States, they increased the price from 7 cents to 14 cents a pound in a single season. The manufacturers would quietly refuse to sell their products to cotton planters during the time when it was usual to have the sales made. They would say, "Wait, and we will sell later," and then when the time came when the cotton planters had to have the bagging and it was too late to import it from abroad, suddenly the price went up from 7 to 14 cents a pound, and the cotton planters were robbed of $3,000,000 as a result.

Practically no revenue comes from cotton bagging. It is all made here. The only purpose of putting it on the free list is to compel the American manufacturers to sell it at a fair price, because it can be bought at Dundee and Calcutta and brought here if they do not sell for fair prices.

Mr. PLATT of Connecticut. Was the price less when the article was on the free list?

Mr. JONES of Arkansas. Practically no less. The price was about the same, from 5 to 6¼ cents a pound, but it has been impossible, with free bagging under the Wilson Act, for them to raise the price from 7 to 14 cents as they did before, and the men who did that came before the committee and frankly told your committee that they had done so and said, "What are you going to do about it?" It was reported to the Senate by a committee. The facts are well known to everybody. The purpose of putting it on the free list is simply to prevent a combination being made by the fourteen or fifteen bagging manufacturers in the United States to charge unreasonable and outrageous prices to the farmers for this product. It is a check that stands all the time against unreasonable prices, because the cotton bagging can be imported from Dundee and Calcutta.

Mr. PETTUS. Mr. President, I have been very anxious to get this amendment out of the contest which divides the Chamber. Those gentlemen have been engaged in this fight so ably and so long that I was in hopes they would not quarrel about this matter. The farmers of the United States ask that two of the articles they use—and they will ask the same right as to cotton ties and other things of that sort—shall be exempt from taxation. The farmers of the United States—I am not speaking particularly for my section; I am speaking for all the farmers—are taxed from the soles of their feet to the top of their head.

The farmer pays a tax on his shoes, and his socks, and his drawers, and his undershirt, and his shirt, and his pants, and his vest, and his coat, and his hat, and if he happen to wear a necktie he pays a tax on it. He pays a tax also on whatever he uses in his household which he does not in fact produce on his farm. He is taxed when he lies down, and he is taxed when he gets up. There is a tax on his sheet and his bedtick. He is taxed on everything that he uses inside of his house—his tin cup and his plate, and his cups and his saucers, and his dishes, and his spoons, whether they be pewter or silver.

Now, the only thing we are going to ask to-day is that you exempt such things as he is absolutely compelled to use in covering the products of his labor, and the Senator from Georgia [Mr. BACON] has proposed that we shall also exempt the cotton ties that go around the production of the South, and I shall insist that that ought also to be allowed. Does it not look like a modest request on the part of the farmer, who pays a tax on everything in the world he uses—his plow, and his reapers, and his hoes, and his chisels, and his screws, his knives, his pocketknife, whether it be a Barlow or a Sheffield razor blade? And if he happens to indulge in the luxury of shaving, he also has to pay a tax on the soap he uses on his face, and the brush which he uses to put it on. He pays a tax on everything.

I ask gentlemen on the other side, who care for shipping and manufactures and for those who produce coal and iron and the like of that, to pause for one moment while they are indulging in their taxing proclivities and their protection theories, and just give us not protection, but exemption in a small degree from this tax. Give us the privilege of putting up our wheat and oats and barley and cotton and cotton-seed cake, and our manure and whatever we use in that direction, so as to carry them to market. You have generously given to the Western farmer some strings with which to tie up his products. We now ask further that you give him the privilege of having an untaxed bag in which to carry his produce to market.

Senators, I desire to call your attention for a moment—I am not going to make a long talk to you—to what you are doing for other people. I have nothing against the manufacturer. He has been a very favored citizen of the United States these years, and I do not want to say anything against him. The fact of the business is I have no war paint on this morning at all. I am asking for votes on the other side of the Chamber, and hope to get them. I will get them if you will only listen and pay some little respect to the reasons. Let us see what you do for the manufacturer. I am not going into details, but whenever a manufacturer wants a thing—sometimes you call it a raw material and sometimes appliances and other things to be used by him in his business—the general rule is that he gets it on the free list. There are exceptions. I do not mean to say it is universal. I will mention a few things.

He needs acids, and those which he needs he gets free. He needs dyes. They come in free. Ashes and bones come in free. Bolting cloths of silk come in free. He needs Brazilian pebbles to make his glasses. He has great use for charcoal and blue clay. He wants them, and he wants copper and cork wood and diamonds. He has very great use for diamonds, and I have no objection to his having them and having them free. It looks a little frightful to put diamonds on the free list, but they are rough diamonds; they have not been cut or polished or worked upon, and they are extremely useful in many respects to the mechanic. He bores with them and he does a great deal of work with them. They constitute a very useful implement. I wish as much consideration had been given to plows, but that is impossible.

So he gets his diamonds free, and his emery ore and his flints and his furs, white enameled glass and glass for optical instruments—in the rough of course—and he gets grasses and vegetable fiber of various sorts, and gold-beater's molds, and gutta-percha, and hair, and horns, and ivory tusks, all for the benefit of the manufacturer, to be worked on. India rubber, indigo, manganese, are all free. I am glad he gets his manganese free, and I am glad that he gets most of the other things free, because I think he needs them free to do his work with. Manganese, I understand, is a very essential article with which to line furnaces. Then he goes into the smoking line, and he gets free meerschaum—not in pipes; and crude minerals, models and patterns of all kinds, provided they can not be used as machines—only the model of the machine. He ought to have them free. There is no doubt of it. He has them, and he has always had them, and I hope he will keep them on the free list.

Then he gets all his paper stock of every sort free, and mother-of-pearl, and shells, and platina, and platinum, and rough shotguns—provided they are single barrel—and raw silk of all sorts, and tin and tin ore, whalebone, and logs of wood; and then he gets all of the foreign woods free generally.

I have named only a few of the articles that the manufacturer gets free, absolutely free, for his use. I am not quarreling with his having them on the free list at all. I am not making any objection to it; but, Mr. President, let us go one step further. Suppose by chance you put a duty on some material that a manufacturer has to use. That is a little shocking to our sensitive system, but we have a plaster for that. We at once turn around and we give him a duty by way of compensation. In other words, we give him a bounty in the shape of an increased tax on the article into which he manufactures the raw material.

We have heard a great deal during the discussion of this bill in reference to compensation to be allowed the manufacturer for any duty that is put on raw material. We have heard a great deal said about the sugar trust, and gentlemen have been ciphering here for weeks to ascertain how much bounty is paid to the sugar trust to induce them to refine the raw sugar imported into the United States. Gentlemen have disputed, saying that it is all the way from 1 cent a pound down to fifty-six one-hundredths of a cent a pound, I think. Nobody has gone under fifty one-hundredths, I believe—that is, one-half of 1 cent per pound—as the compensation which we pay to the manufacturer of sugar.

I am not now debating the question whether these compensations ought to be paid or not. We have had a tax put on for the protection of the cotton of the United States, an infant industry in our country, and straightway—for it was logical, and I did not complain of the Senator from Iowa for putting it on, and he put it on very graciously and very emphatically—a tax of 10 per cent compensation was put on in addition to other duties on

manufactured cotton articles. I am not complaining of that and I am not complaining of any of these acts of compensation which I call bounties.

Gentlemen on the other side contend that it is right. I am not going to quarrel with them on that subject now. I will defer it to a more convenient season. But you do give the manufacturers compensation whenever you tax any part of their raw material, and you do not tax much of it, and when you do tax it you put the tax on lightly.

If you would stop at that, some persons might suppose it was a reasonable kind of a protective tariff, although they do not understand it. There are a great many of us who have never been able to see through it, and I do not expect we ever will. But they do not stop at that. They not only give them the free raw material, or, if you should happen to tax them a little, give them a compensation, which is always fourfold at least the duty on the raw material, except in one or two instances where the bill specifically says it shall be three times as much, for which we are thankful; but after getting through with all that they say, "Well, we are sorry for you; we did tax your raw material somewhat; we compensated you for that, however, by giving you a duty on the manufactured article in addition to your other duties. But if you are at all angry about it, we will give you a 'drawback.'" And you do give drawbacks, and you give them in vast amounts. Gentlemen who have not looked at the subject of drawbacks have little comprehension of the amount of money which goes through that hole. The doctrine of drawbacks had its origin away back in the beginning of our history, and I want to call attention to the amount of drawbacks allowed in the early days. It was 5 cents a quintel, or 5 cents a barrel on salt fish and 5 cents a barrel on salted provisions, and that was all there was of it.

There was no such thing in the early days except the 5 cents on salted fish and 5 cents on salted provisions, which was allowed in the shape of a drawback, and that was because the Senator from Missouri [Mr. VEST] or one of his ancestors happened to be there and protested against the duty on salt, and they said, "By way of compensating these men for the tax we put on salt, we will give them a drawback of 5 cents a barrel on salt fish and salted provisions."

Well, when you start in a certain road, whether it is protecting or drawing back from the Government, it is a very rapid motion. The next time they spoke on this subject they made it 10 cents. They just doubled it; but they confined it to those two subjects; and it was to compensate the Missourians, I suppose, although they were not known in those days, for having to pay a tax on salt; and they expressly declared it to be so. But from that day to this there has been one continued stream of additions of drawbacks. Why, Mr. President, they first put in all articles that were shipped to the United States and immediately shipped out in the same packages, without breaking the bulk to any degree. They were allowed to draw back their money which they paid the Government when they were going to reship these articles without change of any sort or description. The drawbacks grew and grew and multiplied.

The next form in which they put it was, if you pay a duty on the raw material, manufacture it into goods, certain useful articles, and ship them abroad, you shall have back your money; you shall draw it back. Now, there is no other human being except the manufacturer who is allowed such a privilege as that. No other human being is allowed it.

So the drawbacks went on—I do not want to weary you with my discussion of this subject—and it went on until the date of the Walker tariff in the forties—in 1846; and there they curtailed the thing down again. They cut off all these drawbacks except the specified thing of importing and exporting. Well, it looked as if they had no use for money and they wanted to pay it all out after they had got it into the Treasury.

From that day to this, every time a tariff has been mentioned in Congress, a new drawback has been added. You can not find a tariff bill that does not add a new drawback, and the Democrats have been doing the same sort of thing that the gentlemen on the other side of the Chamber have done.

There is one very peculiar thing about this drawback that I want to call your attention to. Whenever you come to enact a general tariff law, you have a general provision always providing that all drawbacks heretofore allowed are hereby continued in full force, and others are added to it. When you came to enact the McKinley law, which you talked so much about, that general provision was put in it, "all drawbacks heretofore allowed are continued in force."

When you gentlemen on this side of the Chamber considered the Wilson bill, you put into it "all drawbacks heretofore allowed are hereby continued in force," and then you added some more. And here in this bill there is a provision that "all drawbacks heretofore allowed are hereby continued in force," and then you go on to add others, and you have just added another one a few moments ago. When coal is brought in, if it is used for our ships, the duty is not payable; it is to be refunded. Well, I am not quarreling about that particularly; but I will just say to the gentlemen on the other side of the Chamber that of all the inventions that ever were made to defraud the Government of the United States of its revenue according to your own laws that you make, this doctrine of drawbacks stands in the front and has taken more money out of the Treasury of the United States than all the balance of the frauds put together.

Mr. President, here is this matter of iron. You import iron into the United States and you put your duty on it, but the provision is that if that is manufactured into anything else and shipped out of the United States you get back your duty—99 per cent of it under the Wilson law and the McKinley law. I think it is 99 per cent under this bill. But it is about all of it. Now, when our forefathers undertook to give a drawback at all they had a machinery about it that looked like they understood human nature, and I hope they did. At all events, they did know that the Good Book said, "Lead us not into temptation," and therefore they did not lead the importers into temptation.

The goods that were imported into the United States were put into a United States warehouse, and were kept by United States officers and were guarded by a United States officer, and they were not allowed to go an inch out of that warehouse until the duty was paid. Finally, however, they invented an idea of giving bond for the duty. After that was invented, directly contrary to the Bible, the whole people of the United States making importations were invited into this field of temptation. Iron imported into the United States could go into a Government warehouse, into a bonded warehouse, into the manufacturing establishments anywhere, by giving a bond, and when manufactured and shipped the duty was paid back to the extent of 99 per cent. And who knew it was the same article that was imported? How could that be known?

Mr. President, I am going to tell you a little experience. I live away down on the Gulf, but we had an idea down there that we could make nails. A gentleman at Brierfield, in Alabama, undertook to make nails. In the first place, he bought the best nail machine that could be made in the United States. He paid largely for it. It was a fine establishment. I have looked at it many a time, and so has my colleague [Mr. MORGAN]. It was a fine establishment. It was a large mill, and it manufactured the best nails ever made of iron, and it had the best iron to make them of. The iron was so tough that artillery could be made out of it in the pig by simply casting it.

Now, with that sort of iron and that sort of a machine he made the best nails that ever were made of iron, but he could not sell them. He could not sell the nails. The other man undersold him by about half a dollar or more, and he finally got down to where he could not sell at all for any profit, and then he thought there must be something wrong about it. Other nail manufacturers were making money. This was in the olden times, before we got down to as low a pecuniary condition as we are now. So he went to New England, and he went all over the New England States to the nail mills, and wherever he went he tried to get some information about his nails. The gentlemen were very courteous and polite to him, and showed him all about their mills and what they did, and he ascertained that his mill was as good as any of them, and his iron much better, and his nails much better; but he could not sell them. He could not learn the reason.

Finally he went to the center of all knowledge, Wall street, in New York, and applied to a broker who was engaged in the shipment of nails to foreign countries. He agreed to employ him to ship and sell his nails, and he readily undertook the job, the broker not exactly knowing what he was doing. They talked it over, and the commissions were all arranged. He was to have the whole business of the shipment of the nails and the command of it. The owner had failed to make money himself, and he wanted some man who was smart enough to do it. But after they had the contract all written out the broker said, "By the way, sir, where do you get your iron?" Said the owner, "I get it out of the ground; it is the very best iron for making nails there is in the world; it is the softest and the toughest. I get it right out of the ground at my nailery." The broker studied a while, and said, "My friend, I can not undertake your business. I can not sell your nails. You see, nails are made of iron, and iron is imported, and when imported they get a drawback on the export, and they have got just that much advantage of you."

Now, that is the strangest advantage in the world. How could they have any advantage? Mr. President, it was simply because they imported one sort of iron and exported a different sort. That is it. It is a little, small matter of making papers about it, but in that way thousands upon thousands of dollars go improperly out of the Treasury of the United States.

I just speak of this nail business. That is only a sample. It is a mere sample of what can be done in that line in the way of appropriating the revenues of the United States to individual purposes.

Mr. President, the manufacturers not only get the free material,

as a general rule, or, if taxed at all, they get a duty by way of compensation on the finished article. But then they get this enormous drawback. I am not quarreling with them now on that subject; but we just ask you to give us the privilege of putting up in a free bag our crops made at home, that the farmers make, whether it be grain or other farm produce. Give us the chance to put it up in a free bag, and wrap the cotton with free cotton bagging, and to tie our bags with free strings, and our hay and whatever else we choose. You have already given us that, however, and we are asking now for free bags and free bagging. Gentlemen, if you look us straight in the face, you will be bound to say that it is a very modest request.

We are manufacturers ourselves. We manufacture cotton into such a condition that you can spin it, and we manufacture wheat into such a condition that you can grind it. We want nice, clean bags to send you the oats in, and we want nice, clean bags to send the wheat to the mill if we do not choose to ship it in bulk. In other words, we want the wrapping of what we make free from duty; and as we pay a tax on everything we eat, everything we drink, and everything we wear, and all our household plunder, do give us this free wrapping for the produce of our labor.

Mr. MANTLE. I should like to ask the Senator from Arkansas, who, I believe, is pretty well informed upon matters relating to the particular point now under discussion, what the importations have been of the material included in the paragraph we are now speaking of? What revenue has been derived, and what has been the total consumption in the United States?

Mr. JONES of Arkansas. The revenue derived under the McKinley Act on this item, as shown by the comparative statement on page 175, submitted by the majority of the committee, on bagging worth more than 6 cents per square yard, was $12,970.

Mr. MANTLE. Twelve thousand dollars?

Mr. JONES of Arkansas. Twelve thousand dollars, the entire amount. The estimate by the committee is that they will get $36,000 from it. That is three times as much as came in under the McKinley law. How they expect to get it, or where they expect to get it, I do not know.

Mr. MANTLE. Now I wish to ask what was the duty under the McKinley law?

Mr. JONES of Arkansas. It was 1.6 cents per square yard valued at 6 cents or less, and 1.8 cents per square yard valued above 6 cents.

Mr. MANTLE. How does that rate compare with the proposed duty?

Mr. JONES of Arkansas. The present rate is half a cent a yard and 15 per cent ad valorem, which is equivalent to 27 per cent. I do not know how it would compare with the other rate.

Mr. MANTLE. Now I should like to ask the Senator, if I am not troubling him too much, what is the value of the total consumption in the country?

Mr. JONES of Arkansas. It is about 70,000,000 yards.

Mr. MANTLE. And the value?

Mr. JONES of Arkansas. It is about 6 cents a yard. There are 10,000,000 bales of cotton. It takes about 7 running yards of bagging to cover a bale of cotton.

Mr. ALLISON. Four cents is said to be the value, according to the statement.

Mr. JONES of Arkansas. That may be the import value, but nobody buys it at that price here.

Mr. ALLISON. In speaking of duties, we always speak of import values.

Mr. JONES of Arkansas. That is the import value, perhaps. There is very little imported. There never has been much imported. There are about fifteen bagging mills in the United States.

I will say to the Senator from Montana that about the only effect of putting bags on the free list was to prevent a combination amongst the bagging manufacturers to compel the cotton producers to pay unreasonable prices for bagging. There has been no material reduction in the price of bagging as the result of putting it on the free list; but just before the McKinley Act went into effect, or about that time, there was, on one occasion that I remember, an agreement made between all the bagging manufacturers except one. I have forgotten the name of that one. I would be glad to mention it if I recollected the name. I think it was a Connecticut mill.

A proposition was quietly and secretly made amongst them to agree to put their prices up without its being known publicly. This one mill refused to go into it. The remainder went into the agreement. When parties wanting bagging would write to the mills to make their contracts, as they were in the habit of doing some months before the bagging was used, they would answer that they were not ready then to make contracts. It was quietly put off until the time to begin to pack the cotton, when the price was sprung from an average of 6 or 7 cents to 12 or 14 cents. It was about doubled.

It was impossible then to have bagging manufactured in Calcutta or Dundee and have it brought over, because it is not produced in any quantity except on special orders, and there was no chance to manufacture it and bring it into the country before the cotton season was over, which lasts only about ninety to one hundred and twenty days.

The result was that cotton cloth was woven, for the purpose of wrapping cotton, into bagging. Chambers of commerce refused to receive the bales of cotton as merchantable because they were not wrapped in the ordinary way. There were these desperate efforts made to protect themselves against the schemes of the manufacturers.

The Finance Committee sent for the men who were engaged in this scheme. They brought them into the Finance Committee room here, and the men who organized it said frankly and brutally to the members of the committee, "Yes, we made this organization. We are compelling these people to pay these extra prices. What are you going to do about it?" That was stated here. I quoted the words here in the Senate.

Mr. PLATT of Connecticut. May I ask the Senator from Arkansas a question?

Mr. JONES of Arkansas. Certainly.

Mr. PLATT of Connecticut. Does not the Senator think that a combination of that sort could be made just as well with bagging on the free list if the parties were disposed to do it?

Mr. JONES of Arkansas. It can not be done. With bagging on the free list it can be brought here cheaper than with taxed bagging. The result of the fact that bagging is on the free list is that people may have bagging made in Calcutta or in Dundee. As a rule, it is not made in Dundee now, but it has been made in Calcutta. A small quantity does come from Calcutta, and on very short notice it can be manufactured in considerable quantities; but the fear of the competition coming from Calcutta keeps the price of bagging at something like a fair rate.

Mr. PLATT of Connecticut. But if anybody chooses to enter into such an unconscionable contract as to double the price of cotton bagging from 7 cents up to 14, I do not see how the question of a little duty on it affects the matter one way or the other.

Mr. JONES of Arkansas. It does affect it. The only effect that the duty can have is to promote this unholy combination to the extent that the tax goes. There can be no apology nor reason for putting a tax on this article. Nobody says it is an infant industry. It has been a profitable business for years. It has had absolute control of the American market for years, and has on one occasion used it for an unholy purpose in this way. I say that people who have so acted are entitled to no consideration, even from the standpoint of a protectionist, at the hands of the Senate of the United States.

Mr. MANTLE. I agree with the Senator, the facts being as he states them, that they are not entitled to protection. I am trying to get some practical information, for I have not had the time nor have I been able to get all the facts myself. I understand that under the McKinley law there was a tariff upon this article.

Mr. JONES of Arkansas. Yes, sir.

Mr. MANTLE. And under that law the importations were very small indeed in relation to the whole quantity used. I gather that from what the Senator from Arkansas has said. Under the Wilson law bagging was placed upon the free list. Now, I want to inquire how much was imported under the Wilson law when it was upon the free list?

Mr. JONES of Arkansas. There were 1,600,000 pounds imported under the Wilson law and there was about 900,000 pounds imported under the McKinley Act.

Mr. MANTLE. So it made very little difference.

Mr. JONES of Arkansas. The importations were not very largely increased.

Mr. MANTLE. Now, one further question. I understand that the duty proposed under this bill increases the rate over the McKinley law?

Mr. PLATT of Connecticut. No; it is lower.

Mr. JONES of Arkansas. I can not compare the rates. I do not know. This is a rate of 27 per cent. The McKinley law charged a tax of 1.6 cents and 1.8 cents a yard, which was more than 1½ cents. On a valuation of 6 cents a yard it would be somewhere in the neighborhood of 30 per cent, I should say.

Mr. PLATT of Connecticut. I think that the McKinley rates averaged about 40 per cent.

Mr. MANTLE. The important fact which seems to be brought out is that even after it was placed on the free list the importations increased very slightly and the American manufacturers continued to furnish the article.

Mr. JONES of Arkansas. There is no question of that.

Mr. MANTLE. I want to ask the Senator just one other question. What relation does the material referred to in paragraph 473½ bear to burlaps and bags for grain made of burlaps in paragraph 493½?

Mr. WHITE. Right there I was about to suggest that I think the amendment proposed, if it is designed to make it certain and

that no doubt should be entertained that grain bags are included, should have added to it "burlaps and bags for grain made of burlaps," being the language used in the present law.

Mr. JONES of Arkansas. I do not know what the proposed amendment covers. I sent to the desk to get it, and the language sent to me covers only cotton bagging.

Mr. WHITE. It reads:

Bagging for cotton, gunny cloth, and similar fabrics suitable for covering cotton, composed of single yarns, made of jute, jute butts, or hemp; plain woven fabrics, bags, and sacks of single jute or hemp yarns, by whatever known.

I think it was designed to include grain bags, but in order to make it more certain, if such was the design of the Senator from Alabama offering it, I suggest that there be added to it "burlaps and bags for grain made of burlaps," being the language of the present law. Then there can be no doubt about the inclusion of grain bags.

The VICE-PRESIDENT. The Secretary will report the amendment offered June 21 by the Senator from Arkansas and now before the Senate.

Mr. JONES of Arkansas. My understanding was that it is an amendment offered by the Senator from Alabama [Mr. PETTUS].

Mr. WHITE. Offered June 30.

The VICE-PRESIDENT. The amendment to insert paragraph 473½ was offered by the Senator from Arkansas, and the Secretary will read it.

The Secretary read as follows:

473½. Bagging for cotton, gunny cloth, and all similar material suitable for covering cotton, composed wholly or in part of hemp, flax, jute, or jute butts.

Mr. JONES of Arkansas. I offered that amendment, and it is intended to cover and does cover cotton bagging alone; but I understood the Senator from Alabama [Mr. PETTUS] to offer another proposition which was intended to be taken as a substitute for the amendment which I had offered and which was pending.

Mr. WHITE. That is the amendment I have before me and which I have just read.

Mr. JONES of Arkansas. If that is the amendment to be considered at this time, I think it ought to be confined to cotton bagging alone, or else the language suggested by the Senator from California should be inserted, because there ought not to be any doubt as to whether it includes burlaps as well as grain bags, if it is intended that they shall be included. The language submitted by me is the language under which cotton bagging alone has been made free all along, and it applies to nothing but cotton bagging.

Mr. MANTLE. I understand the Senator from California proposes to amend it so as to include burlaps and bags for grain. I think the two ought to go together.

Mr. GRAY. Does the Senator from California include in that the word "burlaps?"

Mr. WHITE. I propose to amend the amendment proposed by the Senator from Alabama [Mr. PETTUS] by adding thereto the following language:

Burlaps and bags for grain, made of burlaps.

Which is the language found in the free list in the Wilson law.

Mr. ALLISON. Mr. President, what paragraphs have been voted out of the bill by a vote of the Senate? Were they paragraphs 339, 341, and 342? Am I right in that?

The VICE-PRESIDENT. The Secretary informs the Chair that that is correct.

Mr. ALLISON. Very well. Now, the amendment pending before the Senate is practically placing in the free list one of those bagging paragraphs, namely, bagging for cotton. I understand the Senator from California [Mr. WHITE] now desires to also place upon the free list paragraph 341, which is "Bags or sacks made from plain woven fabrics, of single jute yarns," etc.

Mr. PETTUS. That is already in the amendment.

Mr. WHITE. If that includes "burlaps and bags for grain, made of burlaps," very well. I do not care to have any doubt about it, and so I have added to the phraseology of the amendment of the Senator from Alabama the words "burlaps and bags for grain, made of burlaps," so that there may be no ambiguity about it. Will the Senator from Alabama accept the amendment?

Mr. JONES of Arkansas. Let the amendment be reported from the desk, so that we may understand the precise form it is now in.

The Secretary read as follows:

Bagging for cotton, gunny cloth, and similar fabrics, suitable for covering cotton, composed of single yarns, made of jute, jute butts, or hemp; plain woven fabrics, bags, and sacks, of single jute or hemp yarns, by whatever name known; burlaps and bags for grain, made of burlaps.

Mr. WHITE. I think by striking out from the words "single yarns" down to the word "known" perhaps it would read a little better, though the meaning is plain enough.

Mr. MILLS. I understand that paragraph 340 has been voted out as well as paragraphs 339, 341, and 342.

Mr. PETTUS. They were all stricken out.

Mr. MILLS. But the Secretary has read paragraph 342.

Mr. PETTUS. Paragraphs 339, 341, and 342 were put on the free list by the amendment as amended by the Senator from California [Mr. WHITE].

Mr. GRAY. Adding "burlaps," in order that it may certainly be included, as it probably is included in the general language of the insertion.

Mr. JONES of Arkansas. Mr. President——

Mr. PETTUS. If the Senator will allow me one moment, I want to get the matter understood. I want the Secretary to state which paragraphs have been stricken from the bill.

The SECRETARY. Paragraphs 339, 340, 341, and 342.

Mr. MILLS. Then I was right.

Mr. MANTLE. Bearing directly upon this question, I have a letter here——

Mr. JONES of Arkansas. Will the Senator permit me just a moment?

Mr. MANTLE. Certainly.

Mr. JONES of Arkansas. I think that this amendment should be put in proper shape before we get away from it. The pending amendment is:

Bagging for cotton, gunny cloth, and similar fabrics suitable for covering cotton, composed of single yarns, made of jute, jute butts, or hemp.

That covers bagging. Now it is proposed to include the words:

Plain woven fabrics, bags, and sacks of single jute or hemp yarns, by whatever name known.

Then the Senator from California [Mr. WHITE] proposes the additional words:

Burlaps and bags for grain, made of burlaps.

I think, as thus proposed, the amendment will be in proper shape, and I will agree to accept it as a substitute for the one I have proposed. I suggest to the Senator from Alabama that he accept it in this form, striking out the words "plain woven fabrics, bags, and sacks of single jute yarns, by whatever name known," so as to read:

Bagging for cotton, gunny cloth, and similar fabrics, suitable for covering cotton, composed of single yarns, made of jute, jute butts, or hemp; and burlaps and bags for grain, made of burlaps.

Mr. PETTUS. I do not understand what the Senator asks me to accept.

Mr. JONES of Arkansas. I propose that there shall be stricken out of the amendment as proposed by the Senator the words:

Plain woven fabrics, bags, and sacks of single jute or hemp yarns, by whatever name known.

And that in lieu of those words there shall be inserted what has been suggested by the Senator from California [Mr. WHITE], the words:

Burlaps and bags for grain, made of burlaps.

Mr. PETTUS. Then paragraph 341 would be still open.

Mr. JONES of Arkansas. Paragraph 341 is out of the bill. It is not in existence.

Mr. PETTUS. Is it not on the free list?

Mr. JONES of Arkansas. No; it is out of the bill. It is not in existence. This is a proposition to put an item on the free list, which will be a substitute for what was taxed in paragraphs 339, 341, and 342.

Mr. MILLS. That is right.

Mr. PETTUS. I want the Senator to understand that I am desirous of protecting the grain bags from this tax, but I am also desirous of protecting the other bags that are used for fertilizers and cotton seed and cotton-seed meal, and all that class of farm bags.

Mr. MANTLE. This amendment will cover that.

Mr. JONES of Arkansas. Yes; I suppose so.

Mr. MANTLE. Mr. President, bearing directly upon this question, I am in receipt of a letter, which I presume has been addressed to all Senators here, from the Bradley Fertilizer Company, of Boston, Mass. I ask that the Secretary read the letter. It seems to me to the point and to be rather important.

The VICE-PRESIDENT. The Secretary will read as requested, in the absence of objection.

The Secretary read as follows:

BOSTON, *June 28, 1897.*

DEAR SIR: We earnestly hope that you will continue the fight for lessening the burdens of our farmers by putting this article on the free list.

We refer to burlap 40 inches wide and under, the duty on which was covered by paragraph 339, Schedule J. Wider widths are used for other than agricultural purposes, and we do not object to a duty on such wider widths if Congress deems that advisable, but we most earnestly hope that you will make no compromise on burlap 40 inches and under. Practically all this class of burlap is used for making sacks for grain, flour, and fertilizers, the amount used for such purposes comprising 30 to 50 per cent of all the burlap used in the country.

Against the argument that the duty is required for revenue purposes, we claim that the farmers can not afford and should not be asked to pay it.

Against the argument that the duty is for protection we state emphatically that there is no industry to protect. The claim for protection comes principally from the Chelsea Jute Mills, of Brooklyn, and the committee has been given to understand that this company has $4,000,000 invested in a plant for the manufacture of burlap, while the assessed value of this entire property, including real estate, buildings, and machinery, is but $300,000.

This company was formed in 1877, and, notwithstanding the existence of a duty upon burlap cloth of about 30 per cent for over twenty years prior to the Wilson bill, they have never succeeded in establishing this industry, and yet the committee were led to believe that the Aldrich tariff, which imposed a duty of less than 30 per cent, would enable this industry to flourish here.

By securing a duty upon both burlap and burlap sacks they propose to make a few thousand seamless sacks, and in order to support this industry they ask Congress to impose a duty upon the farmers of the whole country to the extent of two and one-half million dollars. The proposition is preposterous on the face of it. It would be far better for the Government to pay an annual subsidy to this mill equivalent to the profit that they expect to make on these sacks.

Even were it admitted, for the sake of argument, that any considerable amount of capital were invested in a plant in Brooklyn, or at any other point in the United States, for the manufacture of burlap cloth, we claim that such an investment would be ill-advised and could never prosper in competition with India, which controls the jute of the world and has the cheapest labor on earth. A duty far greater than that given by the Dingley bill will never suffice to maintain this industry here against such odds. India must and will hold our market for her burlap, even if she is driven to placing an export duty upon her jute as an offset against any import duty placed by us upon her burlap. This policy has already been agitated by India.

A duty upon burlap imposes a direct tax upon every farmer in the land who raises a sack of grain or buys a bag of fertilizer, and handicaps our farmers in marketing their products in competition with other agricultural countries in the markets of the world.

Yours, very respectfully,

BRADLEY FERTILIZER COMPANY,
ROB. T. BRADLEY, *President.*

Hon. LEE MANTLE,
United States Senate, Washington, D. C.

Mr. MANTLE. Mr. President, to my mind that letter very forcibly presents the argument in favor of placing this material upon the free list. I have said here upon more than one occasion during this debate that in my opinion the farmers of the country, from the very nature of the case, are the last ones to receive a direct benefit from a protective tariff. It arises out of their vocation, from the very nature of their occupation. They are benefited in a measure, according to my view as a protectionist, and that benefit grows out of the diversification of the industries of the country, the employment of labor in other branches of industry, and the creation in this way of a local demand for many of the products of the farm. To that extent they derive a benefit.

But when we remember that of the great staple products, notably cotton, wheat, and some others, we produce a surplus, and that the farmers are therefore compelled to seek the open markets of the world, and that the home price of their product is thereby fixed by the world's market, we at once appreciate the inequality which exists with respect to the benefits to be derived from a protective tariff.

After some investigation, Mr. President, I have arrived at this conclusion, and I have felt and I now feel that whenever the opportunity presents in the formation of a tariff for giving some benefit by placing articles which the farmer must of necessity use upon the free list, without injury to any American industry, the opportunity ought to be improved.

It does not appear that by placing this article on the free list we are going to injure any American industry, for it is stated here that under the Wilson law, with this material on the free list, its importation has increased but a trifle over and above the importations under the McKinley law, nor is there any reason to believe that it will. It seems that the home manufacturer, even under free bagging, has supplied the American market.

It must follow, in this view of the case, that if a duty is imposed it will result in enhancing the cost of this material to the consumer, who is the farmer of the United States. Under these circumstances it must so result, although this is not usually the result of a protective tariff.

Mr. WILSON. Has the Senator from Montana any information to show whether, when that article was placed upon the free list under the Wilson law, the farmer received any benefit in the way of a decreased price?

Mr. MANTLE. I did not inquire as to that, but the important fact to be borne in mind is that the importations did not materially increase, that they were infinitesimal in relation to the whole amount of the article consumed.

Mr. ALLISON. The provision referred to only applied to bagging for cotton. It does not apply to all the other articles now mentioned in this amendment. Bagging for cotton has been made in this country for a long time, but there are large importations of other bagging, and there have been under all other tariff laws as well as under the Wilson law.

Mr. MANTLE. The letter just read refers to a factory engaged in this industry which, it is said, is nominally assumed to have $4,000,000 capital invested in this industry, but which the writer of that letter states emphatically has not more than $300,000 invested, and that, notwithstanding a duty of 30 per cent under former laws for twenty years, the industry has not materially grown. In any event, assuming and conceding that what the distinguished chairman of the Finance Committee says is true, I still maintain that if we can in any way fairly favor the great agricultural interests of this country in the framing of this proposed law, we certainly ought to do it.

It is understood that I am not opposed to a protective tariff, but I am profoundly impressed with this idea, that in the very nature of things the great body of the farmers of this country are the least benefited by a protective tariff, and that in framing this bill and adjusting these matters we ought to try to be just to all elements of the country. I know that is the intention of the committee, and I do not mean by anything I say to reflect upon them in any manner. I am sorry to differ with them; but these are my views, and holding these views I feel constrained to vote on these occasions, even though a protectionist, against these particular items, because I believe there is more justice and more equity in voting to put these particular articles upon the free list than there is in making them dutiable.

There are, I respectfully submit, Mr. President, other things upon which this same amount of revenue may be raised. I made a proposition the other day to place other raw skins, aside from cattle hides, upon the dutiable list—goatskins, which are imported annually to the amount of $10,000,000 or $12,000,000 worth. A duty of 20 per cent ad valorem would make up the deficit which would be created by placing these particular items now under discussion upon the free list. Goatskins, when manufactured, enter into the very finest quality of articles in which leather is used, articles which approximate what are termed luxuries, such as kid gloves and the very finest quality of shoes, and things of that sort.

It does seem to me that, as between the item of burlaps and bagging and the item of these high-grade skins to which I have referred, it would be far more equitable and just to exchange the duty and transfer it to this item of raw skins.

Mr. HAWLEY. Does the Senator bear in mind that goatskins are not produced to any extent in this country?

Mr. MANTLE. There are not a great many, although there are a great many more than we find accounted for in the Treasury statistics bearing upon this subject. There are in the State of Texas alone—and I had a communication printed in the RECORD the other day showing that there are accounted for upon the local record over 250,000 goats, while the statistics of the Treasury Department only give about 41,000. So we can not rely upon the Treasury statistics. In any event, by free importation the skins to which I refer, and notably sheepskins, which are thicker and coarser and inferior to goatskins, come directly into competition with cattle hides in the manufacture of shoes. The product is very deceptive, and many people buy it under the impression that they are buying cowhide shoes, not knowing the difference. Therefore those skins come into competition with cattle hides.

I desire again, in this connection, to call the attention of the committee to the fact that leaving these other skins upon the free list is a direct injury to the manufacturer and the tanner engaged in finishing and tanning and the manufacturing of cowhides. It places them at a disadvantage with their competitors in the trade, who are enabled to bring in a vast amount of sheepskins and goatskins which, in a measure, enter into competition with cowhides. There is no reason in the world why these other skins should not be compelled to pay some sort of a duty, a revenue duty, at least, if nothing more. It is a perfectly legitimate item on which to place a revenue duty.

Mr. PERKINS. Mr. President, inasmuch as my friend from Montana [Mr. MANTLE] has had read here a letter from a dealer in burlaps and sacking in Boston, who is engaged in selling a fertilizer, and therefore would like to place the profits in bags, if there are any, into his own exchequer, it is only fair that I should offer an antidote for that letter in the form of one which comes from a manufacturer in the State which I have the honor in part to represent.

I want to say, parenthetically, that I believe each Senator upon this floor is in sympathy with the great agricultural interests of this country; that none of us would intentionally cast a vote which would cripple that great industry, which is the source of all wealth. When the farmers of the country do not prosper, there is general depression in every other branch of business in the land. We all have a common object in view. We want a good Government, we want wise laws, and we want those laws honestly and faithfully administered. We want to do that which will bring the greatest good to the greatest number, and we only differ as to the means by which we may arrive at that end.

I believe that placing a moderate duty upon burlaps to cover the difference between the wages paid in this country and in other countries where they are manufactured by peon labor, in Calcutta, and the East Indies, would be the best safeguard for the protection of the farmers of this country; for there is a great trust in burlaps, bags, and sacking, which commenced in free-trade England; in Dundee, Scotland, and then changed its base of operations from that country to India. That trust to-day—and I speak advisedly—in anticipation of what we may do here, placing, as they believe we will, burlaps on the free list, have already entered into a combination whereby the prices of burlaps and grain bags will be advanced to the consumers of this country.

But I shall not weary the Senate. I only ask that the Secretary may read the communication I have here, not from a merchant, not from a broker, or a commission man, but from manufacturers.

Mr. MANTLE. If the Senator from California will pardon me, I wish to say that it is not quite clear to me how the profits on

these bags, if placed on the free list, would find their way into the pockets of the people who deal in fertilizers.

Mr. PERKINS. If my friend will listen to the reading of the communication, he will then learn that there are great trusts in other countries, who have formed a combination whereby the prices of burlaps, grain bags, and fertilizer sacks are advanced to the buyer. Having these factories in this country to give employment to our people will act as a financial safety valve upon these great trusts, and therefore the consumer and the agriculturist will be benefited by having the opportunity of the competition between our manufacturers and those abroad in the production of this article.

Competition is the true test, the true standard whereby prices may be reduced. Competition alone is what will benefit the farmers in this respect. It has been well said there is nothing more powerful than one million dollars, except perhaps it be two million dollars. These great combinations of peon and cooly labor do control the great agricultural and manufacturing interests of this nation, and not only of this nation, but of the whole world.

The VICE-PRESIDENT. In the absence of objection, the Secretary will read the statement referred to by the Senator from California.

The Secretary read as follows:

STATEMENT IN BEHALF OF A PROTECTIVE TARIFF ON JUTE BAGS AND BURLAPS FROM THE JUTE INDUSTRY OF THE PACIFIC COAST.

California was one of the first States of the Union to engage in the manufacture of jute bags and burlap.

Ever since 1869 the mills here have supplied a large percentage of the farmers' requirements of grain and wool bags. In those days the West was far from the East, and supplies of bags difficult to get, and to have our domestic wants supplied by the home mills was an important convenience to the farmers, and helped to keep down prices. There are no grain elevators on the Pacific Coast, and no ships or cars are loaded with grain in bulk for transportation.

When California first began to export wheat and wool, so rapidly did the industry develop in the great valleys of the Sacramento and San Joaquin rivers that great difficulty was experienced in getting sufficient bags in which to move the crops. The wheat and wool raisers were at the mercy of importers and foreign manufacturers, who never failed to raise the prices when there was a scarcity, and thus oppress the farmers. So much was this experienced that 20 cents a bag was sometimes charged for the ordinary 2-bushel grain bags weighing about 12 ounces each.

When the home factories entered the field in competition with the imported bags, prices were reduced to a reasonable figure, and for several years past the standard grain bag could be bought at from 6 to 7 cents each. This, without question, was due to the large increase of domestic manufacture, and had it not been for this the bag trade would have been entirely under the control of Calcutta and Dundee importers, and prices would have been much higher and arbitrary.

Since the large extension of the bag and burlap industry on this coast, bags have scarcely ever been higher than 6 cents apiece. Thus in a few years the farmers have been saved hundreds of thousands of dollars, and employment given to our own people, and the money kept at home, thus establishing a remunerative source of employment and aiding the general prosperity.

The San Francisco Chamber of Commerce, representing many farmers and shippers of grain, realize the importance and necessity of protecting the jute bag and burlap industry here. They petitioned the Committee on Ways and Means on January 7 last to restore the McKinley tariff rates for the protection of our home manufactories of bags and burlaps.

In 1872, 100 looms, with all the necessary carding and spinning machinery, were in operation on this coast for making bags and burlaps. In 1880, 300 looms were in operation; in 1889, 500 were in operation, and in 1891 a large jute plant was ordered and a mill built in San Francisco, but, owing to the Wilson bill passing, the machinery has never been taken from the original packages and the mill has never been started. It stands idle at the corner of Eighteenth and Channel streets, San Francisco.

This bill was a great blow to the jute bag and burlap industry, and has completely ruined it. In 1893, 500 looms were in operation in the manufacture of jute bags and burlap in this State, giving employment to 1,100 free white laborers, consuming 21,000 bales of raw jute annually and producing bags and burlap equal to 12,000,000 standard grain sacks. There are also, in addition to the above, prison jute mills on this coast, run entirely by convicts, and they consume 14,000 bales of jute and make 7,000,000 bags annually. So that nearly 50 per cent of the Pacific Coast requirements are now made at home by American labor.

With a fair and just protective tariff, sufficient to admit the payment of reasonable wages to the work people, and a probability of the tariff not being disturbed for some time, this jute bag and burlap industry would undoubtedly rapidly increase, and eventually be sufficient to supply our entire wants of bags and burlaps.

A jute manufacturing plant is expensive and can not be installed to work economically on a small scale. This fact, coupled with the uncertainty for years back of the stability of a reasonable protective tariff, has been the main reason why a larger and more rapid extension of the bag and burlap industry has not taken place.

There is a large capital invested in this State in bag and burlap manufacturing machinery now standing useless, and many work people idle and in sore distress, and it is urgently requested that you pass the House bill and give reasonable protection to our industry, and thus afford us the opportunity of starting the mills again and earning a livelihood.

W. R. THOMAS,

Machinist, Jute Works.
JOHN DOIG,
Starcher, Jute Works.

Mr. WHITE. Mr. President, this subject was before the Senate some days ago. On the 19th of last month, when the provisions in paragraphs 341 and 342 regarding this subject were stricken out, I stated that the bags used for grain upon the Pacific Coast were directly consumed by the farming element, and that with a duty such as that designated, which was imposed by the McKinley law, a direct tax was, in fact, levied upon the farming industry. I stated then that there was but one factory outside of the California State Penitentiary in that State open, and confusing that establishment with one which had existed before and which has since closed up, I said that Mr. Rutherford, the proprietor, employed a large number of Chinamen. That was an error. It seems that the Chinamen were employed in another factory.

But I wish to direct particular attention to one fact. The consumption upon the Coast is about 40,000,000 bags. The California farmer and the farmer of Oregon and Washington do not utilize the elevator system. All grain shipped to Europe is shipped in jute bags, which contain from 130 to 140 pounds. It is impossible of course to transmit the grain in bulk around the Horn, and therefore bags are used. The drawback provision of the bill is absolutely useless. It shows upon its face that it amounts to nothing, and in fact it is a mere delusion. The farmer gets a positive benefit from free grain bags; and whatever may be the theory as to other industries, it is certain, as stated by the Senator from Montana, that when the farmer can be benefited, as he derives so little benefit from legislation of this character, we should look kindly toward his interest.

I assert that the statement made in the document read at the desk can not be supported, in so far as there is an intimation that the farmer derives no benefit from putting jute bags and burlaps upon the free list. I can prove it, and I proved it the other day in this way, that the price of bags in California in 1893 with duty was 6½ to 7 cents; in 1892, with duty, 7¼ to 8 cents; in 1891, with duty, 7 to 7½ cents; in 1896, when bags were free, 4¼ to 4½ cents; in 1895, when bags were free, 4½ to 5 cents, and in 1894, when bags were free, 4 to 4¼ cents.

Now, it is impossible that the rate for bags has gone up lately for fear Congress would put them on the free list. On the 19th of June these items were stricken from the dutiable list as far as we then went, and there was not the least reason anterior to that hour to suppose that the Senate or Congress would put anything on the free list unless it was something that would not be of any especial benefit to the farming community. The farmer knew that 25 cents a bushel had been placed as a duty upon his wheat, and he also knew that it was utterly valueless to him, that he exported his wheat, and that the price of his wheat was fixed abroad, and the only effect it could have would be to make him pay a duty on seed which he might wish to bring into this country.

In a letter which I received day before yesterday from a gentleman with whom I am quite well acquainted, Mr. Hoar, of Ventura County, Cal.—and I might say that Mr. Hoar is a nephew of the distinguished senior Senator from Massachusetts [Mr. HOAR]—he informed me that grain bags were quoted then at 5 cents for Calcutta and 5¼ for the product of the California State prison, showing that the low price can not be due to the product of the prison, since it was quoted higher than the Calcutta importation.

Besides, the total production of the Pacific Coast, including the product of the penitentiary at Walla Walla, was less than 40 per cent of the consumption, in my opinion less than 30 per cent, although the statement says 50 per cent. That is an error. I do not think the California jute mills turn out any such amount as stated in the letter referred to. At all events, experience has proved in the matter of grain bags—the figures I give demonstrate mathematically—that the farmer has derived direct and specific benefit from the placing of these articles in the free list under the Wilson bill. Let us at least incorporate in this provision one paragraph which may do some good to those who are toiling and suffering, and who, as a rule, look in vain to legislation for relief or for their pecuniary advancement. Here is a chance to give the farmer something, no mere formal duty as the wheat duty, but something actually of benefit to him. Let us do it.

A few days ago we voted in such a way as to indicate our intention to be as I have stated. If it is necessary to get more duty, let us obtain it elsewhere. There are other means of imposition of duty and other sources to which we may apply for adequate relief in this regard. If the pending bill is to create a deficiency, it will not be because the farmer has got too much benefit from it. It will be because prohibitory tariff duties have been imposed which have blocked the ordinary channels through which revenue has been in the habit of passing. Let us turn elsewhere if we wish to obtain more revenue, and in this particular instance waive the imposition of a duty in the interest of a class which is suffering more than any other in the United States.

Mr. MANTLE. Just to supplement what I have already said, I have looked at the matter of the importation of grain bags and burlaps, and I find that what I said generally applies to this branch of the subject. I find that in 1893 the importations were one

million one hundred and ninety-nine thousand and some odd dollars, and the unit of value per pound was 4.5 cents. That was under the law of 1890, imposing a duty of 2 cents per pound. In 1896, when they were free, the importations were $1,577,000, having increased less than $400,000, while the unit of value was reduced to 3.8 cents per pound.

Mr. President, this bears out what I said, that while the article was on the free list its importation was not stimulated particularly, but it resulted in lowering the value seven one-thousandths of a cent per pound.

Mr. ALLISON. Where does the Senator from Montana find that information?

Mr. WHITE. On page 174 of the comparative statement.

Mr. MANTLE. I find it in the comparative statement, page 174.

Mr. ALLISON. It was simply reduced seven-tenths, and that is probably not a greater reduction than we have observed in a great many things, if so great.

Mr. MANTLE. I agree with the Senator from Iowa that there has been a reduction in the price of everything.

Mr. WHITE. If the Senator from Montana will excuse me, I might add that if we take Mr. Rutherford's estimate of the value of Calcutta bags, the rate would be 52 per cent ad valorem on grain bags, which is more than it is on anything else in this class of goods.

Mr. BACON. The distinguished Senator from Iowa [Mr. ALLISON] stated that the putting of these several articles which relate to the wheat and cotton crop upon the free list would amount to a loss of from six to seven million dollars to the revenue of the Government.

Mr. ALLISON. I may have stated that in a general way. About $4,000,000 is the real loss apparent. That includes mattings and some other things. It includes those articles which were voted from the dutiable list the other day.

Mr. BACON. If the Senator includes articles which do not relate to cotton or wheat, of course I have nothing to say, but I desire to call the attention of Senators to the fact that the duties upon these particular articles are not of any such large amount or approximately.

Mr. ALLISON. I did not speak of these particular articles.

Mr. BACON. Then I misunderstood the Senator.

Mr. ALLISON. I spoke of the several articles embraced in the various paragraphs which were taken from the dutiable list the other day. Will the Senator from Georgia allow the Senator from Connecticut [Mr. PLATT] to give the estimate?

Mr. BACON. Certainly.

Mr. PLATT of Connecticut. The estimated revenue to be derived from the articles which were put on the free list by the different votes the other day is as follows:

Cotton ties	$54,630
Mattings	1,388,182
Burlaps:	
Calcutta	569,986
Dundee	1,254,508
Bags for grain	721,199
Bagging for cotton	11,683
Total	4,000,188

Mr. BACON. I think the question under consideration is the amount of duty upon the particular articles which it is now sought to put on the free list; the others are altogether of a different character, and if I am correct in that respect, the consideration is limited to the question, What will be the loss of revenue under the proposed act upon grain sacks and the cloth from which they are made and upon cotton bagging and cotton ties?

I have before me the comparative statement, pages 174 and 175, and I find part of the information just given by the Senator from Connecticut, and I ask Senators who represent States in which grain is produced to mark how this loss of revenue is to be divided. If the amendment is adopted, the loss of revenue, as estimated, from the putting of grain sacks on the free list will be $721,000. The actual revenue heretofore derived under the McKinley Act was $536,644, but the estimated loss, I repeat, is $721,199.

Now, the estimated loss from putting cotton bagging upon the free list is only $11,683. There is that difference between the two. If cotton ties are put upon the free list—and I mention that here because the subject is nearly akin, and I may as well say now what I might have to say otherwise on the subject of cotton ties—there will be a loss to the revenues of the Government under the estimate now before us of only $54,630, and from bagging and ties together it will amount to less than $75,000. The estimated loss of all revenue to be derived from the placing of both bagging and ties upon the free list will be less than $75,000, whereas under the accompanying provision by which grain bags are to be placed upon the free list it will amount to seven hundred and twenty-one thousand and odd dollars.

I do not state that for the purpose of showing that any advantage will be had by the States in which grain is produced, but to show that if there is any advantage given under this bill to the States which produce grain, there certainly ought to be, so far as practicable, a corresponding advantage to the States producing cotton. Binding twine is already on the free list. If binding twine and grain sacks are both put upon the free list, certainly both bagging and ties ought also to be upon the free list.

I do not know whether it would be possible to ask the Senate to consider the two amendments together. Therefore I will defer what I may have to say upon the subject of ties until after this amendment has been acted upon.

The VICE-PRESIDENT. The Chair understands the amendment to be the insertion of a new paragraph, to be known as paragraph 473½, and consolidated with that a new paragraph is proposed, 493½, by the Senator from California [Mr. WHITE].

Mr. JONES of Arkansas. I accept as a substitute for the amendment I offered the one proposed by the Senator from Alabama [Mr. MORGAN] as amended upon the suggestion of the Senator from California [Mr. WHITE].

The VICE-PRESIDENT. The Secretary will read the amendment as now proposed.

The SECRETARY. It is proposed to insert as a new paragraph, on page 165, the following:

473½. Bagging for cotton, gunny cloth, and similar fabrics, suitable for covering cotton, composed of single yarns, made of jute, jute butts, or hemp, and burlaps, and bags for grain made of burlaps.

Mr. ALLEN. I think the amendment ought to be separated.

Mr. BUTLER. I suggest to the Senator from Alabama, the Senator from California, and the Senator from Arkansas——

Mr. ALLEN. Let the amendment be read.

The VICE-PRESIDENT. The Secretary will again read the amendment.

The Secretary again read the amendment.

Mr. ALLEN. I move to strike out the words "jute, jute butts, or."

The VICE-PRESIDENT. The Secretary will state the amendment proposed by the Senator from Nebraska.

The SECRETARY. It is proposed, in line 3, to strike out the words "jute, jute butts, or;" so as to make the amendment read:

473½. Bagging for cotton, gunny cloth, and similar fabrics, suitable for covering cotton, composed of single yarns, made of hemp, and burlaps, and bags for grain made of burlaps.

Mr. JONES of Arkansas. That will exclude all the cotton bagging which can be used here. There is not one solitary ounce of it made of hemp.

Mr. ALLEN. What does the Senator mean by "cotton bagging?"

Mr. BERRY. What you tie up cotton with.

Mr. ALLEN. The Senator does not mean that it will exclude bags made of cotton?

Mr. JONES of Arkansas. It will exclude all bags made of jute, and they are all made of jute.

Mr. ALLEN. That is exactly what I want to do to, Mr. President.

Mr. JONES of Arkansas. Let us take a vote on it.

Mr. ALLEN. I desire to exclude bags made of jute, because I do not want to see shipped in here the Indian jute, which is produced by labor paid 5 cents a day, and to have it come in competition with American hemp. That is the very purpose and object of the motion.

Mr. WHITE. I do not understand that there is any intention to interfere with any hemp industry. The question is simply as to what is known as cotton bagging or jute, and the amendment proposed by the Senator from Nebraska to the amendment would result in a discrimination against cotton bagging.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Nebraska to the amendment.

The amendment to the amendment was rejected.

Mr. BUTLER. Parts of lines 3 and 4 of the amendment as offered by the Senator from Alabama having been stricken out at the suggestion of the Senator from California, I suggest that the amendment be allowed to stand, but that the addition proposed by the Senator from California be inserted at the end, because as it stands you specify cotton bagging and you specify grain sacks. You specify two things, and here are guano sacks and sacks for cotton-seed meal not specified.

Mr. WHITE. As I understand it, the suggestion of the Senator from Arkansas [Mr. JONES] was not adopted, and therefore the proposition of the Senator from Alabama, together with the addition suggested by me, stands.

Mr. JONES of Arkansas. That is exactly the condition. I made

the suggestion to strike out certain words, but it was not agreed to by the Senator from Alabama, and I withdrew it.

The VICE-PRESIDENT. Then the Secretary did not read the amendment correctly.

Mr. JONES of Arkansas. I did not understand the reading.

The VICE-PRESIDENT. The Chair requests the Secretary to read the amendment offered by the Senator from Alabama. By consent the words "plain woven fabrics, bags, and sacks, of single jute or hemp yarns, by whatever name known," were stricken out. Does the Senator wish to have them restored?

Mr. JONES of Arkansas. My suggestion was not agreed to, and I withdrew it.

The VICE-PRESIDENT. It has not been acted upon.

Mr. WHITE. It can be considered as withdrawn.

The VICE-PRESIDENT. The Secretary will read the amendment as it stands.

The Secretary read as follows:

473½. Bagging for cotton, gunny cloth, and similar fabrics, suitable for covering cotton, composed of single yarns, made of jute, jute butts, or hemp; plain woven fabrics, bags, and sacks, of single jute or hemp yarns, by whatever name known, and burlaps and bags for grain, made of burlaps.

Mr. JONES of Arkansas and Mr. BUTLER. That is right.

The VICE-PRESIDENT. The question is on agreeing to the amendment as stated.

Mr. PETTUS. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. BUTLER. Before the roll call begins, I wish to call the attention of Senators to the fact that a few days ago a majority of Senators, after a full and free discussion, voted to strike these articles from the dutiable list. At that time the Senator from Alabama moved that they go on the free list in the same motion. The point of order was against it, and that makes this motion now necessary.

If every Senator who was impressed with the justice and necessity of putting these articles on the free list, and so voted a few days ago, will now vote the same way, they will be put on the free list. Unless Senators vote now in favor of this motion, the articles will be left in the basket clause, and will still be on the dutiable list. Therefore I ask every Senator who, a few days ago, was convinced that our motion was fair and just now to vote to put these articles on the free list, as they voted then to take them from the dutiable list.

The VICE-PRESIDENT. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CLAY (when his name was called). I am paired with the Senator from Massachusetts [Mr. LODGE]. I transfer my pair to the Senator from Washington [Mr. TURNER], and vote "yea."

Mr. DEBOE (when his name was called). I am paired with the Senator from South Dakota [Mr. PETTIGREW]. If he were present, I should vote "nay."

Mr. GEAR (when his name was called). I am paired with the senior Senator from New Jersey [Mr. SMITH]. I transfer my pair to the Senator from Maine [Mr. HALE], so that the Senator from Arkansas [Mr. JONES], who is paired with the Senator from Maine [Mr. HALE], and I will be at liberty to vote. The Senator from Maine [Mr. HALE] will stand paired with the senior Senator from New Jersey [Mr. SMITH].

Mr. HANSBROUGH (when his name was called). I am paired with the senior Senator from Virginia [Mr. DANIEL].

Mr. HARRIS of Kansas (when his name was called). I am paired with the senior Senator from Wyoming [Mr. CLARK]. If he were present, I should vote "yea."

Mr. BATE (when the name of Mr. HARRIS of Tennessee was called). My colleague [Mr. HARRIS] is not able to be here. He is paired with the Senator from Vermont [Mr. MORRILL], who is likewise absent.

Mr. MCENERY (when his name was called). I am paired with the senior Senator from New Hampshire [Mr. CHANDLER]. If he were present, I should vote "yea."

Mr. PLATT of New York (when his name was called). I am paired with the senior Senator from New York [Mr. MURPHY]. If he were present, I should vote "nay."

Mr. SEWELL (when his name was called). I am paired with the senior Senator from Wisconsin [Mr. MITCHELL] on this question. If he were present, I should vote "nay."

Mr. THURSTON (when his name was called). I have a general pair with the senior Senator from South Carolina [Mr. TILLMAN]. If he were present, I should vote "nay."

Mr. TURPIE (when his name was called). I am paired with the senior Senator from Minnesota [Mr. DAVIS]. I transfer my pair to the junior Senator from South Carolina [Mr. MCLAURIN], and will vote. I vote "yea."

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER].

The roll call was concluded.

Mr. BERRY. I was requested by the senior Senator from New York [Mr. MURPHY] to state that he is paired with his colleague [Mr. PLATT]. If the senior Senator from New York were present, he would vote "yea."

Mr. MILLS. I am paired with the Senator from New Hampshire [Mr. GALLINGER]. If he were present, I should vote "yea."

Mr. CANNON. I am paired with the senior Senator from Rhode Island [Mr. ALDRICH], who is absent. I transfer my pair to the junior Senator from Nevada [Mr. STEWART], and will vote. I vote "yea."

Mr. TURPIE (after having voted in the affirmative). I understand from the Senator from Florida [Mr. PASCO] that the Senator from South Carolina [Mr. MCLAURIN] stands paired with the Senator from North Carolina [Mr. PRITCHARD]. I therefore withdraw my vote.

Mr. CLARK. I desire to inquire if the junior Senator from Kansas [Mr. HARRIS] has voted?

The VICE-PRESIDENT. He has not voted.

Mr. CLARK. I am paired with that Senator, and therefore withhold my vote.

The result was announced—yeas 30, nays 25; as follows:

YEAS—30.

Allen,	Clay,	Kyle,	Rawlins,
Bacon,	Cockrell,	Lindsay,	Roach,
Bate,	Faulkner,	Mallory,	Teller,
Berry,	Gorman,	Mantle,	Vest,
Butler,	Gray,	Martin,	Walthall,
Caffery,	Heitfeld,	Morgan,	White.
Cannon,	Jones, Ark.	Pasco,	
Chilton,	Kenney,	Pettus,	

NAYS—25.

Allison,	Frye,	McMillan,	Spooner,
Baker,	Gear,	Mason,	Wellington,
Burrows,	Hanna,	Penrose,	Wetmore,
Cullom,	Hawley,	Perkins,	Wilson.
Elkins,	Hoar,	Proctor,	
Fairbanks,	Jones, Nev.	Quay,	
Foraker,	Lodge,	Shoup,	

NOT VOTING—34.

Aldrich,	Hale,	Morrill,	Stewart,
Carter,	Hansbrough,	Murphy,	Thurston,
Chandler,	Harris, Kans.	Nelson,	Tillman,
Clark,	Harris, Tenn.	Pettigrew,	Turner,
Daniel,	McBride,	Platt, Conn.	Turpie,
Davis,	McEnery,	Platt, N. Y.	Warren,
Deboe,	McLaurin,	Pritchard,	Wolcott.
Gallinger,	Mills,	Sewell,	
George,	Mitchell,	Smith,	

So the amendment as amended was agreed to.

Mr. BACON. I ask that the amendment proposed by me as paragraph 517¼ be now taken up, inasmuch as the vote just taken relates directly to that subject.

The VICE-PRESIDENT. The amendment proposed by the Senator from Georgia will be read.

The Secretary read as follows:

517¼. Cotton ties of iron or steel, of any thickness, for baling cotton, cut to length, punched or not punched, with or without buckles.

The VICE-PRESIDENT. Is there any objection to the consideration of this amendment now? The question before the Senate is on the adoption of the new paragraph known as paragraph 517¼, which has just been read by the Secretary.

Mr. PLATT of Connecticut. I think we will take the question by yeas and nays on agreeing to that amendment.

The yeas and nays were ordered.

Mr. QUAY. What is the motion?

Mr. BURROWS. To put cotton ties on the free list.

The VICE-PRESIDENT. The Secretary will call the roll.

Mr. MALLORY. I should like to have the amendment read.

The VICE-PRESIDENT. The Secretary will again read the amendment proposed as paragraph 517¼.

The Secretary again read Mr. BACON's amendment.

The VICE-PRESIDENT. The Secretary will call the roll on agreeing to the amendment.

Mr. BACON. Mr. President, I will say just one word, without detaining the Senate. Under the present bill the estimated amount of revenue from cotton ties will be only $54,000, whereas the estimated revenue from the grain sacks in which wheat will be carried to market, which has just been adopted, was $721,000. Surely if $721,000 can be given to the producers of grain, the amount of $54,000 can be allowed to the producers of cotton.

The Secretary proceeded to call the roll.

Mr. CANNON (when his name was called). I will transfer my pair with the senior Senator from Rhode Island [Mr. ALDRICH] to the Senator from Nevada [Mr. STEWART], and will vote. I vote "yea."

Mr. CHILTON (when his name was called). I am paired with the Senator from Oregon [Mr. MCBRIDE].

Mr. CLARK (when his name was called). I am paired with the junior Senator from Kansas [Mr. HARRIS]. In his absence, I withhold my vote.

Mr. DEBOE (when his name was called). I again announce my pair with the Senator from South Dakota [Mr. PETTIGREW]. If he were present, I should vote "nay."

Mr. GEAR (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. SMITH] to the Senator from Maine [Mr. HALE], and vote "nay."

Mr. MCENERY (when his name was called). I am paired with the senior Senator from New Hampshire [Mr. CHANDLER]. If he were present, I should vote "yea."

Mr. PLATT of New York (when his name was called). I desire to announce my pair with the senior Senator from New York [Mr. MURPHY].

Mr. PRITCHARD (when his name was called). I am paired with the junior Senator from South Carolina [Mr. MCLAURIN].

Mr. SEWELL (when his name was called). I announce my pair with the Senator from Wisconsin [Mr. MITCHELL].

Mr. THURSTON (when his name was called). I have a general pair with the senior Senator from South Carolina [Mr. TILLMAN]. If he were present, I should vote "nay."

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER].

The roll call was concluded.

Mr. MILLS. I am paired with the Senator from New Hampshire [Mr. GALLINGER], but I transfer that pair to the Senator from South Dakota [Mr. KYLE], and vote "yea."

Mr. CHILTON. I am paired with the Senator from Oregon [Mr. MCBRIDE], and so announced, but I transfer that pair to the Senator from Delaware [Mr. KENNEY], as I desire to vote on this question. I vote "yea."

Mr. KENNEY (after having voted in the affirmative). I am paired with the Senator from Oregon [Mr. MCBRIDE]. As he is not present, I desire to withdraw my vote. If he were present, I should vote "yea."

Mr. HARRIS of Kansas. I desire to announce my pair with the Senator from Wyoming [Mr. CLARK]. If he were present, I should vote "yea."

Mr. HANSBROUGH. I transfer my pair with the senior Senator from Virginia [Mr. DANIEL] to the junior Senator from Minnesota [Mr. NELSON], and vote "nay."

Mr. VEST. I vote "yea."

The result was announced—yeas 29, nays 23; as follows:

YEAS—29.

Allen,	Clay,	Mallory,	Roach,
Bacon,	Cockrell,	Mantle,	Teller,
Bate,	Faulkner,	Martin,	Vest,
Berry,	Gorman,	Mills,	Walthall,
Butler,	Gray,	Morgan,	White.
Caffery,	Heitfeld,	Pasco,	
Cannon,	Jones, Ark.	Pettus,	
Chilton,	Lindsay,	Rawlins,	

NAYS—23.

Allison,	Hansbrough,	Mason,	Shoup,
Burrows,	Hawley,	Penrose,	Spooner,
Cullom,	Hoar,	Perkins,	Wellington,
Fairbanks,	Jones, Nev.	Platt, Conn.	Wetmore,
Foraker,	Lodge,	Proctor,	Wilson.
Gear,	McMillan,	Quay,	

NOT VOTING—37.

Aldrich,	Gallinger,	McLaurin,	Stewart,
Baker,	George,	Mitchell,	Thurston,
Carter,	Hale,	Morrill,	Tillman,
Chandler,	Hanna,	Murphy,	Turner,
Clark,	Harris, Kans.	Nelson,	Turpie,
Daniel,	Harris, Tenn.	Pettigrew,	Warren,
Davis,	Kenney,	Platt, N. Y.	Wolcott.
Deboe,	Kyle,	Pritchard,	
Elkins,	McBride,	Sewell,	
Frye,	McEnery,	Smith,	

So the amendment was agreed to.

Mr. ALLISON. I ask the Senate to turn to paragraph 500a, on page 168.

The SECRETARY. On page 168, after line 20, the Committee on Finance propose to insert as a new paragraph:

500a. Charcoal.

Mr. ALLISON. I ask that that may be disagreed to.

The amendment was rejected.

Mr. WHITE. I ask the Senator from Iowa what will be the rate of duty on charcoal?

Mr. ALLISON. It will be 10 per cent, I think.

Mr. LINDSAY. What was done with charcoal?

Mr. BACON. It was put on the dutiable list at 10 per cent.

Mr. ALLISON. It may be 20 per cent.

Mr. WHITE. I understand the Senator from Iowa to state that the duty on charcoal will be 20 per cent.

Mr. ALLISON. I am not quite sure. It is either 10 or 20. I think it will be 10, but those about me think it will be 20 per cent.

Mr. WHITE. At some time before we finish the bill I should like to move to reduce it to 10 per cent, if the Senator from Iowa is right that it is 20 or finds that possibly it is 20. I think the rate is too high and shall move to reduce it. As soon as the Senator looks over the bill and discovers the actual situation of the matter, I would be obliged to him if he would call my attention to it.

Mr. ALLISON. If it is 20 per cent, I will either move to reduce it or allow the Senator to do it. Paragraph 504, relating to coal stores, has been passed over.

The VICE-PRESIDENT. The Secretary will state the amendment to paragraph 504.

The SECRETARY. In paragraph 504, page 169, line 3, after the word "Coal," the Committee on Finance propose to strike out the comma and the words "anthracite, and coal," and in line 4, after the word "be," to strike out "unloaded" and insert "unladen or discharged;" so as to make the paragraph read:

504. Coal stores of American vessels, but none shall be unladen or discharged.

The amendment was agreed to.

Mr. WHITE. Paragraph 505, to which the Senator from Iowa has just alluded, concerns a subject regarding which I have just received two telegrams, which I wish to read. One is dated Indianapolis, Ind., June 30, addressed to me, and is as follows:

I respectfully protest against any change being made in the coal-tar schedule. Have a large investment in this city, and to conduct it successfully must have coal tar, coal-tar pitch, and dead oil of coal tar entered free of duty. If taxed, will be absolutely crippled. My appeal is a business proposition for fairness, and I respectfully ask that the coal-tar schedule remain as reported to the Senate.

P. C. REILLY.

In addition to Mr. Reilly's telegram I have received another, as follows:

PROVIDENCE, R. I., *July 1, 1897.*

Hon. STEPHEN M. WHITE, *Senate:*

Trust you will help defeat Mr. QUAY's resolution to put crude products of coal tar on dutiable list. This is of vital interest to every consumer and dealer in these products in this country, with the exception of one combination or those interested with it.

J. WM. MOORE.

I understand the Senator from Iowa does not propose to eliminate these matters from the free list.

Mr. QUAY. That paragraph went over at my suggestion yesterday. I should be glad if the Senator from Iowa will allow it to go over until to-morrow, and I think probably the Senator from California will be able to "defeat Mr. QUAY's resolution."

The VICE-PRESIDENT. Is there objection?

Mr. JONES of Arkansas. We have been lectured so often about the absolute necessity for the prompt passage of this bill, and the necessity to have it passed so as to allow the promised prosperity full sway, that it seems to me we ought not to be putting things off for another day when we are——

Mr. QUAY. I trust the Senator from Arkansas will not object to the paragraph going over until to-morrow. It will occupy to-morrow not more than five minutes in its final disposition.

Mr. JONES of Arkansas. We might dispose of the bill to-day. There are not many more matters left undisposed of.

Mr. WHITE. And certainly we should do so to-morrow.

Mr. QUAY. If the Senator from Arkansas is willing to proceed and dispose of the bill to-day, this side of the Chamber is perfectly willing.

Mr. JONES of Arkansas. I shall not make any objection. The responsibility is with the majority of the committee. They understand the great necessities that are pressing upon the country. I am simply calling attention to it.

Mr. ALLISON. At the urgent request of the Senator from Pennsylvania, unless the bill is to be finished to-day, I will ask the Senate to pass over the paragraph until to-morrow morning and take it up the first thing.

The VICE-PRESIDENT. If there is no objection, paragraph 505 will be passed over. Does the Senator from Arkansas withdraw his objection?

Mr. JONES of Arkansas. I made no objection. I simply called the attention of the majority to the critical situation of matters.

Mr. ALLISON. Well, they are critical.

The VICE-PRESIDENT. The paragraph will be passed over.

Mr. ALLISON. What has been done with paragraph 532a?

The VICE-PRESIDENT. The Secretary will read paragraph 532a.

The Secretary read the paragraph reported by the Committee on Finance to be inserted on page 171, after line 21, as follows:

532a. Farina.

Mr. ALLISON. I ask that that amendment be disagreed to.

Mr. WHITE. I desire to inquire of the Senator from Iowa what the duty will be on farina?

Mr. ALLISON. I think it will be the same duty as that on wheat flour.

Mr. GRAY. How much is that?

Mr. ALLISON. Twenty-five per cent, I think, is the duty on wheat flour.

The amendment was rejected.

Mr. ALLISON. I move that paragraph 533, feldspar, be stricken out.

The Secretary read the paragraph, as follows:

533. Feldspar.

Mr. ALLISON. Let that be stricken out.

The VICE-PRESIDENT. Without objection, the amendment is agreed to.

Mr. ALLISON. Paragraph 537½ is the next paragraph.

The SECRETARY. On page 172, after line 2, the Committee on Finance propose to insert the following as a new paragraph:

537½. Floor mattings, manufactured from round or split straw, including what is commonly known as Chinese matting.

Mr. ALLISON. I hope that will not be agreed to.

Mr. WHITE. I presume the Senator from Iowa will not wish any vote upon that proposition. It is on the free list, I suppose.

Mr. VEST. It was voted upon with the understanding—I made the motion—that it should go upon the free list. It has been placed on the free list.

Mr. BERRY. And this is a proposition to retain it on the free list?

Mr. VEST. The proposition is to disagree to the paragraph and put it back on the dutiable list. I desire to inquire the status of the paragraph. Has it been adopted and put on the free list?

Mr. ALLISON. I do not understand that it has.

Mr. JONES of Arkansas. The understanding when we voted on the proposition was that it would go on the free list. We simply waited until we reached the free list, when it was to be inserted as a matter of form, as I understood it at the time. I do not see any use to have another fight over a matter that has been settled.

Mr. ALLISON. I do not want to have another fight over it.

Mr. WHITE. I make a parliamentary inquiry. What is the state of the record?

Mr. COCKRELL. I should like the record to be read in that case. Let us see what the status is.

Mr. VEST. If my colleague will permit me, I can state it exactly. When this item was reached in going through the bill regularly, I moved to strike out the paragraph as to these mattings, stating at the time that it was for the purpose of placing them upon the free list.

Mr. ALLISON. That was the notice the Senator gave.

The VICE-PRESIDENT. That is correct.

Mr. VEST. Some debate was had, and the yeas and nays were taken, and the motion carried.

Mr. COCKRELL. That ends it. The matter is not in the bill for consideration.

Mr. BERRY. It was put on the free list.

Mr. VEST. When the free list was taken up, this new paragraph—that was the construction of the Secretary—was read, placing these articles upon the free list. Does the Senator from Iowa want another vote?

Mr. BERRY. It has already been put on the free list.

Mr. ALLISON. The amendment is pending. Let us take a vote upon it.

Mr. VEST. Well, let us have a vote. I move to put it on the free list.

Mr. JONES of Arkansas. The paragraph has been read, I believe.

Mr. PETTUS. I will inquire how that amendment came on the free list?

The VICE-PRESIDENT. It was proposed June 21 by the Senator from Missouri to put it upon the free list. It has not yet been acted upon. The question is upon the amendment inserting as a new paragraph 537½.

The amendment was agreed to.

Mr. ALLISON. The next amendment which was passed over, I think, is paragraph 547½.

The Secretary read paragraph 547½ as amended, as follows:

547½. Gunny bags and gunny cloths, old or refuse, fit only for remanufacture.

Mr. ALLISON. I believe that was the amendment I offered. There is no objection to it, I suppose?

Mr. JONES of Arkansas. No objection.

The VICE-PRESIDENT. Without objection, the amendment which has been read, inserting a new paragraph, 547½, will be agreed to.

The next item which was passed over was paragraph 550, which the Committee on Finance reported to strike out, in the following language:

550. Hides, raw or uncured, whether dry, salted, or pickled; Angora goatskins, raw, without the wool, unmanufactured; asses' skins, raw or unmanufactured; and skins, except sheepskins with the wool on.

Mr. ALLISON. That should be restored and the amendment proposing to strike it out rejected.

The amendment was rejected.

The VICE-PRESIDENT. The paragraph will stand, then, as it came from the House of Representatives.

Mr. ALLISON. At the end of the paragraph I move to insert "all the foregoing not otherwise specially provided for."

The SECRETARY. At the end of paragraph 550 it is proposed to insert "all the foregoing not otherwise specially provided for."

The amendment was agreed to.

The next paragraph which was passed over was the following, which had been inserted on the report of the Committee on Finance:

581½. Magnesia, sulphate of, or Epsom salts.

Mr. ALLISON. I ask that that amendment may be disagreed to.

The VICE-PRESIDENT. Without objection, the amendment will be disagreed to. The Chair hears none, and it is so ordered.

The next paragraph which was passed over was the following:

584. Manganese, oxide and ore of.

Mr. ALLISON. I ask that that may be passed over for a moment.

Mr. WHITE. Did I understand the Senator from Iowa to withdraw paragraph 581½?

Mr. ALLISON. No; that has been disagreed to.

Mr. WHITE. I understood that that paragraph had been voted into the bill.

Mr. ALLISON. I think it was not voted into the bill. It ought to have been voted out anyhow, because it is provided for in the dutiable list at one-fifth of 1 cent per pound.

Mr. WHITE. It is rather severe to deprive us of Epsom salts. [Laughter.]

Mr. ALLISON. The duty imposed will not be a very great deprivation.

I have asked that paragraph 584 should be passed over for the present.

The VICE-PRESIDENT. That order will be made, in the absence of objection.

The next item which was passed over was the amendment proposed by the Committee on Finance, to insert as a new paragraph the following:

603. OILS: Almond, amber, crude and rectified ambergris, anise or anise seed, aniline, aspic or spike lavender, bergamot, cajeput, caraway, cassia, cinnamon, cedrat, chamomile, citronella or lemon grass, civet, fennel, jasmine or jasimine, jugiandium, juniper, lavender, lemon, limes, mace, neroli or orange flower, enfleurage grease, nut oil or oil of nuts not otherwise specially provided for in this act, orange oil, olive oil for manufacturing or mechanical purposes fit only for such use and valued at not more than 60 cents per gallon, ottar of roses, palm and cocoanut, rosemary or anthoss, sesame or sesamum seed or bean, thyme, origanum red or white, valerian; and also spermaceti, whale, and other fish oils of American fisheries, and all fish and other products of such fisheries; petroleum, crude or refined: *Provided*, That if there be imported into the United States crude petroleum, or the products of crude petroleum produced in any country which imposes a duty on petroleum or its products exported from the United States, there shall in such cases be levied, paid, and collected a duty upon said crude petroleum or its products so imported equal to the duty imposed by such country.

Mr. ALLISON. In line 6, after the word "fennel," I move to insert the amendment I have sent to the desk.

Mr. JONES of Arkansas. What is the intention of the Senator from Iowa in regard to paragraph 584? I understood him to ask to have that passed over.

Mr. ALLISON. I have an amendment to that paragraph, which I shall offer a little later in the day.

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa to the amendment of the committee inserting paragraph 603 will be stated.

The SECRETARY. In paragraph 603, page 178, line 6, after the word "fennel," it is proposed to insert "ichthyol."

The amendment to the amendment was agreed to.

Mr. ALLISON. In line 16 of the amendment, after the word "refined," I move to strike out the remainder of the amendment and insert what I send to the Secretary's desk.

The SECRETARY. In paragraph 603, on page 178, line 16, after the word "refined," it is proposed to strike out the remainder of the paragraph, as follows:

Provided, That if there be imported into the United States crude petroleum, or the products of crude petroleum produced in any country which imposes a duty on petroleum or its products exported from the United States, there shall in such cases be levied, paid, and collected a duty upon said crude petroleum or its products so imported equal to the duty imposed by such country.

And in lieu thereof to insert:

Provided, That if there be imported into the United States crude petroleum or the products of crude petroleum produced in any other country which imposes a duty on petroleum or its products exported from the United States, there shall be levied, paid, and collected upon such crude petroleum or its products so imported 40 per cent ad valorem.

The amendment to the amendment was agreed to.

Mr. WHITE. The clause just read is a retaliatory clause.

Mr. PLATT of Connecticut. It is the same as the clause in the Wilson law.

Mr. WHITE. Would it not be better to fix the extent of the duty in proportion to the duty levied abroad?

Mr. PLATT of Connecticut. We have followed the language of the Wilson law.

Mr. GRAY. That is what they have done in regard to refined sugar in this bill. There is a retaliatory clause, but it is worded so as to make the measure of increased duty correspond to the export duty on sugar; and I think we may run up against the same objection in regard to oil that was urged in regard to sugar.

Mr. ALLISON. As there is some criticism of the proposed

amendment, I will withdraw it and allow the amendment to stand as originally agreed upon. In the retaliatory agreement we inserted the provision of the Wilson law, thinking it perhaps wiser and better than the language we originally used. However, I withdraw the amendment, and will let the paragraph stand.

Mr. VEST. Did we not put on the same duty that was imposed by the foreign country?

Mr. ALLISON. You put on 40 per cent in the Wilson law.

Mr. WHITE. The Wilson law reads as follows:

Provided, That if there be imported into the United States crude petroleum, or the products of crude petroleum produced in any country which imposes a duty on petroleum or its products exported from the United States, there shall be levied, paid, and collected upon said crude petroleum or its products so imported, 40 per cent ad valorem.

Mr. ALLISON. That is the amendment I offered just now, and which has been criticised, and so I withdraw it.

Mr. VEST. I prefer the Senator's amendment.

Mr. ALLISON. I prefer it myself.

Mr. WHITE. Then we have our preference.

The VICE-PRESIDENT. If there be no further amendments proposed, and if there be no objection, paragraph 603 will be regarded as agreed to as it has been amended.

The next item passed over was the amendment reported by the Committee on Finance, to insert as a new paragraph the following:

606½. Paintings, in oil or water colors, original drawings and sketches, and artists' proofs of etchings and engravings, and statuary, not otherwise provided for in this act; but the term "statuary" as used in this act shall be understood to include only professional productions, whether round or in relief, in marble, stone, alabaster, wood, or metal, of a statuary or sculptor, and the word "painting" as used in this act shall not be understood to include such as are made wholly or in part by stenciling or any other mechanical process, nor any article of utility.

Mr. ALLISON. I am instructed to offer the amendment which I send to the desk to the amendment which was reported by the committee.

The SECRETARY. It is proposed in the amendment heretofore reported by the committee, in line 11, paragraph 606½, page 179, after the word "sculptor," to insert the words "and shall not include the pedestal or structure on which such statuary may be mounted or placed."

Mr. VEST. Will the Senator from Iowa add to that "unless the work of art, the statue and pedestal, shall be carved from the same block?"

The VICE-PRESIDENT. Without objection, the amendment proposed by the Senator from Iowa to the amendment will be regarded as agreed to.

Mr. VEST. Now I call the attention of the Senator from Iowa to the suggestion I made. It seems to me the exception ought to be interpolated there, "except where the pedestal and work of art itself shall be carved or sculptured from the same block."

Mr. ALLISON. I will accept that amendment. I think that is right in case the statue and the pedestal should be one piece. I do not see how the statue and the pedestal could be very well separated.

Mr. PROCTOR. I ask to have the communication which I send to the desk printed in the RECORD. It is from a member of the Board of General Appraisers, and relates to the pending matter.

The VICE-PRESIDENT. It will be so ordered, in the absence of objection.

The statement referred to is as follows:

PAR. 443. (Paintings, statuary, etc.) The committee appears to have lost sight of the fact that the primary purpose of this revision of the tariff is to secure needed revenue. Otherwise why transfer to the free list articles of luxury which, according to last year's importations, would, even at the low rate in the House bill, yield about $1,250,000?

Probably no other paragraph in the present tariff act has provoked more disputes and litigation and resulted in more inequalities and annoyance generally at the custom-houses than the one making provision for the free admission of paintings and statuary. This was true in a somewhat less degree in the act of 1890, providing for the nominal duty of 15 per cent on these articles.

It must be assumed that the framers of these provisions believed that they would promote the importation of paintings and statuary of such high order of merit as would serve as educators of our students of art, as would minister to art culture in the country, and elevate the tastes of the people generally. This has not been the case, but quite the contrary; and this is believed to be the consensus of opinion amongst the most competent and observant of our artists and art connoisseurs. Instead of stimulating the importation of fine paintings and choice objects of statuary by eminent art dealers, connoisseurs, and art patrons, the tendency has been in the opposite direction. A new "crop" of art fanciers, dealers, and speculators was brought into existence by these provisions, who straightway proceeded to ransack and rummage not only the ateliers and art stores of the Old World, but also the auction rooms, paint and junk shops, foundries, and marble yards, purchasing recklessly of everything, regardless of quality, in the line either of paintings or statuary.

A large proportion of these have been brought into the country to be sold in the stores and shops at auction and by peddlers, at all manner of prices, and thus the country has become flooded, chiefly with cheap and inferior productions of artists, amateurs, artisans, and mechanics. All this to the great detriment of our own artists, amateurs, and work people, and to the serious demoralization and injury of true art. Much of this trash has had a still further demoralizing tendency, being of the class of so-called advanced, or nude, or erotic art, which has found homes in barrooms, saloons, and other places of questionable resort. Furthermore, all manner of articles of utility, decorated by painting, or of which painting is a significant feature, have secured admission under the provision for "paintings," including thousands of women's fans of all kinds (chiefly imported by Tiffany for sale to his wealthy customers and for use simply for ordinary purposes as fans); also, other innumerable hand-painted articles of utility of every description, including Christmas and holiday cards, valentines, hand mirrors, hair brushes, snuff-boxes, fire screens, and interior wall decorations of every conceivable material and description.

Indeed, paper and common cloth materials from China and Japan, intended for use in making fire screens, banners, window shades and the like, and bearing all kinds of rude and inartistic ornamental figures or characters, daubed on with paint, have been admitted free as "paintings," as have also small, cheap medallions intended to be used as the chief figures in cheap, gaudy breastpins, brooches, and the like. In fact "splasher mats" made of strips of bamboo, with birds, flowers, and other things painted on them in Japanese fashion, intended for use in protecting the walls behind washstands, and valued, all told, at not above 30 cents in our currency, have been held by the courts, on appeal from the decisions of the General Appraisers, to be entitled to admission under the provision for "paintings."

It is confidently believed that not more than 20 per cent of the four and a quarter millions in value of so-called "paintings" admitted free of duty during the fiscal year 1895 had any real artistic merit.

Although the abuses with respect to statuary have not been so extensive as in the case of paintings, they are of the same nature. Everything in the nature of statuary, including the cheapest and most ordinary foundry reproductions in bronze, as well as the output of the marble and alabaster yards of Italy, have been entered for free admission, regardless of price or order of merit. The provision in the act of 1890, limiting "statuary" to such as was "cut, carved, or otherwise wrought by hand," etc., fortunately put some check upon the abues with respect to bronze articles; the United States circuit court of appeals for the Second circuit having held, in effect, that only such statuary fell under the provision as was actually cut, carved, or wrought by hand, by or under the immediate direction of the artist who conceived, designed, and made the original model, fall within the provision.

The Senate committee has, however, adopted the language (in its free-list provision) of the present Wilson-Gorman Democratic Act, which does not contain the restrictive language of the act of 1890, but leaves it open for the admission of all manner of truck and trash in the form or semblance of statuary, which, as ordinarily interpreted, would include plaster casts, common molded figures in plaster of paris or cement, even such as the Italians hawk about the streets—indeed, the images of Indians which incumber our streets as tobacco signs.

There has been utter lack of uniformity on the part of classifying officers of customs with respect to "statuary" under the present act. At some of the ports bronze as well as alabaster and marble articles, without regard to order of merit, have been accorded free entry whenever accompanied by a so-called "artist's certificate," which documents, as a rule, are utterly meaningless and perfunctory, and have been authenticated by the United States consular officers, especially in France and Italy, without inquiry and upon the payment of their fees. In many cases marble and alabaster busts, and bronze objects in the shape of busts, statuettes and groups have been admitted free when of the invoice value of $10 and even less. In fact, it was for a time the rule at some of the ports to admit these articles free of duty when of the value of $20 or more, regardless of size, condition, or order of merit. There are now pending before the general appraisers a vast number of protests against the exaction of duty on foundry reproductions in bronze from old models designed by artists who are long since dead, including, for example, life-sized busts of Napoleon, of a value of less, in many cases, than $10, or but little more than the cost of a mere "pot-metal" casting.

No object of statuary, large or small, of the value of $100 or less, properly belongs to the category of "professional productions of a statuary or sculptor only," or is at all likely to be of such order of merit as to serve as an educator of high art. On the contrary, it may be assumed that it belongs either to the class of commercial bronzes, foundry reproductions, or to the output of a marble yard or alabaster works, or is the product of an apprentice or amateur in a studio of the Old World. Surely there is no reason why such articles should be allowed to come in free of duty, or, indeed, at a low rate of duty. They are such things as our needy work people are prepared to produce, and are producing, in bronze foundries and in marble yards and shops and at studios. They include not only statuary proper, but their adjuncts, such as pedestals and plinths, etc., all of which are generally classified as entireties, and are admitted free by customs officers.

The fine paintings and rare objects of statuary imported by the wealthy, with which to ornament and enrich their luxurious homes, are only seen by comparatively few, rarely by artists or students of art, and never by the masses of the people. Consequently the free admission of these works of art, when so imported, amounts simply to a contribution of the public revenues to the rich, with no compensating benefit to the public. Ample provision was made in paragraph 670 of the House bill for the free admission of all works of art, including paintings, statuary, specimens of sculpture, etchings, drawings, engravings, etc., when imported for a municipal corporation or for public exhibition by any association established in good faith expressly and solely for the promotion and encouragement of science, art, or industry. This would include all such institutions as the Metropolitan Museum of Art at New York, the Corcoran Art Gallery at Washington, the Carnegie Art Galleries at Pittsburg, and others of like character, which are accessible to our art students and patrons and to the public generally.

Legislation which exempts from duty costly paintings and statuary, interior decorations, etc., along with the horses, carriages, household furniture, wearing apparel, jewelry, personal effects, etc., of our people of wealth, has the effect of making the coachmen and gardeners of the Vanderbilts and the Goulds and the Huntingtons pay more tax in the way of duties than their millionaire employers.

If the committee is not inclined to adopt the provision in the House bill for paintings and statuary, and desire to "favor art" by imposing a lower rate of duty on the finer and more artistic than on the cheaper and less meritorious articles, both of paintings and statuary, it is suggested that "paintings" be provided for in one paragraph and "statuary" in another, as follows:

"PAR. —. Paintings in oil or water colors, pastels and pen-and-ink drawings, valued at not more than $100 each, 25 per cent ad valorem; valued at more than $100 each, $10 each and 15 per cent ad valorem; but the term 'paintings' as used in this act shall not be understood to include such as are made wholly or in part by stenciling or any other mechanical process, nor any article of utility.

"PAR. —. Statuary, objects of, not specially provided for in this act, $10 each and 15 per cent ad valorem; but the term 'statuary' as used in this act shall be understood to include only such statuary as is cut, carved, or otherwise wrought by hand from a solid block or mass of marble, stone, or alabaster, or from metal, and as is the professional production of a statuary or sculptor only."

The VICE-PRESIDENT. Will the Senator from Missouri please restate his amendment?

Mr. VEST. I move to insert the words "except where the pedestal and statuary shall be carved from the same block."

The SECRETARY. It is proposed to amend the amendment so as to read:

And shall not include the pedestal or structure on which such statue may be mounted or placed, except where the pedestal and statuary shall be carved from the same block.

The PRESIDING OFFICER (Mr. BURROWS in the chair). The question is on the amendment proposed by the Senator from Missouri [Mr. VEST] to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The PRESIDING OFFICER. The paragraph as amended will be regarded as agreed to, in the absence of objection. Paragraph 619 will now be read.

Mr. WHITE. Mr. President, with reference to the paragraph just reached, I wish to say that the other day I called the attention of the Senator from Iowa who is in charge of the bill to the fact that cocoa-butterine is not distinguishable, according to the statement made by the Board of General Appraisers, from cocoanut oil. If we are to have cocoanut oil, the other article upon the dutiable list, to come in—but I see this is not the paragraph. I am mistaken as to that, and I will waive it for the present.

Mr. ALLISON. That paragraph was passed. The Senator refers to the oil paragraph.

Mr. WHITE. I do.

Mr. ALLISON. That was passed. If it be true—and I have no doubt the customs officials are familiar with the facts—that butterine can with difficulty be distinguished from cocoanut oil, both ought to be on the free list or the dutiable list, and I propose to have them placed on the dutiable list.

Mr. WHITE. Mr. Sharretts informed me that there was a case—and he referred me to the decision of the court—where it was impossible to distinguish one from the other. I suggest the same disposition should be made of both articles. He has made a written statement with reference to it, and I called the attention of the chairman of the committee to that fact.

Mr. ALLISON. The Senator called my attention to it before, but it escaped my mind. I now call attention to page 81, paragraph 281. After "cocoa-butterine" I move to insert "and cocoanut oil."

The SECRETARY. In paragraph 281, on page 81, line 22, after the word "cocoa-butterine," it is proposed to insert the words "and cocoanut oil;" so as to read:

Cocoa butter or cocoa-butterine and cocoanut oil, 3½ cents per pound.

The amendment was agreed to.

Mr. ALLISON. I now move to strike out, after the word "palm," the words "and cocoanut oil," in paragraph 603, page 178, line 12.

The amendment was agreed to.

The PRESIDING OFFICER. The next paragraph which was passed over will be stated.

The SECRETARY. All the amendments were agreed to in paragraph 619 except the amendment in line 8, at the end of the paragraph, inserting "cyanide of potassium."

Mr. ALLISON. I ask that paragraph 619 may be passed over for the present. I thought it had been disposed of satisfactorily, but it has not been.

The PRESIDING OFFICER. The paragraph will be passed over temporarily. The next paragraph passed over will be stated.

The next paragraph passed over was the following, which the Committee on Finance had reported to insert:

622½. Regalia and gems, statues, statuary, and specimens or casts of marble, bronze, alabaster, or plaster of paris, where specially imported in good faith for the use of any society incorporated or established solely for religious, philosophical, educational, scientific, or literary purposes, or for the encouragement of the fine arts, or for the use or by order of any college, academy, school, or seminary of learning in the United States, or any State or public library, and not for sale; but the term "regalia" as herein used shall be held to embrace only such insignia of rank or office or emblems as may be worn upon the person or borne in the hand during public exercises of the society or institution, and shall not include articles of furniture or fixtures, or of regular wearing apparel nor personal property of individuals.

Mr. ALLISON. I wish to modify the amendment inserting paragraph 622½, and I send the amendment to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. In paragraph 622½, page 182, line 8, after the word "gems," it is proposed to strike out the word "statues;" in line 9, after the word "specimens," to strike out "or casts of marble" and insert "of sculpture in," and in the same line, after the words "alabaster or," to strike out "plaster of paris" and insert "wood;" so as to read:

622½. Regalia and gems, statuary, and specimens of sculpture, in bronze, alabaster, or wood, etc.

The amendment to the amendment was agreed to.

The paragraph as amended was agreed to.

The next passed-over item was, on page 183, line 20, to strike out paragraph 630, as follows:

630. Sheep dip.

Mr. ALLISON. I hope the amendment to strike out that paragraph will be disagreed to.

The amendment was rejected.

The next item passed over was paragraph 638, on page 184, line 9, as follows:

638. Sodium.

Mr. ALLISON. I move to strike out that paragraph.

The amendment was agreed to.

Mr. CAFFERY. In connection with that paragraph, I present a protest of certain soap makers against the proposed increase of duty, which was handed me by the representative of these protestants, Mr. Eugene M. Taylor, of Brooklyn, N. Y. I hope this protest will have some weight with the conference committee, and that they will strike out the quarter of a cent additional duty placed upon caustic soda. I ask that the protest may be printed in the RECORD.

The PRESIDING OFFICER. If there be no objection, it will be so ordered.

The protest referred to is as follows:

CAUSTIC SODA.

The soap makers and other users of caustic soda are satisfied with the rates of duty imposed on this article by the Dingley bill as it passed the House of Representatives, but the changes the Senate Finance Committee propose making, namely, increasing the duty from one-half cent to three-fourths of a cent per pound on caustic soda, are an unnecessary burden upon the great American industry of soap making.

The trade is already suffering greatly on account of keen competition, and any increase in the price of raw material caused by additional duty would be a great hardship.

The soap makers feel that in the proposed tariff legislation their interests are entitled to as much consideration as those of any other American manufacturers, and they are unanimous that there should be no increase in the duty on caustic soda.

In compliance with a petition signed by the entire trade in all parts of the country, the House of Representatives left the duty on caustic soda unchanged.

The American manufacturers of caustic soda do not need any more protection than they now enjoy. Figures taken from the Bureau of Statistics show that they actually exported caustic soda to England, the home of the heavy chemical industry, and they are now shipping regularly to South America in competition with foreign manufacturers.

In a pamphlet issued last year by the Solvay Process Company, of Syracuse, N. Y., who are one of the largest caustic soda manufacturers in the world, and the largest in the United States, they make the following statement:

"The original capital was $300,000 and the output 30 tons of soda per day. During the following fifteen years the business has required constant enlargement until the present capital is $4,000,000 and the works have a capacity of 600 tons per day."

A duty of three-fourths of a cent per pound on caustic soda is equivalent to 50 per cent protection, to say nothing of ocean freight and cost of handling at points of import.

The statistics also show that since the duty was placed at one-half cent a pound on caustic soda the imports have actually been less than they were when the duty was higher. The imports to the United States from all countries, 1895, were 72,019,114 pounds; in 1896, 47,827,247 pounds.

These figures show that the American manufacturers are steadily increasing their plants under present rates of duty. New works are being built and old works extended, planned for some time since, on basis of present duty.

Five-eighths of the caustic soda used in this country is already made here, and the percentage in favor of American maker is increasing daily.

An advance in the rate of duty on caustic soda would be prohibitory, and defeat one of the objects of the tariff measure—that is, revenue.

Mr. ALLISON. I inquire if paragraph 638, "Sodium," has been stricken out?

The PRESIDING OFFICER. It has been stricken out.

The next passed-over item was paragraph 646, on page 185, beginning in line 3, as follows:

646. Sulphur, lac or precipitated, and sulphur or brimstone, crude, in bulk, sulphur ore as pyrites, or sulphuret of iron in its natural state, containing in excess of 25 per cent of sulphur, and sulphur not otherwise provided for.

Mr. ALLISON. I move the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. In paragraph 646, page 185, line 3, after the words "precipitated, and," it is proposed to strike out "sulphur or brimstone, crude, in bulk;" so as to read:

646. Sulphur, lac or precipitated, and sulphur ore as pyrites, or sulphuret of iron in its natural state, containing in excess of 25 per cent of sulphur, and sulphur not otherwise provided for.

The amendment was agreed to.

Mr. ALLISON. I desire to return now to paragraph 79, on page 15. After the word "sulphur," in line 10, on page 15, I move to insert "brimstone, crude, 50 cents per ton," and a semicolon.

The amendment was agreed to.

Mr. ALLISON. The next paragraph passed over is paragraph 666, which was inserted on the report of the Committee on Finance. I now offer in behalf of the committee an amendment to be inserted in line 18, on page 187, which I send to the desk.

The PRESIDING OFFICER. Does the Senator desire to pass over paragraph "650, tea plants."

Mr. ALLISON. I ask that that may be passed over temporarily.

The PRESIDING OFFICER. It will be so ordered, in the absence of objection. The amendment proposed by the Senator from Iowa will now be stated.

The SECRETARY. On page 187, line 18, at the end of paragraph 666, it is proposed to insert:

Provided, That in case of residents of the United States returning from abroad, all wearing apparel and other personal effects taken by them out of the United States to foreign countries shall be admitted free of duty, without regard to their value, upon their identity being established, under appropriate rules and regulations to be prescribed by the Secretary of the Treasury, but no more than $100 in value of articles purchased abroad by such residents of the United States shall be admitted free of duty upon their return.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Iowa [Mr. ALLISON].

Mr. STEWART. I should like to know upon what principle of justice persons traveling abroad are to be allowed to import clothing or anything else free? The fact that they have sufficient money to travel abroad proves pretty conclusively that they are as well able to pay taxes as any other class of our people. I am informed that the exemptions that are now made under the existing law amount to a very large sum of money annually. I have seen it estimated as high as from twenty-five to thirty million dollars of duties which are not collected from a class of people who are abundantly able to pay them. I do not see why those who remain here and are unable to travel abroad should be compelled to pay duties on everything they buy, whilst those who travel abroad should be allowed to bring in any article free which they buy abroad.

Mr. WHITE. I presume the Senator from Nevada would not object to their immediate wearing apparel, because there would be difficulties attending the confiscation of anything of that kind. [Laughter.] I understand the committee has limited it to wearing apparel in immediate use.

Mr. STEWART. To $100 in value.

Mr. ALLISON. We supposed a great many people might be abroad for three or four or six months, and possibly might have to buy clothing whilst there to the amount of at least a hundred dollars' worth, which they would want to bring in. I think the Senator from Nevada should not complain of the provisions of this bill in relation to wearing apparel.

Mr. STEWART. I understand the $100 exemption was in relation to what they had in actual use.

Mr. PLATT of Connecticut. Oh, no; in addition to what they have when they go abroad. What they take when they go abroad they may bring back, but they may not bring more than $100 worth in addition to that.

Mr. STEWART. Does that include all they are wearing and what they bring with them?

Mr. ALLISON. They can bring back what they took out and $100 worth in addition.

Mr. WHITE. If a man should happen to buy one suit over the value of $100 abroad, and should be wearing it on his return to this country, an attempt to confiscate it might be attended with some complications.

Mr. ALLISON. The duty is imposed on the surplus over $100.

Mr. STEWART. If the provision is limited to wearing apparel in actual use of not over $100 in value, that would get rid of the present difficulty.

Mr. VEST. This limitation ought to be at least $150. I suppose I am alone in opposing this increase at all. I am opposed to this whole principle in legislation. This is gotten up by the American tailors who charge enormous prices in order to compel American citizens who happen to go to Europe, whether they go from necessity or otherwise, to come back and purchase their high-priced clothing; and at the risk of incurring the intense displeasure of those tailors, I have to say that their prices are simply atrocious. In the city of New York a tailor-made suit of clothes can not be obtained from a reputable tailor for less than $75 to $100, and an overcoat for $100.

In the city of Washington, which, compared with New York, is considered rather a provincial town, you pay $60 to $70, and they will charge you more if they can get it. Because an American goes abroad and can buy the same suit of clothes for $20, he is limited to $100 in the amount of goods that he purchases, although he may need underclothing whilst abroad and an overcoat and a hat—possibly two hats, two umbrellas. He must account at the custom-house for all the wearing apparel bought after he leaves our shores until he returns, and if it exceeds $100 he has to pay taxes upon it.

I know when this matter is talked about it opens the flood gates for the abuse of millionaires, who, it is said, go to Europe and spend from seventy-five to a hundred million dollars a year, which in my opinion is all rot—pure, simple rot. No such amount is spent in Europe. If it is spent there, it is spent by people who have the right to do it, who think they can afford to do it. So long as this country lasts, people will go to Europe, and I trust the time will never come when this Chinese and barbarian system will be advocated in the United States, that we should not visit foreign nations and that the people of foreign nations should not visit us. Our country is based upon freedom, and especially social freedom and freedom of locomotion, and if I think it is necessary to my comfort or health to go to Europe and buy European clothing, I ought to have the right to do it, and not have my personal liberty circumscribed by the greed of a few merchant tailors in this country.

I have been besieged by all sorts of circulars abusing millionaires and making absurd statements about the amount of ready-made clothing bought in Europe. A large number of Senators here have been to Europe. Some of them may be ashamed to say so. I am not, and my experience was that I could buy in Europe articles of superior quality for one-third the price; other articles not so good. In certain sorts of clothing the Americans excel all other people, and there are other sorts of clothing in which the foreigners excel us.

The whole meaning of this thing is to put on an enormous tariff and then limit the amount any man may bring in free for the benefit of these merchant tailors. I wish I had some of their circulars here which I received only two days ago. The whole argument is, "The robbery is going on, and we want our portion of it. You have put up the duty upon cloth, why not put up the duty upon ready-made clothing, so as to force the Americans to buy our clothes, whether they like them or not, or whether they fit or not?" I am to be made to go to New York if I want a decent suit of clothes, and to pay $80 or $100 for it. If I am not able to do that, I am to pay right in this town $60 to $75 for a suit of clothes I can buy in Canada or Europe for $20 to $25.

That is not liberty. That is an outrage upon the citizen. It is no crime for me to go to Europe. It is no crime for me to purchase clothing there. If you want to make a law shutting out passage across the Atlantic and make it, as Henry Carey said, an ocean of fire, do it, but do not pass these indirect relics of barbarism which say to a man that he shall not go where he pleases and buy what he pleases and pay what he pleases.

Mr. STEWART. Mr. President, the argument that tailors overcharge might be applied to everything else, and it would be against any protective tariff. The argument that there should be no competitive article taxed because the people of this country charge too high for it would be entirely destructive of every protective duty in the Wilson Act. My position is this: If we are to put a duty upon importations, we should make it bear equally upon all. There should be no discrimination. That is the Chicago platform, that it shall not discriminate between persons or between sections, and I say letting one man bring in his clothing free and charging another man is a discrimination of the rankest and most marked kind, and it is absolutely unjust.

If importations are to pay duty, the importations of rich and poor, of the traveler as well as the stay-at-home, should be taxed alike. There is no justice in allowing one man to import free and taxing another. It can not be justified upon any principle. The argument that tailors charge too much might be made against the manufacturers of steel, the manufacturers of woolens, the manufacturers of cotton, or any other manufacturers. That has been the complaint all the time, that they would charge too high if you allow them to create a monopoly by a prohibitive tariff. That is the reason why both parties declare against a prohibitive tariff, as a rule. The dealers would charge too high. As to a protective duty upon competitive articles, both parties concur. That is the settled policy. It should be equal, and there is no argument that can be made in favor of exempting one man and charging another.

Mr. SEWELL. Mr. President, I am a protectionist, and believe in giving protection to every industry; but I am not willing to let this paragraph go by without stating my views with respect to it.

I do not want to appear before the country in what I call the mean way of examining every man's baggage and every woman's baggage to see whether he or she has more than $100 worth of goods. That system of espionage has never before been proposed in this sense. I call it mean. It is giving way to the demagogue. I shall not make any contest about it, but I wish to express my opinion. There are hundreds and thousands of respectable families to-day who go to Europe who ten, twenty, or thirty years ago could not afford to do it. It is becoming as common as it is to go to the country to spend a few weeks, and many a good woman saves up her hard earnings for the purpose of buying a few new fashions abroad.

Mr. STEWART. Does the Senator from New Jersey know what the Treasury estimate is of the amount of goods brought in free annually and the amount of duty lost? Can he state the amount of goods brought in and the amount of duty lost?

Mr. SEWELL. I have heard it stated at $20,000,000.

Mr. STEWART. Twenty million dollars of duty lost?

Mr. SEWELL. I am myself a business man, and I make my own calculations. I would not inflict what I call this wrong on the American woman and the American man who may go abroad for recreation for any amount of money.

Mr. GALLINGER. Will the Senator from New Jersey permit me?

Mr. SEWELL. Certainly.

Mr. GALLINGER. Is it not inflicted upon every American man and woman who crosses the Canadian border?

Mr. SEWELL. I think not.

Mr. GALLINGER. I think it is.

Mr. SEWELL. I think not.

Mr. GALLINGER. I think it is.

Mr. SEWELL. I have never been stopped at the Canadian border yet.

Mr. GALLINGER. The Senator has had his trunk examined?

Mr. SEWELL. Never.

Mr. GALLINGER. Mine always has been.

Mr. SEWELL. Never. But the custom has been to allow all that is necessary for travel. A family go to Europe and spend three or four months, and they must even of necessity buy more than $100 worth each. The great Government of the United States, with all its sources of revenue, with its great wealth, says to its own citizens, and particularly to the female portion, "If you go abroad, you shall be searched on your return; and if you have over $100 worth of goods, it shall be taken from you or you shall pay duties on it." I submit to the Senate that in these days of American manhood it is too small a business to be engaged in.

Mr. GALLINGER. Mr. President, I had occasion last summer to take a steamboat trip from Boston to St. John, New Brunswick, and my trunk was examined by the custom-house officer. I did not find any fault. I had occasion two years ago to take a trip to the city of Montreal, and at the line my trunk was examined. I delivered over my key to the officer who came on board, and he examined my trunk to ascertain whether I had any dutiable goods. He did the same when I returned to the United States. I submit that we are a law-abiding people in this country, and if we go to foreign lands, we must submit to the laws that require our baggage to be examined to ascertain whether or not we have any dutiable goods.

Mr. President, what is true when we go into the Provinces, into the Dominion of Canada, certainly ought to be true when we go across the ocean to Europe or some other foreign land. It is absurd, it strikes me, for the Senator from New Jersey to put this on the ground of an outrage against the American people. It is nothing of the kind.

Mr. SEWELL. Will the Senator from New Hampshire allow me to interrupt him? He is stating the case very broadly. Canada is a foreign country. We can not regulate the affairs of a foreign country in its treatment of American citizens, but we can regulate the affairs of our own Government so far as concerns the treatment of our own citizens returning from Europe. They are examined now, but they are allowed whatever is reasonable for their travel. Here you propose to limit it. That is what I object to.

Mr. GALLINGER. The Senator a moment ago stated that his trunk had never been examined.

Mr. SEWELL. My trunk never has been examined in Canada.

Mr. GALLINGER. He seems to have changed his mind.

Mr. SEWELL. It was examined. Never in Canada.

Mr. GALLINGER. The Senator has been one of the favored few, then.

Mr. President, I have no sympathy with the plea in behalf of the rich, and I have no sympathy with the denunciation of the merchant tailors in the United States which we have heard from the distinguished and eloquent Senator from Missouri. I chance to have a very superior tailor in my own town, and he has children in the public schools, and he helps to pay taxes. He has some real estate, and it is taxed. He has a stock of goods, and it is taxed. He helps to support the municipal government and the State government and the National Government, and I submit to the Senate that he has the same rights under our law that anyone else has. He has the right to be protected against men going to Europe and bringing in here millions of dollars' worth of articles every year—$24,000,000, I understand, is the amount of revenue taken from the Government, according to the experts of the Treasury Department, to the disadvantage of these very men who help to sustain our Government and help to sustain our municipalities.

I do not wear very fine clothes, but I have not run across the tailors in the city of Washington who charge $60 and $70 for a suit of clothes. I have not discovered them. I have patronized tailors on F street and Pennsylvania avenue, and I say that in my judgment there is not a city in the United States, and I doubt whether there are very many cities abroad, that furnish people cheaper clothes than are furnished to the people of the city of Washington. I will not venture to say how cheaply I have purchased a tailor-made suit in the city of Washington, because I am afraid it might shock the sensibilities of the distinguished Senator from Missouri. He probably wears a different kind of clothes, and he must patronize a different kind of tailor from those I patronize, either in Washington or in the State of New Hampshire.

I do not think there is any hardship about this matter. I do not think our poor people who are struggling now to get a living making clothes ought to be oppressed, while Mr. Vanderbilt or Mr. Gould or some other millionaire may go to Europe and bring home a thousand or two thousand or three thousand dollars' worth of European clothes without paying any duty upon them, as I understand they are doing from time to time. I am very glad that the committee have restricted the matter; it is fair. I think we will be acting in the interest of the poor people of this country if we stand by the committee in their suggestion concerning this item.

Mr. ALLEN. I desire to add to my motion made yesterday as follows: Strike out the word "actually," in line 13, and insert after the word "the," in line 13, the word "actually;" in line 14, strike out "appropriate," and after the word "the," in the same line, insert "then;" in line 16, strike out "and present comfort and convenience" and insert "not exceeding $100 in value;" so that the amendment when completed will read as follows:

Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall only include such articles as are in the actual use of, and as are necessary for the then wear and use of, such person for the immediate purposes of the journey, not exceeding $100 in value, and shall not be held to apply to merchandise or articles intended for other persons, or for sale.

Mr. PLATT of Connecticut. Has the Senator from Nebraska listened to the amendment which the committee proposes, to follow the amendment as printed in the bill?

Mr. ALLEN. I did not hear the amendment read.

Mr. PLATT of Connecticut. Let it be read.

The PRESIDING OFFICER. The Chair will have the modification proposed by the committee read.

The SECRETARY. It is proposed to add to paragraph 666 the following proviso:

Provided, That in case of residents of the United States returning from abroad, all wearing apparel and other personal effects taken by them out of the United States to foreign countries shall be admitted free of duty, without regard to their value, upon their identity being established, under appropriate rules and regulations to be prescribed by the Secretary of the Treasury, but no more than $100 in value of articles purchased abroad by such residents of the United States shall be admitted free of duty upon their return.

Mr. ALLEN. Do I understand that to mean that it would exclude the bringing in of other articles?

Mr. PLATT of Connecticut. It permits the bringing in of only $100 worth of apparel free of duty.

Mr. ALLEN. I am willing to accept the amendment in lieu of the one I made.

The PRESIDING OFFICER. The Senator from Nebraska withdraws his amendment.

Mr. ALLEN. Mr. President, I do not concur with my friend the Senator from New Jersey [Mr. SEWELL], who seems to grow indignant at the idea of inspecting trunks and parcels brought from abroad to this country. I think there is nothing in any well-regulated inspection law which should cause any good citizen to feel indignant about its enforcement. There is carried abroad from this country, if the information we get is to be relied upon at all, seventy-five to one hundred million dollars a year in gold or gold equivalent, and that forms one of the strong drafts upon our Treasury.

I have no objection to any person who feels able to do so visiting any portion of the habitable globe where he can put his foot down in safety or even if he runs some risk of danger. But the people who are permitted to enjoy the blessings of the effete East, and who come in contact with monarchies and the softening influences of monarchy, ought not to object to paying a reasonable price for the privileges they enjoy, and they ought not to object to an application of the inspection laws of the United States that are, or should be, applied to every person who lands upon our shores, whether he be a citizen or a foreigner.

If an American citizen, male or female, who has been abroad, comes back to this country with articles that are not contraband, there can be no reasonable objection to an officer making a proper inspection of the baggage. If the articles are contraband and are subject to taxation, then this Government should have no consideration whatever for the feelings of such an individual, male or female. It is a fact current throughout the length and breadth of this country that thousands of people go to Europe annually for the express purpose of there purchasing their supplies, because they can purchase them there cheaper than they can here. They can pay their expenses to Europe and back and purchase their supplies much cheaper than they can purchase the supplies here.

What is wrong, when you come across an individual of that kind, in inspecting his or her baggage and enforcing the laws of the United States and compelling the contraband articles, if I may be permitted so to call them, to pay the proper duty? There is a good deal of namby-pambyism about this European travel. I do not object, as I said, to a man going to the North or South Pole, if he can go there. I have no jealousy or ill feeling toward my honorable friend the Senator from Missouri because he has had the advantages of Eastern travel and contact with Eastern people. I regard it as a matter of his own concern. I would not

deprive him of any right as a citizen because he has done so or because he desires to do so, but I would put a stop, if it were within my power, to the constant drain upon this country which comes from sending our money by millions and hundreds of millions annually to Europe.

Every penniless count in France and in Austria and England and in other European countries is coming here, and they are taking away a certain class of our people annually in marriage and taking hundreds of millions of dollars with them. I am among the number who believe that it is a blessing rather than a curse that they should go, but I believe, at the same time, that this country should enforce its inspection laws against high and low, rich and poor, alike, and no honorable man or woman has a right to complain when that is done in the proper order.

I say nothing about the question where a man should expend his money. I believe very much as my amiable friend the Senator from Missouri believes, that a man ought to be permitted to spend his money when and where and under what circumstances he may see fit. I believe that he should have the entire world to contract in, if he wants it, under proper regulations. I believe if my friend wants to go to Europe or elsewhere to purchase his clothing, he should have that right, but I do not believe that he should bring back in his trunk or trunks four or five thousand dollars' worth of goods that would escape taxation under the guise that they were his personal effects.

There is no reason why a law of this kind should not be adopted and enforced.

Mr. LINDSAY. I will ask the Senator who reported the amendment whether it makes any provision for a foreigner bringing in any wearing apparel free?

Mr. ALLISON. The amendment applies only to residents of the United States.

Mr. GRAY. It does not say so.

Mr. LINDSAY. I desire to inquire whether there is any provision which will admit a foreigner's wearing apparel free of duty, or does he have to pay duty on all of his apparel?

Mr. GRAY. The amendment does not say that it is confined to United States citizens.

Mr. LINDSAY. The amendment in terms confines it to residents of the United States.

Mr. GRAY. Where?

Mr. LINDSAY. In the proviso.

Mr. GRAY. That is not in the printed part of the amendment.

Mr. ALLISON. The first part applies to wearing apparel and articles of personal adornment—personal effects of persons coming into the United States. The proviso applies only to citizens of the United States or residents of the United States.

Mr. LINDSAY. I will ask that the amendment may be reported again.

Mr. PLATT of Connecticut. Let the whole of it be stated.

The VICE-PRESIDENT. The Secretary will read the amendment.

The Secretary read as follows:

668. Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of persons arriving in the United States; but this exemption shall only include such articles as actually accompany and are in the use of, and as are necessary and appropriate for the wear and use of such persons, for the immediate purposes of the journey and present comfort and convenience, and shall not be held to apply to merchandise or articles intended for other persons or for sale: *Provided*, That in case of residents of the United States returning from abroad, all wearing apparel and other personal effects taken by them out of the United States to foreign countries shall be admitted free of duty, without regard to their value, upon their identity being established, under appropriate rules and regulations to be prescribed by the Secretary of the Treasury, but no more than $100 in value of articles purchased abroad by such residents of the United States shall be admitted free of duty upon their return.

Mr. LINDSAY. That is satisfactory.

The PRESIDING OFFICER. The question is on agreeing to the amendment as modified.

The amendment as modified was agreed to.

The next passed-over amendment of the Committee on Finance was, on page 187, paragraph 668, which the committee proposed to amend in line 21, after the word "including," by striking out "pulp wood" and inserting "poplar and other pulp woods, deal ends;" in line 22, after the words "shingle bolts," to insert "heading bolts, stave bolts;" in line 23, after the word "sawed," to insert "or planed on one side;" and in line 24, after the words "fence posts," to insert "railroad ties;" so as to make the paragraph read:

668. Wood: Logs and round unmanufactured timber, including poplar and other pulp woods, deal ends, firewood, handle bolts, shingle bolts, heading bolts, stave bolts, gun blocks for gunstocks, rough hewn or sawed or planed on one side, hop poles, fence posts, railroad ties, ship timber, and ship planking; all the foregoing not specially provided for in this act.

Mr. ALLISON. I ask that "heading bolts" and "stave bolts," in line 22, and "railroad ties," in line 24, may be stricken from the paragraph, they having been already placed upon the dutiable list under paragraphs 194 and 198.

The VICE-PRESIDENT. The question is on agreeing to the amendment of the Senator from Iowa to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

Mr. ALLISON. The Senator from Colorado [Mr. TELLER] has an amendment which he wants to offer to this paragraph. I ask him to withhold it for a moment, until I can move to insert as a new paragraph what I send to the desk.

The SECRETARY. On page 190, at the end of paragraph 670½, insert a new paragraph, as follows:

670½. Works of art the production of American artists residing temporarily abroad, or other works of art, including pictorial paintings on glass, imported expressly for presentation to a national institution, or to any State or municipal corporation, or incorporated religious society, college, or other public institution, except stained or painted window glass, or stained or painted glass windows; but such exemption shall be subject to such regulations as the Secretary of the Treasury may prescribe.

The amendment was agreed to.

Mr. ALLISON. I now ask the Senate to turn to page 31, paragraph 118.

Mr. LINDSAY. Before we leave the free list, I ask the Senator from Iowa——

Mr. ALLISON. I am not leaving it except for a moment.

The SECRETARY. On page 31, paragraph 118, line 25, after the words "manganese ore," insert the words "containing less than 40 metallic units in dry state;" so as to read:

Manganese ore containing less than 40 metallic units in dry state, $1 per ton.

The amendment was agreed to.

Mr. ALLISON. Now the Senator from Colorado wants to offer an amendment to the free list.

Mr. LINDSAY. I give way to the Senator from Colorado.

Mr. QUAY. I desire to call the attention of the Senator from Iowa to the fact that manganese ore, on which a duty has just been imposed, is a component of ferro-manganese, and that the duty on that product ought also to be raised.

Mr. ALLISON. If the Senator will allow me, I will propose some amendment to-morrow morning on that subject.

Mr. TELLER. On page 187, paragraph 668, line 25, after the words "ship planking," I move to insert "and rough lumber manufactured of white pine."

The PRESIDING OFFICER. The Senator from Colorado proposes an amendment, which the Secretary will read.

The SECRETARY. After the words "ship planking," in lines 24 and 25 of page 187, paragraph 668, insert the words:

And rough lumber manufactured of white pine.

Mr. LINDSAY. Before we proceed with the consideration of that amendment, I want to make an inquiry of the Senator from Iowa. Does the free list include wood alcohol anywhere? If it does not, I wish to offer an amendment putting wood alcohol on the free list.

Mr. ALLISON. It does not include wood alcohol.

Mr. LINDSAY. Then on page 188, at the conclusion of paragraph 669, I move to amend by inserting as paragraph "669½. Wood alcohol."

The SECRETARY. It is proposed to insert as a new paragraph after line 12, on page 188, the following:

669½. Wood alcohol.

Mr. ALLISON. I hope that will not be done.

Mr. STEWART. What has become of the amendment of the Senator from Colorado?

Mr. TELLER. I supposed the amendment I offered was pending.

The PRESIDING OFFICER. The pending question is the amendment proposed by the Senator from Colorado, upon which he is entitled to the floor.

Mr. TELLER. Mr. President, I do not intend to delay the Senate with any lengthy discussion of this question. I understand it has been somewhat discussed heretofore at the proper place. I was not present, and I did not hear the debate.

I understand that under this bill white-pine lumber will bear a duty of $2 per thousand. Under the McKinley Act the duty on white-pine lumber was $1 a thousand. Under the Wilson Act it was on the free list, and it has been on the free list since the Wilson Act was passed. I can not conceive of any reason why it should now be put on the dutiable list at a rate of $2 per thousand unless the committee propose to prohibit the import into the United States of white-pine lumber, and judging from the statement made by one of the parties who were advocating this duty before the Ways and Means Committee, I suppose that is the real purpose, because one of the parties who appeared before the committee in defense of the duty declared that it should be a prohibitory duty, and that $2 was a prohibitory duty.

Mr. President, there is no principle upon which this duty can be defended. It is not to build up any industry. It is not to protect any American industry, but to destroy. The authorities that have already been cited in the brief debate, and which can be cited

again, I think show conclusively that at the rate we are now consuming the white pine of this country not to exceed seven or eight years at most can elapse before the entire white pine of the country will be consumed. Of course it is somewhat difficult to say whether that is the exact time, and yet all the authorities agree that in six or eight years at most the white pine will be exhausted if we continue the present annual cut.

We have been in the habit of putting duties upon products brought from foreign countries, upon the theory that we wanted to equalize the labor in the production of the article. The reports submitted by the officers of the Government, and which have been presented here by the Commissioner of Labor and by the Secretary of Agriculture, show that it costs more to prepare a thousand feet of white-pine lumber in Canada, the only country that is bringing us any white pine, than in the United States. That is accounted for by two reasons. The first is that that country is somewhat rougher than ours, and secondly, they do not have as efficient machinery and they are not as well prepared for the work. I do not care to go into the details to show it; if anybody doubts or disputes it, of course that can be done; but both the Commissioner of Labor and the Secretary of Agriculture have submitted facts here to show that we can produce a thousand feet of pine lumber, stumpage and labor, cheaper than in Canada.

In looking over the RECORD it would appear that an effort was made here the other day to make the Senate believe that the pine lumber of Canada was coming in conflict with the pine lumber of Michigan and Minnesota. But an examination of the imports of lumber and an acquaintance with the business carried on will establish the fact that that is not the case. The imports of lumber from Canada into the United States have gone almost entirely to the New England States.

There is very little imported into Michigan, and some into Ohio; but that which goes into Michigan does not come in contact with Michigan lumber. It has gone to Michigan for distribution, mainly to Ohio, possibly some to Indiana; but the great bulk of it has gone East. I have a statement here that shows the amount which has gone to the New England ports. We have not increased the import of lumber from Canada for several years.

Mr. STEWART. The people have not been able to buy it.

Mr. TELLER. The Senator from Nevada submits that the people have not been able to buy it. That is exactly true. I have no doubt that the falling off in the consumption of lumber in this country has been owing to the poverty of the people more than to the scarcity of lumber.

I am informed by those who know that the white-pine lumber in Canada sells for a higher figure, as a rule, than in the United States.

I desire to read some of the statistics shown by the tables of imports. Here are tables of imports of lumber into the United States from Canada for several years, commencing with 1890, when it was 715,000,000 feet, and ending with 1896, when it was 742,000,000 feet. That includes all classes of lumber. It includes white pine, spruce, and other lumber. I have a table here, which I will not attempt to read, showing where the lumber has gone that came into the United States. There were about 12,000,000 feet of lumber that went to Chicago.

Mr. ELKINS. From where?

Mr. TELLER. From Canada. About the same amount went to Detroit, a little less to Huron, Mich., and to Minnesota, according to the statement here, which I presume is correct, there were less than a quarter million feet. Taking all the imports of lumber into the United States, into the Lake Champlain ports, the quantity was 330,096,000 feet; other New York ports, including Buffalo, 199,592,000 feet; into Michigan and Ohio ports, 48,658,000 feet; into Chicago, Ill., 12,026,000 feet; into Minnesota ports, 236,000 feet, and into Wisconsin ports, none at all.

I read this statement for the purpose of showing that the effort made here to make it appear that the Northwest—Minnesota and Michigan—is being injured by the imports of Canadian lumber is not correct. One of the Senators stated a very pathetic condition, that the mills of Minnesota on one side of a river and Michigan on the other side were standing idle, and a bridge built across that river in the vicinity of those mills was constructed out of Canadian lumber that came in free.

The fact, as shown by the statement of the mayor of the city where the bridge was built and by the contractor of the bridge, is that the engineer who built the bridge insisted that a certain portion of the timber used should be of hemlock, and no hemlock was found in that immediate vicinity on the Minnesota side and none on the Michigan side that was fit for use, and therefore Canadian hemlock had to be used to a very limited degree, and the bridge was built out of Minnesota and Michigan lumber aside from the Canadian hemlock that they were compelled to have.

The people in the Northwest are interested in the lumber business. They do not, in fact, get any of this Canadian lumber in a section of the Northwest or in the prairie country. Take the States of South Dakota and North Dakota. They get practically nothing from Canada. Michigan and Minnesota lumber supplies that market. The Canadian lumber supplies the Eastern market. If there is a duty put upon white-pine lumber, it will come to this, simply, that the Minnesota and Michigan timber region will furnish the timber for the East to the exclusion of Canadian timber, and the price will rise $2 a thousand or more—certainly it will not be less—to every homesteader in the West.

I should like to know from the committee upon what theory this duty is imposed, with the fact staring them in the face, uncontradicted and undisputed, and admitted by them (at least they have never disputed it), that if the present cut continues for, I will say, eight years, the white pine of the United States will be a thing of the past. Upon what theory do they say it is necessary to protect the manufacture of white-pine lumber in the United States when it is proved conclusively that white-pine lumber can be manufactured in Minnesota and in Michigan cheaper than in Canada, and when it is proved that the price of white-pine lumber in Canada is more than in the United States?

Upon what principle do they propose to put upon the people who build houses in the great Northwest an extra tax that will not be $2 a thousand, for that will necessarily be put on because it goes to the Government if the Canadian brings his lumber here, but a tax that the manufacturers of lumber in the State of Minnesota and in the State of Michigan and in the State of Wisconsin may put upon the settlers? If this is a prohibitive tax, as it was declared before the committee $2 a thousand would be, with the high price of manufacture in Canada, with the high price of stumpage in Canada, with the difficulties of transportation, it is the exclusion of all Canadian lumber from the United States, this great market, the greatest in the world for lumber, for the American people consume per capita more lumber than any other people in the world, two to one. Why? Because we are a growing and a building country, because we have thousands of people who are going out upon the public domain to make a home, and if this duty is imposed, every one of them must pay tribute to the timber manufacturers of those three States.

I do not know but the committee will fall back on the oft-repeated statement that this is not a protective duty, but a revenue duty; but if it is, the revenue duty is exceedingly small and will grow smaller and smaller, with the fact that is staring us in the face that there is to be no import of Canadian lumber. Not only will the people of the Northwest be put to an additional burden for every house they build, for every barn, and for every cabin, but so will the people of New England, of Ohio, and of some portions of Pennsylvania and New York.

Mr. President, I am in favor of protection. I would protect every American industry that needs it. But I would not run protection into the ground. I would not abuse it as it is being abused here by simply putting on an arbitrary tax that shall enable the manufacturers of lumber to put their own price without competition upon the lumber, which is not a luxury, but is an absolute necessity, and thus compel every settler in the West to pay tribute to them.

In looking over the RECORD the other day I saw that an appeal was made to the Senate that these people had invested their money in this timber and that they are entitled to the protection given to other industries. You protect other industries to build them up. You protect the manufacture of iron to enable the people of the United States to manufacture iron cheaply. You do not protect this lumber to enable them to give to the people cheaper lumber, but you protect it for the avowed purpose, stated in open declaration here on this floor, to raise the price to the consumer, and that is not a Republican doctrine; it never has been; and even in this day, in my judgment, the Republican party will not stand by that as a protective theory.

It is not to raise the price, but to make articles ultimately cheaper that we have been advocating the protective doctrine here for years. That is the true protective theory. We have said, "Build up your industries; make them strong; and when they are strong, manufactured articles will be cheaper, and in the end a duty which may have created a little burden upon commerce will inure to the benefit of all by producing cheapness." That is the legitimate and proper theory.

Mr. President, there is nothing in this duty on white pine which appeals to any protective theory with which I have been familiar in my public career.

Mr. GRAY. May I interrupt the Senator with a question?

Mr. TELLER. Certainly.

Mr. GRAY. If the Senator knows, I should be glad to have him state the estimate of the white pine standing within the limits of the United States?

Mr. TELLER. It would take a little time to go over that, but I will say to the Senator from Delaware that the Secretary of Agriculture has made a report, No. 70, I think, of this session, and the Commissioner of Labor has made a report, which I think is No.

40, in which they both agree that if the cutting continues, within the next seven or eight years white pine will be a thing of the past in the United States.

Mr. GRAY. Then, as the Senator argues, no protective tariff can increase the growth of white-pine timber?

Mr. TELLER. No protective tariff can increase it, and if a protective tariff excludes from the United States the consumption of the Canadian product, it hastens the time when the white-pine tree will be as scarce in the Northwest as an orange tree is now.

Mr. President, in my boyhood days I lived in the timber country of New York and Pennsylvania. I remember those magnificent forests, which have never had their equal except on the Pacific Coast, and to-day in all that country there is not a white-pine tree left that is fit for lumber. It will be so in Michigan, it will be so in Wisconsin, it will be so in Minnesota, in ten years at the furthest; and those people are not entitled to any special legislation. Every hour that they let their stumpage stand it grows more beneficial to them. If they let it stand ten or fifteen years, they will get more for it than under this forced system of putting on duties and taking toll from the great industries of the country.

I challenge the committee here to make one single showing which will justify a duty upon white-pine lumber which will not justify a duty upon every article of commerce and trade and which will not blot out the free list. Our manufacturers need white-pine lumber for the carrying on of an infinite variety of trade and manufacture and are entitled to have the Canadian market. This duty is to be imposed in the interest of a few men, and only a few men, who own the white pine of this country, not to exceed in number forty or fifty at the most.

I know there may be small holdings, but I am speaking of great holdings. There are upon the farms in some of the Western States a few straggling pines, but the great pine forests are owned by a few capitalists in this country, and it is in their interest, and in their interest alone, at the cost and expense of the settler and at the cost and expense of the manufacturer of every variety and kind in this country, whose interests the committee have professed so great a desire to protect, that this duty is now to be imposed.

If there is a proposition in this bill anywhere—and I think there are a hundred—which is absolutely indefensible, here is one beyond question.

Mr. VEST. I want to offer an amendment to the pending bill for the purpose of having it printed.

The PRESIDING OFFICER. The Senator from Missouri offers an amendment and asks that it be printed.

Mr. ALLISON. Let it be read, Mr. President.

Mr. VEST. Let the amendment be read.

The PRESIDING OFFICER. The amendment will be read.

The SECRETARY. It is proposed to add to section 13, on page 204, the following:

Provided, That goods arriving at any outer port of entry, which are invoiced or consigned to either of the interior ports of entry specified under act of Congress approved June 10, 1880, may be entered for transportation without appraisement to such port, and there subjected, if entered for immediate consumption, to the rates of duty in force at the time of arrival at the outer port.

Mr. VEST. Mr. President, I simply want to observe that this question of free lumber was considered exhaustively in the absence of the Senator from Colorado [Mr. TELLER], and decided against those of us who believe that no duty at all should be imposed upon that article.

I do not know that the paper I have in my hand throws any light on the subject or adds a single new argument; but it came to me this morning from a reputable citizen of New York, who asked me as a personal favor to lay it before the Senate. He is a practical lumber man, and his letter struck me with a great deal of force. I only regret that it was not here at the time the main subject was disposed of. I ask the Secretary to read it.

The Secretary read as follows:

BUFFALO, N. Y., *June 30, 1897.*

DEAR SIR: In the lumber debate Senator SPOONER said that the lumber men of the Northwest and the lumber men of the Southwest were overrun by Canadian competition, as railroads are bringing Canadian lumber into that country through Superior, Minneapolis, and St. Paul. If you look at the Imports of Merchandise for 1896, No. 3, page 205, you will see that no lumber comes into Wisconsin from Canada, not a board, and that into Minnesota there came during that fiscal year 230,000 feet, valued at $3,105, out of a total importation of over 750,000,000 feet.

None of this lumber comes into the West, into the regions that he states, to compete either with Northern or Southern lumber. It all goes into the East and nearly half of it in Lake Champlain, and nearly 200,000,000 feet comes down the coast from New Brunswick and Nova Scotia. This is spruce.

Senator SPOONER wants to know why we should protect hemlock, "the poor man's lumber," and Southern pine and fir, etc., and not protect the poor pine-land owners in his own State with their white pine.

As a fact, hemlock does not come into this country from Canada, except for large Government or contract work, where it is used for piers and other structures under water, because of its lasting qualities.

It is too cheap a wood to bear transportation; that's the reason it doesn't come in, it being furnished at near-by points to consumers.

As to spruce, that grows in Maine, and that has to be protected because the Maine Senators want it protected, and that settles it.

And besides that, these Senators are going to have some timber they have in northeastern Maine lumbered by Canadians, driven down the St. John River by Canadians, sawed at the mills at Fredericton by Canadian workmen, and shipped to this country in Canadian bottoms, come in free of duty.

It may be said, however, that spruce reproduces, and therefore these forests replenish; but as to Northwestern white pine, once cut, not pine, but other growths appear, and the pine forest utterly perishes.

As to fir on our Western coast, our own people have it in abundance, and the people in British Columbia are permitted Chinese labor; so theirs is a special case.

These gentlemen in the Northwest who want to shut Canada lumber out of its market in the East, where it has been coming so long, are telling how hard up they are and how they have all failed.

There is a committee known as the ways and means committee of this great lumber convention which has an office in Washington; their names fill about a page of the tariff hearings. This is the Winchester & Co. organization.

There are six of them from Michigan, Wisconsin, and Minnesota, and four of the six are to-day rated in Dun's Commercial Agency AAA1, and this means a million and over.

I refer of course to the firms to which they belong, and they are really not among the heavy ones of the Northwest; that is, the heaviest. I have misstated a little, I find on looking it up. One of them is only AA1, poor fellow.

The Republican legislatures of Nebraska and Kansas passed joint resolution after joint resolution calling on their representatives at Washington to vote for free lumber.

They not only want a two-dollar duty but a four-dollar duty. They've got a club in this bill which they pretend is to hit Canada if they put an export duty on logs over there, but they really intend to use that club on the people of the United States.

Canada put that export duty on logs clear down to the time that we reduced the duty on lumber, and the Government over there has just declared that when we put a duty on lumber it will go back on logs, and that's what these millionaires want, just another million or so, by shutting out the Canada lumber.

I could tell you the story about that bridge at Duluth, which Horatius Spooner held so bravely, but the import tables answer him sufficiently.

Now, I want you to take this in behalf of one of the plain people whose business is lumber, and who is about to be ruined if this duty goes on lumber, and give the Senate the benefit of it, for everything here stated as a fact is a fact.

Very respectfully, yours,

GEORGE W. STEVENS.

Hon. GEORGE G. VEST,
United States Senate.

The PRESIDING OFFICER. The question is on the amendment to the amendment proposed by the Senator from Colorado [Mr. TELLER].

Mr. GRAY. What is that amendment, Mr. President? I should like to have it read.

The PRESIDING OFFICER. The Secretary will state the proposed amendment.

The SECRETARY. It is proposed to amend paragraph 668 by inserting after the words "ship planking," in line 24, on page 187, the words:

And rough lumber manufactured of white pine.

Mr. TELLER. On that I shall ask for the yeas and nays.

Mr. GRAY. Mr. President, I should like to ask—I was out when the amendment proposed by the Senator from Colorado [Mr. TELLER] came up—what is the duty which is proposed to be put upon white-pine lumber in this bill?

Mr. TELLER. It will be $2 if this bill passes as it now stands. It was $1 under the McKinley law, and it is free under the Wilson law.

Mr. GRAY. I understand there is, in addition, a retaliatory clause proposed in this bill of $2 a thousand if any country shall place an export duty upon lumber. Is not that so?

Mr. ALLISON. I will say to the Senator that there is a retaliatory clause equivalent to the export duty, whatever it may be.

Mr. TELLER. That is on page 61 of the bill.

Mr. GRAY. So that if Canada shall, in the exercise of her taxing power, conclude to put a duty of $2 or $3—it certainly was $3 for a long time—of export duty upon lumber, then practically the duty upon lumber from Canada will be $4 a thousand. So that I want it understood just what the amount of this burden is going to be. If it be a four-dollar duty, it will be prohibitive, and that will inure entirely to the benefit of those who own the remnant of white-pine timber along the northern tier of States—I do not know what they are—Michigan, Wisconsin, and Minnesota, I think the Senator from Colorado said.

Mr. President, that seems to me to be a very wrongful kind of a tax for such an interest as that for those who own these lands. The Senator from Colorado says there are about forty who own the bulk of them. It is proposed that we should tax in this extravagant way the people of this country and the manufacturing interests of this country, to whom white-pine lumber is so necessary. Four dollars a thousand, it is asserted, as I have said, will be prohibitive. I should like to have read, in fairness to those whose interests seem to be assailed and threatened by this tax, a letter which I hold in my hand from a dealer in and a manufacturer of white-pine lumber, who has been compelled to resort to the forests of Canada in order to obtain the supply for his mills in this country, and is manufacturing largely in this country and supplying the sash and door and building trades with this very needful and necessary article. I send to the Secretary's desk and ask to have it read, in order that we may see at least what are the views of one of the manufacturing industries of this country, the letter to which I refer.

The Secretary read as follows:

WASHINGTON, D. C., *June 29, 1897.*

SIR: I appeal to you—I appeal to the Senate of the United States—against a four-dollar duty on lumber, which is provided for in the pending tariff bill.

I represent a business which has been continued for over fifty years, descending from father to son. The timber in Michigan, which has been always our home, and where our main operations were conducted, is now cut off. Not as much white pine stands in Michigan to-day as has been cut by her sawmills in a single year. We are now operating at Duluth and in Canada, and have established a large lumber yard at Buffalo, where we receive and manipulate and partly manufacture our Canada stock.

We established this connection since the passage of the Wilson bill, making lumber free. We had noted that the McKinley bill reduced the duty on white pine, which is what we handle, to $1 per thousand, and the further reduction by the Wilson bill seemed naturally proper, as the country needed the Canadian supply both of logs and lumber.

The pending bill provides for a two-dollar duty, which is itself prohibitive on this Canada white-pine lumber, and further provides for an additional two-dollar duty if Canada shall impose an export duty on saw logs.

This Canada is going to do and has lately so declared; so as a consequence, there will be a four-dollar duty on the white-pine lumber which we are bringing from Georgian Bay to Buffalo.

By this duty our lumbering operations on Georgian Bay and our yard and planing-mill operations at Buffalo are cut off one from the other absolutely, and both are absolutely ruined.

I have stated my case only as a typical one. At Oswego, at Ogdensburg, at Whitehall, N. Y., at Burlington, Vt., at Toledo, Ohio, are operations similarly situated, to which the same disaster will come.

There is not an operation along this northern border to-day that is making any money, for the reason that the people are too poor to buy their products in volume.

I trust the United States Congress will not now pass a law which will add a duty of $4 per thousand to this lumber, or this two-dollar prohibitive duty, which the people must pay or do without it, as neither producer nor dealer can pay it.

Yours, very truly,

ARTHUR HILL.

Hon. GEORGE GRAY,
United States Senate.

Mr. GRAY. Mr. President, I understand that this retaliatory clause—for such it is—is one of the most important features of this bill. It will undoubtedly double the duty on white-pine lumber. I do not know whether the Senator from Colorado alluded to that, as I was unfortunate enough to be out when he commenced his remarks; but if we pass this duty of $2 on manufactured lumber, the Canadian Government will undoubtedly exercise the power that it has recently had conferred upon it of putting an export duty of $2 upon lumber, as it has been heretofore.

I hold in my hand a dispatch from Ottawa, dated June 18, 1897, to the New York Herald, which says:

OTTAWA, ONTARIO, *June 18, 1897.*

The Dominion Government, in the House of Commons to-day, took power to itself to impose, by order in council, an export duty on logs and pulp wood, and also on Canadian ores. The first resolution provides that on pine, Douglas fir, spruce, fir balsam, cedar, elm, and hemlock logs and pulp wood an export duty not exceeding $3 per thousand feet board measure, and in case of the export of any of the above-mentioned logs or pulp wood in shorter lengths than 9 feet, then a rate per cord may be levied in the same way not greater than the equivalent of the above-mentioned rate per thousand feet board measure, and such export duty shall be chargeable accordingly, after the publication of such proclamation, provided that the Government in council may, by proclamation, published in like manner, from time to time remove and reimpose such export duty. It was passed without debate.

So they are preparing to exert this power in case this tax is imposed. We may say that is all wrong that they should exert that power; that it is bad faith and bad manners to this Government; but, nevertheless, Mr. President, we are exciting by this legislation of ours just such acts of hostility as that, and we are converting the natural relations of these people, which ought to be friendly and amicable, and ought to be such that trade should flow easily and peaceably between them, into conditions that are like the camps of opposing armies, and acts of hostility and acts of retaliation such as are provided for in this bill have come to be the common parlance of our trade relations.

We retaliate, but we retaliate on our own people. Because Canada puts an export duty of $2 on logs, then we tax all the American people. The man who builds a house or the factory that makes sash and doors and window blinds we tax $2. We retaliate, but we suffer for the retaliation.

I recollect when the retaliatory clause of 1890 was up, I think it was the Senator from North Carolina, our late lamented colleague, Mr. Vance, who said retaliation reminded him of the man who, when he was knocked down in the street, went home and retaliated by beating his wife. So when we want to retaliate on Canada for putting a two-dollar export duty upon logs we tax the American people, without hurting Canada, and we make these exactions on all these important trades and lines of business that ought to be more considered.

Mr. MANTLE. Mr. President, I understand the pending amendment to be to strike out the duty as applied to white-pine lumber. The legitimate object and purpose of a protective tariff, as I understand it, is to encourage, to foster, to develop, and to expand the industries of our own country, or such of them as are susceptible to that operation.

The situation with respect to white-pine lumber seems to be, as gathered from all the arguments and statistics bearing upon the subject and the best authority that can be reached, that the white pine of the country is limited in amount, that it is incapable of renewing itself or of being grown or developed by any process, that when once extinguished it can not be revived. There is no way by which its growth can be encouraged or developed or expanded, and its ultimate destruction is absolutely certain.

Again, it is admitted that what there is left in this country is owned by a comparatively few gentlemen—a syndicate; that the duty, if levied, taken in connection with the retaliatory duty which is sure to follow upon the part of Canada, will result in the total prohibition of the importation of any white-pine lumber.

Therefore it is manifest that from a protective standpoint absolutely nothing can be accomplished by the levying of this duty, and that from the revenue standpoint absolutely nothing can be accomplished by the levying of this duty, because it is acknowledged to be prohibitory, taken in connection with the retaliatory duty. Hence we can have absolutely no benefit from a protective point of view; we can gain absolutely nothing from a revenue point of view. Therefore we are flying directly in the face of the protective idea, because we are offering a premium for the extinction and destruction of the white pine of this country; whereas it would seem to be the true policy, the policy of wisdom, to save, in so far as possible, the white pine of the United States, and to draw upon the white pine of Canada for our use just so long as we may.

So it follows again that the only effect of this duty will be to enhance the cost of white pine to the consumers of that character of lumber, located principally in the West and Northwest. I submit, if the facts as stated here in these arguments are correct, the deductions which I make are indisputable.

On the 22d of last February what I have regarded as one of the most infamous orders which ever issued from the executive department of this Government went into effect, taking some 21,000,000 acres of the forest lands of the Rocky Mountain region from public settlement—an order which, had it been permitted to stand, would have resulted in great injury to the people of those localities.

The only excuse given for the issuance of these orders was the desire to preserve the forests of this country, and yet by the terms of the pending bill we are now attempting to pursue a policy which places a premium upon the destruction of the forests of the United States.

Mr. JONES of Arkansas. I will not delay the debate for more than a moment, but I have been handed a copy of the North-Western Lumberman, which seems to illustrate the purpose of the $2 a thousand tax on lumber. The heading is, "Mr. Winchester's remarks at Memphis." The introduction in the paper is:

A. H. Winchester, of Buckhannon, W. Va., a member of the executive committee of the national lumber convention, and a lumberman of experience, was present at the meeting of the Southern Lumber Manufacturers' Association held at Memphis, Tenn., last week, and in response to an invitation talked tariff to the lumbermen there assembled in an exceedingly forceful and vigorous manner. No better description of his talk can be given than to quote the words of one who was present. Said he: "Winchester's speech was the feature of the Memphis meeting; every story that he told was just as pat as it could be, and invoked laughter and applause every time. He is one of the most convincing speakers I ever listened to; he drives a thing home and clinches it in the back of your neck with a sledge hammer."

In his speech—I will not read the whole of it—Mr. Winchester said:

Now, you take our average cut of the United States, and $1 a thousand advance means what? It means $35,000,000 to the lumbermen of the United States in a year. Now, if we carry out this idea, $1 duty don't take it to that. Lumber in Canada would come down a whole dollar, and it wouldn't help us any. Get it up to about $2, and then it would begin to have its effect.

To illustrate a little further: There were a lot of gentlemen from the Northwest, up Minnesota way, in Washington the other day, and they were sitting in Senator BURROWS's committee room. An interesting incident occurred there. Senator BURROWS is chairman of the committee. The committee hadn't had a meeting for a long time. We happened to be sitting in that room, and one of the gentlemen from Minnesota had an envelope and a lead pencil. He walked around the room and he ciphered out a little bit, and he said: "Mr. BURROWS, do you know what $1 a thousand would mean to this little crowd of men in here?" There were not as many in the room as there are here. He said the advance of $1 a thousand on lumber meant $6,125,000 on last year's product.

Mr. SPOONER. Mr. President, I was not in the Senate when the motion was made or when the debate commenced, and I do not intend now to take many moments of the time of the Senate in discussing the matter. Some days ago the subject was considered, and I thought it was very fully debated. What I have heard from the Senator from Colorado [Mr. TELLER] and what I have heard from the Senator from Montana [Mr. MANTLE], with perfect deference to them, furnishes, so far as I can remember, no new consideration legitimately bearing upon this subject.

I, as a Senator, representing in part one of the States in which the white-pine interest is very great, objected to the proposition to put it upon the free list, not only from the basis of being a protectionist, but also upon the ground that it was an unfair discrimination against the industry of three States lying along the border of Canada.

The Senator from Delaware [Mr. GRAY] talks about the Canadian threat of placing an export duty upon white pine. There is nothing new about that threat. Whenever a tariff bill has been

pending in Congress and there has been a proposition to levy a duty upon any product as to which we compete with Canada, it has been suggested in newspapers and in council to put an export duty upon the article. The Canadians will not put an export duty upon logs, in my opinion, because, as I showed in the short speech which I had the honor to make to the Senate, this is their great market.

They will not attempt to place any export duty upon logs. That threat is only intended to influence this legislation, and if we are to arrange the duties in the pending bill with reference to retaliation possibilities, Mr. President, the attention and action of the Senate ought not to be confined to white pine. There are a great many items in the bill concerning which it might be well to give thought in fixing duties here, if it is to be considered at all, to the matter of retaliation.

The Senator from Montana [Mr. MANTLE] says white pine does not reproduce itself. Neither does iron ore; neither does silver. A great many things upon which duties are levied in the bill do not reproduce themselves.

Mr. MANTLE rose.

Mr. SPOONER. I know there is no duty upon silver.

Mr. MANTLE. If the Senator from Wisconsin will permit me, I see no analogy between the two propositions.

Mr. SPOONER. There is some.

Mr. MANTLE. The quantity of white pine can be measured; we know practically what there is, but no man can tell how much iron ore there is.

Mr. SPOONER. You do not know practically what there is. It was stated upon the floor of the Senate the other day, and a map was exhibited to us to show, that there was a little white pine in Wisconsin and a little in Michigan and a little left in Minnesota, and before the debate terminated it was discovered by the testimony of a Senator from one of the States of the West that one of the very largest bodies of white pine standing to-day in the United States is situated in the State of Idaho.

Mr. MANTLE. If I may interrupt the Senator, I will say that all of it is embraced within the recent forestry-reservation order.

Mr. SPOONER. I agreed with the Senator in his denunciation of the recent forestry-reservation order; but I am not discussing that matter.

Mr. MANTLE. If the Senator will permit me, I think the statement made at that time will bear some investigation. There is white pine in Idaho, but it is not of that excellent quality and character suitable for manufacturing that the other white pine is.

Mr. SPOONER. I have the very best and most reliable evidence any man could ask that there is a great body of white pine in Idaho, and that it is of fine quality. And it was developed in that debate that there is a large body of white pine in North Carolina. I did not know it, I confess, until it was stated by the Senator from North Carolina, who knows about the resources of his own State.

Here is a duty upon iron ore. When you take a ton of iron ore out of the earth, it is never put back. By the same reasoning, applied to iron ore and mica and potash and a great many other items, there should be no duty upon any of these articles.

Mr. GRAY. Coal.

Mr. SPOONER. Coal. The same thing may be said of coal.

I call to the attention of the Senate again, as I did the other day, the absolute indefensibility and injustice of this discrimination. Tell me, some of you Senators, why there should be in a tariff law a duty of $2 a thousand on the spruce lumber of Maine, while the white pine of Minnesota, Michigan, and Wisconsin is placed upon the free list.

Mr. LINDSAY. We voted to take it off the dutiable list.

Mr. SPOONER. You are not proposing to take it off.

Mr. LINDSAY. We did vote to take it off.

Mr. SPOONER. You are not proposing to take it off, and this proposition is not to take it off. This proposition is not to take the two-dollar duty off of the pine of the South—the yellow pine. It is not to take the two-dollar duty off the spruce of the State of Maine. It is not to take the two-dollar duty off the woods of the far West. It is simply to discriminate against the white pine of Wisconsin, Minnesota, and Michigan.

Mr. TELLER. Will the Senator from Wisconsin allow me to ask him a question?

Mr. SPOONER. Certainly.

Mr. TELLER. Will the Senator tell me why a discrimination is made in this bill as follows:

> Sawed boards, planks, deals, and other lumber of whitewood, sycamore, and basswood, $1 per thousand.

Why does not the Senator insist upon putting $2 on the basswood of Missouri and some of the Southwestern States, and the sycamore?

Mr. SPOONER. It is cheaper wood. Besides, that question should have been addressed by the Senator from Colorado to the committee. I have not made these duties. I have voted for all the duties, or nearly all of them.

Mr. TELLER. I have challenged the committee to give a reason. They will probably not do it any more than the Senator from Wisconsin can.

Mr. SPOONER. I am not interested in that question, and I am not a member of the committee, and the only reason which occurs to me is that it is a very much cheaper wood and that $1 may be adequate in one case and not in the other. That may not be a good reason, but it is the only one that occurs to me.

I know there are a great many gentlemen here who would like to see white pine on the free list, and there are a great many things in the pending bill which I should be glad, so far as the mere interest of my State is concerned, to see on the free list. I have voted for a great many duties here, some peculiarly relating to the far West, which did not commend themselves to my judgment as abstract propositions. I have voted for them, notwithstanding the fact that the arguments furnished by the other side against them were very strong, because the Senators from those States, including my friend the Senator from Nevada [Mr. STEWART], who presumably know about the interests of their own States, informed the Senate that in their judgment they were necessary in order to protect and develop the industries in those States.

I say again, if this were a proposition to put lumber on the free list, it would be one thing; but it is a proposition simply to discriminate in a tariff bill against a particular sort of lumber in which the State of Wisconsin and the State of Michigan and the State of Minnesota, lying along the Canadian border, happen to be peculiarly interested. I speak only for my constituents, because, as I have said before, the only selfish interest I have on earth in this question is that white pine should be put upon the free list. I certainly hope the Senate——

Mr. MANTLE rose.

Mr. SPOONER. Does the Senator from Montana desire to interrupt me?

Mr. MANTLE. Would it interrupt the Senator if I asked a question?

Mr. SPOONER. No.

Mr. MANTLE. I am a protectionist. I believe very firmly in protection for this country, and if the Senator from Wisconsin can show me how we can by protection foster the white-pine business by levying this duty, I shall be glad to vote for it.

Mr. SPOONER. There has always been a duty upon white pine, and I suppose it was put there to protect and foster the industry. The Wilson Act made it free.

Mr. MANTLE. Will not the ultimate end of this be to use up and destroy the white-pine industry of the country?

Mr. SPOONER. This proposition is alleged to be in the interest of forest preservation. It is proposed that the men who have invested their money in those States and paid taxes upon the land for a great many years shall hold it and continue to pay taxes upon it, and give our market to the white pine of Canada, until the forests of Canada have been denuded of white pine. In the meantime the fires will have destroyed their timber.

Mr. JONES of Arkansas. What the Senator from Wisconsin said a few moments ago would probably create the impression to one not familiar with the facts in the case that Senators on this side had not voted for free lumber; had not voted to make all these things free. So far as I am concerned, I will say frankly that I shall vote for the motion of the Senator from Colorado, but I would prefer to vote for a motion to put all lumber on the free list which we put on the free list. If we can not have the whole of it on the free list, we will take any part of it we can get.

Mr. SPOONER. Why does not the Senator move to amend the motion by including the other articles?

Mr. JONES of Arkansas. We have proposed it, and it was voted down. Now we will vote for this proposition. If we can not get a whole loaf, we will take a half loaf.

Mr. SPOONER. This also was voted down.

Mr. JONES of Arkansas. So far as I am concerned, I can not be brought into that sort of a movement to defeat this amendment. If there is any chance to put white pine on the free list, I am perfectly willing to do it, so far as I am concerned.

Mr. SPOONER. Of course.

Mr. JONES of Arkansas. I would prefer to put the whole of it on the free list; but if we can not get all, we will take what we can get.

Mr. SPOONER. I leave the question with the Senate.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Colorado [Mr. TELLER], upon which the yeas and nays have been ordered.

The Secretary proceeded to call the roll.

Mr. MANTLE (when Mr. CANNON's name was called). The Senator from Utah [Mr. CANNON] has a pair, I believe, with the Senator from Rhode Island [Mr. ALDRICH]. If the Senator from Utah were here, he would vote for this proposition, and I will try to arrange a pair for him.

Mr. CLARK (when his name was called). I am paired with the junior Senator from Kansas [Mr. HARRIS].

Mr. DEBOE (when his name was called). I am paired with the senior Senator from South Dakota [Mr. PETTIGREW].

Mr. GEAR (when his name was called). I am paired with the senior Senator from New Jersey [Mr. SMITH]. I will transfer my pair to the Senator from Maine [Mr. HALE], and will vote. I vote "nay."

Mr. BERRY (when Mr. MURPHY'S name was called). The senior Senator from New York [Mr. MURPHY] is paired with his colleague [Mr. PLATT]. If the senior Senator from New York were present, he would vote "yea."

Mr. PRITCHARD (when his name was called). I am paired with the junior Senator from South Carolina [Mr. MCLAURIN], but inasmuch as we agree on this subject, I take the liberty of voting. I vote "nay."

Mr. TURPIE (when his name was called). I am paired with the Senator from Minnesota [Mr. DAVIS]. I understand that the junior Senator from Kentucky [Mr. DEBOE] is paired with the Senator from South Dakota [Mr. PETTIGREW] on this question. We might transfer pairs so that the senior Senator from Minnesota will stand paired with the Senator from South Dakota, if that is acceptable to the junior Senator from Kentucky.

Mr. DEBOE. It is.

Mr. TURPIE. I vote "yea."

Mr. WARREN (when his name was called). I announce my pair with the junior Senator from Washington [Mr. TURNER].

Mr. MANTLE. I am informed that if the Senator from Rhode Island [Mr. ALDRICH] were here, he would vote "nay" and the Senator from Utah [Mr. CANNON] would vote "yea." I will therefore let the pair stand.

The result was announced—yeas 32, nays 33; as follows:

YEAS—32.

Allen,	Cockrell,	Lindsay,	Rawlins,
Baker,	Daniel,	Mallory,	Roach,
Bate,	Gorman,	Mantle,	Stewart,
Berry,	Gray,	Mills,	Teller,
Butler,	Hansbrough,	Morgan,	Turpie,
Caffery,	Jones, Ark.	Pasco,	Vest,
Carter,	Kenney,	Pettus,	Walthall,
Chilton,	Kyle,	Quay,	White.

NAYS—33.

Allison,	Gallinger,	McMillan,	Sewell,
Bacon,	Gear,	Martin,	Shoup,
Burrows,	Hanna,	Mason,	Spooner,
Cullom,	Hawley,	Nelson,	Wellington,
Deboe,	Heitfeld,	Penrose,	Wetmore,
Elkins,	Hoar,	Perkins,	Wilson.
Fairbanks,	Lodge,	Platt, Conn.	
Foraker,	McBride,	Pritchard,	
Frye,	McEnery,	Proctor,	

NOT VOTING—24.

Aldrich,	Faulkner,	McLaurin,	Smith,
Cannon,	George,	Mitchell,	Thurston,
Chandler,	Hale,	Morrill,	Tillman,
Clark,	Harris, Kans.	Murphy,	Turner,
Clay,	Harris, Tenn.	Pettigrew,	Warren,
Davis,	Jones, Nev.	Platt, N. Y.	Wolcott.

So Mr. TELLER'S amendment was rejected.

Mr. MANTLE. I now move that the duty on white pine be reduced to $1, the same as upon other lumber.

Mr. TELLER. I suggest to the Senator if he will move to insert in line 16, page 60, after the word "basswood," the words "and white pine," he will put it under the dollar classification.

Mr. MANTLE. I will accept the suggestion of the Senator from Colorado.

Mr. TELLER. I was about to make that motion myself.

The VICE-PRESIDENT. Will the Senator from Colorado restate the motion?

Mr. TELLER. It is to insert after the word "basswood," in line 16, paragraph 193, the words "and white pine." That will make it $1 per thousand on white pine.

Mr. JONES of Arkansas. That is as it was under the McKinley law.

Mr. TELLER. I should like to say that that will put the duty where the McKinley bill put it in 1890.

Mr. BURROWS. Except, as I will state to the Senator, that the duty on hemlock has been increased from $1 to $2.

Mr. TELLER. By this bill?

Mr. BURROWS. By the pending bill, which the Senator does not propose to change.

Mr. TELLER. I do not propose to interfere with that. I am like the Senator from Arkansas. If I had my way I would vote for free lumber, because I believe it would be wisdom for us to save the forests of the United States. I can not conceive why the committee in this case saw fit to raise the duty over and above that of the McKinley Act of 1890.

I supposed that all Republicans who are in good standing with the party recognized that as the chief tariff bill that has passed Congress in many years, and as containing the sum of all wisdom of past ages. If it was enough in 1890, when there was a great deal more pine than there is now, it is enough now.

Mr. President, I have not very much hope of securing any reduction of this duty. I understand very well how Senators are voting here. The Senator from Wisconsin [Mr. SPOONER] said that he had been voting for Western interests. I have been delighted to see him occasionally vote for a Western interest, but I have felt all the time, understanding the condition that prevails here, that I was under no obligation to the Senator from Wisconsin. I was under obligation to the Republican caucus that had determined what the votes of Republican members in this Chamber should be.

If the caucus has determined that the duty on white-pine lumber is to be $2, and somebody will say so, as far as I am concerned I will drop the question; I will have nothing further to say about it. I have asked the committee to make some statement to the country to show why they put this duty of $2 upon this article, that has been on the free list for years, and was on the one-dollar list for years before, put there by the Republican party. I want to know why they now double this duty when the price of lumber has been steadily going up, when it is one of the things, perhaps, that has not kept pace with fall in prices, because the supply of this class of lumber is known to be growing less and less. I should be delighted in the interest of the people who are anxious to purchase this material at a fair price, in the interest not only of the settlers, but of the manufacturers who use it to a large extent, to see it put at a dollar a thousand, if it can not be put on the free list.

Mr. MANTLE. Mr. President, I think I have shown pretty conclusively that the doctrine of protection does not apply in this particular, and I think it must be evident to those who have followed this debate that no revenue can accrue to the Government from the levying of this tax. The Treasury can not be benefited. The industry can not possibly be encouraged. The only effect will be to enhance the cost of this particular class of lumber to the consumer. I will read from a hearing before the Committee on Ways and Means of the House of Representatives, which the Senator from Colorado [Mr. TELLER] hands me, as follows:

> Mr. EVANS. What do you think the duty ought to be?
> Mr. WINCHESTER. It ought to be prohibitive.
> Mr. EVANS. Would $2 do that?
> Mr. WINCHESTER. Yes; just about.

That is the purpose, Mr. President, to make it prohibitive. I am not going to detain the Senate any longer, but I want to appeal to my friends on the other side of the Chamber with whom I have found it necessary, according to my idea of what is right in the discussion of this tariff measure, to vote on more than one occasion. I appeal to Senators upon the other side who favor moderate duties, who have shown that they are willing to take into consideration all the equities of the case as they may bear upon the particular items treated of in the bill, to come to the aid of the Western and Northwestern people in this particular and help to reduce this duty to the level at least of the duty imposed upon other kinds of timber.

Mr. SPOONER. Mr. President, I shall only take a moment. I have not intended to vote for a prohibitive duty; but if 19 per cent ad valorem on lumber is a prohibitive duty, I should like to know what the duty on wool is?

Mr. MANTLE. The point has no just relation whatever to the subject under discussion, and I think that is evident to every Senator on this floor. We could not prohibit the importation of wool if we wanted to do so, because we must have it. We do not produce enough, and it is evident that with a just protective tariff levied upon wool we can foster and encourage the woolgrowing industry of this country. That is the judgment of the majority of those who have given the matter study and investigation. But it is simply impossible to encourage and develop the white pine growing industry of this country, and the logical and legitimate effect of this duty must be to hasten its destruction. It is simply putting a premium upon the destruction of the white-pine forests of the country.

Mr. ALLEN. The trouble with the Senator from Montana is that he has run up against the Republican machine. There is the trouble. There is no reason whatever for the imposition of this tax except that the machine has decreed it shall be so.

Mr. MANTLE. I do not know whether I have run up against any machine or not. I am simply differing with many of my protectionist colleagues here upon this occasion as I have upon other occasions.

Mr. SPOONER. It is the same machine that put a duty on hides.

Mr. ALLEN. Yes; you give us crumbs of comfort occasionally. The duty on hides is a mere bagatelle as compared with this tax on lumber.

Mr. SPOONER. I am talking about the machine.

Mr. ALLEN. Of course; the machine has decreed that it shall be otherwise; and the machine is perfectly willing to sit silent and not offer a reason, simply because it has no reason to offer, voting this tax by mere force of numbers and without any excuse whatever.

Mr. President, I took occasion to show as well as I could the

other day that the homes of the Western States are not yet half built. They are not a quarter built. They must be built from this lumber; and to be built from the lumber, under this bill, if it becomes a law, there is to be levied $2 upon every thousand feet that goes into the construction of the homes and into the construction of the fences and the barns, and buildings of that character. There is no more excuse for levying this tax upon the poor people who are struggling to establish their homes than there would be for a highwayman to meet his victim upon the highway and at the point of a gun compel him to surrender his money.

I know that force of numbers can do anything. A brutal majority can sit silent and vote like a mere automaton and accomplish whatever result they desire. But if the reasoning that is ordinarily applied to the imposition of a tariff tax is to be applied in this case, anyone will see in a moment that it falls short. The "protection" of the white-pine forests of our country means their utter destruction. It means their speedy destruction, not their conservation. It means their destruction within the next five or six years. Then the people of the United States, so far as white pine is concerned, will be at the absolute mercy of the owners of white pine in Canada, who will fix their own price to American consumers, and that evidently will be beyond what it is now.

Certainly a revenue of no considerable consequence can be derived from the imposition of a tax of this kind. It was stated before the Ways and Means Committee that it was designed to be prohibitive, that it was designed to force the hands of the few lumber barons of this country into the pockets of the millions and take $2 a thousand feet out of their pockets and transfer it to their own without any equivalent.

Mr. BURROWS. In view of the statement of the Senator from Nebraska [Mr. ALLEN], made also by the Senator from Montana [Mr. MANTLE], that it was said before the Committee on Ways and Means that this duty was intended to be prohibitory, I ought to say, in justice, that the gentleman who made that statement subsequently stated that he had said nothing of the kind; that he alluded to another article entirely. I so stated in the Senate subsequently, and I hardly think that the misrepresentation of that gentleman ought to be continued. He evidently did not allude to white pine at all.

Mr. TELLER. What did he allude to?

Mr. BURROWS. He stated that he alluded to the other items of which he was speaking.

Mr. TELLER. Of what was he speaking?

Mr. BURROWS. He was speaking of the other subjects.

Mr. ALLEN. The Senator from Missouri [Mr. VEST] took occasion to show during the discussion that he did allude to white pine.

Mr. BURROWS. I stated at the time that the gentleman himself told me that he did not allude to or mean to be understood as speaking of white pine.

Mr. TELLER. I understood that the gentleman had backed out from what he said. But if he tells the truth, the committee had a very bad reporter. It is utterly impossible to read the report and believe that he did not make the statement that the committee attributes to him. It is a Republican committee that reported it.

The VICE-PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Colorado [Mr. TELLER] to put white pine under the dollar classification in line 16, page 60, paragraph 193.

Mr. MANTLE. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. CLARK (when his name was called). I am paired with the junior Senator from Kansas [Mr. HARRIS]. He is absent, and I withhold my vote.

Mr. GEAR (when his name was called). I transfer my pair with the Senator from New Jersey [Mr. SMITH] to the Senator from Maine [Mr. HALE], and vote "nay."

Mr. HANNA (when his name was called). I am paired with the junior Senator from Utah [Mr. RAWLINS]. In his absence I withhold my vote.

Mr. PLATT of New York (when his name was called). I am paired with the senior Senator from New York [Mr. MURPHY], and withhold my vote.

Mr. PRITCHARD (when his name was called). I am paired with the junior Senator from South Carolina [Mr. MCLAURIN], but inasmuch as he has already voted for a $2 rate on white pine, I think I am at liberty to vote. I vote "nay."

Mr. SEWELL (when his name was called). I am paired with the Senator from Wisconsin [Mr. MITCHELL].

Mr. THURSTON (when his name was called). I have a general pair with the senior Senator from South Carolina [Mr. TILLMAN]. I will therefore withhold my vote.

Mr. TURPIE (when his name was called). I stand paired with the senior Senator from Minnesota [Mr. DAVIS]; but by the arrangement already announced, the junior Senator from Kentucky [Mr. DEBOE] being paired with the senior Senator from South Dakota [Mr. PETTIGREW], the pairs are transferred so that the Senator from Minnesota [Mr. DAVIS] and the Senator from South Dakota [Mr. PETTIGREW] will stand paired, and the Senator from Kentucky and I will vote. I vote "yea."

Mr. WARREN (when his name was called). I again announce my pair with the junior Senator from Washington [Mr. TURNER].

The roll call having been concluded, the result was announced—yeas 32, nays 31; as follows:

YEAS—32.

Allen,	Clay,	Kenney,	Pettus,
Baker,	Cockrell,	Kyle,	Roach,
Bate,	Daniel,	Lindsay,	Stewart,
Berry,	Faulkner,	Mallory,	Teller,
Butler,	Gorman,	Mantle,	Turpie,
Caffery,	Gray,	Mills,	Vest,
Carter,	Heitfeld,	Morgan,	Walthall,
Chilton,	Jones, Ark.	Pasco,	White.

NAYS—31.

Allison,	Frye,	McMillan,	Proctor,
Bacon,	Gallinger,	Martin,	Quay,
Burrows,	Gear,	Mason,	Shoup,
Cullom,	Hawley,	Nelson,	Spooner,
Deboe,	Hoar,	Penrose,	Wellington,
Elkins,	Lodge,	Perkins,	Wetmore,
Fairbanks,	McBride,	Platt, Conn.	Wilson.
Foraker,	McEnery,	Pritchard,	

NOT VOTING—26.

Aldrich,	Hanna,	Morrill,	Thurston,
Cannon,	Hansbrough,	Murphy,	Tillman,
Chandler,	Harris, Kans.	Pettigrew,	Turner,
Clark,	Harris, Tenn.	Platt, N. Y.	Warren,
Davis,	Jones, Nev.	Rawlins,	Wolcott.
George,	McLaurin,	Sewell,	
Hale,	Mitchell,	Smith,	

So Mr. TELLER's amendment was agreed to.

Mr. ALLISON. On page 175, paragraph 584——

Mr. JONES of Arkansas. Before the Senator from Iowa takes that up, will he permit me to call his attention to the fact that the provision for a tax on cotton ties was not stricken out of paragraph 125, page 34? I ask that that be done by unanimous consent.

Mr. ALLISON. I do not like to have it done by unanimous consent.

Mr. JONES of Arkansas. The Senate has put it on the free list.

Mr. ALLISON. I am perfectly willing that it shall be done.

Mr. JONES of Arkansas. I move to strike out, beginning with the word "hoop," after the word "That," in line 16, page 34, and ending with the word "ties," in line 18.

The SECRETARY. After the word "That," in line 16, strike out all of the paragraph down to and including the word "ties," in line 18, as follows:

Hoop or band iron, or hoop or band steel, cut to length, or wholly or partly manufactured into hoops or ties.

Mr. JONES of Arkansas. The words in line 18, beginning with the word "coated," down to the word "commodity," in line 20, have already been stricken out.

The VICE-PRESIDENT. They have been stricken out. The question is on the amendment of the Senator from Arkansas.

The amendment was agreed to.

Mr. ALLISON. In paragraph 584 I move to strike out the words "and ore," after the word "oxide;" so as to make the paragraph read:

584. Manganese, oxide of.

The amendment was agreed to.

Mr. ALLISON. Now I ask the Senate to turn to paragraph 386 for a moment. I call the attention of the Senator from Arkansas to it.

Mr. JONES of Arkansas. What is the page?

Mr. ALLISON. Page 133, line 21; the word "braids" remains in the bill, as I understand, although the committee recommended to strike it out.

The VICE-PRESIDENT. Yes; the amendment was disagreed to.

Mr. ALLISON. I move to strike out the word "braids" there.

The VICE-PRESIDENT. The Senator from Iowa moves to strike out the word "braids," in line 21, page 133, paragraph 386. Without objection, the amendment is agreed to.

Mr. ALLISON. I move to restore the word "braids" in line 3, page 134. I desire to restore "braids" by unanimous consent.

The VICE-PRESIDENT. The Senator from Iowa moves to insert the word "braids" in line 3, page 134, paragraph 387.

The amendment was agreed to.

Mr. LINDSAY. With the consent of the Senator from Iowa, I will dispose of the amendment I offered, to put wood alcohol on the free list.

Mr. ALLISON. That has not been disposed of yet, I believe.

Mr. LINDSAY. No, sir. I supposed when I offered the amendment that it would be accepted by the Committee on Finance. I find, however, that it will not be accepted by the committee, and I think I shall direct my attention to wood alcohol in a different line.

Wood alcohol is protected by a duty of $2.25 a gallon and it pays no tax whatever under the internal-revenue laws. The manufacture of wood alcohol is essentially a trust—75 or 80 per cent of it is controlled by one management. Yet it gets $2.25 a gallon in the way of protection and does not pay a cent of revenue to the Federal Government.

This was done, I understand, in order that the manufacturing interests might have alcohol used in the arts and industries of the country at the lowest possible rate. In the Wilson bill a provision was incorporated looking to free alcohol for use in the arts. The Treasury Department held that that provision was not sufficiently specific and that it could not be enforced. A commission was appointed at the last Congress to investigate what steps were necessary in order to secure free alcohol in the arts, and immediately upon the beginning of the discharge of the duties of that commission the wood-alcohol men appeared and opposed any provision looking to free alcohol in the way of spirits distilled from grain, upon the idea that it would break down the industry.

When Mr. Bubb, of the American Charcoal Company, appeared before the committee and presented his side of the case, he said:

Should a free-alcohol law become operative, there is no doubt that it would secure to a limited number of manufacturers of specialties enormous profits; but I ask, with all sincerity, would the general public in any way be the gainers? On the other hand, should such a law become operative it would be the means of destroying entirely the wood-alcohol industry, in which there is a large amount of money invested, and in which business nearly all of the parties interested have every dollar invested that they have in the world. Furthermore, it would throw out of employment from twelve to fifteen thousand men who are engaged directly or indirectly in the preparation and sale of charcoal.

This gentleman before he quit explained the character of the wood-alcohol industry.

Mr. WHITE. Will the Senator from Kentucky inform me whether it is true, as I have heard it alleged, that the by-product in the manufacture of wood alcohol furnishes the wood alcohol without cost, and that the result is that wood alcohol is made without any expenditure at all?

Mr. LINDSAY. The charcoal is a by-product of the wood-alcohol industry or wood alcohol is a by-product of the charcoal industry. From this gentleman's exposition of the subject I am at a loss to tell which is the principal and which is the subsidiary industry.

The CHAIRMAN. You represent the entire charcoal industry in the United States?

Mr. BUBB. The chemical charcoal industry.

The CHAIRMAN. You pretty nearly admit that you have a monopoly? My last friend would not admit that he had a monopoly, because he only controls 75 per cent of the business in the United States.

Mr. BUBB. We control 100 per cent.

They say they have driven the old fashioned charcoal industry out of existence, and while they have only $50,000 of capital, they virtually control the production of wood alcohol.

Senator JONES of Arkansas. Your real business is to make alcohol?

Mr. BUBB. Yes, sir.

Senator JONES of Arkansas. And you call yourselves the charcoal company?

Mr. BUBB. No, sir; we do not call ourselves the charcoal company.

Senator JONES of Arkansas. I thought you said you did—that you called it the American Charcoal Company?

Mr. BUBB. The American Charcoal Company distributes it.

The CHAIRMAN. That is the company of which I asked the capital.

Mr. BUBB. It is $50,000, and that company distributes the chemical charcoal.

Senator JONES of Arkansas. Your real business is that of making alcohol, and you call yourselves the American Charcoal Company?

Mr. BUBB. The seventy manufacturers do. They constitute the American Charcoal Company.

Senator JONES of Arkansas. The American Charcoal Company is a different organization from the one which produces the alcohol?

Mr. BUBB. Yes, sir.

Senator JONES of Arkansas. It is one composed of all the producers?

Mr. BUBB. Yes, sir; as a means of distributing it.

Senator JONES of Arkansas. That seems to tend just a little toward a combination.

Representative RUSSELL. The people who distribute the charcoal—the American Charcoal Company—also produce crude alcohol?

Mr. BUBB. Yes, sir.

Representative RUSSELL. And as the producers of crude alcohol you are associated or combined under another name?

Mr. BUBB. Yes, sir.

Representative RUSSELL. The same people?

Mr. BUBB. As producers of crude alcohol?

Representative RUSSELL. Yes.

Mr. BUBB. No, sir.

Representative RUSSELL. The same concern produces charcoal and crude alcohol?

Mr. BUBB. Yes, sir.

Representative RUSSELL. As producers of charcoal you call yourselves the American Charcoal Company?

Mr. BUBB. Yes, sir.

Representative RUSSELL. What do you call yourselves—the same people—as producers of crude alcohol?

Mr. BUBB. Take my own self, personally; my concern is called the McKean Chemical Company. Then there are the Otto Chemical Company and the Hermance Chemical Company. Those are the three in which I am interested.

Senator JONES of Arkansas. All those belong to the American Charcoal Company for handling the charcoal product?

Mr. BUBB. Yes, sir.

Senator JONES of Arkansas. What do you do with the wood-alcohol product?

Mr. BUBB. We sell it to the Manhattan Spirit Company.

The CHAIRMAN. They are individual companies in that business?

Mr. BUBB. Yes, sir.

And again:

Representative RUSSELL. But you all have the same contract with the Manhattan Spirit Company as to the delivery of crude alcohol?

Mr. BUBB. You are mistaken there. For instance, take Messrs. Baylis & Co., of Binghamton. They are members of the American Charcoal Company, but the Manhattan Spirit Company does not handle their crude. There are quite a number of other cases.

Representative RUSSELL. The majority do have such contracts?

Mr. BUBB. Yes, sir.

The CHAIRMAN. The Manhattan Company handles 75 per cent?

Mr. BUBB. A majority of it.

Representative RUSSELL. Seventy-five per cent?

Mr. BUBB. Yes, sir.

Then this combination, which pay no taxes whatever on the product and get a percentage at the rate of $2.25 a gallon, say they will be ruined if we put this article on the free list; that Canadian wood alcohol will come across the border and drive these people out; that if we put distilled spirits on the free list to the extent necessary for the promotion of the manufacturing industry, that, too, would break down the wood-alcohol business. If wood alcohol was used for no other purpose than in the arts, there might be some reason why it should be protected by a duty of $2.25 a gallon and required to pay no tax to the Federal Government; but wood alcohol has ceased to be a mere instrumentality of the manufacturing people of the United States.

Another gentleman appeared before this committee who manufactured wood alcohol in two factories in North Carolina. In one of those factories he manufactured the crude wood alcohol, and in the other he refined it. He says:

I believe if we have free alcohol it will stop both of my factories. That is the first thing.

That is the first objection this gentleman stated to having free alcohol for manufacturing purposes.

Another point is that with free alcohol I do not see how any means can be adopted to prevent its being used for drinking purposes, because wood alcohol is made so refined now that when it is mixed with common alcohol the mixture can be used for drinking purposes.

The CHAIRMAN. In what proportion?

Mr. CLARK. In the proportion of about 10 per cent. If you take 50 per cent of grain alcohol and 50 per cent of wood alcohol and dilute it with water down to one-half, it has not a very distasteful effect upon the tongue, and if you take it down to 10 per cent, I believe it may be used for drinking right along.

The CHAIRMAN. Do you know that that is done, or is it simply your opinion that it might be done?

Mr. CLARK. It is merely an opinion from the mixtures I have made and have had my men try to see whether they could drink it. I understand that wood alcohol is used to adulterate liquors. That is simply what I have heard. I do not know that it is true. I am firmly convinced that 10 per cent of wood alcohol in grain alcohol could be drank.

The CHAIRMAN. You do not think that wood alcohol ought to be used in any way for drinking purposes without paying a tax?

Mr. CLARK. No; I do not. But if you have free alcohol and methylation, I see nothing to prevent a large amount of methylated spirits from being used for drinking purposes. That is a thing very easily tested. All you have to do is to take a sample of refined wood alcohol and common alcohol and mix them in that proportion and dilute them with water, and almost any man can drink it.

If any Senator has the curiosity to inquire at the Internal Revenue Department, he will find that wood alcohol is being used in combination with distilled spirits for beverage purposes, and it is to get a protection of $2.25 a gallon under this bill; and so far as the Finance Committee on the other side is concerned, this article is to go without paying a single cent of tax to the Federal Government.

Mr. WHITE. Can the Senator from Kentucky inform me whether there is any chemical difference in the properties of these two articles?

Mr. LINDSAY. I would not undertake to say that there is no chemical difference, but the chemical properties are so similar that after the two alcohols have been refined and put into bottles you can not distinguish the one from the other either by its color or by the aroma that comes from it. I understand that neither can you distinguish one from the other by the taste, but of course about that matter I can not speak from experience.

Mr. WHITE. I understand, however, the killing properties of wood alcohol are better than those of the ordinary alcohol. [Laughter.]

Mr. LINDSAY. Wood alcohol probably kills more quickly.

Mr. WHITE. It is stated here that wood alcohol is an absolute poison. I have seen that statement made.

Mr. LINDSAY. I understand that that has been tested, and it has been proved that it is not an absolute poison. It is a poison in the same way that any alcoholic beverage turns out to be a poison in the end, but wood alcohol may operate a little more expeditiously. [Laughter.]

But as Senators on the other side are not willing that the manufacturers shall have competition with the wood-alcohol producers and will not put the article on the free list, I suppose the only resort left to me is to withdraw, which I now do, my proposed amendment, and to give notice that I shall move to amend the bill by having wood alcohol taxed as other spirits are taxed.

Mr. ALLISON. Mr. President, I desire to return for a moment to paragraph 262, on page 77, and then I shall move to proceed to the consideration of executive business. I ask unanimous consent

to modify the amendment inserting paragraph 262, "comfits, sweetmeats," etc., in line 9 and in line 14, by inserting "18 per cent" where "10" is now provided for in the bill.

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. On page 77, paragraph 262, line 9, before the words "per centum," it is proposed to strike out "ten" and insert "eighteen;" and in line 14, before the words "per centum," to strike out "ten" and insert "eighteen;" so as to read:

If containing over 18 per cent of alcohol and not specially provided for in this act, 35 per cent ad valorem and in addition $2.50 per proof gallon on the alcohol contained therein in excess of 18 per cent.

The amendment was agreed to.

EXECUTIVE SESSION.

Mr. ALLISON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After fifteen minutes spent in executive session the doors were opened, and (at 5 o'clock and 50 minutes p. m.) the Senate adjourned until to-morrow, Friday, July 2, 1897, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate July 1, 1897.

CONSUL-GENERAL.

John F. Gowey, of Washington, now consul-general at Kanagawa, to be consul-general of the United States at Yokohama, Japan, an office created in lieu of Kanagawa by the diplomatic and consular appropriation act for the year beginning July 1, 1897.

CONSULS.

George N. West, of the District of Columbia, now consul at Pictou, to be consul of the United States at Sydney, Nova Scotia, an office created in lieu of Pictou by the diplomatic and consular appropriation act for the year beginning July 1, 1897.

Ossian Bedell, of New York, to be consul of the United States at Fort Erie, Ontario, vice Ralph Johnson, resigned.

John C. Higgins, of Delaware, to be consul of the United States at Dundee, Scotland, vice John M. Savage, resigned.

COLLECTOR OF CUSTOMS.

George C. Bidwell, of New York, to be collector of customs for the district of New York, in the State of New York, in place of James T. Kilbreth, deceased.

APPRAISER OF MERCHANDISE.

Wilbur F. Wakeman, of New York, to be appraiser of merchandise in the district of New York, in the State of New York, to succeed Walter H. Bunn, removed.

UNITED STATES ATTORNEY.

Emory P. Close, of New York, to be attorney of the United States for the northern district of New York, vice William A. Poucher, to be removed.

RECEIVER OF PUBLIC MONEYS.

C. Sanford Russell, of Ironton, Mo., to be receiver of public moneys at Ironton, Mo., vice Mann Ringo, resigned.

INDIAN AGENT.

Lee Patrick, of Sac and Fox Agency, Okla., to be agent for the Indians of the Sac and Fox Agency, in Oklahoma Territory, vice Edward L. Thomas, resigned.

POSTMASTERS.

Jerome E. Poche, to be postmaster at Washington, in the county of Wilkes and State of Georgia, in the place of John A. Dyson, removed.

Sebastian Anderson, to be postmaster at Jasper, in the county of Dubois and State of Indiana, in the place of Charles Egg, removed.

Abel Landry, to be postmaster at Napoleonville, in the parish of Assumption and State of Louisiana, the appointment of a postmaster for the said office having, by law, become vested in the President on and after July 1, 1897.

Richard J. Bawden, jr., to be postmaster at Bessemer, in the county of Gogebic and State of Michigan, in the place of Levi S. Rice, removed.

Frank L. Gilman, to be postmaster at Laconia, in the county of Belknap and State of New Hampshire, in the place of John O'Loughlin, deceased.

William O. Sides, to be postmaster at Portsmouth, in the county of Rockingham and State of New Hampshire, in the place of John E. Leavitt, whose commission expired April 15, 1897.

William J. Cornell, to be postmaster at Chautauqua, in the county of Chautauqua and State of New York, the appointment of a postmaster for the said office having, by law, become vested in the President on and after July 1, 1897.

Guy O. Frank, to be postmaster at Minot, in the county of Ward and State of North Dakota, in the place of Josiah J. Long, removed.

Albert J. Claney, to be postmaster at Bellevue, in the county of Allegheny and State of Pennsylvania, the appointment of a postmaster for the said office having, by law, become vested in the President on and after July 1, 1897.

William G. Cubberly, to be postmaster at Custer, in the county of Custer and State of South Dakota, in the place of Bertha Wood, resigned.

Fred Arnold, to be postmaster at Bethel, in the county of Windsor and State of Vermont, in the place of George H. Tupper, resigned.

CONFIRMATIONS.

Executive nominations confirmed by the Senate July 1, 1897.

CONSULS-GENERAL.

John T. Gowey, of Washington, to be consul-general of the United States at Yokohama, Japan.

Charles L. Cole, of Pennsylvania, to be consul-general of the United States at Dresden, Saxony.

CONSULS.

George N. West, of the District of Columbia, to be consul of the United States at Sydney, Nova Scotia.

Walter J. Hoffman, of the District of Columbia, to be consul of the United States at Mannheim, Baden.

Louis A. Dent, of the District of Columbia, to be consul of the United States at Kingston, Jamaica.

Samuel S. Lyon, of New Jersey, to be consul of the United States at Osaka and Hiogo, Japan.

SOLICITOR-GENERAL.

John K. Richards, of Ohio, to be Solicitor-General.

PROMOTION IN THE ARMY.

General officer.

Col. Henry Clay Merriam, Seventh Infantry, to be brigadier-general.

JUDGE OF COURTS IN INDIAN TERRITORY.

John R. Thomas, of Illinois, to be judge of the United States courts in the Indian Territory.

POSTMASTERS.

William W. Woods, to be postmaster at Wabash, in the county of Wabash and State of Indiana.

Theodore E. McCrary, to be postmaster at Lexington, in the county of Davidson and State of North Carolina.

James F. Wray, to be postmaster at Reidsville, in the county of Rockingham and State of North Carolina.

Eli P. Jennings, to be postmaster at New Decatur, in the county of Morgan and State of Alabama.

John B. Vincent, to be postmaster at Hutchinson, in the county of Reno and State of Kansas.

William A. Price, to be postmaster at Delaware City, in the county of Newcastle and State of Delaware.

HOUSE OF REPRESENTATIVES.

THURSDAY, *July 1, 1897.*

The House met at 12 o'clock noon, and was called to order by the Speaker.

Prayer by the Chaplain, Rev. HENRY N. COUDEN.

The Journal of the proceedings of Monday last was read.

The SPEAKER. Without objection, the Journal will be considered as approved.

Mr. SETTLE. Mr. Speaker, I desire to amend the Journal. I have an amendment in writing, which I desire to send up to the desk.

The SPEAKER. The gentleman from Kentucky [Mr. SETTLE] has an amendment to the Journal, which he offers.

Mr. DINGLEY. Mr. Speaker, I move the approval of the Journal.

The SPEAKER. The gentleman from Kentucky [Mr. SETTLE] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Strike out the following words, to wit:

"Accordingly (at 12 o'clock and 42 minutes p. m.) the House, in pursuance of the order heretofore adopted, adjourned until Thursday next at 12 o'clock m."

And insert in lieu thereof these words, viz:

"Accordingly (at 12 o'clock and 42 minutes p. m.) the Speaker, in pursuance of the rule adopted May 6, 1897, declared the House adjourned until Thursday next at 12 o'clock m."

Mr. SETTLE. Mr. Speaker, I heard the reading——

The SPEAKER. There is a slight technical difficulty in regard to that amendment, and that is that there are no such words in the Journal.

Mr. SETTLE. I was going to call the Speaker's attention to

the fact that the printed RECORD is supposed to be the Journal of the House, and the amendment was prepared with the printed RECORD before me.

The SPEAKER. By whom is it supposed to be?

Mr. SETTLE. It is furnished to members as the CONGRESSIONAL RECORD, and is regarded by them and by the country as official.

The SPEAKER. But it is not the Journal of the House.

Mr. SETTLE. Well, then, I desire, if the Chair rules that the Journal as read by the Clerk is the only authoritative and official Journal of the House, to amend my motion by striking out the words which appear in the Journal and inserting those words which have been read in my amendment.

Mr. WILLIAM A. STONE. Mr. Speaker, I desire to make a point of order against this motion, if it is tenable.

Mr. SETTLE. What is the point?

The SPEAKER. The Chair did not quite understand the gentleman from Kentucky.

Mr. SETTLE. I say the amendment was prepared under the idea that the CONGRESSIONAL RECORD laid upon the desks of members was the official record of the proceedings of the House, and so my amendment proposed to strike out the words that appear in the printed RECORD, but which do not appear in idem verbis, although they appear substantially in the Journal as read by the Clerk from the desk just now. Therefore I want to strike out the adjourning words that appear in the Journal as read by the Clerk and to substitute those which I have had read. I desire to offer my amendment to correspond with the Journal as read.

The SPEAKER. The Journal says:

And accordingly (at 12 o'clock and 42 minutes) the House adjourned until Thursday next at 12 o'clock m.

Mr. SETTLE. I move to strike out those words and to substitute in lieu thereof the words that appear in my amendment; and I desire to submit a few remarks, by the permission of the Chair, upon my amendment. Mr. Speaker——

The SPEAKER. The gentleman from Kentucky.

Mr. SETTLE. It may appear at first blush that the amendment just reported to the House seeks only to deal with the difference 'twixt tweedledum and tweedledee; but I assure the Chair and I assure the House that it is offered in no technical spirit, nor in any spirit of mere verbal or captious criticism.

I offer the amendment because I think it more clearly recites the actual occurrences of Monday's session than does the Journal as read by the Clerk, and I believe that, actually reciting the occurrences on the floor, every member may vote for it without regard to party ties or any condition of servitude, voluntary or involuntary, previous or now existing. [Laughter.] Now, the Journal as read by the Clerk recites the fact that the House adjourned until this morning, thereby implying that the House voted to adjourn from Monday until to-day.

I deny that that is the actual or real fact in the case. I say that the House voted to adjourn, and thereupon the Speaker, in pursuance of the rule adopted on the 6th of May, declared that the House stood adjourned until this morning.

I can therefore see no reasonable objection that any gentleman, Democrat or Republican, can have to the adoption of that amendment. But we who are upon this side of the Chamber have an additional reason for desiring the amendment adopted, and that is this: We have all along protested against this rule, its adoption in the first place, as not only against public policy, but actually in violation of the Constitution, and we have a right to demand that the record shall show that these unusual adjournments were in pursuance of that rule, which we have all along combated and resisted.

Now, Mr. Speaker, I have my own peculiar views upon this rule that I have never yet been able to express to the House, and I desire, briefly, under the amendment just offered, to state them. It is a remarkable fact, to me at least, that in all the debate that preceded the adoption of this rule by the House not one single objection was urged against it except on the ground of policy. I take the broad position that this rule is in violation of the Constitution of the United States and that the House had no authority under the Constitution to reduce the number of legislative days from the six days provided by the Constitution, except in the manner provided in that instrument. I find, however, that distinguished Democrats differ with me in that position, so I shall not be surprised if my Republican friends also differ with me.

Mr. SIMPSON of Kansas. If the gentleman will permit me, the great constitutional lawyer from Texas differed with him and voted for the adoption of the rule.

Mr. BAILEY. I suggest to the gentleman from Kansas that he go and inform himself, for that is not true. [Applause on the Democratic side.]

The SPEAKER. Gentlemen must not interrupt each other, and must not make unreasonable requests.

Mr. SETTLE. My position is broadly this: That the Constitution regulates the sessions of both Houses of Congress, and that neither House can by any general rule alter the number of legislative days. It is true that the framers of the Constitution recognized that exigencies might arise where it would not be proper to meet every day, and they provided means whereby the House, if it desired to adjourn, might pass over a day or as many as three days; but the House that desired so to pass over a day or over three days must be the House then in session, then about to adjourn. That House might adjourn for three days, but it could not by a general rule blot out four days out of every week, as this rule has done. The blotting-out process must be done by separate and independent vote on each occasion when an adjournment over is desired. The rule now in force makes it possible for a quorumless House to violate the provision of the Constitution; indeed, this has happened several times since we have been acting under it.

Where do we find authority for daily sessions of Congress? Did you ever think where? Not in your rules. Look in your rules. Not in the rules of the Fifty-fifth Congress and not in the rules of the Fifty-fourth Congress. I have not examined any other. You will not find them in the rules of any previous Congress. And if any such rules were ever incorporated in the rules of any previous Congress, they were merely declarative of what is in the Constitution. If we were to adjourn after repealing this rule, we would meet to-morrow, not by virtue of any rule of this House, but by the rule laid down in the Constitution.

There was a resolution adopted at the beginning of this Congress providing not for daily sessions, but that the daily hour of meeting shall be 12 o'clock; referring to the hour of meeting, and recognizing the fact that the sessions of the House were daily, and only determining the hour at which the House should meet. One of the things that has always troubled me, and upon which I have been desirous as a representative of my people to express myself, is, Did the House have the power to single out any two days a week, to the neglect of all the other four remaining days, and say that on those two days only should public business be transacted in the House? I affirm that it has not.

The Constitution is very plain upon the subject of daily sessions. The uniform construction that has been given to it by every Congress that has met since the formation of the Government shows that daily sessions were contemplated by the framers of the Constitution; and this was but reasonable. The framers of the Constitution recognized that Congress was a necessary evil, for they required it to meet at least once in each year. For what purpose? To transact public business. How? As expeditiously as possible, in order that those interests might not suffer and that members might not be detained from their homes an unreasonable length of time. Look at the clause of the Constitution which points to the daily sessions. There are but two things a quorumless House may do. One to adjourn from day to day, and the other to compel the attendance of absent members.

That provision of the Constitution permitting a quorumless House to adjourn from day to day would, I think, have been an unreasonable provision if it had not been the purpose of the Constitution to insure daily sessions. Such an expression would not have been employed if the sessions had been less frequent than daily. Wherever the word "days" is used in the Constitution, it refers manifestly to calendar days. When it is once admitted that the purpose was to insure as speedy dispatch of public business as possible, you can not attach to the word "day" any other than its natural meaning—calendar, not legislative day.

Now, we have undertaken to say that the public business, which the Constitution said should be transacted on six days, shall be transacted on two days. Why, then, I ask you, may not this House have said that the House should meet only on Monday of each week?

Ah, but gentlemen say: "More than three days would then elapse." But when you once concede the power of the House to fix the legislative day, the three-days restriction vanishes. In the Constitution, as I have said, the word "day" obviously means calendar day, and in that instrument legislative day and calendar day refer to the same period of time and are interchangeable terms.

Now, if, by making the legislative day differ from the day referred to in the Constitution in the clause permitting less than a quorum to adjourn from day to day, you thus change the construction of that clause, then you must change the construction of the three-day provision in order to keep pace with the growing construction of the Constitution in the adjournment from day to day clause. If adjournment from day to day now means from legislative day to legislative day, then adjournment for three days means for three legislative days. What follows? You might then say we will meet only on Mondays, and then an adjournment from day to day would mean a three-weeks calendar adjournment. Or you might say that you would meet only on the first Monday of each month, and then an adjournment for three days would mean an adjournment for three calendar months. Gentlemen, that is

a monstrous absurdity, and yet it is a logical result of your reasoning. We are not to suppose that the framers of the Constitution left that gap.

But what did they do? The honorable gentleman from Maine [Mr. DINGLEY], when he advocated the passage of this rule, said: "Why should we meet every Monday and Thursday and go through the performance of adjourning for three days when we can do it by a rule?"—thereby confessing that it was his opinion that the House had a right to reduce the number of legislative days. And this is exactly what you have done. You can take a recess until to-morrow, but you can not adjourn until to-morrow. To-morrow is blotted out of the calendar. By a kind of fiction you can merge to-morrow in this day that has gone before by recess till then, but you will not meet to-morrow. To-morrow will never come, or rather your to-morrow is next Monday. Gentlemen have said to me that they have known one legislative day to run over two or three calendar days. That does not militate against my position, because in that case the calendar day was not wasted; it was utilized, and the House was in session on that calendar day, or on those calendar days.

The proper way to have proceeded, although it would have exercised gentlemen on the other side and put them to some trouble, would have been to have pursued the plan that my friend from Maine deprecated, namely, to have gone to the trouble at every meeting of voting to adjourn for three days. That the House had a right to do, however impolitic it might have been. It was easy for you gentlemen to adopt this rule and put it behind you with no occasion for any further votes to adjourn for three days, but if you had been confronted with the idleness of the House for now practically three months, I very seriously question if a majority could have been found at all times upon the floor of this House to advocate these unusual periods of adjournment.

But, Mr. Speaker, while I pronounce this rule unconstitutional and the most dangerous and revolutionary measure that has ever found its way upon the Journal of the House of Representatives, yet I do not share in the grave apprehensions of some men, who are, perhaps, more learned than I am, that by reason of the House having adopted this rule the present session of Congress has come to a close. I believe that that provision of the Constitution is directory. If I did not think so, I would not stultify myself by appearing here from day to day and assisting in shaping what I believed to be void legislation.

But let me emphasize the thought that a direction of the Constitution addresses itself as strongly to my sense of right, to my conscience, and to my oath as a command of the Constitution. Shall we continue to violate the Constitution merely because the consequences are not so grave as some gentlemen apprehend? I remember that nearly two thousand years ago the great apostle asked an almost similar question: Shall we who believe in present salvation to the believer continue in sin that grace may abound? I answer the first question as he answered the last: God forbid. If we love the Constitution, we will respect the Constitution and will obey its slightest precepts or directions, and not only its mandates or its commands.

If it were true that the House, by the adoption of this rule, had brought this session to a close, then we would accomplish, by violating the Constitution, the very thing that the framers of the Constitution intended to prevent. If that contention was true, then we should never have any legislation at all unless both Houses were in perfect accord. If that contention was true, all that the Senate would have had to do, if it had been unfavorable to the tariff bill, would have been to adjourn for six days without the consent of the House, and thereby have brought the session to a close. No, gentlemen, I can not subscribe to any such doctrine as that. But there was a remedy for this state of affairs, and there always has been a remedy, if the minority party on this side of the Chamber had chosen to avail themselves of it.

That remedy was for the minority to have met here daily and to have enforced the attendance of absent members, and thereby to have brought the question to a practical test. But the minority did not think the game was worth the candle. They did not care to introduce into this Chamber the enactment of scenes that might have brought the blush of shame to our cheeks and unduly inflamed the public mind. There would have been a hot time in the old town if they had, so they contented themselves with protesting against the iniquitous measure, satisfied that the sober judgment of the thinking American people would place the responsibility upon the party that had put it upon the Journal of the House.

You have heard from the people already, gentlemen. Their mutterings have found their way even here to this Capitol. We have been here for three months, operating under a rule the avowed purpose of which was to stop all legislation. The people will not care to take your answer that you were summoned here to enact a tariff bill. They will not accept that as a sufficient explanation of your failure to pass upon measures that have been sent to you by the Senate. Such was the Cuban resolution, and such was the bankruptcy bill. They have begun to doubt the sincerity of the Republican party in all its platform promises made at St. Louis. You promised much to Cuba. Calhoun has gone to Cuba; and Calhoun has returned; and Calhoun has gone home; and Calhoun has been forgotten; and so, alas! has Cuba.

There has not been a day for the last two months when the Democratic side of the House, although they did not regard those as partisan measures, have not been willing to vote upon both of these bills. But you would not. They do not care for the technicalities of the question as to whether there is a civil government or a state of war in Cuba. What they have persuaded themselves to believe is this: That a brave people who can maintain so unequal a struggle as the Cuban patriots have maintained for two years, under the most adverse influences, deserve to be a free and independent people. [Applause.] But, gentlemen, the same indifference that you have manifested toward the unhappy people of the Island of Cuba——

Mr. STEELE. I desire to make a point of order that the gentleman is not discussing any correction of the Journal.

The SPEAKER. The Chair thinks the point of order is well taken.

Mr. SETTLE. I hope the Chair will reserve that decision for a few minutes.

The SPEAKER. The Chair hopes the gentleman will confine himself to the question before the House.

Mr. SETTLE. All right. I will try to proceed in perfect order.

Mr. KELLEY. I rise to a question of personal privilege, which is in order.

Mr. WHEELER of Alabama. I call the gentleman to order. He can not take another member off the floor to raise a question of personal privilege.

Mr. KELLEY. Certainly not, if the gentleman has the floor.

Mr. WHEELER of Alabama. The gentleman from Kentucky [Mr. SETTLE] has the floor.

Mr. SETTLE. Mr. Speaker, I was not aware that I was transgressing the rules of legitimate debate. I am surprised that my friend from Indiana had not discovered it earlier in the proceedings.

The SPEAKER. He might have done so without mentioning it.

Mr. SETTLE. My idea was, Mr. Speaker—I am not intending to debate the point of order decided by the Chair, for I have the greatest respect for the occupant of the chair and for the high dignity with which he conducts himself in his high office; but I would suggest—I think I may do it without impropriety—that the more odious this rule can be made to appear the more reason I have to insist upon the adoption of the amendment which gives the rule prominence, a thing which the Journal as read does not do.

But I will endeavor to proceed in order. I was going to say that the people of the country are wide awake; they have their eyes open and their ears open to all that is going on in this House. They are not uninterested observers, as you may believe them to be, of our proceedings. They know that this House has acted in utter defiance of public sentiment and of the reasonable demands of the public, and that it has outraged every sense of justice and propriety by the adoption of the rule under which we are now operating. And, gentlemen, they are going to hold you to an account for it, and in the great day of the people's wrath you will not be able to stand. They are already weighing you in the balances. I suppose you have heard already from Chicago, and Cincinnati, and Columbus, and Cleveland—yea, from Canton itself.

The SPEAKER. The Chair begs to suggest to the gentleman from Kentucky that his present line of discussion is hardly pertinent to the pending question.

Mr. SETTLE. Well, Mr. Speaker, although it is a mere suggestion from the Chair, I will construe it into a decision of the Chair that I am not allowed to state my reasons for the adoption of this amendment which gives prominence to a rule which I say is so obnoxious that not only should the House reverse it, but the American people themselves by their recent utterances have demanded that it shall now, even at this late day, be wiped from our records.

But I will try to conclude in order. I say, gentlemen, that these elections mean much. They are the avant-couriers and heralds of a better day coming, or to change the figure, they are but the preliminary skirmishes of that great battle that is to be fought in 1898, and of that still greater battle that is to be fought in 1900; that battle which in my judgment will prove to the Republican party both its Armageddon and its Waterloo.

Mr. STEELE. I must insist on my point of order. We are anxious for a vote upon the pending question.

Mr. BAILEY. Mr. Speaker, I submit that any argument which would tend to discredit the rule, and thus to give an excellent reason why the Journal ought to be corrected, is in order.

Mr. DINGLEY. Does the gentleman think that this line of discussion has anything to do with the question? The question is

whether or not the Journal correctly states what took place in the House. It has nothing to do with the rule.

Mr. BAILEY. Yes; it has something to do with the rule, because, as the gentleman from Kentucky very properly said in the beginning of his remarks, it was the rule itself that prompted him to suggest the amendment.

Mr. DINGLEY. That is a concession that he is not speaking on the question before the House.

Mr. BAILEY. The difference between the statement in the Journal and the amendment which the gentleman from Kentucky offers is not very great, and would not be important at all except in view of the special rule. Now, I submit that it is a proper matter in argument upon the motion to amend, which amendment is only material because of the obnoxious character of the rule itself——

Mr. STEELE. To talk about the election of 1900?

Mr. BAILEY. I imagine it is always right to talk about the public sentiment of the nation.

Mr. DINGLEY. That is the trouble. The gentleman from Kentucky is arguing on political grounds, instead of parliamentary grounds.

Mr. BAILEY. The trouble is that gentlemen on the other side seem neither to understand nor to heed public sentiment; but on this side we always respect it and are always glad to bring it to the attention of gentlemen on the other side for their instruction and guidance.

Mr. DINGLEY. We have been having these performances at every session of the House for three months; it would seem about time that we should get down to something else.

Mr. BAILEY. Well, we are not doing anything else, and it would seem we might as well occupy the time in this way.

The SPEAKER. Certainly the gentleman from Kentucky would not maintain that the battle of Armageddon has anything to do with the present question.

Mr. SETTLE. I do not know about that; the Chair and I look at things somewhat differently.

The SPEAKER. It may be that the gentleman from Kentucky can show a connection?

Mr. SETTLE. Well, that is what I was trying to do.

The SPEAKER. The Chair hopes, however, that the gentleman will act upon his honor in this matter and confine himself to the question before the House, which is the motion to amend the Journal.

Mr. SETTLE. I beg the Chair and the House to believe that, in asking to be allowed to proceed, I am not asking it as a matter of favor, but as a matter of right. I have endeavored, under the latitude of debate, and even without invoking the latitude of debate, to make my remarks pertinent to the issue. It certainly was pertinent to the issue to comment upon the iniquity of this rule and to say to gentlemen on the other side that the people, because of the adoption of this rule, are beginning to repudiate them already, and that their final overthrow will come in two or three years from now. That certainly was a legitimate argument, in my opinion, and I beg the pardon of the House if, in making it, I trespassed upon the rules of debate.

But a remark which escaped my friend from Texas [Mr. BAILEY] has called my attention to another point. It may be asked, Is not the old record of the House under daily sessions tantamount to the record as read this morning? Do not all records under daily sessions show that the House adjourned until the next day? I say that is true; but strictly speaking that was not correct, for even in that case the House did not vote to adjourn until the next day. The House simply voted to adjourn; and the Speaker declared it adjourned until the next day, because of the rule then in force. But in view of the fact that those adjournments were to constitutional and normal periods no complaint was ever made as to the incorrect verbiage. But such a state of the case does not present itself to-day. Now there is complaint; and we object that the Journal should not continue to show that this House adjourned for three days when in fact the House did not do so.

It is true that the House with a quorum did adopt the rule; but it does not follow that everything that the House with a quorum does is lawful. A House with a quorum frequently passes unconstitutional measures. The question to be decided is not whether the House had a quorum, but whether the quorum did what the Constitution authorized it to do.

Now, Mr. Speaker, however improbable it may appear to you that Armageddon shall come or that Waterloo shall come, I undertake to say that in three years the hosts of the unterrified Democracy [derisive laughter on the Republican side]——

The SPEAKER. The House will please be in order.

Mr. SETTLE. The unterrified Democracy propose to take their banner, now trailing in the dust, and give it again into the charge and keeping of that lion-hearted Democrat of Nebraska; and they propose to hold up his hands and cheer his heart during all the thickness of that desperate fight until he shall plant it upon the very topmost heights of victory. [Applause on the Democratic side.]

Mr. DINGLEY. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the amendment offered by the gentleman from Kentucky [Mr. SETTLE].

The question being taken, the Speaker announced that the noes seemed to have it.

Mr. SETTLE demanded a division.

The House divided. Pending the announcement of the result of the division,

Mr. RIDGELY demanded the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 90, nays 105, answered "present" 25, not voting 132; as follows:

YEAS—90.

Adamson,	Davis,	Lewis, Ga.	Shuford,

So the amendment was rejected.

Mr. TALBERT. Mr. Speaker, I desire to withdraw my vote. I am paired with the gentleman from New York, Mr. Low.

The SPEAKER. The gentleman's vote will be withdrawn.

Several members addressed the Chair.

The SPEAKER. The Chair suggests that gentlemen wait until the pairs are announced before making these statements.

The Clerk announced the following pairs:

Until further notice:

Mr. ODELL with Mr. BARTLETT.
Mr. BOUTELLE with Mr. LAMB.
Mr. KERR with Mr. ROBB.
Mr. PITNEY with Mr. SAYERS.
Mr. SAUERHERING with Mr. COWHERD.
Mr. STEWART of Wisconsin with Mr. LITTLE.
Mr. WILLIAM A. STONE with Mr. MCCLELLAN.
Mr. QUIGG with Mr. BLAND.
Mr. POWERS with Mr. GAINES.
Mr. LYBRAND with Mr. LENTZ.
Mr. OTJEN with Mr. LESTER.
Mr. LOUD with Mr. DE VRIES.
Mr. SPALDING with Mr. CLAYTON.
Mr. DE ARMOND with Mr. GILLETT of Massachusetts.
Mr. MCCLEARY with Mr. BANKHEAD.
Mr. MCEWAN with Mr. VEHSLAGE.
Mr. MCCALL with Mr. JONES of Virginia.
Mr. HEATWOLE with Mr. DINSMORE.
Mr. ACHESON with Mr. WILSON of South Carolina.
Mr. BELDEN with Mr. SULZER.
Mr. BARRETT with Mr. FITZGERALD.
Mr. KULP with Mr. STALLINGS.
Mr. SOUTHARD with Mr. NORTON.
Mr. MINOR with Mr. SPARKMAN.
Mr. CLARKE of New Hampshire with Mr. KING.
Mr. HENRY of Connecticut with Mr. CLARDY.
Mr. HEMENWAY with Mr. ROBERTSON of Louisiana.
Mr. PUGH with Mr. RHEA of Kentucky.
Mr. HENRY of Indiana with Mr. MIERS of Indiana.
Mr. BROSIUS with Mr. ERMENTROUT.
Mr. CHICKERING with Mr. BRADLEY.
Mr. FOOTE with Mr. CASTLE.
Mr. HICKS with Mr. OTEY.
Mr. GROUT with Mr. BERRY.
Mr. WHITE of Illinois with Mr. BRENNER of Ohio.
Mr. GROW with Mr. RICHARDSON.
Mr. YOUNG of Pennsylvania with Mr. BENTON.
Mr. BARNEY with Mr. TODD.
Mr. BARROWS with Mr. JETT.
Mr. ADAMS with Mr. CUMMINGS.
Mr. JOY with Mr. CARMACK.

For this day:

Mr. DOLLIVER with Mr. COCHRAN of Missouri.
Mr. EDDY with Mr. GREEN.
Mr. FLETCHER with Mr. HENRY of Texas.
Mr. HENDERSON with Mr. MCMILLIN.
Mr. TAWNEY with Mr. SLAYDEN.
Mr. TONGUE with Mr. RIXEY.
Mr. WEYMOUTH with Mr. ZENOR.
Mr. FARIS with Mr. MAGUIRE.
Mr. LOW with Mr. TALBERT.
Mr. BINGHAM with Mr. DOCKERY.
Mr. BRUMM with Mr. MCALEER.

Mr. HENRY of Texas. Mr. Speaker, I am paired with the gentleman from Minnesota, Mr. FLETCHER. Having voted in the affirmative on this question, I desire to withdraw my vote and to be recorded present.

Mr. CLARDY. Mr. Speaker, I am paired with the gentleman from Connecticut, Mr. HENRY. Having voted in the affirmative on this question, I desire to withdraw my vote and to be recorded present.

Mr. POWERS. I have a general pair with the gentleman from Tennessee, Mr. GAINES, but he is present and voted, and I desire to change my vote from "present" to "no."

Mr. MCMILLIN. I desire to know if I am recorded as voting.

The SPEAKER. The gentleman is recorded in the affirmative.

Mr. MCMILLIN. I desire to withdraw my vote, as I am paired with the gentleman from Iowa, Mr. HENDERSON.

Mr. JETT. Mr. Speaker, I am paired with the gentleman from Massachusetts, Mr. BARROWS. Having voted in the affirmative, I desire to withdraw my vote and to be recorded as present.

Mr. KING. I have a general pair with the gentleman from New Hampshire, Mr. CLARKE. I desire to withdraw my vote and to be recorded as present.

Mr. SAYERS. I am paired with the gentleman from New Jersey, Mr. PITNEY. Having voted in the affirmative on this question, I desire to withdraw my vote and to be marked present.

Mr. WHEELER of Kentucky. I am paired with the gentleman from Iowa, Mr. HAGER. Having voted in the affirmative on this question, I desire to withdraw my vote and to be recorded as present.

Mr. DOCKERY. I am paired with the gentleman from Pennsylvania, Mr. BINGHAM. I desire to be recorded as present.

Mr. ROBB. I am paired with the gentleman from Ohio, Mr. KERR. I desire to withdraw my affirmative vote and to be recorded as present.

Mr. RICHARDSON. I am paired with the gentleman from Pennsylvania, Mr. GROW. I desire to withdraw my affirmative vote and to be recorded as present.

Mr. FLEMING. Mr. Speaker, I voted "no" under the impression that the question submitted to the House was the one first offered by the gentleman from Kentucky [Mr. SETTLE], which was to strike out certain words which were supposed to be in the Journal, but which, upon examination, I found were not in the Journal. I am now informed by the gentleman that while I was temporarily engaged otherwise he changed his motion, and simply moved to add to the statement already in the Journal the statement that the adjournment was announced by the Speaker to be for three days, in accordance with the rule. I therefore ask to change my vote from "no" to "aye," as I misunderstood the question.

The SPEAKER. The Clerk will call the gentleman's name.

The Clerk called the name of Mr. FLEMING, and he voted "aye."

Mr. WEAVER. I understood that I was paired with the gentleman from Ohio, Mr. BRENNER, but I understand that he is paired with the gentleman from Ohio, Mr. WHITE. Such being the case, I desire to withdraw my answer of "present," and to vote "no."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the approval of the Journal.

The Journal was approved.

SWEARING IN OF A MEMBER.

The SPEAKER laid before the House the certificate of the election of Hon. Edwin C. Burleigh, to fill the vacancy caused by the death of Hon. Seth L. Milliken. The certificate was read.

Mr. DINGLEY. Mr. Speaker, I desire to announce the presence of the Hon. Edwin C. Burleigh, who is ready to take the oath of office.

Mr. Burleigh then came forward, and took the oath prescribed by law.

MESSAGE FROM THE PRESIDENT.

A message in writing from the President of the United States was communicated to the House of Representatives by Mr. PRUDEN, one of his secretaries, who also announced that the President had approved and signed bill and joint resolutions of the following titles:

On June 7, 1897:

An act (H. R. 15) making appropriations for the current and contingent expenses of the Indian Department and for fulfilling treaty stipulations with various Indian tribes for the fiscal year ending June 30, 1898, and for other purposes.

On June 15, 1897:

Joint resolution (H. Res. 64) relating to the payment of salaries in the consular service; and

Joint resolution (H. Res. 61) to provide for the immediate repair of Dry Dock No. 3, at the New York Navy-Yard.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. PLATT, one of its clerks, announced that the Senate had passed joint resolution of the following title; in which the concurrence of the House was requested:

Joint resolution (S. R. 52) directing the Secretary of War to issue tents for the use of the Grand Army Encampment, at Leavenworth, Kans.

PERSONAL PRIVILEGE.

Mr. KNOWLES. Mr. Speaker, I rise to a question of personal privilege, one involving my good name and my character for truth and veracity. I want to say that if it only involved myself, I would not trouble this House with it. I send to the Clerk's desk a clipping from the Associated Press dispatches of June 22, which was published in the Washington Post of that date, and ask that it be read and printed in the RECORD.

The Clerk read as follows:

BATEMAN'S SHOT AT BRYAN—HE DECLARES THE RECENT CANDIDATE GUILTY OF BRIBERY AND FORGERY.

LEWISTON, ME., *June 21.*

Prof. L. C. Bateman, of Auburn, who was the candidate of the People's Party of Maine for governor last year, and who is a leader of the middle-of-the-road forces in this State, to-day published an attack on William J. Bryan. Professor Bateman says that Populist Congressman FREEMAN KNOWLES, of South Dakota, while on his recent trip to his old home in Skowhegan, Me., gave out the information that Mr. Bryan's recent gift of $1,500 to the Populist national committee was made with the distinct understanding that no action against fusion should be taken by the People's Party before the next national convention.

This, Professor Bateman says, is nothing more nor less than direct bribery.

Mr. DINGLEY. I desire to raise the question as to whether this presents a question of personal privilege. It does not affect the relation of a member to the House, or any conduct in the House.

The SPEAKER. The gentleman has not yet stated his case, but has only made a preliminary statement.

Mr. KNOWLES. Mr. Speaker, I pronounce that statement a willful and malicious falsehood, made out of whole cloth, without the least shadow of truth or foundation.

Mr. DINGLEY. Mr. Speaker, I have no objection to the gentleman making any personal statement, but I do not care to have it taken as a precedent that this raises a question of personal privilege which of right may be made in the House. Certainly the business of the House ought not to be interfered with by matters that have no relation to the business of the House. As to any controversy between the gentleman from South Dakota and Mr. Bryan or Mr. Bateman, of Maine, I do not think it concerns the affairs of this House or its conduct at all. The newspapers or anybody may hire a hall. [Laughter on the Republican side.]

Mr. KNOWLES. You will see, Mr. Speaker, that this raises a direct issue between myself and Mr. Bateman, and between myself as "a member of Congress" and Mr. Bateman; and therefore I think it is nothing but just to myself that I have an opportunity to refute this slander.

The SPEAKER. How is it a matter between the gentleman referred to and "a member of Congress?"

Mr. KNOWLES. Because I am pointed out there as "a member of Congress" and as making that statement, which is as false as hell [laughter]; and I have not been guilty of that statement. I will not detain the House long, but I wish to say that I wrote to Mr. L. B. Talbot, chairman of the Populist committee of Somerset County, Me., for a statement as to the truth or falsity of Mr. Bateman's statement, and I desire to have this letter of mine to him and his letter in reply read and printed in the RECORD.

Mr. DINGLEY. Mr. Speaker, I must object to the RECORD being used for such a purpose. Private controversies having no relation to the conduct of a member of this House ought not to be printed in the RECORD.

The SPEAKER. The Chair will hear the gentleman from South Dakota upon the propriety of this as a question of personal privilege to be disposed of in the House. If the gentleman desires to make a personal explanation, the Chair will submit it to the House for unanimous consent.

Mr. KNOWLES. I should like the House to give me unanimous consent.

The SPEAKER. The gentleman from South Dakota asks unanimous consent that he may be allowed to make a personal explanation. Is there objection?

Mr. DINGLEY. Well, Mr. Speaker, I think we should have some limitation upon this.

Mr. GROSVENOR. I should ask the gentleman from Maine, Does not this involve the question of putting campaign material in the RECORD for the purpose of keeping the "middle of the road" Populists off the track of those on the side of the road? If so, I shall object.

Mr. KNOWLES. I say to the gentleman that there is nothing of a campaign character in these letters at all. They are simply private letters which refute the statement of Mr. Bateman and prove the truth of what I have asserted here to-day. There is nothing of a campaign nature in it.

The SPEAKER. Is there objection to the request of the gentleman that he be permitted to make a personal explanation? [After a pause.] The Chair hears no objection.

The Clerk read as follows:

HOUSE OF REPRESENTATIVES UNITED STATES,
Washington, D. C., June 23, 1897.

DEAR SIR: The inclosed Associated Press dispatch appeared in the Washington Post this morning. I would like to ask you how such an infamous falsehood could possibly have been circulated? Did I say anything of the kind? On the contrary, did I not say that our committee had refused to accept any portion of the royalty of Mr. Bryan's book? How did it come that my words should be exactly reversed? Did Bateman manufacture this out of whole cloth, or was it reported to him by our enemies who seem so much interested in dividing our forces? It must be a desperate cause which necessitates such tactics. I trust you will not permit me to remain under this slander.

Very respectfully, yours,

FREEMAN KNOWLES.

L. B. TALBOT, Esq.,
Chairman Populist Committee of Somerset County, Skowhegan, Me.

SKOWHEGAN, ME., *June 25, 1897.*

DEAR FRIEND KNOWLES: Yours of the 23d at hand. Words fail to express my surprise, as I read that same dispatch in yesterday's papers.

As soon as I received your note, I at once began to inquire and found out at once how it all came about. You perhaps remember that after you spoke in Coburn Hall I introduced you to a man named George Hapgood, and that he asked you what you proposed to do as a national body. You told him that it was too soon to say anything and that the understanding was that the party "should not commit itself before the next national convention."

Now Hapgood is a friend of years standing with Bateman, and he wrote to him expressing his pleasure at your efforts for us here, and how you had presented our views before the business men. Bateman wanted to know if you had said anything concerning the national policy of the party. From that came in a letter the statement of Hapgood to Bateman that you had not expressed yourself, but had made the statement that the Populists should not commit themselves before the next national convention. Bateman knowingly and maliciously twisted this to make what he did with that statement.

I therefore, after consulting Hapgood and taking down his very words, accuse L. C. Bateman of downright falsehood.

Hapgood is a fine fellow and a true Populist.

With much regret, yours,

L. B. TALBOT.

Mr. KNOWLES. Mr. Speaker, while that letter clears me of the charge and brands Mr. Bateman as a contemptible liar, I want to say that it does not do me justice. What I did say was this. I said: The People's Party was going right along about its business, preaching the doctrine laid down in the St. Louis platform, and that they would continue to do that until the next national convention assembled, which is the only authority competent to change that platform or to decide what the issues shall be upon which the next battle shall be fought. I further stated that Mr. Bryan had tendered to the Populist national committee $1,500 from the proceeds of the sale of his book; that this tender had been made in good faith, absolutely free from all or any conditions except that it was to be used for the propagation of literature upon the financial question, but that the chairman of the national committee, after consulting with the Populist Congressional caucus, had declined to accept the funds thus tendered.

Mr. Bryan had announced that he would distribute one-half his profits from the sale of the book among the committees of the three parties which supported him, in the ratio of the vote cast, and this refusal of the Populist national committee to accept the portion assigned to them left matters in a somewhat awkward position. Mr. Bryan thereupon deposited the money with Senator ALLEN as a citizen of his own State, subject to further order, and there it remains to-day. The national committee did not and has not accepted a dollar of the fund, and I never made any such statement nor thought of any such thing. That is all I have to say.

Mr. TERRY. Mr. Speaker——

Mr. RIDGELY. Mr. Speaker——

IMMIGRATION STATION, ELLIS ISLAND, NEW YORK.

The SPEAKER laid before the House the following message from the President of the United States; which was read, referred to the Committee on Appropriations, and ordered to be printed:

To the Congress of the United States:

On the 15th ultimo all the buildings of the immigration station at Ellis Island, New York, excepting the heating plant and lighting apparatus, were destroyed by fire.

I transmit herewith a letter from the Secretary of the Treasury, which states the fact and explains the need of rebuilding.

In order that there may be no delay in this important work, I recommend that an appropriation be made at once of $300,000, the sum estimated by the Secretary of the Treasury as required for this purpose.

WILLIAM MCKINLEY.

EXECUTIVE MANSION, *July 1, 1897.*

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

A bill (S. 250) for the relief of Charles P. Chouteau, survivor of Chouteau, Harrison & Valle—to the Committee on War Claims, when appointed.

A bill (S. 708) for the relief of Albert E. Redstone—to the Committee on Claims, when appointed.

A bill (S. 977) for the relief of Fanny B. Randolph and Dora L. Stark—to the Committee on War Claims, when appointed.

A bill (S. 936) for the relief of C. B. Bryan & Co.—to the Committee on Claims, when appointed.

A bill (S. 1464) for the relief of Christopher Schmidt—to the Committee on Claims, when appointed.

A bill (S. 1194) for the relief of the estate of Richard Lawson—to the Committee on Claims, when appointed.

A bill (S. 438) for the relief of the estate of Charles M. Roberts, deceased—to the Committee on Claims, when appointed.

Concurrent resolution—

Resolved by the Senate (the House of Representatives concurring), That the President of the United States be, and he is hereby, requested to invite, by proclamation or otherwise, as he may deem most proper, foreign nations to make exhibits at the Transmississippi and International Exposition to be held at the city of Omaha, in the State of Nebraska, from the 1st day of June to the 1st day of November, A. D. 1898—

To the Committee on Foreign Affairs, when appointed.

NEW ENGLAND DISTILLING COMPANY.

Mr. EVANS. Mr. Speaker, I desire to call up for consideration the report of the Committee on Ways and Means on the bill (H. R. 3486) to allow the distillery of the New England Distilling Company and the rectifying house of Mullins & Crigler, both situated in Covington, Ky., to be operated within 600 feet of each other.

The bill was read, as follows:

Be it enacted, etc., That the distillery of the New England Distilling Company and the rectifying house of Mullins & Crigler, both situated in Covington, Ky., and having their respective premises separated from each other by a distance of only 548 feet, in a direct line, may, to avoid special hardship to the proprietors of said premises, both continue to be operated as now situated, and in like manner as they have been operated, in the belief that the premises were duly separated according to law, for twelve years past, notwithstanding that the said premises are not distant from each other full 600 feet in a direct line as required by the general statutes in that regard.

Mr. EVANS. Mr. Speaker, it is the unanimous opinion of the committee that this bill ought to pass, and ought to pass speedily. The facts are these: The statute provides that no rectifying establishment shall be constructed or operated nearer to a distillery than 600 feet. Away back in May, 1885, it was supposed that the required distance existed between the distillery and the rectifying establishment mentioned in this bill; but a few days ago it was discovered that the distance between them is only 548 feet. This state of things has continued for twelve years, without any fault on the part of either of the persons interested. By the action of the internal-revenue officers the bonds have been approved each year, and large plants have been constructed and operated there.

Now, if the recent discovery of the fact that the distance between this distillery and this rectifying house is less than the 600 feet prescribed by the statute were to prevent the approval of the bonds of the distillery, the House can see that a great hardship would be inflicted upon the owners of these establishments. The Secretary of the Treasury recommends the passage of this bill. The Commissioner of Internal Revenue has set forth the facts upon which justice demands the passage of the bill, and it is the unanimous opinion of the Committee on Ways and Means that it ought to pass.

The bill was ordered to be engrossed and read a third time; and it was accordingly read the third time, and passed.

On motion of Mr. EVANS, the motion to reconsider the vote by which the bill was passed was laid on the table.

ORDER OF BUSINESS.

Mr. DINGLEY. Mr. Speaker——

Mr. TERRY. Mr. Speaker——

Mr. DINGLEY. Mr. Speaker, I move that the House do now adjourn.

Mr. BAILEY. Mr. Speaker, I desire to inquire if there is not a special order setting apart this day——

Mr. DINGLEY (interposing). That order is for a week from to-day.

The question was taken on the motion to adjourn; and the Speaker declared that the ayes seemed to have it.

Mr. BAILEY. I ask for a division.

The House divided; and there were—ayes 105, noes 92.

So the motion was agreed to; and the House accordingly (at 1 o'clock and 28 minutes p. m.), in pursuance of the order heretofore adopted, adjourned until Monday next, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, the following executive communications were taken from the Speaker's table and referred as follows:

A letter from the Secretary of War, transmitting, in response to concurrent resolution No. 9, Fifty-fifth Congress, a letter from the Chief of Engineers, with copy of a report on the present condition of Cumberland Sound, and its relation to the commerce of Fernandina—to the Committee on Rivers and Harbors, and ordered to be printed.

A letter from the Attorney-General, relating to certain amounts for the payment of outstanding claims in North Dakota, New Mexico, and Idaho—to the Committee on Appropriations, and ordered to be printed.

A letter from the Secretary of War, calling attention to certain desired changes in House Document No. 67, relating to the issue of a certain duplicate check—to the Committee on Claims, and ordered to be printed.

A letter from the Secretary of the Interior, transmitting a copy of a communication from the Commissioner of Indian Affairs and accompanying copy of a memorial from the Wichita and affiliated bands of Indians—to the Committee on Indian Affairs, and ordered to be printed.

A message from the President, transmitting a letter from the Secretary of the Treasury, and recommending an appropriation for rebuilding the immigrant station at Ellis Island, New York—to the Committee on Appropriations, and ordered to be printed.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS INTRODUCED.

Under clause 3 of Rule XXII, bills, resolutions, and memorials of the following titles were introduced and severally referred as follows:

By Mr. ROBBINS: A bill (H. R. 3587) to make an appropriation for the improvement of the Youghiogheny River in the State of Pennsylvania, and for other purposes—to the Committee on Rivers and Harbors.

By Mr. GRAFF: A bill (H. R. 3588) to provide for the purchase of a site and the erection of a public building thereon at Pekin, in the State of Illinois—to the Committee on Public Buildings and Grounds.

By Mr. LACEY: A bill (H. R. 3589) to extend the powers and duties of the Commission of Fish and Fisheries to include game birds and other wild birds useful to man—to the Committee on the Merchant Marine and Fisheries.

By Mr. BRUNDIDGE: A bill (H. R. 3590) to increase the number of officers of the Army to be detailed to colleges—to the Committee on Military Affairs.

By Mr. SHAFROTH: A bill (H. R. 3591) to appropriate $100,000 for sinking artesian wells in the eastern portion of the State of Colorado—to the Committee on Irrigation of Arid Lands.

By Mr. OSBORNE: A bill (H. R. 3592) to provide for the purchase of a site and the erection of a public building thereon at Evanston, in the State of Wyoming—to the Committee on Public Buildings and Grounds.

By Mr. HAWLEY: A bill (H. R. 3593) making appropriation for the improvement of the Brazos River—to the Committee on Rivers and Harbors.

By Mr. STARK: A bill (H. R. 3594) to amend an act entitled "An act to regulate commerce," approved February 4, 1887—to the Committee on Interstate and Foreign Commerce.

By Mr. STEPHENS of Texas: A joint resolution (H. Res. 71) proposing an amendment to the Constitution of the United States authorizing the levy of a tax on incomes and inheritances—to the Committee on the Judiciary.

By Mr. DALZELL: A resolution (House Res. No. 64) providing for consideration of House bill No. 379, "to provide revenue for the Government and to encourage the industries of the United States"—to the Committee on Rules.

By Mr. ARNOLD: A memorial of the Pennsylvania legislature, for appropriation for Paris Exposition in 1900—to the Committee on Appropriations.

By Mr. DALZELL: A memorial of the Pennsylvania legislature, for appropriation for Paris Exposition in 1900—to the Committee on Appropriations.

By Mr. ADAMS: A memorial of the legislature of the State of Pennsylvania, relative to the Paris Exposition in 1900—to the Committee on Appropriations.

By Mr. YOUNG of Pennsylvania: A memorial of the legislature of the State of Pennsylvania, relative to the Paris Exposition in 1900—to the Committee on Appropriations.

By Mr. OLMSTED: A memorial of the Pennsylvania legislature, relative to an appropriation for the Paris Exposition in 1900—to the Committee on Appropriations.

PRIVATE BILLS AND RESOLUTIONS INTRODUCED.

Under clause 1 of Rule XXII, private bills and resolutions of the following titles were introduced and severally referred as follows:

By Mr. ADAMSON: A bill (H. R. 3595) granting a pension to Mrs. Penny F. Stevens—to the Committee on Pensions.

Also, a bill (H. R. 3596) granting a pension to Mrs. Bettie Gresham—to the Committee on Pensions.

Also, a bill (H. R. 3597) granting a pension to Thomas J. Morman—to the Committee on Pensions.

Also, a bill (H. R. 3598) granting a pension to Henrietta Fowler—to the Committee on Pensions.

By Mr. BELL: A bill (H. R. 3599) for the relief of Joseph B. Presdee—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3600) for the relief of Henry Hinckley—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3601) for the relief of Elizabeth Felton—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3602) for the relief of D. P. Owen—to the Committee on Invalid Pensions.

By Mr. BOTKIN: A bill (H. R. 3603) granting a pension to Francis M. Moore—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3604) granting a pension to Oscar Reed—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3605) for the relief of James M. Campbell—to the Committee on Military Affairs.

By Mr. DE VRIES: A bill (H. R. 3606) for the relief of the citizens of the city of Auburn, Cal., and quieting title to lands therein—to the Committee on Private Land Claims.

By Mr. DOLLIVER: A bill (H. R. 3607) to pension Mrs. Ann Martin—to the Committee on Invalid Pensions.

By Mr. KETCHAM: A bill (H. R. 3608) removing the charge of desertion from the record of Sylvester H. Mase, a musician, Fifty-sixth New York Infantry—to the Committee on Military Affairs.

By Mr. KULP: A bill (H. R. 3609) for the relief of Samuel C. Krickbaum, of Benton, Pa.—to the Committee on Invalid Pensions.

By Mr. LACEY: A bill (H. R. 3610) granting a pension to Charles Blitz—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3611) to increase the pension of Jesse R. K. Lamb, Company D, Seventh United States Infantry—to the Committee on Pensions.

Also, a bill (H. R. 3612) to increase the pension of Thomas D. Porter—to the Committee on Invalid Pensions.

By Mr. MOON: A bill (H. R. 3613) for relief of Hugh J. Brady—to the Committee on Military Affairs.

By Mr. OSBORNE: A bill (H. R. 3614) granting an increase of pension to John F. Crawford—to the Committee on Invalid Pensions.

By Mr. SHAFROTH: A bill (H. R. 3615) for the relief of Mrs. Ellen Sexton—to the Committee on Claims.

By Mr. SHATTUC: A bill (H. R. 3616) for the relief of Robert A. Young—to the Committee on Invalid Pensions.

By Mr. SIMS: A bill (H. R. 3617) for the relief of Thomas Cary—to the Committee on Military Affairs.

Also, a bill (H. R. 3618) for the relief of William Christenberry—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3619) for the relief of E. A. Clark—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3620) to amend the military record of John K. Skinner—to the Committee on Military Affairs.

By Mr. SULZER: A bill (H. R. 3621) for pension to Mary Ann Sullivan—to the Committee on Invalid Pensions.

By Mr. TAYLER of Ohio: A bill (H. R. 3622) granting a pension to Mary A. Benchat—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3623) granting a pension to Elizabeth Mayes—to the Committee on Invalid Pensions.

By Mr. BABCOCK: A bill (H. R. 3624) granting a pension to Pauline Robbins, of Sandusky, Sauk County, Wis.—to the Committee on Invalid Pensions.

By Mr. GRAFF: A bill (H. R. 3625) to increase the pension of Andrew R. Jones—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3626) granting a pension to Lemuel Shook—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3627) to remove the charge of desertion from the military record of Joseph Moll—to the Committee on Military Affairs.

Also, a bill (H. R. 3628) granting a pension to Elizabeth Tinkham—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3629) to remove the charge of desertion from the military record of Robert White—to the Committee on Military Affairs.

Also, a bill (H. R. 3630) for the relief of Thomas B. Briggs—to the Committee on Military Affairs.

Also, a bill (H. R. 3631) granting a pension to Ellen Miles Brown—to the Committee on Invalid Pensions.

Also, a bill (H. R. 3632) for the relief of William H. Bentley—to the Committee on Military Affairs.

Also, a bill (H. R. 3633) to remove the charge of desertion from the military record of John D. Brining, of Canton, Ill.—to the Committee on Military Affairs.

Also, a bill (H. R. 3634) to remove the charge of desertion from the military record of Charles R. Bortle—to the Committee on Military Affairs.

Also, a bill (H. R. 3635) granting a pension to Stephen Jackson, of Glasford, Ill—to the Committee on Invalid Pensions.

By Mr. STURTEVANT: A bill (H. R. 3636) granting a pension to Mrs. Nellie Shaw—to the Committee on Invalid Pensions.

By Mr. RIDGELY: A bill (H. R. 3637) for the relief of David Hogan—to the Committee on War Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, the following petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. ADAMSON: Resolutions of the Board of Trade of Columbus, Ga., favoring the enlargement and improvement of the United States building at Columbus—to the Committee on Rules.

By Mr. BREWSTER: Petition of Mrs. Margaret Roberts, guardian of Cyrus Roberts, to accompany House bill for his relief—to the Committee on Military Affairs.

By Mr. CAPRON: Petition of Charles Henry and other citizens of North Kingston, R. I., for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. DALZELL: Resolutions of the Travelers' Protective Association of America, remonstrating against the passage of a bill restricting the sale of railroad tickets—to the Committee on Interstate and Foreign Commerce.

By Mr. DANFORD: Petition of J. W. Hollingsworth and other citizens of St. Clairsville, Ohio, asking for the passage of a bill to further restrict immigration—to the Committee on Immigration and Naturalization.

By Mr. ERMENTROUT: Petitions of tea merchants of Philadelphia, Pa., and Baltimore, Md., asking for a specific duty on tea—to the Committee on Ways and Means.

Also, remonstrance of E. & A. Huyett, of Birdsboro, Pa., against increasing the rate of duty on tanned skins for morocco—to the Committee on Ways and Means.

Also, petition of the wholesale grocers and dealers of Chicago, Ill.; also an indorsement of said petition by the Commercial Exchange of Chicago, asking for a duty on tea—to the Committee on Ways and Means.

Also, petition of Lawford Bros., of Baltimore, Md., asking that sheep dip be placed on the free list—to the Committee on Ways and Means.

By Mr. HILBORN: Petitions of T. G. Baty, F. M. Gordon, and other citizens of Sacramento, Cal., favoring the passage of a bill for a more rigid restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. KIRKPATRICK: Petition of Elias Markley and 87 other citizens of Lehighton, Pa., praying for the passage of a bill to restrict immigration—to the Committee on Immigration and Naturalization.

By Mr. LACEY: Petition of Thomas D. Porter, late of Company C, Twenty-fifth Illinois Volunteer Infantry, and Company A, Seventh Illinois Cavalry, for an increase of pension—to the Committee on Invalid Pensions.

By Mr. MILLER: Petition of G. W. Hardman and other citizens of Mount Zion, W. Va., praying for the further restriction of immigration—to the Committee on Immigration and Naturalization.

By Mr. OLMSTED: Petitions of Joseph E. Miller and others, L. C. Baker and others, and George A. Saltsman and others, all citizens of Harrisburg, Pa., praying for the passage of a law to further restrict immigration—to the Committee on Immigration and Naturalization.

By Mr. POWERS: Petition of the Congregational State Convention of Vermont, praying for the passage of the bill to prohibit kinetoscopic reproductions of prize fights—to the Committee on Interstate and Foreign Commerce.

Also, remonstrance of the C. A. Hibbard Boot and Shoe Company, of Burlington, Vt., against increasing the duty on tanned skins for morocco—to the Committee on Ways and Means.

By Mr. SHATTUC: Paper to accompany House bill granting an increase of pension to Robert A. Young—to the Committee on Invalid Pensions.

SENATE.

FRIDAY, *July 2, 1897.*

The Senate met at 11 o'clock a. m.

Prayer by Rev. HUGH JOHNSTON, D. D., of the city of Washington.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on motion of Mr. QUAY, and by unanimous consent, the further reading was dispensed with.

HARBOR AT BRUNSWICK, GA.

The VICE-PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting a report, with accompanying map, of a survey of the outer bar of Brunswick, Ga., made by Lieut. R. G. Peck, United States Navy, assistant, Coast and Geodetic Survey, pursuant to the provisions of the item in the river and harbor act of June 3, 1896; which, with the accompanying papers, was referred to the Committee on Commerce, and ordered to be printed.

NORTHERN LIBERTY MARKET CLAIMS.

The VICE-PRESIDENT laid before the Senate the following communication from the Commissioners of the District of Columbia; which was read, and referred to the Committee on the District of Columbia:

OFFICE OF COMMISSIONERS OF DISTRICT OF COLUMBIA,
Washington, July 7, 1897.

SIR: The Commissioners of the District of Columbia have the honor to acknowledge receipt of an official copy of the resolution of the Senate, dated the 30th ultimo, requesting them to suspend, until further action of Congress, further proceedings under the act of Congress "to provide for the payment of certain claims against the District of Columbia by drawback certificates," approved January 6, 1897, known as the Northern Liberty Market claims, and will govern themselves accordingly.

Very respectfully, JOHN W. ROSS,
President Board of Commissioners District of Columbia.

Hon. GARRET A. HOBART,
President of the Senate.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. W. J. BROWNING, its Chief Clerk, announced that the House had passed a bill (H. R. 3486) to allow the distillery of the New England Distilling Company and the rectifying house of Mullins & Crigler, both situated in Covington, Ky., to be operated within 600 feet of each other; in which it requested the concurrence of the Senate.

PETITIONS AND MEMORIALS.

Mr. BERRY presented a memorial of the Arkansas Division, Travelers' Protective Association of America, of Little Rock, Ark., remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which was referred to the Committee on Interstate Commerce.

Mr. GALLINGER presented the petition of Wallace J. Knowles and 51 other citizens of Seabrook, N. H., praying for the enactment of legislation for a more rigid restriction of immigration; which was ordered to lie on the table.

Mr. SEWELL presented the petition of George M. Ballard and 35 other citizens of Newark, N. J., praying for the early passage of the pending tariff bill; which was ordered to lie on the table.

Mr. COCKRELL presented the memorial of F. M. Montgomery and 52 other citizens of Missouri, and the memorial of J. Brownson Wallace and 19 other citizens of Missouri, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. COCKRELL. I present resolutions unanimously adopted at the annual meeting of the American Medical Association in Philadelphia June 2, 1897, remonstrating against the passage of Senate bill No. 1063, for the further prevention of cruelty to animals in the District of Columbia. I ask that the memorial lie on the table and that it be printed as a document.

The VICE-PRESIDENT. Without objection, that will be the order.

Mr. GALLINGER. I will inquire as to what is the memorial particularly?

Mr. COCKRELL. They are resolutions opposing the vivisection bill reported by the Senator.

Mr. GALLINGER. Resolutions adopted by a medical association?

Mr. COCKRELL. Adopted by the American Medical Association at Philadelphia.

Mr. GALLINGER. In this connection, I desire to state that I entered a mild protest a while ago against the printing of numerous documents relating to this one bill. We have, I think, four or five different documents already printed. Some of them are in severe and unjust criticism of the committee, stating absolute untruths regarding the action of the committee.

I do not object to the printing of the memorial, and yet it does seem to me rather strange that when a committee has considered a matter carefully, giving a long hearing to both sides, permitting the opponents of the bill to print 300 pages in the report of statements in opposition, that they should then flood the Senate with memorials, resolutions, and protests, and that we should print them at the expense of the Government.

Mr. COCKRELL. This memorial consists of only two or three pages, and it is in appropriate form.

The VICE-PRESIDENT. The memorial will be printed as a document, in the absence of objection, and referred to the Committee on the District of Columbia.

Mr. FAIRBANKS presented sundry memorials of citizens of Indiana, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. PENROSE presented a memorial of 52 citizens of Harrisburg, Pa., and a memorial of 64 citizens of Coatesville, Pa., remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

He also presented a petition of the legislature of Pennsylvania, praying for the enactment of legislation appropriating a sufficient sum to insure a dignified and creditable exhibit of the industries and resources of the United States at the Paris Exposition in 1900; which was ordered to lie on the table.

Mr. HANNA presented sundry memorials of citizens of Ohio, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. BUTLER presented a petition of the Gulf Coast Farmers' Alliance and Industrial Union No. 4030, of Texas, praying for the passage of Senate bill No. 1728, to aid in the construction of a railroad and telephone line from the Missouri River to the Pacific Ocean; which was referred to the Committee on Pacific Railroads, and ordered to be printed in the RECORD, as follows:

GALVESTON, TEX., *June 26, 1897.*

[Resolution of Gulf Coast Farmers' Alliance and Industrial Union No. 4030, of Texas.]

Whereas Hon. MARION BUTLER, Senator in the United States Senate, has introduced Senate bill 1728, "An act to aid in the construction of a railroad and telephone line from the Missouri River to the Pacific Ocean;" and

Whereas this act will be of enormous benefit to our people and settle the Pacific Railroad muddle: Therefore,

Be it resolved, That we heartily indorse Senator BUTLER'S actions in Congress and indorse his bill No. 1728, and request our Representatives now in Congress to use all honorable means and help to pass said bill, as it is for the best interest of our American people.

F. KEHLER,
T. BOEHL,
National Legislative Committee, G. C. F. All., 4030, of Texas.

Mr. McMILLAN presented memorials of G. E. Hubbon and 267 other citizens; of the Detroit Retail Clerks' Union, No. 168; of the Detroit Iron Molders' Union, No. 244; of the Detroit Iron Molders' Union, No. 31; the Detroit Waiters' Union, No. 21; the Detroit International Brotherhood of Bookbinders, No. 20; the Lansing Trades and Labor Council; the Jackson Miners' Protective Association, No. 6395; the Bay City Journeymen Barbers' Union, No. 18; the Bay City Central Trades Union; the Albion Iron Molders' Union, No. 104; the Grand Rapids (Mich.) Federation of Labor; the Detroit Broom Makers' Union, No. 2; the Detroit Painters and Decorators' Union, No. 37; the Lansing City Lodge, No. 384; the Detroit Amalgamated Sheet Metal Workers' Local Union, No. 106; the Saginaw Retail Clerks' Union, No. 65; the National Mine, Winthrop Mine Workers' Union, No. 7; the National Longshoremen's Association, No. 44; the Jackson Iron Molders' Union, No. 242; the Iron Mountain Iron Ore Mine Workers' Union, No. 2; the Munising International Longshoremen's Union, No. 62; the Menominee International Longshoremen's Association, No. 69; the Alpena Long Shore Union, No. 7; the Grand Rapids Grocers' Clerks Union; the Flint Federal Labor Union, No. 6803; the Marquette Longshoremen's Union, No. 11; the Marquette International Longshoremen's Association, No 59; the Grand Rapids Salesmen's Union, No. 18; the Ishpeming Mine Workers' Union, No. 8; the Port Huron Cigar Makers' Union, No. 368; the Marquette Retail Clerks' National Protective Association, No. 131; the Tawas City International Longshoremen's Union, No. 14; the Cadillac Cigar Makers' Union, No. 393; the Lansing Typographical Union, No. 72; the Port Huron Typographical Union, No. 300; the Detroit International Association of Machinists; the Port Huron Barbers' Union, No. 188; the Muskegon Trades and Labor Assembly; the Detroit Metal Polishers, Buffers, Platers, and Brass Workers' Union, No. 1; the Jackson City Lodge, No. 95; the Detroit Cigar Packers' International Union, No. 284; the East Jordan Independent Laborers' Association, No. 24; the Detroit River Lodge, No. 2, American Association of Iron and Steel Workers; the Grand Marias Longshoremen's Association, No. 42; the Grand Rapids Coopers' Union; the Bay City Cigar Makers' Union, No. 184; the Grand Rapids Brewers' Local Union, No. 10; the Grand Rapids Local Union, No. 26; the Escanaba Cigar Makers' Union, No. 268; the Owosso Cigar Makers' Union, No. 167; the Detroit Pattern Makers' Association; the Detroit Machine Wood Workers' Local Union, No. 41; the Grand Rapids Lodge, No. 191, Independent Association of Machinists; the Grand Rapids Bricklayers' Union, No. 1; the Norway Mine Workers' Union; the Detroit Iron Molders' Union, No. 244; the Ludington Vessel Loaders' Union; the Negannee Federal Labor Union, No. 6736; the Detroit Carpenters' Union, No. 19; the Detroit Longshoremen's Union, No. 10; the Port Huron Longshoremen's Association, No. 30; the Muskegon Typographical Union, No. 168; the Bay City Longshoremen's Union, No. 25, and the Detroit Theatrical Protective Union, No. 14, all in the State of Michigan, remonstrating against the enactment of legislation intended to destroy the present system of ticket brokerage; which were referred to the Committee on Interstate Commerce.

Mr. TURPIE presented a petition of Star Lodge, No. 457, Brotherhood of Locomotive Firemen, of Seymour, Ind., praying for the passage of the so-called Foraker bill to amend the act to regulate commerce; which was referred to the Committee on Interstate Commerce.

Mr. ELKINS presented a petition of sundry citizens of Parkersburg, W. Va., and a petition of sundry citizens of Mount Zion,

W. Va., praying for the early passage of the pending tariff bill; which were ordered to lie on the table.

GEOLOGICAL SURVEY REPORTS.

Mr. ELKINS. I ask leave to lay before the Senate and have printed a report by the Director of the United States Geological Survey. I send the document to the desk. It is in reply to the memorial of the legislature of Colorado relative to the earlier publication of the reports of the Geological Survey and the establishment of a bureau of mines. I ask that the report be printed for the information of the Senate.

Mr. FRYE. As a document?

Mr. ELKINS. Yes, as a document.

The VICE-PRESIDENT. Is there objection? The Chair hears none, and that will be the order.

REPORTS OF COMMITTEES.

Mr. HANNA, from the Committee on Pensions, to whom were referred the following bills, reported them severally without amendment, and submitted reports thereon:

A bill (S. 589) to increase the pension of Caroline V. English; and

A bill (S. 481) granting a pension to Mrs. Ann M. Madden.

Mr. BAKER, from the Committee on Pensions, to whom was referred the bill (S. 2291) granting an increase of pension to Elijah A. Gilbert, reported it with an amendment, and submitted a report thereon.

Mr. MCMILLAN, from the Committee on the District of Columbia, to whom was referred the bill (S. 1865) to extend the charter of the Franklin Insurance Company of the city of Washington, reported it without amendment, and submitted a report thereon.

He also, from the same committee, to whom was referred the bill (S. 921) to regulate the use of the public parks and improved reservations in the District of Columbia under the charge of the Chief of Engineers of the United States Army, reported it without amendment, and submitted a report thereon.

He also, from the same committee, to whom was referred the bill (S. 919) to incorporate the East Washington Heights Traction Railway Company of the District of Columbia, reported it without amendment.

He also, from the same committee, reported an amendment intended to be proposed to the general deficiency appropriation bill; which was ordered to be printed, and, with the accompanying papers, referred to the Committee on Appropriations.

CAPE CHARLES HARBOR IMPROVEMENT.

Mr. FRYE, from the Committee on Commerce, to whom was referred the concurrent resolution submitted by Mr. SEWELL on the 16th ultimo, reported it without amendment; and it was considered by unanimous consent, and agreed to, as follows:

Resolved by the Senate of the United States (the House of Representatives concurring), That the Secretary of War is hereby directed to prepare and submit plans and estimates for the further improvement of the harbor and approaches at Cape Charles City, Va., by the construction of a stone breakwater on the south side of the cut leading to Cape Charles Harbor similar to the breakwater which has just been completed on the north side; and for sundry dredging near Old Plantation Light in the cut leading to the harbor, thereby enabling vessels to go in and out of the harbor without danger or difficulty.

BILLS INTRODUCED.

Mr. ELKINS introduced a bill (S. 2321) for the relief of Daniel K. Shields; which was read twice by its title, and referred to the Committee on Military Affairs.

Mr. HOAR introduced a bill (S. 2322) granting a pension to Margaret M. Beardslee; which was read twice by its title, and referred to the Committee on Pensions.

Mr. FRYE introduced a bill (S. 2323) supplemental to the act of February 9, 1821, incorporating the Columbian College, in the District of Columbia, and the acts amendatory thereof; which was read twice by its title, and referred to the Committee on the District of Columbia.

He also introduced a bill (S. 2324) for the relief of the estate of George W. Lawrence; which was read twice by its title, and referred to the Committee on Claims.

Mr. CLARK introduced a bill (S. 2325) to lease the Industrial Home of Utah to the Salt Lake Free Kindergarten Association; which was read twice by its title, and referred to the Committee on Education and Labor.

Mr. TELLER introduced a bill (S. 2326) for the relief of persons who have filed declarations of intention to enter desert lands; which was read twice by its title, and referred to the Committee on Public Lands.

He also introduced a bill (S. 2327) for the relief of Thomas Rosbrugh; which was read twice by its title, and referred to the Committee on Public Lands.

He also introduced a bill (S. 2328) to aid the State of Colorado to support a school of mines; which was read twice by its title, and referred to the Committee on Public Lands.

He also introduced a bill (S. 2329) to regulate interstate traffic in wild game; which was read twice by its title, and referred to the Committee on Forest Reservations and the Protection of Game.

Mr. THURSTON introduced a bill (S. 2330) to prevent the monopolizing or engrossing of trade or commerce of any kind among the several States or with foreign nations, and providing penalties for breach of the provisions hereof and the method of enforcing the same; which was read twice by its title.

Mr. THURSTON. In introducing this bill, I desire to state that I claim no originality for it. It is a bill founded upon the idea first presented to the Senate in the amendment proposed by the Senator from Minnesota [Mr. NELSON]. I have considered the suggestion coming from the Senator from Minnesota to be so far worthy of the most serious consideration of the Senate and of the Committee on the Judiciary, that I have used it as a foundation for a proposed statute which I have carefully prepared, with some assistance; and I hope it will receive the careful attention of the committee and, later, of the Senate.

I move that the bill be referred to the Committee on the Judiciary.

The motion was agreed to.

Mr. ELKINS introduced a joint resolution (S. R. 58) for the prevention of the introduction and spread of contagious and infectious diseases into the United States; which was read twice by its title, and referred to the Committee on Public Health and National Quarantine.

Mr. KYLE introduced a joint resolution (S. R. 59) making an appropriation for the continuation and completion of river improvement work at Pierre and Fort Pierre, S. Dak.; which was read twice by its title, and referred to the Committee on Commerce.

PENSION EXAMINERS.

Mr. ALLEN. I submit a resolution for which I ask immediate consideration.

The resolution was read, as follows:

Resolved, That the Secretary of the Interior be, and he is hereby, directed to send to the Senate the names and residences and the political affiliations, if known, of the pension examiners in the field who were dismissed or discharged June 30, 1897, and the specific reasons for such action in each case; and also send to the Senate the names and addresses and political affiliations, if known, of such persons as were appointed to succeed them, and those among the latter who have at any time been soldiers in the Union Army.

Mr. GALLINGER. Let the resolution go over under the rule.

The VICE-PRESIDENT. Objection is made to its present consideration, and the resolution goes over.

MISSOURI RIVER IMPROVEMENTS.

Mr. KYLE submitted the following resolution; which was considered by unanimous consent, and agreed to:

Resolved, That the Secretary of War be directed to furnish the Senate with a copy of the special report of Capt. J. C. Sanford, of the United States Corps of Engineers, bearing date of June 26, 1897, and relating to improvements on the Missouri River at Pierre and Fort Pierre, S. Dak.

CUMBERLAND SOUND IMPROVEMENT.

Mr. PASCO. I reported yesterday, from the Committee on Commerce, the joint resolution (S. R. 57) making an appropriation of $50,000 for sluicing and dredging at the entrance of Cumberland Sound. I stated then that I would ask leave to file a written report this morning, which report I have now ready.

I was instructed by the committee to ask that the joint resolution receive immediate consideration. The necessity for the appropriation is owing to the fact that the old channel is closing up and shoaling, and a new channel is opening which needs immediate assistance. The matter was called to the attention of the War Department by a concurrent resolution of the two Houses, and a report was sent in favoring early action on the part of Congress. That report was last Tuesday referred to the Committee on Commerce. It was taken up yesterday, and the engineer in charge of the work was before the committee. The committee authorized the joint resolution to be reported, and it is important that it be now considered. I do not wish to take up the time of the Senate by entering into the particulars of the work.

The VICE-PRESIDENT. The Senator from Florida asks unanimous consent for the present consideration of the joint resolution indicated by him.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

The joint resolution was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. PASCO. I ask that the report be printed in the RECORD in connection with my remarks.

The VICE-PRESIDENT. That will be the order.

The report this day submitted by Mr. PASCO is as follows:

[Senate Report No. 370, Fifty-fifth Congress, first session.]

HARBOR OF CUMBERLAND SOUND.

Mr. PASCO, from the Committee on Commerce, submitted the following report, to accompany Senate resolution 57:

The Committee on Commerce, to whom was referred a communication from the Secretary of War relating to the present condition of the harbor of Cumberland Sound, between the States of Georgia and Florida, in response to

a concurrent resolution of the two Houses of Congress calling for information as to such harbor and asking whether any action is necessary to protect the entrance from being closed against the commerce which usually enters there, report as follows:

The Secretary transmits a letter from the Chief of Engineers upon the subject, with a report from Capt. O. M. Carter, who has had charge of the work.

This work was placed under the continuing-contract system by the river and harbor appropriation bill of the Fifty-fourth Congress, and the last appropriation that was made under the contract entered into by the Government under this law with the Atlantic Contracting Company of New York is due as the work proceeds and the funds are available to these contractors for building and extending the jetties already commenced, and no funds are at present available for other purposes.

The report shows that there has been a gradual shifting of the channel through the entrance to the Sound and a shoaling which seriously threatens the commerce of the port of Fernandina, which passes through this channel. The remedy proposed is to aid the formation of a new and short route parallel to the north jetty. The erosion of this new channel continues as the jetty is extended and raised, and in time an uninterrupted new north channel will be established, but in the meantime there should be a remedy for the danger which threatens the port by the shoaling and gradual closing of the old channel.

The report recommends an immediate appropriation of $500,000 to continue the jetty work under the existing contract, and an emergent appropriation of $50,000 for sluicing and dredging along the line of the new channel, so as to open it without delay, and afford prompt relief to the commerce, which has already suffered seriously.

The contractors who enter into this class of contracts are generally willing to go on with their work and wait for payment until appropriations are made, according to the provisions of the law and the terms of the contract.

The conduct of those who have entered into this contract leads to the belief that they will continue the work upon the jetties as they have done in the past, and the committee are not disposed to recommend the appropriation at the present time of a large sum which is not according to the terms of the law authorizing the continuing contract under which the work is progressing. But the great and manifest importance of the work justifies an effort to keep the harbor open, and the committee are of the opinion that this can be done by carrying out the recommendation contained in the report of the engineer in charge and of the Chief of Engineers providing a sufficient amount of money to open the new channel by doing the necessary dredging, as stated in the earlier part of this report.

The sum of $50,000 is required for this purpose, according to the engineer's report, and the committee have prepared a joint resolution appropriating this sum, or so much thereof as may be necessary, with the provision that the limit of cost, as already fixed by law, be not changed. This can be done under the present project, which includes an estimate of $150,000 for contingencies, and they recommend that this joint resolution do pass.

The communication from the Secretary of War is hereto attached as a part of this report.

[Senate Document No. 163, Fifty-fifth Congress, first session.]

WAR DEPARTMENT, *Washington, June 26, 1897.*

SIR: In response to concurrent resolution No. 9, Fifty-fifth Congress, first session, dated May 26, 1897, requesting "the Secretary of War to furnish the Congress with such information as he may have in his possession with reference to the present condition of the harbor of Cumberland Sound, and to inform the Congress whether any immediate action is necessary to protect the entrance from being closed against the commerce usually entering the port of Fernandina," I have the honor to transmit herewith a letter from the Chief of Engineers, dated June 25, 1897, together with a copy of a report on the subject from Capt. O. M. Carter, Corps of Engineers, dated June 15, 1897.

Very respectfully,

R. A. ALGER, *Secretary of War.*

The PRESIDENT OF THE UNITED STATES SENATE.

—

OFFICE OF THE CHIEF OF ENGINEERS,
UNITED STATES ARMY,
Washington, D. C., June 25, 1897.

SIR: I have the honor to acknowledge receipt of concurrent resolution No. 9, passed by the Senate May 26, 1897, and by the House of Representatives June 10, 1897, requesting the Secretary of War "to furnish the Congress with such information as he may have in his possession with reference to the present condition of the harbor of Cumberland Sound, and to inform the Congress whether any immediate action is necessary to protect the entrance from being closed against the commerce usually entering the port of Fernandina."

In answer to the reference of the above resolution to this office for report, I have the honor to submit the accompanying copy of letter of June 15, 1897, with two maps, from Capt. O. M. Carter, Corps of Engineers, on the subject, and beg to invite attention to the views of that officer as expressed in the closing paragraph, as follows:

"In view of the urgency of the situation, and of the manifest advantages to the United States of aiding artificially in opening the new channel now, I am of opinion that the sum of $500,000 should be made available immediately, $50,000 of which should be used for sluicing and dredging, and the balance for raising the north and south jetties under the existing contract, without which work dredging will give no satisfactory or permanent relief."

The concurrent resolution is herewith returned.

Very respectfully, your obedient servant,

JOHN M. WILSON,
Brig. Gen., Chief of Engineers, U. S. Army.

Hon. R. A. ALGER,
Secretary of War.

—

REPORT OF CAPT. O. M. CARTER, CORPS OF ENGINEERS, ON CONDITION OF THE HARBOR AT CUMBERLAND SOUND.

UNITED STATES ENGINEER OFFICE,
Savannah, Ga., June 15, 1897.

GENERAL: In compliance with your instructions of the 11th instant, and in accordance with the provisions of a concurrent resolution of Congress "that the Secretary of War be requested to furnish the Congress with such information as he may have in his possession with reference to the present condition of the harbor at Cumberland Sound, and to inform the Congress whether any immediate action is necessary to protect the entrance from being closed against the commerce usually entering the port of Fernandina," I have the honor to submit the following report:

The project for improving the entrance to Cumberland Sound, which was submitted by the late Gen. Q. A. Gillmore, Corps of Engineers, in 1879, and which was revised in 1891, and again in 1895, aims at securing a navigable depth across the bar of 19 feet at mean low water. The mean rise and fall of tide is 5.9 feet.

Operations under that project were begun in 1880, but on account of the lack of any system in supplying funds, which have been provided at long intervals and in totally inadequate amounts, it has been impossible to push forward the works with proper energy; hence they have not obtained at any time the desired controlling influence on the most important hydrographic feature, the channel location, and the navigable bar channel has deserted the desired route entirely, the present channel crossing the south jetty about 7,000 feet seaward of its initial point. From the jetty crossing, the sailing range runs about south 78° 50' east, reaching deep water at a distance of somewhat more than a mile and at a point nearly half a mile south of the outer end of the south jetty. The shoalest point on this line is found near its outer end, where the inner and the outer 15-foot curves are separated by a belt from 300 to 500 feet wide, with least mean low-water depths of somewhat less than 13 feet.

A comparison of the various surveys made since 1888 shows, as might be expected under the circumstances, a gradual shifting of the channel to the south. Moreover, the period of increased depths upon which the channel entered in 1893, and which lasted until quite recently, is ended, the shoaling seriously threatening the commerce of the port of Fernandina.

The discharge finds so much resistance in the long, shallow south channel that a new short northern route is opening, its location being nearly parallel to the north jetty and about 1,000 feet from it, thus forming an almost direct continuation of the deep water of Amelia Basin. The erosion of this new channel began in 1895, following the extension of the north jetty, and has advanced so rapidly that the channel now extends more than 3,000 feet into the shoal, with a least width of more than 400 feet between the 12-foot curves. Depths of more than 3 fathoms are now found where a sand shoal, bare at low water, existed a few years ago. Between the extreme easterly end of this 12-foot pocket and the 12-foot curve outside the bar there is still a stretch of about half a mile of lesser depth. This barrier is daily decreasing, and there is reason to believe that sooner or later it will break down altogether and an uninterrupted new north channel be established, when the closing of the gap in the south jetty can be commenced.

The river and harbor act of June 3, 1896, appropriated $5,000 for improving Cumberland Sound, and provided "that contracts may be entered into by the Secretary of War for such material and work as may be necessary to complete the present project, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate $2,345,000, exclusive of amount herein and heretofore appropriated."

Under the provisions of that act a contract was entered into on October 8, 1896, with the Atlantic Contracting Company, of New York, for all of the material and labor necessary to complete the work. Operations have been carried on with such vigor by that company that the funds provided by the sundry civil bill of June 4, 1897, will not suffice to pay for what has been done already.

Presumably, however, there is a limit to the readiness and the ability of the company to continue work without payment, and that limit may be reached during this critical period, when the new north channel is in process of formation, when an opportunity is afforded to close the sailing gap in the south jetty to confine the channel between the jetties and increase the scour there, all without interfering with navigation, and when a failure to do this immediately means the loss of an opportunity for quick success, which may not be presented again, and the probable closing of the port of Fernandina against much of its usual commerce.

In view of the urgency of the situation and of the manifest advantages to the United States of aiding artificially in opening the new channel now, I am of opinion that the sum of $500,000 should be made available immediately, $50,000 of which should be used for sluicing and dredging, and the balance for raising the north and south jetties under the existing contract, without which work dredging will give no satisfactory or permanent relief.

Two charts accompany this report.

Respectfully submitted.

O. M. CARTER,
Captain, Corps of Engineers.

Brig. Gen. JOHN M. WILSON,
Chief of Engineers, U. S. A.

PERSONAL EXPLANATION.

Mr. WELLINGTON. Mr. President, I rise to a question of personal privilege. I hold in my hand a copy of the Washington Post of this morning, and upon the front page will be found an article which is so grossly unjust and so utterly untrue that I can not allow it to pass by unchallenged. In it I find an attempt but thinly veiled to injure me with the constituency I have in my State and embroil me unnecessarily with the President of the United States. The article is headed:

MR. WARNER WILL WIN—THE CONSUL TO LEIPSIC IS CERTAIN TO BE CONFIRMED—LIVELY SCENES IN COMMITTEE—MR. WARNER, SR., AND SENATOR WELLINGTON MEET FACE TO FACE—THE SENATOR ATTACKS BOTH FATHER AND SON, AND ALSO VENTS CONSIDERABLE SPLEEN UPON THE PRESIDENT, CRITICISING THE APPOINTMENTS MADE BY THE LATTER—SOME OF THE INSIDE FACTS.

Then they go on in this article to predict that Mr. Warner will be confirmed. They give what purports to be a full history of the meeting of the committee yesterday.

In the first place, according to my idea, a committee which meets to consider a nomination which the Senate itself is later to consider in executive session, certainly meets in executive session itself, and all the proceedings of that committee should be secret and held sacred there. I want to know how this newspaper procured a report of the proceedings of that committee, and why, when that report was made, it was not made truthfully and without coloring. I do not presume for a moment that any officer or member of that committee could have made the report. Who else could have made it? I refused to be interviewed upon the facts in the case. Who could have made it but that other man, the creature who was present yesterday to give testimony before the committee? What is the report here given? Let me read a part of it:

In his intense antagonism Senator WELLINGTON has not only arrayed himself against all of Mr. Warner's friends and against the entire delegation from the State, to say nothing of Governor Lowndes and other influential Maryland Republicans, but he has gone out his way to attack the President in the most bitter terms. The angry scorn with which he mentioned Mr.

McKinley's name in the committee room yesterday was but one of the many interesting features of a very remarkable occasion. Nearly every member of the committee was present.

Then later on they say:

The Democrats had very little to say, although they watched the developments with intense interest. The committee adjourned without action and without even fixing a day upon which to reassemble. It is known, however, that the impression created by Mr. Warner's presentation of his son's case was most favorable, etc.

In the first place, here is a charge made that I have arrayed against myself the entire Maryland delegation. It is a falsehood, without any foundation in fact whatever. The Maryland delegation will stand with me in this fight. They say I have arrayed against me the governor of the State. It is false, false from the bottom up. They say that but yesterday, in the committee room, I attacked the President of the United States. It is false again. I did no such thing. I have criticised the appointments of President McKinley. I am a free man; I am a Senator of the United States, and I reserve to myself that liberty of judgment which will permit me to criticise any appointment made by the President of the United States which in my judgment is an error, or which, for the benefit of the service, should not have been made.

I have criticised the appointments of President McKinley, and should the occasion offer when in my judgment it is necessary I will do so again. But when I did criticise them yesterday, it was in a respectful manner. I did not "vent" any "spleen," and I do not intend that this newspaper shall place me falsely either with the President of the United States or with my constituency.

I have been the friend of the Administration. I was the friend of the present President of the United States before his nomination. I stood by him in the convention. I worked and labored day and night in the State of Maryland to bring that ancient Bourbon State out of the Democratic column and place it among the triumphant States which cast their votes for William McKinley, and we accomplished a work in that State which in my judgment deserves some consideration. We converted a Democratic majority of 30,000 into a Republican majority of three and thirty thousand for William McKinley. That was some of the work we did there.

I have a right to expect the same consideration that is given to other Senators upon the Republican side of the Chamber. I have that same right, but if it is not to be given to me, well and good. The moan will soon be made. I can exist without it.

But, sir, if the price of patronage is to be servile obedience, then I refuse to give it. I am a free man. I stand upon my prerogatives as a Senator of the United States, and I will not be misrepresented. I will not be misjudged by reason of such utterly untrue newspaper reports.

Now, then, going on with this villainous statement, they say:

Mr. WELLINGTON was plainly in angry and ill-natured mood when he appeared before the committee. He began at once with an attack upon the character of young Mr. Warner, although in the same breath almost he admitted having recommended him for the consulship at Southampton. He claimed, however, that he had simply signed a letter which Mr. Warner, sr., had written, and that he had not had the time to make any inquiries, etc.

Then they go on further:

To this letter, Mr. WELLINGTON admitted, the President had paid no attention, not even acknowledging it, but on the very day that it was received sent in Mr. Warner's name to the Senate.

This seemed to be an affront which Mr. WELLINGTON could not brook without feeling the highest degree of resentment. "I want to know," he exclaimed, "whether I am to have control of the Maryland appointments or not? If I am, I want to know it; if not, I wash my hands of the whole thing."

Here is a statement that is utterly untrue. No such words were ever uttered in the committee rooms, and every member of the committee who was there present will say that they were not.

As he continued Mr. WELLINGTON grew more and more excited. He was especially incensed at a report that Mr. Warner had assisted him to be elected Senator. "Why," said he, "Mr. Warner can not vote in Maryland and he can not influence another vote there or anywhere else."

And right here there is just enough of truth to give it some foundation, because that is a fact.

In conclusion, he made an almost piteous appeal to the committee to stand by him and reject the nomination. "I have been badly treated by the President," he complained, "and although the only Republican Senator from my State, I am being ignored." He thought that Senatorial courtesy ought to be invoked in his behalf, and asserted that he had given enough reasons to prevent confirmation. He acknowledged that he knew nothing detrimental to the young man, except through mere hearsay, and that all the rumors and stories went back to college time. He continued to talk very rapidly and very loudly, repeating his former statements, and constantly harping on the fact that he had been affronted and insulted by the President.

Another falsehood, another misstatement, another thing that can only be characterized in its right way if I were to use, with reference to the author, that simple Saxon word which begins with an "l," ends with an "r," and has two little letters between, which the imagination of the Senate will furnish for itself.

Now, then, the article goes on to give a pretended reply of this creature, in which there is very little truth. It goes on further and states what purport to be the inside facts of the case. It is too long to inflict upon the Senate. I do not intend to do so upon this occasion. It was but a half hour before I came here that this infamous article was called to my attention, and as it endeavored to place me in a false position with the President, I could not for a moment hesitate to resent it.

Mr. President, I intend to be placed fairly. I intend to be upon this floor, as I came here, a Republican, standing by Republican principles and voting for a Republican tariff bill in line with the Administration of President McKinley from first to last. But if my Senatorial prerogatives are to be interfered with, then I will make war so far as that is concerned. I did not make a "piteous appeal" to the committee of the Senate. I ask no favors from the committee or from the Senate, but I say to the committee and to the Senate I have a right to have impartial justice, and I have a right to be treated as other Senators have been treated in this body. I have a right to the advantage of Senatorial prerogative, and if that is not given me, then I will know the reason why. I will remain upon the floor of the Senate; there will be no driving me out. I will remain right here. No man ever struck me a blow but that I returned it with interest, and they will find me on deck if the struggle is to begin.

HOUSE BILL REFERRED.

The bill (H. R. 3486) to allow the distillery of the New England Distilling Company and the rectifying house of Mullins & Crigler, both situated in Covington, Ky., to be operated within 600 feet of each other was read twice by its title, and referred to the Committee on Finance.

THE TARIFF BILL.

Mr. ALLISON. I move that the Senate proceed to the consideration of House bill 379.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 379) to provide revenue for the Government and to encourage the industries of the United States.

Mr. WHITE. Several Senators this morning, and a number yesterday evening, spoke to members of the Committee on Finance on this side of the Chamber with relation to the proposed amendments to the bill. The situation is such that we ought to have, and if possible this morning, all the amendments which the committee design to propose, especially those of any importance. There may be, no doubt, and will be found, clerical errors in the bill, but I refer to those of a vital character.

We have reached a point where we ought to know the position of the committee with reference to the matter of a duty on tea, and also beer, and likewise the antitrust amendment, and any other matter of a similar important character connected with the legislation. Members of the Senate have a right to see those amendments, and while we have no disposition to press the committee at all, we feel it our duty to those who are not as well informed upon the bill as members of the Republican caucus to make this suggestion. I trust that it will be received not as undue urging at all, but as made in view of the necessities of the situation and the lateness of the hour. We ought to pass the bill to-day or to-morrow if possible.

Mr. PETTUS. At the proper time I will ask that the Senate take under consideration an amendment proposed in reference to the sugar trust. It was offered on the 16th of June.

The VICE-PRESIDENT. The Senator from Alabama sends to the desk an amendment submitted by him on the 16th of June.

Mr. ALLISON. It is the intention of the committee this morning to go on with the bill, beginning on page 190. As suggested by the Senator from California, I think Senators have a right to know as respects important amendments that may be offered hereafter. There is one amendment which has not been offered that probably will be offered some time during the day relating to the increase of revenue. As the sections relating to beer, etc., will be reached in a few moments, I will say to the Senator that it is the intention of the committee to ask that the amendments of the committee be disagreed to. I trust the Senator will allow us a little time to consider the question of tea, which was passed over when reached.

Mr. WHITE. Of course I have no disposition, as the Senator knows, to incommode him in the slightest degree; but I made the suggestion in view of the fact that my attention was called to the matter by many Senators who want to know, and who think that the members of the committee on this side ought to have the information. We have been unable to furnish it. I presume, as to the amendment affecting the revenue to which the Senator alludes, I may judge what it is from the newspapers, which, however, we were told this morning, and it rather surprised me, are unreliable. I observed in the newspapers that there is an amendment being prepared with reference to a stamp tax; and if that is the case I trust the Senator will present it as soon as he possibly can, so that we may examine it.

Mr. ALLISON. That will be done as quickly as we can.

Mr. TELLER. I should like to inquire of the Senator from Iowa if it is correct that the committee are preparing an amendment of the character mentioned—an excise tax?

Mr. ALLISON. Some Senators have under consideration matters relating to stamps upon certain transfers of stock. That is all that I know is in preparation, and it will be submitted to the Senate as soon as possible.

Mr. TELLER. Inasmuch as there seems to be some hunting for revenue by the caucus at least, I do not know whether by the committee or not, I should like to inquire whether the committee or the caucus have considered the suggestions made by the Secretary of the Treasury that we could get more revenue by decreasing the tax on spirits? Is that subject under consideration or is it considered worthy of consideration by the committee or the caucus?

Mr. ALLISON. Of course what is said in caucus is not to be divulged; it is kept secret under the ordinary rules of caucus proceedings. I will say as respects the matter of distilled spirits that the committee have very carefully considered that question and also the recommendation of the Secretary of the Treasury in that regard. For myself, I believe that a lower rate upon distilled spirits in time would produce perhaps a greater revenue, but the committee have had more than a dozen amendments relating to the question of distilled spirits, not only in regard to the reduction of revenue, but as respects all the details and regulations concerning the treatment of the tax. I myself think it is unwise for us on this tariff bill to undertake at this time to revise all the necessary amendments to a matter so important as the collection of the tax upon distilled spirits.

I believe that there are many necessary and essential modifications that should be made to the tax upon distilled spirits, but I think it is manifestly impossible for us now to deal carefully, deliberately, and wisely with a matter that involves nearly $10,000,000 of revenue to the Government. So I think I can say to the Senator from Colorado and to the Senate that it is the belief of the Committee on Finance, or at least of the Republican members of it, who have considered this question, that it ought to be taken up with care and deliberation immediately upon the reassembling of Congress in December, and that the whole question should be gone over at that time as to the true tax upon distilled spirits and the many inequalities and injustices in reference to the transportation of spirits, its method of storing, its use in manufacture, etc.

It is a matter of magnitude, which of course relates to the revenue, but it relates to very many other questions, and I do not think we can deal with it wisely upon the pending bill. Although the Secretary of the Treasury may be right (and I believe he is right in the sense that a lighter tax upon distilled spirits would produce more revenue in the end than the one that we have now), it is manifest to me that it will produce less revenue within the next year, and the next year is the time when we shall need revenue the most. I also believe that the distilled-spirits tax at the high rate which we now have of $1.10 a gallon can be more efficiently enforced than it is now, and I have no doubt, at least I hope there is no doubt, that more efficient measures will be taken to enforce the existing law until such time as we can make changes in it.

Mr. TELLER. If the Senator is correct that a change of tax will necessitate a lowering of the revenue collected on spirits for a time, this is the proper time for him to try his experiment, if any experiment it is, because we have now in the Treasury enough money so that if the revenue should fall off for the next year and a half or two years we would still get along without borrowing any additional money. If that is to be the case, we had better make this movement now instead of waiting until we have exhausted the money in the Treasury and then try the experiment.

If the tax was reduced from $1.10 to 70 cents, it would not necessitate any change in the machinery or in the method of transportation or anything else. The Government would simply collect from the distiller 70 cents where it had been collecting $1.10, and the disposition or temptation on the part of certain people to commit frauds, where the great leak is, would be taken away.

Mr. ALLISON. If the Senator will allow me, I will state that the Secretary of the Treasury in recommending a reduction of the tax does not recommend 70 cents, as I understand him, but he does recommend in connection with that reduction that there shall be a complete change in other sections of the law. So his own recommendation indicates that we must go thoroughly into the whole question of distilled spirits if we are to reduce the tax, and for that reason we are not ready to do it now.

Mr. TELLER. The Secretary of the Treasury says that the revenue-getting point is 70 cents.

Mr. LINDSAY. With the permission of the Senator, I will send to the Secretary's desk and have read a letter which I find in the newspapers, written by the Secretary of the Treasury only a day or two since, which shows that he desires nothing except a reduction of the tax.

Mr. TELLER. I have the letter on my table. I was about to refer to it. Let it be read.

The Secretary read as follows:

WASHINGTON, *June 20.*

Under date of June 19 Secretary Gage addressed the following letter to Senator BURROWS concerning the proposed tax on distilled spirits:

SIR: Your letter of the 17th instant relative to the legislative proposition to secure increased revenue by reducing the rate of tax on distilled spirits has been received.

In reply, you are informed that I do not think it advisable to endanger the passage of this measure by appending to it a provision shortening the period during which the spirits may remain in the bonded warehouses on the distillery premises. The allusion in my letter to which you refer, relating to the shortening of this bonded period, was merely in the nature of a suggestion, and was not intended as a recommendation.

My attention has just been called to this matter, in connection with the proposition to reduce the tax, and I considered it proper that the Congress should have all the facts that were in my possession. The question as to the length of the bonded period is sufficiently complex to be a separate measure. See joint resolution of March 28, 1878 (20 Stat., page 249), and act of May 28, 1880 (21 Stat., page 145), where this question is considered without reference to any rate of tax. See also, on the other hand, the acts of June 6, 1872, (17 Stat., page 238), fixing the rate of tax at 70 cents per gallon, and the act of March 3, 1875 (18 Stat., page 339), establishing the tax rate at 90 cents per gallon. In neither of these last two named acts, which have produced nearly all the revenue derived from distilled spirits, is there any provision modifying the length of the bonded period.

I would state finally that the two questions are separable; that the question of the reduction of the rate of tax is of transcendent importance; and I think that if the introduction of the proposition to change the bonded period, and its consideration in connection with fixing the tax rate, seriously complicates or imperils the needful legislation with reference to the revenue, it should be eliminated from the question.

Respectfully, yours,

L. J. GAGE, *Secretary.*

Hon. J. C. BURROWS, *United States Senate.*

Mr. TELLER. Mr President——

The VICE-PRESIDENT. The Senator from Alabama [Mr. PETTUS] is entitled to the floor.

Mr. TELLER. I had the floor, I believe, and I did not yield the floor.

The VICE-PRESIDENT. The Chair recognized the Senator from Alabama [Mr. PETTUS], and he has been standing on the floor while the Senator from Colorado [Mr. TELLER] and the Senator from Iowa [Mr. ALLISON] were exchanging inquiries and answers.

Mr. TELLER. The custom of the Senate has been that when a Senator was interrupted he might sit down. I do not care about the floor; only I want the traditions and decencies of the Senate preserved. I was taken off the floor, as I could be only with my own consent, to have a paper read. I am entitled to the floor, whether the Chair thinks so or not; but it is a matter of no particular consequence to me whether I have the floor now or whether I have it later on, except I desire, as I repeat, that the traditions and decencies of the Senate be preserved. I yield to the Senator from Alabama.

The VICE-PRESIDENT. Does the Senator from Alabama desire the floor?

Mr. PETTUS. Mr. President, I surely intended to treat the distinguished Senator from Colorado with the utmost courtesy. My understanding was that I had the floor when he intervened, and I stood until I thought he was through; but if he desires to proceed further, I am entirely willing to yield to him.

Mr. TELLER. Go on.

Mr. TELLER subsequently said: Mr. President, I desire to make a personal explanation.

This morning I was taken off the floor, as it seemed to me, rather summarily. I was not quite certain whether I was taken off the floor by the Senator from Alabama who sits farthest from me [Mr. PETTUS] or by the Chair; but I was disposed to resent it. I supposed I was taken off the floor because I had dropped into my seat while I was listening to the reading of the paper offered by the Senator from Kentucky [Mr. LINDSAY], he having asked me if I would yield to him for that purpose.

I learned afterwards that I was not entitled to the floor at all; that the Senator from Alabama was entitled to the floor, and that therefore the ruling of the Chair was eminently proper in saying that the Senator from Alabama was entitled to the floor, for I had been speaking by the courtesy of that Senator, and in his time—a fact which I did not know. Therefore I was inclined to think that either the Chair or the Senator from Alabama had done me some injustice. I find that I was wrong and the Chair and the Senator from Alabama were right.

Mr. PETTUS. I made a motion, Mr. President, to take up for consideration an amendment to this bill in reference to the sugar trust, as it is called, or rather the importers of sugar, attempting to raise or depress the market value of that article, and I ask that it be taken up for consideration.

Mr. ALLISON. If the Senator from Alabama will excuse me, I think it was the general purpose to go on with the amendments of the committee—I supposed that was the understanding—until they were disposed of; and, if it would suit his convenience, I should prefer to go on with them, at least for a while this morning, and consider the amendments of the committee which have not yet been disposed of.

Mr. PETTUS. To what hour, or to about what hour?

Mr. ALLISON. I hope we shall get through them in the course of two or three hours. The Senator will not lose his opportunity, as he understands, of course, to have his amendment considered.

Mr. PETTUS. Very well, Mr. President, I do not desire to thrust this matter into any improper place.

Mr. ALLISON. I ask to go back to paragraph 183, one of the omitted paragraphs, on page 58.

The VICE-PRESIDENT. The paragraph will be read.

The Secretary read as follows:

183. Nickel (except nickel matte), nickel oxide, alloy of any kind in which nickel is the component material of chief value, 6 cents per pound.

Mr. TELLER. Mr. President, I do not desire to continue the discussion at this time on the question as to whether a tax on whisky is proper or not. I do not speak for the Administration, and I have no connection with it, except as a member of this body. I understand that the Secretary of the Treasury has sent here two letters, in which he states his desire that there shall be legislation at this session and in this bill upon this question, for the purpose of increasing the revenue. I understand—I do not know whether it is true or not—that in the pocket of a Senator of the Secretary's party there is an amendment prepared at the Treasury Department and sent here to be introduced, to carry out his idea as to what the tax should be upon this article.

I do not want to interfere with the orderly disposition of this bill. I do not propose to put myself in a position to be charged with unnecessary delay, but I want to notify the committee now that before the bill is disposed of I shall discuss the question as to what ought to be the tax upon spirits. I shall attempt to show that the committee are giving away at least $2,000,000 a month of revenue which might be collected, and might be collected without detriment to the public interests or to the interests of the honest producers of spirits. I shall take occasion to do that when the Senator who has the bill in charge indicates that he has gotten through with his proposed amendments.

Mr. PLATT of Connecticut. Mr. President, the receipts for the fiscal year ending June 30, 1895, from the tax on distilled spirits made from materials other than peaches, apples, grapes, etc., were, in round numbers, $73,741,000. The next year, 1896, the receipts were practically the same, $73,743,000. So it is true that the increased tax did not produce additional revenue, but the condition of business was such that I think it will be found that there was not so much whisky or spirits consumed.

But what I wish particularly to say is, that we did collect in 1896 $73,743,000 on spirits at $1.10 a gallon. Upon the same amount, with the tax reduced to 90 cents a gallon, we should collect about $10,000,000 less.

Mr. TELLER. I shall discuss that when the time comes, and shall show the fallacy of that statement.

Mr. ALLISON. Returning to paragraph 183, I move to strike out the paragraph and insert what I send to the Secretary's desk.

The VICE-PRESIDENT. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. It is proposed to strike out paragraph 183, and in lieu thereof to insert the following:

Nickel ore, 3 cents per pound on the nickel contained therein; nickel matte, 4 cents per pound on the nickel contained therein; nickel and nickel oxide alloy of any kind, in which nickel is the component material of chief value, 8 cents per pound.

The VICE-PRESIDENT. Without objection, the new paragraph will be considered as agreed to.

Mr. VEST. Of course we object, Mr. President, but, as I have said before, we can not help ourselves. But I want to call attention again to the absolute absurdity of this increase. The rate under the existing law on this article is 6 cents, and the House of Representatives put the same rate upon this article. There can be no reason for it, as the comparative statement of the commercial situation shows. We exported from this country, in 1896, $442,795 worth of nickel and we imported $58,000 worth. Why the necessity for putting on this additional duty? It will not increase the revenue. It can not be done for the purpose of protection, because this enormous excess of exports over imports shows that we command the American market and send abroad a large amount of this commodity.

Mr. ALLISON. Has the paragraph been agreed to?

The VICE-PRESIDENT. The paragraph has been agreed to.

Mr. ALLISON. I ask to modify paragraph 605, on page 179, to correspond with the amendment just made. I send the amendment I propose to the desk.

The SECRETARY. In paragraph 605, on page 179, line 2, after the word "silver," it is proposed to insert "or;" and after the word "copper," in the same line, to strike out the words "or nickel and nickel matte;" so as to read:

Ores of gold, silver, or copper matte, etc.

The amendment was agreed to.

Mr. ALLISON. Now I ask that we go on with the bill at page 190.

The SECRETARY. On page 190, beginning in line 22, the Committee on Finance reported to strike out section 3, as follows:

SEC. 3. That for the purpose of equalizing the trade of the United States with foreign countries and their colonies producing and exporting to this country the following articles: Argols, or crude tartar, or wine lees, crude; chicle; brandies, manufactured or distilled from grain or other materials and not specially provided for in this act; champagne and all other sparkling wines; still wines, including ginger wine or ginger cordial, and vermuth; laces made of silk, or of which silk is the component material of chief value; all mineral waters, and all imitations of natural mineral waters, and all artificial mineral waters, not specially provided for in this act; paintings and statuary; sugar, molasses, and other articles provided for in paragraph 208 of Schedule E of this act, or any of them, the President be, and he is hereby, authorized, as soon as may be after the passage of this act, and from time to time thereafter, to enter into negotiations with the governments of those countries exporting to the United States the above-mentioned articles, or any of them, with a view to the arrangement of commercial agreements in which reciprocal and equivalent concessions may be secured in favor of the products and manufactures of the United States; and whenever the government of any country or colony producing and exporting to the United States the above-mentioned articles, or any of them, shall enter into a commercial agreement with the United States, or make concessions in favor of the products or manufactures thereof, which in the judgment of the President shall be reciprocal and equivalent, he shall be, and he is hereby, authorized and empowered to suspend, during the time of such agreement or concession, by proclamation to that effect, the imposition and collection of the duties mentioned in this act on such article or articles so exported to the United States from such country or colony, and thereupon and thereafter the duties levied, collected, and paid upon such article or articles shall be as follows, namely:

Argols, or crude tartar, or wine lees, crude, containing not more than 40 per cent of bitartrate of potash, one-half of 1 cent per pound; containing more than 40 per cent of bitartrate of potash, 1 cent per pound.

Chicle, 7 cents per pound.

Brandies, manufactured or distilled from grain or other materials and not specially provided for in this act, $2 per proof gallon.

Champagne and all other sparkling wines, in bottles containing not more than 1 quart and more than 1 pint, $6 per dozen; containing not more than 1 pint each and more than one-half pint, $3 per dozen; containing one-half pint each or less, $1.50 per dozen; in bottles or other vessels containing more than 1 quart each, in addition to $6 per dozen bottles on the quantities in excess of 1 quart, at the rate of $1.90 per gallon.

Still wines, including ginger wine or ginger cordial and vermuth, in casks, 50 cents per gallon; in bottles or jugs, per case of 1 dozen bottles or jugs containing each not more than 1 quart and more than 1 pint, or 24 bottles or jugs containing each not more than 1 pint, $1.60 per case, and any excess beyond these quantities found in such bottles or jugs shall be subject to a duty of 5 cents per pint or fractional part thereof, but no separate or additional duty shall be assessed upon the bottles or jugs.

Laces made of silk, or of which silk is the component material of chief value, 55 per cent ad valorem.

All mineral waters, and all imitations of natural mineral waters, and all artificial mineral waters, not specially provided for in this act, in green or colored glass bottles containing not more than 1 pint, 20 cents per dozen; if containing more than 1 pint and not more than 1 quart, 28 cents per dozen bottles, but no separate or additional duty shall be assessed upon the bottles; if imported otherwise than in plain green or colored glass bottles, or if imported in such bottles containing more than 1 quart, 20 cents per gallon, and in addition thereto duty shall be collected on the bottles and other coverings at the same rate as would be charged if imported empty or separately.

Paintings in oil or water colors, pastels, pen and ink drawings, and statuary, not specially provided for in this act, 30 per cent ad valorem.

Sugar, molasses, and other articles provided for in paragraph 208 of Schedule E of this act, 92 per cent of the duty imposed thereon in said paragraph 208.

And it is further provided that with a view to secure reciprocal trade with countries producing the following articles, whenever and so often as the President shall be satisfied that the government of any country, or colony of such government, producing and exporting to the United States coffee, tea, and hides, or any of such articles, imposes duties or other exactions upon the agricultural, manufactured, or other products of the United States, which, in view of the free introduction of such coffee, tea, and hides into the United States, he may deem to be reciprocally unequal and unreasonable, he shall have the power and it shall be his duty to suspend, by proclamation to that effect, the provisions of this act relating to the free introduction of such coffee, tea, and hides, raw or uncured, whether dry, salted, or pickled; Angora goatskins, raw, without the wool, unmanufactured; asses' skins, raw or unmanufactured; and skins, except sheepskins with the wool on, of the products of such country or colony, for such time as he shall deem just; and in such case and during such suspension duties shall be levied, collected, and paid upon coffee, tea, and hides, the products or exports from such designated country, as follows:

On coffee, 3 cents per pound.

On tea, 10 cents per pound.

Hides, raw or uncured, whether dry, salted, or pickled; Angora goatskins, raw, without the wool, unmanufactured; asses' skins, raw or unmanufactured; and skins, except sheepskins, with the wool on, 1½ cents per pound.

And in lieu thereof to insert:

SEC. 3. That whenever any country, dependency, or colony shall pay or bestow, directly or indirectly, any bounty or grant upon the exportation of any article or merchandise from such country, dependency, or colony, and such article or merchandise is dutiable under the provisions of this act, then upon the importation of any such article or merchandise into the United States, whether the same shall be imported directly from the country of production or otherwise, and whether such article or merchandise is imported in the same condition as when exported from the country of production or has been changed in condition by remanufacture or otherwise, there shall be levied and paid, in all such cases, in addition to the duties otherwise imposed by this act, an additional duty equal to the net amount of such bounty or grant, however the same be paid or bestowed. The net amount of all such bounties or grants shall be from time to time ascertained, determined, and declared by the Secretary of the Treasury, who shall make all needful regulations for the identification of such articles and merchandise and for the assessment and collection of such additional duties.

The VICE-PRESIDENT. The question is on the amendment reported by the Committee on Finance.

Mr. GRAY. Mr. President, section 3, on page 195, is important, and I should like to have the attention of the Senator from Iowa a moment in order to ascertain whether there is to be any opportunity for modifying it. It ought to be modified, because there is a somewhat similar provision in the present law; and in my

opinion, after a very careful examination of the documents bearing upon it, it contravenes the treaty obligations of the United States with at least one, and perhaps two, of the great countries of Europe—Prussia and Austria-Hungary. The present law, known as the Wilson law, has a provision, I believe—I quote from memory—that wherever any country, dependency, or colony shall pay an export bounty upon any article, in that case—I do not know that it says sugar, but any article, which includes sugar——

Mr. ALLISON. The provision in the present law relates to sugar.

Mr. GRAY. An export bounty upon sugar.

That in that case there should be an additional duty of 10 per cent upon the sugar of that character, refined sugar imported into the United States.

Mr. ALLISON. One-tenth of a cent a pound.

Mr. GRAY. One-tenth of a cent a pound. I was thinking of the 10 per cent of the committee—one-tenth of a cent a pound; which was supposed to be a compensation to the sugar trust or to the sugar manufacturers of this country for the stimulus given to importations from abroad by the export bounty of the country paying it.

Mr. President, whatever may have been the ground for that additional duty, it certainly resulted in an increased tax to the people of the United States and an increased subsidy to the manufacturers of sugar in this country.

There is under the present law a differential of one-eighth of a cent, I believe, in favor of the sugar refiners of this country, and this one-tenth of a cent a pound added a tenth to the eighth of a cent protection, to the advantage given to the American sugar refiners over those abroad in the countries which pay this export bounty; and that was the case with the countries from which the largest import of sugar was made into the United States. I think practically it was another difficulty, another impediment, placed in the way of the importation of this competing product from the countries which most largely exported it.

A protest has been made by the Government of Germany, by His Imperial Majesty the Emperor of Germany, through the proper channel, the State Department, and to the Congress of the United States, protesting against the imposition of this additional duty upon the ground that it is in violation of the treaty stipulations of the United States. After very carefully considering the protest, I am of that opinion, and of the opinion that the United States can not afford, consistently with its honor and with its reputation as a treaty-observing power, to thus put in doubt, even much less openly and clearly violate the treaty—put in doubt its good faith in regard to the obligations it is under to Prussia and Austria-Hungary.

Mr. President, I will have read, because I believe it is a public document, it having been printed, this protest of the German ambassador in behalf of his Government, addressed to the Secretary of State, the proper channel through which such communications should be made, which protest, as I believe, has been sent by the Secretary of State to the Finance Committee, and therefore is properly in the possession of the Senate.

The Secretary read as follows:

[Translation.]

Note of the German ambassador, addressed to the Secretary of State, April 5, 1897, protesting against any additional duty being levied on German sugar on account of export bounties being paid by Germany.

IMPERIAL GERMAN EMBASSY, *Washington, D. C., April 5, 1897.*

MR. SECRETARY OF STATE:

The bill approved by the House of Representatives, now before the Senate of the United States (H. R. 379), provides in Schedule E, No. 206, that sugars, etc., the product of any country which pays, directly or indirectly, a bounty on the export thereof, shall pay, apart from the actual duty set forth in the said No. 206, an additional duty equal to such export bounty so far as this bounty shall be in excess of any (internal) tax collected upon such sugars or upon the raw materials (beet or cane) used in their manufacture.

By instruction of the Imperial Government, I have the honor respectfully to invite your excellency's attention to the fact that this provision can not be reconciled with the right of the most favored nation, which is granted by existing treaty stipulations to German products with respect to the duties to be imposed upon them on entry into the United States. The above provision, should it become a law, would, on the contrary, by imposing upon German sugar a special additional duty and thereby establishing in the aggregate a higher duty than upon sugars from various other countries, seriously damage, in treaty violation, German exports to the United States.

Your excellency is aware that this question was already discussed in the year 1894 between the Imperial Government and the Government of the United States. I may, in especial, refer to the memorandum of this embassy of July 16, 1894, and to the note of August 28, 1894, addressed by my predecessor, Baron Saurma, to the Secretary of State, Mr. W. Q. Gresham, both of which are found printed on pages 234 and 235 of the proper volume of Foreign Relations of 1894.

It appears to me needless, therefore, to repeat here the text of these two documents; but I must say here emphatically that I accept in their entirety as my own the arguments advanced therein on the part of my predecessor in behalf of the opinion held by the Imperial Government. I must state, furthermore, here that the damage which threatens German exports from the provisions of the present bill before Congress is a much heavier one than that which resulted from the tariff law of August 28, 1894, as this law provided only for an additional duty of one-tenth of a cent per pound of German sugar, while the present bill, should it become a law, will entail a much higher additional duty upon German sugar.

As your excellency further knows, the Government of the United States has unreservedly recognized the justice of our protest against any additional duty based on our export bounty upon German sugar. This is clearly expressed in words in the report by Secretary of State W. Q. Gresham to the President of the United States, of October 12, 1894, a copy of which was communicated to this embassy in a note of December 7, 1894, and may be found printed on pages 236 to 239 of the proper volume of foreign relations for the year 1894. The President of the United States explicitly concurred in this view of the Secretary of State by recommending to Congress, in his annual message of December, 1894, the repeal of the additional duty upon German sugar. The Imperial Government may, therefore, entertain the hope that the Government of the United States will exert every endeavor to explain to Congress the importance of the existing treaty obligations between Germany and the United States, and the consequence to be adduced therefrom in order to prevent the proposed provision concerning the adding of the amount of the German export bounty to the duty upon German sugar from becoming a law in violation of treaty obligation.

On this occasion I may invite your excellency's attention to another point which my predecessor in 1894 only touched upon. On August 22, 1891, declarations were exchanged at Saratoga between Mr. Von Mumm, the imperial chargé d'affaires ad interim, and Mr. John W. Foster, specially empowered by the United States, which had on the one part the importation of German sugar into the United States in view, and on the other the importation of American pork into Germany. The United States made as the basis of these declarations the admission, free of duty, of German sugar, pursuant to the tariff act of October 1, 1890. The tariff act of August 28, 1894, had already shifted in an unfavorable way for Germany the premises upon which the exchange of these notes was effected, and they would be changed still more to the disadvantage of Germany if the present bill now before Congress should, without amendment concerning sugar, become a law.

The Imperial Government would in such event be compelled to regard the premises as defective upon which the German declarations had been based in the correspondence exchanged in August, 1891, and it would, moreover, be confronted with the question whether those advantages should be further continued which it had hitherto extended to the United States by applying to the importations from that country, especially with regard to its agricultural products, the minimum tariff established by the customs treaties concluded between the German Empire on the one hand and Austria-Hungary and several other states on the other.

With respect to the advantages which the United States, and especially its agriculture, has been afforded by these reduced duties, I may refer to the note of Mr. Von Mumm, chargé d'affaires ad interim, of December 10, 1891, in the annex to which the duty rates of the general German tariff are contrasted with the treaty tariff. This note will be found printed as an annex to the proclamation of the President of the United States of February 1, 1892.

Accept, etc.,

THIELMANN.

Hon. JOHN SHERMAN,
Secretary of State of the United States.

Mr. GRAY. Mr. President, I have asked that the letter from the German ambassador be read in extenso for the reason that I thought it proper that that protest, made through the proper channel, the Secretary of State, and meant to be brought to the attention of this body and of the House of Representatives, should be treated with proper respect. I think it is a courteous and well-reasoned paper. I do not think, as I said before, that the United States can afford to leave even in doubt its strict adherence to the spirit of any treaty obligation that it has undertaken with other nations. I think that the uberrima fides which ought to attend a great national obligation of that kind ought to be especially the care of the United States Senate to preserve.

Mr. President, the late Secretary of State, Mr. Gresham, to whom a similar protest was made in 1894, when the Wilson bill imposed this discriminating duty upon sugar from countries that gave an export bounty, made a report to the President, which is in print, and I will add it as an appendix to what I say. I shall not trouble the Senate to read it at length now. I think a good many who are here now will recollect its purport, and what I consider the unanswerable argument made by the then Secretary of State to the proposition made in the Wilson bill, and afterwards enacted into law, to enact this one-tenth of a cent differential on sugar coming from Germany, although it did not say Germany or Austria-Hungary, but it said on the sugar coming from any country to this from other countries where an export bounty was paid on sugar brought into the United States.

I do not think we have avoided the objections made to this class of differential duties by leaving out the specific naming of sugar as the article to which it is to be applied and the adopting of language such as is employed in section 3 of the amendment of the committee to the House provision, which says:

That whenever any country, dependency, or colony shall pay or bestow, directly or indirectly, any bounty, etc.—

then there shall be imposed an additional duty by the United States equal to the amount of that bounty upon such article. We all know that this is intended primarily, and perhaps exclusively, to apply to sugar. I do not, of course, mean any disrespect to the committee or to intimate that they were trying to evade a duty or to do indirectly what they would not be willing to do directly.

What is now in this section is undoubtedly what was enacted in the Wilson law, to compensate sugar manufacturers by an additional duty for the cheap sugar that came from bounty-paying countries. I do not believe that this is a just ground for such an imposition. I do not believe, because we can get the benefit of that policy, whether it be wise or unwise to pay a bounty on exports, that the people of this country should be deprived of cheap sugar by the legislative interference of the Congress of the United States. In this section as it is framed a larger protection, a larger differential, is given to the American manufacturer of refined sugar than under the Wilson law. Whereas in the Wilson Act it is one-tenth of a cent per pound on sugar coming from

bounty-paying countries, in this bill there is an additional duty equivalent to the amount of the export bounty, which I am informed in this case amounts on the two classes of sugar to twenty-seven one-hundredths and thirty-eight one-hundredths of a cent, respectively, three times as much on the average as the differential imposed in the Wilson Act. That passes without much discussion.

We have heard a good deal about what differential ought to be given to the sugar manufacturer, and I am not here to deny that the American refiners should be treated fairly and should receive consideration as other manufacturers have received consideration and on the same footing as other manufacturers seeking protection; but here is an additional and concealed protection, a concealed subsidy and bounty, which people do not understand, adding very materially to the cost of sugar in the United States and to the subsidy that is to be given indirectly by the tariff bill to the sugar refiners.

That it contravenes our express obligations assumed with Germany, I will call the attention of such Senators as are interested in the matter to the text of that treaty bearing upon the subject. It is the treaty between the United States and Prussia of May 1, 1828, upon which this provision is based. Article 5 of that treaty provides:

> No higher or other duties shall be imposed on the importation into the United States of any article the produce or manufacture of Prussia, and no higher or other duties shall be imposed on the importation into the Kingdom of Prussia of any article the produce or manufacture of the United States, than are or shall be payable on the like article being the produce or manufacture of any other foreign country.

Article 9 provides:

> If either party shall hereafter grant to any other nation any particular favor in navigation or commerce, it shall immediately become common to the other party, freely, where it is freely granted to such other nation, or on yielding the same compensation, when the grant is conditional.

Mr. President, the stipulations of that treaty are continued to the present time, even through the change of government and the consolidation of the German Empire, so far as Prussia is concerned as a constituent part of that Empire, and their case is properly represented by the protest of the ambassador from His Imperial Majesty the Emperor of Germany.

Mr. President, it can not be urged that this bounty is a discrimination made by Germany or any other bounty-paying country against the United States which justifies a departure from the obligations of that treaty. It is a matter, as urged by the German ambassador, of domestic concern with Germany whether they shall pay an export bounty or not, and we have no more right to take cognizance of that export bounty as a matter of domestic policy in Germany than Germany would have a right to take note of the levying of a duty by the United States upon articles coming from Germany to this country, or we would have a right to take notice of the levying of a duty by Germany upon articles going into that country.

In the protest made by the then German ambassador in 1894 against the enactment of this provision of the Wilson bill, to which I have referred, there is this statement, which I think is very clear and conclusive as to the argument to which it addresses itself:

> The United States—
>
> Says the German ambassador in July, 1894—
>
> might, for instance, with the same reason assert that German manufacturers in any particular branch of industry paid lower taxes than elsewhere, and then, in order to bring about a so-called equalization, levy a discriminating duty on the German product concerned on its importation into an American port. It is quite evident that such a view of the case would render the most-favored-nation clause altogether illusory.

So it would, and if we are to treat the payment of bounty by Germany upon the export of German-grown sugar as a matter of which we can properly take cognizance in the framing of our tariff laws and make it the ground for a retaliatory enactment such as this, then the favored-nation clause of the treaty between the United States and Prussia or any other country would, as this gentleman says, be altogether illusory. It could be evaded.

Nations of the standing of the United States and Germany do not seek to find plausible grounds upon which to evade the obligations undertaken by solemn treaty. They seek to live up to the spirit as well as to the letter of treaties, and no other course is consistent with the dignity or the reputation and good name and fame of this great country. It is on behalf of my own country more than on behalf of Germany that I ask the attention of the Senate to this protest of the German ambassador, that we may preserve our own good faith above suspicion, that we may not be put in the category of a nation seeking to avoid it by plausible argument and by fine-spun reasoning which perhaps would be out of place in a magistrate's court.

Mr. President, I think I have said enough, certainly so far as I feel that I am concerned in the matter, to bring it to the attention of the Senate, and to have rehearsed briefly the grounds upon which I think the attention of the Senate is challenged in this matter and the reason why it should be given careful consideration, and why this provision should not be enacted into law without the gravest reason and the clearest exposition of the standing of the United States in regard to it. I do not believe we can do it without making ourselves amenable to the charge of broken faith, and under that, as an American citizen as well as an American Senator, I should be exceedingly restive.

APPENDIX.

DEPARTMENT OF STATE,
Washington, D. C., October 12, 1894.

THE PRESIDENT:

The note of the German ambassador of August 28, 1894, protests against the additional duty of one-tenth of a cent a pound imposed by the tariff act of that date on sugars which are imported from, or are the product of, a country that pays a bounty on the exportation of such sugars.

The protest is based upon "the fact that such a measure could not be reconciled with the most-favored-nation clause which governs the economic relations of the two countries," but that it is "rather a differentiation whereby the exportation of German sugar to the United States" is "more unfavorably treated than that of several other European countries." In this relation the German ambassador says:

"The granting of an export bounty is a domestic affair of Germany. An intent not to fulfill its treaty stipulations based upon the most-favored-nation clause can not therefore be inferred from this by any other country. [He also declares] that the view which has been manifested by the legislative bodies of the United States would render the effects of the most-favored-nation clause illusory, and that it would expose the contracting parties to the adoption of arbitrary duties, which it is the object of treaties containing a most-favored-nation clause to prevent."

By the tariff act of October 1, 1890, an additional duty of one-tenth of a cent a pound was imposed on sugars imported from countries that paid a greater bounty on the exportation of refined sugar than was paid on raw sugar. Against this additional duty it does not appear that the German Government protested. The reason, however, why no such protest was made may perhaps be discovered by a comparison of the provisions of the two acts. By the act of 1890 the additional duty was imposed only on sugars above No. 16 Dutch standard, and on them on the conditions above stated. By the act of 1894 the additional duty is imposed on all sugars, whether above or below that standard.

The value of sugars imported into the United States from the German Empire has been more than $15,000,000 annually. Of this aggregate only $200,000 or $300,000 worth, or about one seventy-fifth, was above No. 16 Dutch standard. The effect, therefore, of the additional duty of one-tenth of a cent under the tariff act of 1890 was comparatively insignificant.

The effect of the additional duty on all sugars under the act of 1894 is most important, since, other things being equal, the importer would not take the more highly dutiable German sugars till other sugars not subject to the additional duty had been absorbed. The additional duty under the act of 1894 affects, therefore, the whole of our large trade in German sugars.

We are now brought to the consideration of the legal aspects of the German ambassador's protest.

The treaty between the United States and Prussia of May 1, 1828, on which the protest is based, contains two stipulations that bear on the present question.

Article 5 provides:

"No higher or other duties shall be imposed on the importation into the United States of any article the produce or manufacture of Prussia, and no higher or other duties shall be imposed on the importation into the Kingdom of Prussia of any article the produce or manufacture of the United States, than are or shall be payable on the like article being the produce or manufacture of any other foreign country."

Article 9 provides:

"If either party shall hereafter grant to any other nation any particular favor in navigation or commerce, it shall immediately become common to the other party, freely, where it is freely granted to such other nation, or on yielding the same compensation, when the grant is conditional."

The stipulations of these two articles place the commercial intercourse of the United States and Prussia, not the entire German Empire, on the most-favored-nation basis; the first, by providing that the duties shall not be higher than "on the like articles being the produce or manufacture of any other foreign country;" the second, by providing that any particular favor granted by either party "to any other nation" shall "immediately become common to the other party."

In other words, these stipulations give either party the right, special engagements of reciprocity being excepted, to take the duties levied by the other on articles the produce or manufacture of any other country, and to demand the same treatment for its own products and manufactures. It is obviously no answer to this to say that certain discriminating duties levied by one party on the products or manufactures of the other are not confined to the latter, or to any country by name, but apply equally to all countries that may happen to fall in a certain category. If there is any other country, or if there are other countries, which either by name or by a general classification are exempt from the duty (special engagements of reciprocity being excepted), the requirements of the treaty are not fulfilled. To say that the discrimination is not specifically and explicitly national, or that it applies to more than one country, is a mere argumentative subterfuge, inconsistent with the clear intention of the treaty.

By the second article of the commercial convention between the United States and Great Britain of July 3, 1815, it is provided, in language almost identical with that in the subsequent treaty with Prussia, that—

"No higher or other duties shall be imposed on the importation into the territories of His Britannic Majesty in Europe, of any articles the growth, produce, or manufacture of the United States, than are or shall be payable on the like articles being the growth, produce, or manufacture of any other foreign country."

By the general customs act of 7 William IV, section 60 (1836), it was provided:

"That the duty upon rice, rough or in the husk, imported from the west coast of Africa, shall be, per quarter, 1 penny."

Under this act the general duty on the same kind of rice, which was commonly called rough rice, or paddy, was 2s. 6d. per bushel. By some members of the British Board of Trade it was argued that the discrimination was not inconsistent with the provisions of the convention, since it gave an advantage, not to the produce of any particular country, but only to articles of commerce shipped from a particular place, and treated the product of all countries alike.

Against this contention the United States protested.

In a note to Lord Palmerston of February 1, 1841, Mr. Stevenson, the minister of the United States in London, said:

"If it be admitted, as it must be, that by the provisions of the existing law all rice, wherever produced (and of course that of Africa), can be imported into British ports at the low duty of a penny per quarter, upon what principle can it be maintained that Africa is not thereby placed upon the footing of

a favord nation, with advantages given to her produce which the treaty intended equally to secure to the United States? Can the stipulations of the treaty be defeated or evaded by Great Britain allowing Africa to import from her coasts not only her own rice but that of other nations?"

The result of this protest was that the British Government equalized the duties on rough rice imported from the United States and from the western coast of Africa. (House Executive Document No. 2, Twenty-seventh Congress, second session, pages 47–57.)

The discrimination in the act of 1894 is even more pointedly at variance with the treaty stipulations in question than was the discrimination in the British act of 1838, since it imposes, expressly, an additional duty on an article as the produce or manufacture, and because it is the produce or manufacture, of a country that may happen to fall within a disfavored category.

It is scarcely necessary to say that the question now under consideration can not be affected by the form in which the discrimination is created—whether it is created by granting a duty lower than the general duty, or by imposing a duty in addition to the general duty. The form in which the discrimination is created is no criterion either of its extent or of its effect. In reality, in the present case, the discrimination, so far as its effect is now ascertained, would fall on Germany and Austria-Hungary alone. If it fell on only one country, or on three or more, the question of treaty construction would remain, so long as there was any other country that was favored.

Another question, however, is yet to be considered. Can the payment by a government of a bounty on the exportation of an article of its produce or manufacture be considered in the light of a discrimination which may warrant another government in laying on the importation of such article an additional or discriminating duty, in spite of a most-favored-nation stipulation?

The answer seems to be plain, that the payment by a country of a bounty on the exportation of an article of its produce or manufacture for the purpose of encouraging a domestic industry can no more be considered as a discrimination than can the imposition of a protective or practically prohibitive duty on the importation of an article the produce or manufacture of a foreign country for the same purpose be so considered. The two measures are the same in principle; the question as to which shall be adopted is a matter of domestic policy. It is a matter in respect of which nations, in stipulating for equality of treatment, have preserved liberty of action. The protective duty on importation and the bounty on exportation are alike intended, whatever may be their effect, to create a national advantage in production or in manufacture. As between the two, the bounty is the more favorable to the inhabitants of foreign countries, since it tends to enable them to get cheaper articles at the expense of the bounty-paying government.

Formerly the Government of the United States paid a bounty on all exported pickled fish that were derived from the fisheries of the United States. (Section 2, act of July 29, 1813, Stat. L., volume 3, page 50.) This act was continued in force in 1816, its duration having originally been limited to the period, whatever it might be, covered by the war with Great Britain and a year thereafter. (Act of February 9, 1816, Stat. L., volume 3, page 254.) It remained in force for many years; it seems still to have been in force in 1845. It probably never was imagined that this act created a discrimination which might expose the United States to retaliatory or discriminating duties at the hands of foreign governments.

In laying protective duties on foreign articles instead of paying bounties on domestic products, the immediate effect, if not the object, of the law is to curtail importations; but so long as the duties imposed are equal on the products or manufactures of all nations, though in practice they may operate most unequally, foreign nations can not object on legal grounds. They can not allege discriminations in the treaty sense. It is understood, when treaties against discriminating duties are made, the governments reserve the right to favor by duties or by bounties their own domestic production or manufacture.

The additional duty, therefore, levied by the act of 1894 on all sugars coming from bounty-paying countries is not responsive to any measure that may be considered as constituting a discrimination by those countries against the production or manufacture of the United States, but is itself a discrimination against the produce or manufacture of such countries. It is an attempt to offset a domestic favor or encouragement to a certain industry by the very means forbidden by the treaty.

I assume that the German Government does not claim the treaty affords any just ground for protest against the additional duty on sugars not shown to be the produce or manufacture of Prussia.

Respectfully submitted.

W. Q. GRESHAM.

Mr. CAFFERY. Mr. President, the argument of the distinguished Senator from Delaware [Mr. GRAY] is correct, that the imposition of a bounty on sugar exported from Germany in favor of its own export trade is a matter of domestic concern to that Empire; but whenever that export bounty touches the interest of the United States or any other country in a way either seriously to impair or destroy that interest, then it becomes a question of vital domestic concern to the country to which the exported article is brought.

The Senator from Delaware perhaps has not taken cognizance of the condition of the sugar culture in Germany. The German sugar makers are protected against the importation of any foreign sugar by a tariff which is entirely prohibitory. No foreign sugar can enter a German port. Then, in addition to that, they give an export bounty on raw sugar of twenty-seven one-hundredths of a cent per pound, and on refined sugar of thirty-eight one-hundredths of a cent per pound. So we have an industry which is walled in against all outside interference, protected against any foreign invasion, with unlimited power to invade other countries and to destroy industries in those countries about upon an even plane with the protected industry of the country which gives the export bounty.

I suppose this case for the consideration of the Senator from Delaware: Suppose the conditions of raising wheat in Delaware and in Germany were about even; that the only advantage Delaware had over Germany was in the matter of transportation and freight across the ocean, the same advantage possessed by Germany over Delaware. Now, if Germany were to give an export bounty of such an amount as to induce the Germans to export their wheat into Delaware and ruin its wheat growers, I want to know whether it would not become a matter of domestic policy to the United States to preserve that industry from destruction?

I think it would. It is one of these retaliatory acts that countries are bound to resort to as a matter of self-defense when the interests of their people are threatened, when the pursuits of its own people are about to be destroyed. It then becomes a little more than a matter of domestic policy. It becomes a matter of self-preservation, and that is the way I look at it.

As a general rule, I am not opposed to taking cheap goods from any quarter of the globe, coming from where they may; but in this particular instance I do not believe it will be proper to allow the Germans to come into the United States with their bountied sugar and destroy the product of the domestic growers. The bounty would be a sufficient inducement for the exportation of their sugar, and is of a sufficient amount to destroy the industry in the United States.

I call the attention of the Senator from Delaware to the fact that the sugar industry of Germany is, in my opinion, a most pernicious example of the bad effects of protection and sugar bounties. Here is an industry which levies upon the people of Germany, according to the reports that Mr. Consul Mason makes, about 3 cents per pound additional to the price of sugar in the United States.

In other words, where the people of the United States are consuming sugar at about 4½ cents per pound, the Germans are consuming it at 7½ cents a pound. That shows the deleterious effect of the system of protection. An artificial industry, built up on props, not able to sustain itself even by high protection, has to resort to the expedient of export bounties in addition to prohibitory duties.

I would inquire whether a system of that sort, artificially supported in every direction by law, ought to be permitted to destroy industries in other countries? In my opinion, it becomes then a question of self-preservation of any country whose industries are threatened by a flood of exports induced by an export bounty.

Mr. President, while I am on my legs, and the question of sugar is up, I propose to say something about the report of the Secretary of the Treasury on the resolution introduced by me in the Senate on the 17th ultimo in regard to the evidence upon which the Treasury drawback allowance was based. It was asserted by my amiable friend the Senator from Iowa [Mr. ALLISON] in charge of the bill on the Republican side that the Treasury statement of drawback allowances was absolutely correct.

Mr. LINDSAY. I will ask the Senator from Louisiana if the report has yet been printed?

Mr. CAFFERY. I procured proof sheets yesterday.

Mr. LINDSAY. Oh, yes.

Mr. CAFFERY. It was stated by the Senator from Kentucky [Mr. LINDSAY] when it was alleged the statement was prepared by the late distinguished Secretary of the Treasury, Mr. Carlisle, and therefore correct, that Mr. Carlisle got his information from the sugar trust, and the report of the Treasury Department shows that the information came from the king of the sugar trust, Mr. Havemeyer.

It appears that Mr. Ira Ayer wrote to a number of sugar refiners to get from them a statement of the exact number of pounds of raw sugar required to make a pound of refined sugar of a certain degree, and I have here what he says. I will read from the proof sheets of the report of the Treasury Department:

In seeking the fullest information possible relative to the "yield" of refined products from raw sugars of different kinds and grades, I addressed a letter to the principal refiners of the country dated January 5, 1895, inclosing a tabulated form which each was requested, as far as practicable, to fill out. (See Exhibit B.)

The names of the refiners to whom this letter was addressed are: Nash, Spaulding & Co., Boston, Mass.; H. O. Havemeyer, president of the American Sugar Refining Company, New York, N. Y.; B. H. Howell, Son & Co., New York, N. Y., for Mollenhauer Sugar Refining Company, New York, N. Y., and National Sugar Refining Company, Yonkers, N. Y.; The W. J. McCahan Sugar Refining Company, Philadelphia, Pa.; William Henderson, New Orleans, La.; Cunningham & Miller, Sugarland, Tex.

From Nash, Spaulding & Co. no reply whatever was received, although several urgent letters were sent them, a copy of the last of which, dated March 1, 1895, will be found—Exhibit B.

To my letter of January 5, 1895, the W. J. McCahan Sugar Refining Company and the National Sugar Refining Company replied under dates of January 7, 1895, and March 6, 1895, respectively, stating their inability to furnish the data desired.

So it is seen that two of the refiners failed to make any response whatever to the letter of Mr. Ayer making these inquiries, as stated.

Messrs. Cunningham & Miller replied under date of April 13, 1895, availing themselves partially of the use of the blank form which had been furnished them. (See Exhibit C.) A similar response was received from William Henderson under date of April 18, 1895.

Sworn statements were subsequently received from both of these firms, covering substantially the information which they had first sent as per form furnished. (Exhibit B.)

The Mollenhauer Sugar Refining Company furnished a sworn statement under date of April 22, 1895. (Exhibit B.)

Mr. H. O. Havemeyer, president of the American Sugar Refining Company, furnished information by letters dated, respectively, February 21 and April 15, 1895. (Exhibit B.)

Mr. Havemeyer made no sworn statement whatever. He wrote two letters at different dates, with long intervals between the letters.

Dr. Edward Sherer, sugar expert in charge of the United States laboratory at this port, furnished information by letter through the appraiser, dated April 9, 1895. (Exhibit B.)

In an investigation of the same question made at San Francisco., Cal., in 1886, I obtained the sworn statement of E. L. G. Steele, president and manager of what was then known as the American Sugar Refining Company, of that city, and certain figures taken from that statement (Exhibit A, with my report dated August 24, 1886) are used in this report.

A tabulated statement of the information received from the sources above mentioned, with reference solely to the refined products obtainable from 100 pounds of raw cane centrifugal sugar testing 96 degrees by the polariscope, has been prepared and is submitted herewith, marked "Exhibit D."

It would appear that Mr. Havemeyer made two statements in letters of different dates, from February 21, 1895, to April 8, 1895, and Mr. Sherer furnished his information by letter, through the appraiser, of April 9, and in 1886 a statement was obtained from the president and manager of the American Sugar Refining Company in San Francisco, which is said to be an exhibit appended to the document, but which I can not find. Possibly it may have been overlooked in the printing. His statement was derived in 1886, and is stated from the memory of the investigator.

These are the sources of the information: Mr. Havemeyer, the president of the American Sugar Refining Company in New York; another president of the American Sugar Refining Company in San Francisco, in 1886, and Mr. Mollenhauer under the wing of the sugar trust, embraced within the sugar trust in all likelihood; and the only independent statements in regard to the whole matter of the number of pounds of raw sugar it takes to make a pound of refined are not taken as the basis of the drawback allowances of the Treasury Department.

In Exhibit B is a copy of a letter which Mr. Ira Ayer, special agent of the Treasury, sent to all these refiners; and he says in the letter:

It is usual in these cases to ask for a sworn statement of the manufacturer, and I will thank you therefore to have the statement, when completed, duly sworn to.

It would seem that a manufacturer enjoying so much protection from the Government of the United States and engaged in a business of such proportions as that of manufacturing and refining sugar for the consumption of 72,000,000 people would not treat in an airy and indifferent style a communication such as was addressed to him by Mr. Ayer. Here is what Mr. Havemeyer has to say:

THE AMERICAN SUGAR REFINING COMPANY,
New York, January 14, 1895.

DEAR SIR: Owing to my absence from the office through illness for the past ten days, I am but now in receipt of your communication of the 5th instant, and hope to give the matter my attention at an early date.

Now, he was sick. I hope he does not get monkish at that period, for when health returns, frail man is apt to forget his devout tendencies. The letter is dated January 14. He was going to reply at an early day. He waits until February 21 prayerfully to think over this important matter about which he was addressed, and here is what he says:

DEAR SIR: In response to your letter of February 18, I beg to state that 92 pounds of hard refined sugar and 6 pounds of sirup are obtainable from 100 pounds of first-class centrifugal sugars, polarizing 96 degrees.

Ninety-two pounds of hard refined sugar, he says, are obtainable. How much more is obtainable? Is any more sugar obtainable? There are 96 pounds of sugar in the 100 pounds of raw. Mr. Havemeyer airily says there are 92 pounds of hard granulated sugar. Then he states:

Eighty-eight pounds of hard refined sugar and 10 pounds of sirup are obtainable from first-class raw beet sugars polarizing 94 degrees direct and of 88 degrees net analysis.

It is impracticable to furnish the yields from any other grades of sugar in hard refined and sirup, none being used in their manufacture.

Here is the statement therefore that our granulated sugar is made only from cane sugars testing 96 degrees by the polariscope, and raw beet sugars of 88 net analysis:

The sirup from the beet sugar is of no value; that from the centrifugal cane varies from one-half cent to 1 cent (say three-fourths cent) per pound.

What sort of a statement is that, Mr. President, to give to the United States, whose beneficiary he is? When making millions according to his own testimony by this differential in his favor, he says not one single word about the amount of sugar possible to be made out of the residue, only stating that the sirup was comparatively of no value, one-half to a cent a pound. He says the sirup from the beet is of no value whatever.

Now, Mr. Havemeyer bethought him later that perhaps his statement was not full enough; that he had left out something; that while there were 96 pounds of crystallizable sugar in 100 pounds of raw at 96 test he only accounted for 92 pounds of granulated sugar, and whatever sirup there was was worth about half a cent a pound.

He wrote a letter dated the "American Sugar Refining Company, New York, April 15, 1897," as follows:

DEAR SIR: In response to your communication of April 8—

So therefore between February 1 and the date of this letter Mr. Ayer had written him another communication, as the first one did not give as many facts in relation to this question of drawback allowance, the number of pounds of raws it took to make a pound of refined, as was required—

I beg to say that the sirup valued in my letter to you of February 21 at from one-half cent to 1 cent per pound (or, which is the same thing, 6 to 12 cents per gallon) is table sirup after it has been subjected to the full process of refining, filtering, clarifying, etc. Without such process it is fit only for distilling purposes, and sold, ex package, at 2 to 3 cents per gallon, an average of one-fifth of 1 cent per pound.

The polarization of these sirups averages about 40—

Forty degrees, I suppose, of saccharine strength, but the degree is not mentioned here—

and the weight 12 pounds per gallon, with 20 per cent water.

Mr. President, the Treasury drawback allowances are made upon Mr. Havemeyer's statement, 92 pounds of hard granulated sugar and 6 pounds of sirup.

Mr. Cunningham's statement is as follows:

Possible product of hard refined sugar from imported raw cane sugar, and the products under the ordinary methods of refining now in use in the United States.

Polarization.	Amount of raw sugar used.	Hard refined.	Ex. C.	Sirup.	Loss.
	Pounds.	*Pounds.*	*Pound.*	*Pounds.*	*Pounds.*
96	100	92.16	.92	3.49	3.08
94	100	88.34	.45	4.61	5.33

Loss consists of water, ash, and other impurities. Hard refined tests from 99.8 degrees to 100 degrees; Ex. C, 99 degrees to 94 degrees; sirup, 32.8 degrees to 41 degrees.

Mr. Cunningham's statement gives, as the product of 100 pounds raw, at 96 degrees, as follows: Hard refined, 92.16 pounds. Extra C, ninety-two one-hundredths of a pound. Solid matter in sirup, 3.49 pounds. Loss, 3.08 pounds.

As to the polarization of the above product, I have quoted the sworn statement of the chemist of Mr. Cunningham. He is an honest man; he is not in the sugar trust; he has given a fairly correct statement. He has a small refinery. He turns out 400 or 500 barrels a day at most. Some of the sugar-trust factories turn out 12,000 barrels per diem.

If Mr. Cunningham can get 93 pounds of first-class sugar, hard granulated and extra C, and leave solid matter in the sirup of 3½ pounds, which Mr. Havemeyer has not accounted for, how is it that the Havemeyers, with their enormous works, with their tremendous output, can not make as much? Why was not the Treasury Department statement bottomed upon the statement of Cunningham and Miller? Why was the statement of Mr. Havemeyer taken without any inquiry further than these loose statements? Here is a statement from Mr. Havemeyer not sworn to. Here is a statement from Mr. Cunningham and Mr. Miller, sworn to by their chemist. That statement is disregarded and the statement of Havemeyer taken.

Now, here is the Government chemist, Mr. Sherer. Mr. Sherer made no examination himself. He inquired, he says, but he does not give the particular sources of information. Here is what he says:

UNITED STATES LABORATORY,
OFFICE OF APPRAISER OF MERCHANDISE,
New York, N. Y., April 9, 1895.

SIR: Referring to letter of Special Agent Ira Ayer of April 8, 1895, requesting a statement from me showing the average refined products obtainable from 100 pounds of cane sugar (centrifugal) polarizing 96 degrees, and further requesting the average tests of each refined products and the character of the loss, I have the honor to report as follows:

The average yield from 100 pounds of cane sugar (centrifugal) polarizing 96 degrees, as ascertained from the last available sources of information, is, in my opinion, as follows:

	Pounds.
Hard refined sugar	92.50
Sirup	5
Loss	2.50

The test of hard refined sugar ranges from 99 degrees to 99.9 degrees; of sirup, from 30 degrees to 40 degrees.

I will print the whole of these statements in the RECORD as an appendix.)

Now, Mr. President, we come to the averages of all these statements. I have not read the statement of Mr. Mollenhauer, nor the statement of Mr. Henderson, for Mr. Henderson's statement is based upon 97 degrees sugar, when the investigation was taken on the basis of 96 degrees sugar. Mr. Mollenhauer's statement is so loose as not to form the base of any calculation whatever. He gives 80 pounds of hard refined as the result of a hundred pounds of raw sugar at 96 test, and he gives 15 pounds of soft sugar; but giving so few pounds of hard refined, it was absolutely necessary for him to make up the loss by a great number of pounds of softer sugars.

But here are the statements which are entitled to some consideration, the statement of Mr. Havemeyer, the statement of Messrs.

Cunningham and Miller, and the statement of the Government chemist at the United States laboratory. Both of these statements exceed the estimate of Mr. Havemeyer, and both are disregarded and Havemeyer's taken. The average of all of these statements, according to this Treasury report, is 92.46 pounds, including the statement of Mollenhauer, which gives only 80 pounds.

There are hundreds and thousands and millions of dollars in this matter, and here even is the general average of all these statements disregarded and the statement of Mr. Havemeyer taken literally and exactly as he gave it.

Mr. President, from an analysis of this report, which regulates both the duty upon refined sugar as based upon polariscopic test and the number of pounds of raw which it takes to make a number of pounds of refined, and the drawback allowances on export of sugar, it will be seen that the statements upon which the drawback allowances are based are exceedingly loose, inartificial, and, in my opinion, erroneous and inaccurate.

Messrs. Cunningham and Miller practically in their statement give 94 pounds of sugar. This sirup which Mr. Havemeyer says is worth only half a cent a pound when it is refined is worth much more. During the conversation I had with Mr. Buynitzky, of the Treasury Department, he told me that there was a drawback allowance asked upon sirup valued at 30 cents a pound. Here is the Treasury statement that allows about 1 cent a pound. They can make sirup on an allowance of 2 cents and get a drawback on it of from 5 to 20 and 30 cents. When they export it it is a perfect bonanza to the sugar trust or to anybody else who wants to export sugar or sirup.

Mr. President, it appears we are exporting some sirup. Here is a statement from the Treasury showing that in May, 1897, there was 36,204.36 worth of sirup exported. In April, 1897, there was $3,092.80 exported. But it does not give the allowance of the drawback per gallon. It gives the value of the total product, but it does not appear from this statement, which has been derived unofficially from the Treasury Department, that there has been any valuation of the sirup per gallon. They report in those same months $4,046 of sugar in May, and $4,520.32 in April last, exported. In 1896 they exported refined sugar numbering 9,106,259 pounds, worth $450,750, and sirup, 6,953,307 gallons, worth $737,870.

See what frauds can be perpetrated upon the country in the way of drawback allowance under a Treasury regulation by not giving the accurate number of pounds of refined sugars made out of raw sugars of a certain test and not accurately accounting for the soft sugar and sirup.

I have not any proof to show what this exported sirup and sugar are worth per gallon or pound, and therefore I can not tell what the drawback allowance was upon it.

I will refer to the peculiar clause in this drawback law, if I can lay my hands right on it, in which it is stated that not more than 8 cents per gallon should be allowed for sirup exported unless the Treasury, upon investigation, concluded to give more. That is about the amount of it, but I suppose when the refiner claims it to be worth, say, 30 cents a gallon or 20 cents a gallon, the Treasury is not very hard to convince that it is worth more than the 8-cent limit.

Mr. President, I stated that the present sugar schedule is not upon a proper basis. Given the number of pounds of raw sugar to make a pound of refined and given the differential between raw and refined, it is easy to ascertain the duty levied by polariscopic test. It is manifest, therefore, when they get a larger number of pounds of raw sugar than are necessary to make a pound of refined, they make both in the matter of duty and in the matter of drawbacks upon export. So the statement of the Treasury Department, in my opinion, is incorrect. I never could see how when there were 96 pounds of sugar in a hundred pounds of raw you could throw away 4 pounds of it as practically worthless.

It is true that there is a little ash in the residue, which in the process of refining makes a good deal of invert sugar; but they get that back again in the shape of first-grade sirup, and a large quantity of the sirups said to be made from 4 pounds of sugar will make the second-grade sugar, called extra Cs.

Mr. President, I would inquire seriously of the Senate, what hold has the sugar trust upon the legislative branch of the country that it is necessary to give it the differential carried in this bill? They get a clean differential of 20 cents; they get a countervailing duty of 38 cents a hundred; they get a clean duty of 58 cents according to the schedule itself, without any sort of reference to prices.

Mr. GRAY. You want to give them the countervailing?

Mr. CAFFERY. I am willing to cut off the differential and give them the countervailing, or cut off the countervailing and give them the duty. The countervailing is, under the circumstances, too high.

Not only is this countervailing duty sufficient, but on top of that countervailing duty is added this 20 cents clear, extra, useless tariff. It is fit for nothing but to make this institution, already too strong, doubly strong. Every succeeding Congress has felt the weight of the sugar trust. Its representatives are among the most astute men in the world, and in the formation of every bill the sugar trust works its sweet will and has its own way.

I read the other day statements showing that the wholesale grocers of the United States were virtually slaves of the sugar trust. The consumers are the virtual slaves of the sugar trust. This institution has the hardihood to say and did say, in the investigation before the Lexow committee, that it was of inestimable good to the citizens of the United States, in that it had lowered the price of sugar to the consumer. That statement is absolutely false.

The price of sugar has not been lowered by the sugar trust, and the sugar trust makes as much differential duty under the Wilson Act as it did under the McKinley Act. It makes as much differential between the raws and refined as it did when brown sugar was worth 8 cents a pound, and now, when raw sugar is worth about 2.3 cents per pound, according to the statement of Mr. ALDRICH, the differential in favor of the trust in the open market is about the same, nearing a cent a pound.

I introduced a table some time ago in the discussion of this bill showing that the differential in favor of the trust now was much greater than it was when brown sugar was worth 7 and 8 cents a pound. They have hammered the price down to the producer, and with false pretenses are trying to make capital in their favor by the lower prices of sugar and claiming the gratitude and thanks of the millions who consume their sugar.

The lowering of the price is not due to the sugar trust. It never was due to the sugar trust. It is due to the lowering of the price of the article in the hands of the producer; from the enormous quantities of it made in Germany, and in the Tropics, and all over the world. There is not the slightest ground upon which this differential given in the bill in favor of the trust can be allowed.

It is said—my colleague [Mr. MCENERY] said in his speech—that these thrusts made at the sugar trust would reach the planter. Mr. President, the sugar planters of Louisiana can not lean upon this pillar of the sugar trust. If they do, sooner or later the sugar trust and planter will go down together. It is too powerful and too corrupt an institution upon which any honest set of producers can lean for support. If the producers of Louisiana do not want the sugar trust as a prop, as a pillar, as a support for them, they must get from behind the sugar trust, lest the avenging dagger of the people reach them and transfix them together.

I have heard it said—I believe on this floor—that trusts are good things, first-rate things; that the trend of civilization is toward trusts; that they produce cheaply; that the consuming millions are the beneficiaries of all their evil combinations, of all their contracts in restraint of trade, and just so the producer is benefited; the trusts must be looked upon with at least eyes of leniency. I do not look at it that way. When the argument was attempted to be made in the case of the Transmissouri Traffic Association that there might be a reasonable contract in restraint of trade I think it involved a solecism.

No contract in restraint of trade can be reasonable. It may have a superficial look of reasonableness, but in the nature of things it must be wrong. The common law and our fathers were wiser than we when we take up a new doctrine that contracts in restraint of trade can be reasonable. Such contracts are not only not reasonable, but they are illegal. They have been denounced by the law. They have been denounced ever since civilization began.

It is too late to find apologies and excuses for conspiracies and combinations in restraint of trade on the ground that they may be reasonable, and as such tolerated and legalized. The only reasonable restraints on trade are those recognized in a case where a man engages not to enter in a certain line of business, which he sells to another, for a certain limit of time and in a certain locality. This agreement has no tendency to depress prices or to harm anybody, and is really, in an economic sense, not in restraint of trade.

These enormous aggregations of capital in the nature of things tend to control prices. Do not add to that necessary evil of civilization the power of these gigantic monopolies to enter into contracts to control trade and to depress or elevate prices and to have the whole population at their mercy.

This institution, Mr. President, this great, gigantic trust, is a blot upon the land. The people feel as though they were in the shadow of an enormous power that they can not resist. The individual man is dwarfed, destroyed, and the corporate influence and the power of wealth overshadows the land with its baneful power.

In a few days, Mr. President, this bill will pass, the evil to be wrought by it will be consummated, and the people of the United States will be treated to such a dose of tariff as was never thrust down them before. This bill carries higher rates than the McKinley law. In a time of profound peace we have a bill in comparison with which the Morrill tariff bill of the war pales into utter

insignificance. Here are some of the articles upon which the duties are in excess of 100 per cent:

Common window glass, from 107 per cent to 168 per cent; pocket-knives, 111 per cent; tobacco, from 105 to 298 per cent; rice, 100 per cent; salt in bulk, 114 per cent; woolen cloths, valued at not over 50 cents per pound, 128 per cent; blankets, 125 per cent; flannels from 102 to 119 per cent; shawls, 171 per cent; wool hats, from 117 to 203 per cent; felts, from 104 to 224 per cent; cheap silks, from 200 to 700 per cent.

That is a fine lot of articles carrying over 100 per cent, and nearly every one of them is an article of indispensable and absolute necessity to the ordinary citizens of the United States.

I have some papers which I propose to introduce into the RECORD; but before I do so I want to draw the attention of the Senator from Iowa to what I consider a manifest injustice under the sugar schedule, and that is, that the same rate of duty is allowed by paragraph 202 as to all sugars that have gone through a refining process as is allowed to granulated sugars. I submit to that Senator, who is a man of great considerateness and kindness, that this is a deep cut on the common people of the United States, who largely consume sugar testing by the polariscope from 83 to 85 degrees.

Under the operation of this bill this sugar would be denied to the ordinary consumer, or its price would be raised by the sugar trust, which would absolutely control it under the provisions of this bill. It is not proper, nor is it just to place that character of sugar under the same tariff that you have placed upon the higher grades of sugar, testing by the polariscope from 99 to 100 degrees.

This sugar is very largely used in manufacturing preserves and jellies and making ordinary cakes and articles containing sweets which the people ordinarily eat. I submit that the imposition of this very high rate of duty upon that grade of sugar ought to be taken off in conference. I call the prayerful consideration of the Senator from Iowa, in behalf of the consumers of this country, to this unjust provision of the bill.

I shall introduce this document, which I ask to have incorporated in my remarks, of the distributers and manufacturers dealing in or using refined sugar, protesting against any increase of protection that would make the consumption more difficult and the importation of the foreign article impracticable.

The PRESIDING OFFICER (Mr. FAULKNER in the chair). In the absence of objection, the paper referred to by the Senator from Louisiana will be inserted in the RECORD.

The paper referred to is as follows:

To the Senate of the United States, Washington, D. C.:

We, the undersigned, distributers and manufacturers, dealing in or using refined sugar, respectfully protest against any tariff which, by increasing the protection on the article, would make the importation of foreign more difficult, if not impossible.

We further beg that the schedule may be so amended as not to exclude the yellow refined sugar not over No. 16 Dutch standard, which is required by manufacturers and by the poorer classes in this country.

Anderson Preserving Company (O. L. Anderson, treasurer), manufacturers of preserves, jellies, etc., Camden, N. J.; W. H. Keen Company (W. H. Keen, president), bakers and confectioners' supplies, Philadelphia, Pa.; George Miller & Son Company (Chas. B. Miller, president), manufacturers of confectionery, Philadelphia, Pa.; C. McD. Harvey, editor Confectioners' Journal; C. Reichle & Sons (C. Reichle), confectioners; American Preservers' Company (L. J. Link, local manager), 950 Beach street; Croft & Allen Company (E. F. Roberts, secretary), Thirty-third and Market streets; G. W. Coles Candy Company (G. W. Coles, president), 114 Market street; Robt. C. Fest's Son & Co., biscuit manufacturing; Henry Wanklin, biscuit manufacturing; Brandle & Smith, manufacturers confectionery; James Bell, grocer; Wm. J. Strange, grocer; James M. Curdy Son, grocer; The Bakers' Supply Company, 16 North Delaware avenue, Philadelphia, Pa.

Mr. CAFFERY. I also wish to introduce a letter published in the New York Journal of Commerce and Commercial Bulletin, of June 25, by Mr. R. Fleming Crooks, in regard to this duty on sugar, and especially in regard to the high duty upon these low-grade sugars.

The PRESIDING OFFICER. If there be no objection, the paper referred to by the Senator from Louisiana will be inserted in the RECORD as part of his remarks.

The paper referred to is as follows:

[New York Journal of Commerce and Commercial Bulletin, June 25, 1897.]

FOREIGN SUGAR COMPETITION—ITS INFLUENCE AS A CHECK UPON THE TRUST'S OPERATIONS—MR. R. FLEMING CROOKS REPLIES TO SENATOR M'ENERY'S STATEMENT IN THE SENATE THAT ROBERT CROOKS & CO. WOULD BE THE EXCLUSIVE BENEFICIARIES OF A PROPOSED AMENDMENT—IMPORTS AMOUNT TO ONLY 4 PER CENT OF THE COUNTRY'S CONSUMPTION—THE SUGAR TRUST'S ADVANTAGES.

In the Senate on the 12th instant Senator MCENERY referred to Robert Crooks & Co. as being, in his opinion, the exclusive prospective beneficiaries of a proposed amendment to the sugar schedule of the tariff. Mr. R. Fleming Crooks, of the firm named, was questioned yesterday regarding the Senator's statement. He said:

In fairness, I must suppose Senator MCENERY entirely misunderstood, for he stated that it was designed to strike down the dividing line between the lower-grade sugars, viz. those below No. 16 D. S., and those above.

Now, the amendment read, "And on sugar above No. 16 Dutch standard in color, which has gone through a process of refining, 1 cent and ninety-five one-hundredths of a cent," purposely excluding refined sugar not above No. 16 Dutch standard, which, under the Senate schedule, is mulcted three-fourths of a cent more than raw of about the same test, as will be seen by the following statement:

Yellow refined, not over No. 16 D. S.		1.95
Raw muscovados, 85 per cent 75 degrees	1.00	
Three one-hundredths for each additional degree	.30	
	1.30	
Less	.10	
		1.20
Margin		.75

To illustrate his point, Senator MCENERY exhibited a trust white sugar over No. 16 Dutch standard, but only polarizing 83.6, which he not incorrectly called a "fraud and a deceit." Such sugar, however, being over No. 16 Dutch standard, would, under the amendment, be subject to the full refined duty of 1.95. While the trust makes such a quality in large quantities, it is not made in Great Britain, and could not be sold there. The lowest test above No. 16 Dutch standard imported polarizes 92 to 94 degrees, and this we were selling on the 10th instant at 3⅞ cents as against the trust's price of 4.00 cents he quoted for the sugar which Senator MCENERY denounces. Even yellow sugar, which would have been admitted by the amendment, polarizes 85 to 87 degrees, and was then sold by us at 3¾ cents; for, being a by-product in refining, it can be sold cheaply, although thoroughly wholesome and sound.

While giving Senator MCENERY full credit for his ignorance, one may criticise his thus speaking against this amendment—which was only lost by his and another vote—particularly as on the previous day his was the one vote which gave the trust the additional advantage of one-tenth of a cent less on low raw sugar and seventy-five one-thousandths of a cent more protection on refined.

It does not seem fair that when it is clearly demonstrated that the Senate bill charges one class of refined 62½ per cent more duty than the same test of raw, that our opponents should shift their ground and ask who is to be benefited by its importation. It is an indisputable fact that the soft sugar made in England and Scotland tests much higher than that refined in America, as is shown in the certificate quoted in CONGRESSIONAL RECORD, page 1963, where we find that out of nine of the lower American samples the highest tests 86.1, whereas the sample of yellow Scotch tests 89, so that Senator MCENERY need not be afraid of the quality of British sugar, and we may not unfairly claim that the consumer will benefit more than the importer by the continued competition in this market of yellow refined.

Its importation, even when admitted on the raw basis, as under the McKinley and Wilson bills, has been a bagatelle, amounting last year to not more than 3,500 tons; but even this drop in the bucket helped to check excessive prices being charged, and that, we suppose, is causing it to be legislated against.

As Mr. John Farr pointed out in a letter printed in the CONGRESSIONAL RECORD, page 1980, the American refiners make a heavy tonnage of soft sugar. He contends that they turn out an equal quantity of refined, in granulated and soft (the latter carrying a large percentage of water), to the raws melted, thus thoroughly impeaching the Treasury allowance of 107½ pounds of 96 centrifugals to 100 pounds of refined, on which the pending tariff schedules are based.

In the same letter Mr. Farr states: "Messrs. Willett & Gray are acting as the agents of the refiners in this matter, and, while I have every reason to desire that our refiners should have ample protection, I can not understand why they should find it necessary to resort to misleading and confusing technical statements, which seem to be made up with the idea of tangling people up instead of making the subject clear."

It is amazing that the clever men at Washington should find any insuperable difficulty in the preparation of an equitable tariff, for, as Senator J. K. JONES mentions (CONGRESSIONAL RECORD, page 1958), the most obviously simple solution of the matter is to impose the same duty of 1 cent on all sugar—raw and refined—polarizing 75 degrees, with an additional three one-hundredths of a cent for each extra degree, then adding any additional duty on refined above No. 16 that Congress may see fit to give the refiners as protection or gratuity. This, as he said, would plainly let the people of the country understand the amount of margin given the refiners, without any juggling.

If, as Senator HOAR infers (CONGRESSIONAL RECORD, page 2045), the gentlemen on either side of the Senate Chamber have no desire except "to settle the difficult problem of a duty on sugar" in the manner which is for the best interests of the country, they surely can readily do it on these lines.

People can not be imposed on by any bland promises of inquiries into the workings of trusts, when it is proposed to give a very largely increased and intentionally prohibitory bonus to a trust whose methods are notorious.

It is almost impossible to arrive at a fair conclusion, if, while assessing an arbitrary duty on refined, the duty on raw be made upon a composite and necessarily theoretical basis, which in the Dingley and Senate schedules allows a very large margin to the refiners.

Even taking the prodigal Treasury differentials for loss in manufacturing, which do not allow for the refiner's profit on resulting low grades, at a very conservative calculation, the protection on 96 per cent centrifugals, as compared with a good grade of German granulated (costing, say, 12s. c. i. f. New York) is as follows:

		Cents.
Wilson bill	per pound	.231
Dingley bill	do	.465
Senate bill	do	.540

To which must be added the extra value of American over the competing German.

This is the minimum protection, and will be largely increased on the lower tests.

As only about 8 per cent of the imports of raw sugar, up to 1895, were beets, centrifugals can be regarded as the refiner's raw material in the United States. (CONGRESSIONAL RECORD, page 1997.)

Even last year, when the Cuban crop failed, 67 per cent of the imports consisted of centrifugals.

It is difficult to understand on what grounds the American refiners ask for any increased protection, or why they fear being swamped by foreign sugar. Even last year, under the stimulus of advanced prices, caused by the shortness of the Cuban crop, on which America has largely relied, the total importations of refined only amounted to about 77,000 tons, some portion of which was, I understand, brought in by the trust for its own purposes.

This total of 77,000 tons is only about fourteen days' consumption for the country, and could be turned out easily in five days from the trust's largest single house.

Great Britain contributed but about 9,300 tons of the following grades, as

correctly as can be gathered from the British board of trade returns and from figures in our own office:

	Tons.
Yellow, not above No. 16 Dutch standard	3,547
Soft white, above No. 16 Dutch standard	3,653
Granulated	2,103
Total	9,303

The importation of 77,000 tons, including the above 9,303 (and 13,000, or one-sixth of the whole, which were entered at the Pacific Coast), does not amount to 4 per cent of the country's consumption of nearly 2,000,000 tons. As one consideration it might hardly seem wise if, in order to benefit the trust by excluding this insignificant total, only reached under exceptionally favorable circumstances, America should expose her exports to injury from countries which have always proved themselves adepts at commercial retaliation, and which have already given clear warning of their intentions. It must be conceded that under the existing tariff all foreign sugar could readily have been shut out had the trust foregone a little of its great profits.

We are to some extent engaged in the importation of refined sugar, but this might not be a sufficient reason for speaking for publication if our side of the case had any fair chance of presentation; but, as the majority of those who could express an opinion are precluded from stating anything at variance with the wishes of the trust, I avail of the opportunity afforded by Senator McENERY'S remarks.

If it be deliberately decided to hand matters over to the trust without the small check of any foreign competition, the verdict must be accepted, but meantime a little wholesome ventilation, even at the risk of repetition, can do no harm.

Combinations of organized capital are legitimate enough, but this is quite consistent with a belief that the trust as at present operated is the greatest enemy in the country to freedom of contract, and when it or any of its allies calls for fresh favors under false pretenses, and displays such amazing greed and rapacity, no one need apologize for speaking the truth.

Senator ALDRICH, when citing the undoubtedly depressed condition of the British refining industries in consequence of continental competition, overstated it in saying that there were only two refineries now running, for I can give you the names of eleven belonging to separate firms in active operation.

It seems ludicrous, however, to draw any parallel between cisatlantic and transatlantic conditions. Apart from its control of the raw market, its vast capital, its remunerative stock-exchange attachment, its immense profits on inland freights, and the superiority in appearance of its granulated product as compared with the various competing grades with which comparisons are made, the trust has so completely enthralled the distributers that the trade can now truly be called a bondage rather than a business.

A cleverly devised "factor plan" entitles the factor (and most large buyers sooner or later become factors) to a rebate of three-sixteenths cent, which rebate, however, is withheld for a time as a pledge of loyalty, except possibly in the cases of some powerful firms, who may deduct their three-sixteenths cent from each invoice.

The scheme is worked under the guise of State wholesale grocers' associations, the presidents of which are usually salaried, and, as often as not, are mere scouts for the trust, reporting all misdemeanors, such as purchases of foreign sugar. It is not a particularly pleasant thing to tell tales of servitude in a free country, of the watching of carts, and of responsible firms buying in the names of dummies, etc., but the following extract from a letter we received is a sample of how much freedom the American wholesale grocer has:

"A very few days after giving your brokers an order for ——, we were advised that factors representing the American Sugar Refineries were not permitted to handle foreign sugar. We immediately notified Messrs. —— ——— of the facts, which notice reached them at least two weeks before the sugar was shipped. The sugar has arrived, and we do not feel any responsibility for its care under the circumstances. The railroad company have stored it subject to the order of your brokers."

While the trust's orders are generally conveyed very circumspectly, some of the wholesale grocers' associations have issued printed notices forbidding dealings in foreign sugars, but such above-board prohibitions are apparently rather avoided. Such a system breeds plenty of jackals and "heelers" to attend to the details of browbeating and bullying.

The agents of the trust have been very active in Ohio, where every use has been made of the State law which imposes imprisonment or fine for the sale of an article "if it is colored, coated, polished, or powdered, whereby damage or inferiority is concealed; or if, by any means, it is made to appear better or of greater value than it really is; or if it contains any added substance or ingredient which is poisonous or injurious to health."

There is nothing, however, in this law forbidding the sale of sugar containing the usual blue, for nearly all granulated or hard sugar (that made by the trust included) has an infinitesimal quantity of a blue colorant, which is as harmless as the yellow in mustard. But the parties interested in excluding foreign sugar from Ohio have been spreading reports that the food commissioner was looking for foreign sugar offending in this respect, and have thus frightened intending purchasers.

Unfortunately for himself, the commissioner arrested Mr. D. M. McCullough, of Troy, Ohio, for selling some of the very well-known A Z R Lion brand, made by the Austrian sugar refinery at Aussig, and imported through us.

The State employed the speaker of the Ohio house of representatives and two other lawyers—surely rather a strong team to bring against a grocer. Nevertheless they tackled the wrong grocer and the wrong sugar, and have been defeated, as announced in your paper, although every technical point was used against the defendant, such as, we are told, the nonadmission of analysis of samples drawn from the same shipment, but from a different sack from that tested by the inspector. This arraignment of a grocer for selling undoubtedly good sugar which is sold all over the civilized world looks very much like persecution.

At the request of the Austrian Government, the Secretary of State, Mr. Sherman, has, I hear, had full official samples drawn for analysis by the Treasury Department, so that probably the dairy and food commissioner of Ohio may have cause to regret his action in this matter.

APPENDIX.

[Senate Document No. 159, Fifty-fifth Congress, first session.]

CERTAIN DRAWBACK ALLOWANCES.

The Vice-President presented the following letter from the Secretary of the Treasury, transmitting, in response to Senate resolution of June 17, 1897, copies of the evidence or statements on which the drawback allowances contained in Circular No. 102, of June 25, 1896, division of customs, were based:

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., June 24, 1897.

SIR: In compliance with the resolution of the Senate of June 17, 1897, I have the honor to transmit herewith copies of the evidence or statements on which the drawback allowances contained in Circular No. 102, of June 25, 1896, division of customs, were based.

The exhibits accompanying the papers show the names and indicate the occupations of the persons making the statements or furnishing the evidence.

The drawback allowances for the different degrees of saccharine strength of sugar were decided upon proof obtained by this Department, through its agents and officers, and were, so far as practicable, verified by theoretical calculations.

I have further to state that it has been necessary to rearrange and modify under each successive tariff the drawback allowed on exported sugars. I send herewith copies of various circulars issued by this Department since the enactment of the drawback law of August 5, 1861 (12 Stat. L., 292). The documents pertaining to these circulars are so numerous and voluminous that it is impracticable for the Department to furnish copies of the same within a reasonable time, nor do they contribute any facts of value in connection with pending legislation.

The papers now transmitted are as follows:

1. Copy of report of Special Agent Ira Ayer, of the Treasury Department, dated June 26, 1895, with Exhibits A, B, C, D, and E and memorandum.
2. Circular of July 10, 1862.
3. Circular of March 20, 1871.
4. Circular of June 26, 1875.
5. Circular of December 17, 1875.
6. Circular of September 6, 1877.
7. Circular of February 13, 1879.
8. Circular of June 3, 1879.
9. Circular of June 5, 1883.
10. Circular of June 9, 1883.
11. Circular of October 3, 1883.
12. Circular of January 7, 1884.
13. Circular of July 23, 1884.
14. Circular of September 28, 1886.
15. Circular of February 3, 1888.
16. Circular of March 23, 1891.
17. Circular of May 7, 1891.
18. Circular of May 27, 1891.
19. Circular of February 1, 1896.
20. Report of committee of Special Agents Chance and Ayer and Drug Examiner Leary, with Exhibits A, B, and C, June 17, 1896.
21. Circular of June 25, 1896.

Respectfully, yours,

L. J. GAGE, *Secretary.*

The PRESIDENT OF THE SENATE.

OFFICE OF SPECIAL AGENT, TREASURY DEPARTMENT,
New York, June 26, 1895.

SIR: I acknowledge receipt of your letter dated November 27, 1894 (R. H. B), with inclosed communication from the Department relative to the establishment of rates of drawback on refined sugars manufactured from imported raw sugars paying duty under the present tariff.

The importance of the subject in its relation to the revenues has called for the collection and consideration of the most full and reliable data obtainable.

The mode of determining the proper allowance of drawback on the refined products of raw sugars being dependent on the mode of assessing duties under the ad valorem system, it is desirable to first consider the subject with reference to the commercial, dutiable, and productive values of such raw sugars.

COMMERCIAL VALUES OF RAW SUGARS.

The commercial values of nearly all raw sugars are determined by trade rules or usages, which are, to a certain extent, arbitrary and crude, but which, nevertheless, are of general application in the markets from which this country receives its supplies.

Formerly the values of raw sugars were fixed by their color and other conditions, ascertained by expert inspection; but more recently resort has been had to the polariscope, by means of which the percentage of crystallizable sugar, or of "purity," is determined with approximate accuracy.

Upon such determinations all raw sugars used by refiners are bought and sold, except a few assorted East India sugars and an occasional sugar of low grade, the character and relative values of which, as compared with other sugars, are well understood.

Until within the past year sales of first-class cane centrifugal sugars were generally made on a basis of 96 degrees test, the terms of the sale providing that to the price fixed for a 96-degree sugar should be added one thirty-second of 1 cent per pound for each degree above such test, and that from such fixed price of a 96-degree sugar should be deducted one-sixteenth of 1 cent per pound for each degree below such test down to 94 degrees; below 94 degrees the allowance to be three thirty-seconds of 1 cent per pound for each degree down, fractional parts of a degree in proportion. Under this rule the reduction of three thirty-seconds of a cent is rarely made, as sugars seldom vary 2 per cent from basis of sale.

During the past year, however, the usage has become quite general to sell Cuba cane centrifugal sugars on a basis of 95 degrees test, the terms being, in brief, one thirty-second of a cent per pound up, or one-sixteenth of a cent per pound down, for each degree above or below the basis, fractions in proportion; below 93 degrees test, three thirty-seconds of a cent per pound for each degree down. (See Exhibit A.)

Some Cuba centrifugals testing near to 94 degrees are sold on the basis of 94 degrees test, with the same rise and fall per degree, above and below basis, as in the case of such sugars of higher test above noted, the three thirty-seconds deduction beginning at 92 degrees. Sales on the 94-degree basis are most generally made near the beginning and toward the close of the sugar season, when sugars, as a rule, test lower than at the height of the season.

Cane centrifugals of still lower grades are sometimes sold on the basis of 91 degrees, 92 degrees, or 93 degrees, with like conditions of rise and fall, but such basis of settlement are exceptional.

In regard to what are known as Java centrifugals, the basis of sale is almost invariably 96 degrees, sugars very near to that test being selected for the American market, the rise and fall per pound for each degree above or below basis being the same as hereinbefore shown in the case of Cuba cane centrifugals sold on the same basis.

Similar rules apply to molasses and muscovado sugars, which are sold generally on the basis of 89 degrees, but lower grades are sometimes sold on lower bases, as, for example, 84 degrees, 86 degrees, and 87 degrees test. As these sugars are not involved in the present discussion, it is not regarded as necessary to refer to them more particularly at this time.

Sales of cane centrifugals on the bases of 94 degrees, 95 degrees, and 96 degrees test, with the conditions of rise and fall above noted, may be regarded as permanent trade usage. As before noted, sales on the bases of 91 degrees, 92 degrees, or 93 degrees are exceptional, and generally grow out of unusual conditions of the sugar, as, for example, such as arise from mishap in manufacture or from damage.

Beet sugars are sold with practically the same conditions of rise and fall on the basis of their "net analysis," which is determined by deducting for each 1 per cent of "ash" found in the sugar 5 degrees of its polarization. The "net analysis" is understood to represent the productive value or "yield" of beet sugars. For example, a beet sugar polarizing 94 degrees and of 88 degrees net analysis will produce 88 pounds of hard refined sugar. (See Exhibit B.)

The reason of the change of basis, hereinbefore mentioned, from 96 degrees to 95 degrees, in the case of Cuba centrifugals, is explained by the statement that Cuban planters have found that it is more advantageous for them to make their first-product centrifugal sugar to test 95 degrees rather than 96 degrees.

It is stated in this connection that a sugar sold on the 95-degree basis, if actually testing 95 degrees, brings only one thirty-second of a cent per pound less than the price of a 96-degree sugar, if sold under the same market conditions, which enables the seller to obtain one thirty-second of a cent per pound more than as though he had sold the same sugar on a basis of 96 degrees test, with one-sixteenth of a cent per pound off for each degree below basis. (See Exhibit A.)

It appears that buyers of sugar are not averse to the various bases of settlement mentioned, for the reason that thereby they are more liable to buy the sugars for what they really are, and hence secure with greater certainty the grades required for advantageous "mixing" in refining, or for "melts" of a character best adapted to the plant, and to the general plan of refining operations.

So much has the character of the sugars to do, under existing conditions, with profitable refining, that some plants are adjusted especially to the refining of raw sugars of low and medium grades, while others, engaged chiefly in the production of hard refined sugars, use raw sugars of a high grade, ranging, say, from 92 degrees to 98 degrees.

The reduction of one-sixteenth of 1 cent per pound, or of three thirty-seconds of a cent, as the case may be, for each degree below the basis of sale, when but one thirty-second of a cent is added for each degree above such basis, is explained in the trade as being in part in the nature of a penalty, so as to insure to buyers (refiners) that sugars shall not fall below the test basis of purchase.

This view of the case seems to be sustained by the fact that the deductions from standard value for each degree below the basis of sale are in all cases double or more than double the additions to standard value for each degree above the test basis.

DUTIABLE VALUES OF RAW SUGARS.

After conference with the local appraising officers, and with the general appraiser having most to do with the reappraisement of sugars, it is found that there is a substantial agreement between their mode of determining dutiable values and the mode of determining commercial values recognized by the trade.

By reference to Exhibit A, the figures of which relate to the valuation of cane centrifugals, it will be seen that 96 degrees test is taken by the examiner as the basis of valuation, one thirty-second of a cent per pound up and one-sixteenth of a cent per pound down to 94 degrees; below 94 degrees, three thirty-seconds of a cent per pound per degree down—fractions in proportion.

Such differences, if any, as may exist between the appraising officers and the trade in the mode of valuing sugars sold and invoiced on a basis of 95 degrees or 94 degrees test must, it is believed, lead to the final and full acceptance of such bases for the determination of actual market values.

PRODUCTIVE VALUES OF RAW SUGARS.

It appears that under existing trade conditions only hard refined sugars are being exported, and refiners state that for the present it will be necessary to provide only for drawback allowance on hard refined sugars made from cane centrifugals testing not lower than 92 degrees by the polariscope, and from first-product raw beet sugars which range near to 94 degrees polarization and are of about 88 degrees "net analysis." (See Exhibit B.)

The determination of drawback allowance on the hard refined product from beet sugars is simple, and can be treated in a few words.

The cane centrifugals, which are now to be specially considered as entering into the production of hard refined sugars, range from 92 degrees to 98 degrees, and are sold on the several bases from 92 degrees to and including 98 degrees test, with rise and fall as before noted.

It is proper to state, in this connection, that in speaking of the rise and fall of one thirty-second of a cent per pound up, or of one-sixteenth of a cent per pound down, for each degree above or below the basis, as established by trade usage, a representative of the refining interest stated that one-sixteenth of a cent per pound was the correct measure of the difference per degree between the productive or intrinsic values of sugar for refining purposes.

As this statement has an important bearing on the subject, it is necessary to give it full consideration and to show that it is not true, in fact.

It has been noted that the trade rules or usages by which the commercial values of nearly all raw sugars are determined are, to a certain extent, arbitrary.

This will be made clear when it is considered that sugars are constantly fluctuating in value, and that the rise and fall from the basis of sale, established by trade usage, being fixed, can not, in the nature of the case, correspond to the changing conditions of the market. This could only be brought about by the use of varying proportionate quantities of increase or decrease after a just measure had been fixed, or by fixed percentages of rise and fall, taken on the basis value.

For example, let it be assumed that the value of a 96-degree cane centrifugal is 2 cents per pound, and that on such valuation one-sixteenth of 1 cent per pound fairly represents the relative difference between the actual or productive values of cane centrifugals testing, respectively, 95 degrees and 96 degrees; it is manifest that when a cane centrifugal testing 96 degrees is worth 4 cents per pound, the one-sixteenth of a cent would not justly represent the increased relative difference between the intrinsic values of the two sugars.

In the case last supposed, the basis price having been doubled, the corresponding relative difference in the value of the sugars testing, respectively, 95 degrees and 96 degrees, should also be doubled, making as the measure of difference in intrinsic values one-eighth of a cent per pound, instead of one sixteenth of a cent, as in the case first supposed. On the same hypothesis a fixed percentage, say 3 per cent of the basis price, added thereto or taken therefrom for each degree above or below basis would give practically the same results.

That the rule of deducting one-sixteenth of 1 cent per pound for each degree below the basis of sale, which was established under former tariffs, includes, incidentally, a penalty consideration under the operation of the present tariff is shown by facts known to all buyers and sellers.

Under existing usage, invoices of sugar are "extended" at prices showing the value of sugar of the test which is made the basis of sale; and when it is found that the test of the sugar falls below the basis test given in the invoice, the appraiser makes no deduction from the basis price, although the seller is obliged to make such deduction under the terms of the contract.

This practice subjects the importer or buyer to the necessity of paying duty on a value in excess of the actual commercial or productive value of the sugar.

For example, suppose a sugar sold on a basis of 96 degrees is invoiced and entered at 2 cents per pound and is found by the appraiser to test but 95 degrees. In such case the appraiser refuses to reduce the entered value, and the importer or buyer is compelled to pay duty on one-sixteenth of a cent per pound more than the actual selling price of the sugar.

Assuming that the one thirty-second of a cent per pound, which buyers and sellers agree to accept as the measure of difference in value for each degree of test above the basis of sale, is the true measure of such difference, it is found that the penalty involved in the one-sixteenth deduction amounts to $\frac{2}{32}-\frac{1}{32}=\frac{1}{32}$ of a cent per pound.

In such case duty is paid on one thirty-second of a cent per pound more than the actual value of the sugar. Forty per cent of one thirty-second equals one-eightieth of 1 cent, which would be the amount that the importer or buyer would be forced to pay on each pound of sugar in excess of the proper duty because the seller invoiced his sugar at a price corresponding to a test 1 degree higher than the true test.

It is true that a pound of crystallizable sugar in a high grade of raw sugar is worth somewhat more than a pound of crystallizable sugar in a raw sugar of lower grade.

One reason for this is that in a low-grade sugar there is greater bulk, with less relative extractable value, which means that the relative cost of packages, of freight, of labor in handling of plant, and of refining materials, as compared with the value of the resultant refined products, is greater in low-grade than in high-grade sugars.

Another reason is that in refining a sugar of low grade there is a greater proportional "inversion" and consequent degradation in value of crystallizable sugar, which in the form of "invert" sugar must appear in the low-grade refined sugars and in the sirup product.

The foregoing considerations have a bearing upon the case not heretofore alluded to, a brief discussion of which would seem proper at this point.

It must be constantly borne in mind that the increased cost of producing refined sugar from a low-grade raw sugar, arising from increased labor, cost of refining materials, etc., is not an element of dutiable value, and can not therefore be properly considered in determining drawback allowance, the only such element being, under the ad valorem system, the relative productive value of the raw material consumed, when compared with a fixed standard of productive value.

The difference in the cost of labor, plant, and refining materials incident to the production of 1 pound of hard refined sugar from a raw sugar testing 90 degrees and such costs incident to the production of 1 pound of hard refined sugar from raw sugars of other tests between 92 degrees and 98 degrees is unascertained, and practically, for the present, unascertainable.

In looking for the measures of this difference it is found that the one thirty-second, which may be accepted as covering all penalty considerations less the one-eightieth before noted, which was considered to cover, incidentally, the penalty arising from error in invoicing, is three one-hundred-and-sixtieths of a cent, which it may be assumed covers all other penalty considerations.

This three one-hundred-and-sixtieths would be less than three-fifths of 1 per cent of the average price of a 96-degree cane centrifugal sugar from September 6, 1894, to April 16, 1895. (See Exhibit D.)

This would amount on 1 barrel of sugar weighing 300 pounds to the drawback on less than 2 pounds of hard refined sugar.

The insignificance of this difference is further and perhaps more clearly illustrated by the following:

The value to the refiner of 1 pound of hard refined sugar produced from a low-grade sugar is exactly the same as the value of 1 pound of such sugar produced from a high-grade raw sugar.

From market reports (see Exhibit E) and from the findings further on in this report that $1\frac{1}{16}$ pounds of raw cane centrifugal sugar testing 90 degrees is used in the production of 1 pound of hard refined sugar, it appears that the cost to the refiner of the pound of sugar refined from a raw sugar testing 90 degrees is made up of:

	Per cent.	
*Raw sugar appearing in the refined sugar as crystal; that totally lost or destroyed in process of refining and loss by degradation of value of crystal "inverted" in such process	95	100 per cent = cost to refiner of 1 pound hard refined sugar.
†All refining expenses, including interest, taxes, insurance, wear and repairs of plant, etc	5	

From the same data, modified by information received from refiners, it appears that such cost, in case of a raw sugar testing 94 degrees, is made up of—

	Per cent.	
Raw sugar as above noted (*), not less than	94¼	100 per cent = cost to refiner of 1 pound hard refined sugar.
All refining expenses as above noted (†), not more than	5¼	

Using the foregoing exhibit as an illustration, it becomes apparent that the differences in cost of material used in producing the pound of hard refined sugar from the different grades of raw sugars covered by this discussion are so trifling that they need not be further considered.

But looking solely at the differences which inhere in the various grades of raw sugars, the existence of which give a greater relative value to the pound of crystal in a high-grade than a low-grade sugar, which differences must be considered separate and apart from the greater cost of refining, it can not be seriously urged from any point of view that the relative difference between the productive value of such sugars for each degree above the basis is one thirty-second of a cent per pound, and at the same time one-sixteenth or three thirty-seconds of a cent per pound, as the case may be, for each degree below the basis.

If by any possible statement of the case it could be made to appear that one-sixteenth of 1 cent per pound does fairly represent the difference in productive or intrinsic value between sugars varying 1 degree in test, the question recurs, why, then, is one thirty-second of 1 cent per pound invariably taken as the measure of such value for each degree above basis?

If it be answered that the difference in bases prices of sugars varying 1 degree in test is but one thirty-second of a cent per pound, the claim that one-sixteenth of a cent per pound is the correct measure of value as between such sugars is effectually disposed of, since in a trade transaction the fixing of the basis price of a sugar fixes the market price for the basis test, the basis price being in no case controlled by any arbitrary trade rule or consideration whatever.

The foregoing considerations may be summed up as follows:

(1) Neither the difference of one thirty-second of a cent per pound per degree above basis nor that of one-sixteenth of a cent per pound per degree below basis can be held to represent, except approximately and in an arbitrary and clumsy manner, the actual differences between the intrinsic or productive values of sugars. It is equally clear that the one-sixteenth of a cent per pound down, occurring at it does throughout the whole gradation of bases prices in contradistinction to one thirty-second of a cent per pound up, represents in part a penalty consideration.

(2) The prices fixed on the several bases of sale constitute for the time being, and for each individual transaction, standards of commercial and intrinsic values.

Giving full weight to these deductions, and notwithstanding the arbitrary rule of rise and fall to and from bases, respectively, fixed by trade usage, it must of necessity be assumed for the purposes of this discussion that the relative commercial values of raw sugars, determined in manner as hereinbefore shown and modified by the penalty consideration of one thirty-second of 1 cent hereinbefore noted, practically represent their several intrinsic or productive values for refining purposes.

To assume otherwise would be to assume that refiners do not know the relative productive values of the several kinds and grades of raw sugars which they refine.

Any form of regulation governing allowance of drawback on refined products of raw sugars subject to an ad valorem rate of duty must be based on this assumption.

The conclusion follows—

That the value of the material consumed in the manufacture of 1 pound of hard refined sugar from a raw sugar of a given test is substantially the same as the value of the material consumed in the manufacture of another pound of hard refined sugar from a raw sugar of a different grade or test, provided only that the bases of value of such raw sugars were fixed on the same market conditions.

It has been seen that buyers and sellers of all grades of raw sugars, by the terms of their contracts, agree that for each degree of polariscope test above the basis of sale one thirty-second of 1 cent per pound shall be added to the price fixed for such basis. Contracts are made constantly recognizing such rule of gradation, and the addition under this rule is certainly free from all taint or suggestion of "penalty" hereinbefore considered.

The fact that the additions for commercial value are invariably one thirty second of 1 cent per pound for each degree of test above the basis, whatever such basis may be and whatever the state of the market, suggests that such additions, although arbitrary and inexact, must necessarily, and may with safety to the Government, be taken as the measure of difference in productive values of raw sugars of different degrees of purity.

If, with raw sugar at a given basis value, the one thirty-second of 1 cent were an accurate measure of the difference per degree in productive values of such raw sugars, its use in determining the value of a 96-degree sugar, under the same market conditions, either by addition in case of sugars below 96 degrees or by subtraction in case of sugars above that test, would lead to accurate results.

If the basis value of the raw sugar were such as to make the measure of one thirty-second too great, then addition would make the price of a 96-degree sugar too high, and subtraction would make it too low.

If the basis value of the raw sugar were such as to make the measure of one thirty-second too small, then addition would make the price of a 96-degree sugar, so found, too low, and subtraction would leave it too high.

It is in the interest of the revenue to make and to leave the 96-degree sugar, which under the plan proposed is taken as the basis of drawback determination, at a low rather than a high valuation, but as has been noted, either too great or too small a measure would work both for and against such interest.

The fact that the use of any measure will work in opposite ways, when used either above or below the 96-degree standard, considered in connection with the fact that nearly all the raw sugars from which hard refined sugars are made range from 94 degrees to 98 degrees, indicates that the variations pointed out will be practically self-correcting.

Such injustice, if any, as the use of this measure of relative values may work to the refiner or exporter in the plan proposed for determining drawback allowance must, it is believed, be held to be solely chargeable to the method of determining the commercial values of raw sugars established by trade usage and recognized by the appraising officers of the Government in determining dutiable values.

"YIELD" OF REFINED PRODUCTS FROM RAW SUGARS.

In seeking the fullest information possible relative to the "yield" of refined products from raw sugars of different kinds and grades, I addressed a letter to the principal refiners of the country, dated January 5, 1895, inclosing a tabulated form which each was requested, as far as practicable, to fill out. (See Exhibit B.)

The names of the refiners to whom this letter was addressed are: Nash, Spaulding & Co., Boston, Mass.; H. O. Havemeyer, president of the American Sugar Refining Company, New York, N. Y.; B. H. Howell, Son & Co., New York, N. Y., for Mollenhauer Sugar Refining Company, New York, N. Y., and National Sugar Refining Company, Yonkers, N. Y.; the W. J. McCahan Sugar Refining Company, Philadelphia, Pa.; William Henderson, New Orleans, La.; Cunningham & Miller, Sugar Land, Tex.

From Nash, Spaulding & Co. no reply whatever was received, although several urgent letters were sent them, a copy of the last of which, dated March 1, 1895, will be found—Exhibit B.

To my letter of January 5, 1895, the W. J. McCahan Sugar Refining Company and the National Sugar Refining Company replied under dates of January 7, 1895, and March 6, 1895, respectively, stating their inability to furnish the data desired (Exhibit B).

Messrs. Cunningham & Miller replied under date of April 13, 1895, availing themselves partially of the use of the blank form which had been furnished them. (See Exhibit C.) A similar response was received from William Henderson, under date of April 18, 1895.

Sworn statements were subsequently received from both of these firms, covering substantially the information which they had first sent as per form furnished. (Exhibit B.)

The Mollenhauer Sugar Refining Company furnished a sworn statement under date of April 22, 1895. (Exhibit B.)

Mr. H. O. Havemeyer, president of the American Sugar Refining Company, furnished information by letters dated, respectively, February 21 and April 15, 1895. (Exhibit B.)

Dr. Edward Sherer, sugar expert in charge of the United States laboratory at this port, furnished information by letter through the appraiser, dated April 9, 1895. (Exhibit B.)

In an investigation of the same question made at San Francisco, Cal., in 1886, I obtained the sworn statement of E. L. G. Steele, president and manager of what was then known as the American Sugar Refining Company, of that city, and certain figures taken from that statement (Exhibit A, with my report dated August 24, 1886) are used in this report.

A tabulated statement of the information received from the sources above mentioned, with reference solely to the refined products obtainable from 100 pounds of raw cane centrifugal sugar testing 96 degrees by the polariscope, has been prepared, and is submitted herewith, marked "Exhibit D."

In reducing the refined products to pounds of crystal, which it was found necessary to do in order to a just comparison of data furnished, hard refined sugars are considered as testing 100 degrees, soft refined 92 degrees, and sirup 40 degrees, unless otherwise reported.

An inspection of the tabulated statement (Exhibit D) shows that the yield reported by H. O. Havemeyer, president of the American Sugar Refining Company, represents a recovery in refining of 94.4 pounds of crystal from 96 pounds of crystal in the raw sugar, or twenty-four one-hundredths of a pound in excess of the average.

After due consideration, it is regarded as just and safe to accept 92 pounds of hard refined sugar and 6 pounds of sirup as the "yield" from 100 pounds of raw cane centrifugal sugar testing 96 degrees by the polariscope.

Upon these quantities calculations are based in determining the proper rate of drawback allowance on such hard refined sugar and sirup made from raw cane centrifugal sugar.

Hard refined sugars of standard test range generally from 95.5 degrees to 99.9 degrees, and such sugars are regarded as testing nominally 100 degrees.

The test of the sirup product, which is understood to average about 40 degrees, is taken at not less than 38 degrees, and its weight at not less than 11½ pounds per gallon.

The average price of raw cane centrifugal sugar testing 96 degrees, from September 1, 1894, to April 18, 1895, duty paid, was 3.277 cents per pound, and of granulated sugar during the same period 3.882 cents per pound.

Investigation shows that 5 cents per gallon is a fair valuation to place upon sirup at this time, in condition as "thrown" from the centrifugal.

From the foregoing data are obtained the following figures:

Value of 22 pounds granulated sugar at 3.882 cents	$3.571
Value of 6 pounds sirup (one-half gallon) at 5 cents	.025
Total value of refined products	3.596

Let it be assumed, for the purpose of finding a formula for the ascertainment of the relative dutiable values of the material used in the manufacture of 1 pound of hard refined sugar and of 1 gallon of sirup, that the dutiable value of 1 pound of raw cane centrifugal sugar testing 96 degrees is 2 cents. Value of 100 pounds at 2 cents = $2.

Then—

Total value of refined products.	Value of material for refined products.	Value of refined sugar.	Value of material for refined sugar.
$3.596	$2	$3.571	$1.985
		Value of refined sirup.	Value of material for sirup.
$3.596	$2	$0.025	$0.0139

$\frac{\$1.986}{92} = \$0.0215$ = dutiable value of material in 1 pound of hard refined sugar.

$\frac{\$0.0139}{5} = \$0.0278$ = dutiable value of material in 1 gallon sirup.

$0.0215 at 40 per cent = $0.0086 = duty on material in 1 pound hard refined sugar.
$0.0278 at 40 per cent = $0.0112 = duty on material in 1 gallon sirup.

Weight of raw material consumed in manufacture of 1 pound hard refined sugar. $= \frac{\$0.0215}{0.02} = 1.075$ pounds $= 1\frac{3}{40}$ pounds.

Weight of raw material consumed equivalent to value of material in 1 gallon sirup. $= \frac{\$0.0278}{0.02} = 1.39$ pounds, say 1½ pounds.

The foregoing figures show that for every pound of hard refined sugar exported there may be properly allowed a drawback of the duty on $1\frac{3}{40}$ pounds of raw cane centrifugal sugar testing 96 degrees, and that for every gallon of the sirup product, valued at 5 cents per gallon, in condition as "thrown" from the centrifugal, there may be allowed a drawback equal to the duty paid on 1½ pounds of such raw sugar.

The conclusion reached in this report in the discussion under the head of "Productive values of raw sugars" indicates that, having established proper bases of allowance for hard refined sugar and sirup made from raw cane centrifugal sugar testing 96 degrees, such grade may be taken as representative of the several grades of raw cane centrifugals testing, say, from 92 degrees to 98 degrees and higher.

From the findings referred to, it follows that when hard refined sugar is made from cane centrifugal sugars testing either above or below 96 degrees, and not below 92 degrees, by the polariscope, the equivalent productive value or corresponding market value of a 96-degree sugar may be found by adding to the dutiable value of the sugars used, for each degree below 96 degrees and not below 92 degrees, one thirty-second of 1 cent per pound, or by subtracting from the dutiable value of the sugars used one thirty-second of 1 cent per pound for each degree above 96 degrees; proportionate parts of the one thirty-second of 1 cent per pound, increase or reduction of value, being added or subtracted for fractions of degrees of test, as above noted.

The corresponding dutiable value per pound of 96-degree sugar being so found, the value of the raw sugar actually used in the manufacture of the hard refined sugar may be determined by allowing the value of $1\frac{3}{40}$ pounds of such 96-degree sugar for each pound of hard refined sugar exported.

In the case of raw-beet sugars, it has been shown that the "net analysis" represents the productive value or "yield" of such sugars.

For example, a raw beet sugar showing a polarization, say, of 94 degrees and of 88 degrees "net analysis," would give a yield of 88 pounds of hard refined sugar.

The resultant sirup product from the refining of raw beet sugars is practically of no commercial value.

It is plain, therefore, that when hard refined sugar is made wholly from imported beet sugars the dutiable value of the material used for each pound of the exported article may be determined by dividing the dutiable value of 1 pound of the material used by the decimal denoting the "net analysis" of such material.

From figures already presented, it has been seen that the value of 1½ pounds of cane centrifugal sugar, testing 96 degrees, may be taken as representing the value of the material entering into the manufacture of 1 gallon of the sirup product resultant from refining such raw sugar, the valuation of such sirup being placed at 5 cents per gallon.

As before shown, the test of such sirup is placed at not less than 38 degrees and its weight at not less than 11½ pounds per gallon.

If the sirup be made from a sugar testing above or below 96 degrees, it is manifest that the dutiable value of the sugar allowance for 1 gallon of sirup should be found in manner as hereinbefore shown in the case of hard refined sugar.

Inasmuch as the value of the sirup greatly fluctuates, the regulation provides that such value be declared by the manufacturer on the export entry, and that such declared value be subject to verification by the collector.

It is further provided that, if the value of the sirup be found to be above or below 5 cents per gallon, the value of the material used in such sirup may be determined by a proportionate increase or reduction in the quantity of sugar (1½ pounds), taken as hereinbefore provided, as the measure of such value.

It may be here remarked that the adjustment of the basis of drawback allowance herein fixed for the sugar and sirup products is such as to provide for a value of the sirup in condition as thrown from the centrifugal as high as 8 cents per gallon without detriment to the Government. As the regulation provides only for sirup in condition as "thrown" from the centrifugal,

without having undergone any filtering or other clarifying process, it will probably not exceed that limit of value.

The drawback on the sugar product is relatively so large, compared with that on the sirup product, that it is obviously unnecessary to provide for a declaration of its value on the export entry.

SUMMARY.

The investigation shows:

1. Under the ad valorem system of collecting duties on raw sugars the mode of determining drawback allowance on refined products must depend primarily on the mode of valuing sugars commercially and for dutiable purposes.

2. Under trade usage raw sugars are generally bought and sold on various bases of test, with a rise of one thirty-second of 1 cent per pound for each degree above basis and a fall of one-sixteenth of 1 cent per pound for each degree below basis, 2 degrees down; for each degree below basis, beginning with the third degree, the fall is three thirty-seconds of 1 cent per pound, fractions of a degree in proportion.

3. These rules, although arbitrary and inexact, are recognized and practically adopted by the appraising officers of the Government in fixing the dutiable value of imported raw sugars.

4. The fall of one-sixteenth or of three thirty-seconds of a cent per pound, as the case may be, for each degree below basis, is found to include in part a penalty consideration.

5. Under the law, only so much of the rise or fall from bases values of raw sugars of various grades as stands for the measures of difference in "yield" or productive value of such sugars can be considered in determining drawback allowance.

6. From considerations presented, it is regarded as necessary and safe to accept the one thirty-second of a cent rise as the measure of difference in productive value for each degree of variation in test in case of raw cane centrifugal sugars testing from 92 degrees to 98 degrees and higher, when bought under the same market conditions.

7. Under present refining and trade conditions it is found necessary to provide only for drawback allowance on hard refined sugars made from raw cane centrifugal sugars testing from 92 degrees to 98 degrees and higher, or from beet sugars. Incidentally, provision has been made for the sirup product resultant from refining such cane centrifugal sugars.

8. From the most reliable sources of information it is found that 92 pounds of hard refined sugar and 6 pounds of sirup are obtainable from 100 pounds of raw cane cetrifugal sugar testing 96 degrees by the polariscope.

9. On an assumed valuation for a raw cane centrifugal sugar testing 96 degrees and ascertained values for hard refined sugar and sirup, it is found further that for every pound of hard refined sugar exported there may be allowed $1\frac{1}{16}$ pounds of such raw sugar and that the value of the material in 1 gallon of sirup, valued at 5 cents per gallon, is equal to the value of $1\frac{1}{4}$ pounds of such raw sugar.

10. It is obvious that when the hard refined sugar is made from 96 degree raw cane centrifugal, the drawback allowance on each pound of the refined product will be the duty paid on $1\frac{1}{16}$ pounds of such raw sugar, as shown by the import entry and invoice, less the legal deduction of 1 per cent; and that such allowance on 1 gallon of the resultant sirup, valued at 5 cents, will be the duty paid on $1\frac{1}{4}$ pounds of such raw sugar, less the same deduction.

11. With respect to raw cane centrifugals testing from 92 degrees to 96 degrees and higher, when sold under the same market conditions, the principle is established that equal values produce results which are so nearly equal that for practical purposes they may be treated as equal.

12. With respect to such sugars and within the limits of test mentioned, bases prices, being controlled by no arbitrary trade rule, represent, for the time being and for each individual transaction, standards of productive and market value.

13. From such standards the dutiable values of such sugars are determined, and whether their ascertained test be above or below 96 degrees, the equivalent productive value, or corresponding dutiable value, of a 96-degree sugar, sold under the same market conditions, may be found by the use of the one thirty-second measure of value, either by addition or subtraction, as hereinbefore pointed out. For fractions of degrees of test, proportionate parts of the one thirty-second measure of value may be used.

14. Since, as has been shown, equal values produce equal results, the value of the 96-degree sugar so found is then taken to represent the value of the raw sugar actually used, and the drawback allowance is based on the use of $1\frac{1}{16}$ pounds of such 96-degree sugar, so valued.

In submitting the form of regulation which follows it is perhaps desirable to state that for reasons herein noted provision is made only—

1. For the establishment of a drawback rate on hard refined sugars made from raw cane centrifugals testing not lower than 93 degrees, and from raw beet sugars.

2. For the establishment of a drawback rate on the sirup resultant from refining the cane centrifugals above noted, in condition as "thrown" from the centrifugal.

"FORM OF REGULATION.

"On the exportation of loaf, cut loaf, cube, granulated, or powdered sugar, refined wholly from imported raw sugars, and 'stove dried' or dried by any other equally effective process, a drawback will be allowed equal in amount to the duties paid on the imported sugars used in such manufacture, less the legal deduction of 1 per cent.

"When such 'hard refined' sugars of standard test are made wholly from cane 'centrifugals' testing 96 degrees by the polariscope, drawback shall be based on a quantity of material used, to be determined by allowing $1\frac{1}{16}$ pounds of such raw sugar for each pound of 'hard refined' sugar exported, and the dutiable value of such material shall be ascertained by reference to liquidated value on the import entry.

"When such hard refined sugars are made from cane centrifugal sugars testing either above or below 96 degrees and not below 92 degrees by the polariscope, the equivalent productive value or corresponding dutiable value of 96-degree sugar shall be found by adding to the dutiable value of the sugars used, for each degree below 96 degrees and not below 92 degrees, one thirty-second of 1 cent per pound, or by subtracting from the dutiable value of the sugars used one thirty-second of 1 cent per pound for each degree above 96 degrees. Proportionate parts of the one thirty-second of 1 cent per pound increase or reduction of value shall be added or subtracted for fractions of degrees of test as above noted.

"The corresponding dutiable value per pound of 96-degree sugar being so found, the value of the raw sugar actually used in the manufacture of the refined sugar shall be determined by allowing the value of $1\frac{1}{16}$ pounds of such 96-degree sugar for each pound of hard refined sugar exported.

"When such refined sugars are made wholly from improved beet sugars, the dutiable value of the material used for each pound of the exported article shall be determined by dividing the dutiable value of 1 pound of the material used by the decimal denoting the 'net analysis' of such material.

"The dutiable value of the material used in the manufacture of the sirup product of the cane sugars above described shall be determined by allowing for each gallon of such sirup in condition as 'thrown' from the centrifugal, testing not less than 36 degrees, weighing not less than $11\frac{1}{2}$ pounds per gallon, and valued at 5 cents per gallon, $1\frac{1}{4}$ pounds of 96 degree sugar, the dutiable value of which material shall be found as hereinbefore provided in the case of hard refined sugars.

"The value of such sirup shall be declared by the manufacturer on the export entry, which declaration shall be verified by the collector; and the value of the material used in sirups valued above or below 5 cents per gallon shall be fixed by increasing or reducing the quantity of sugar above noted to correspond to the increase or reduction above or below the 5 cents per gallon above specified.

"On requisition of collectors, appraising officers shall furnish polariscope tests, 'net analysis,' and other conditions of valuation not recorded on the import invoices, for use in liquidation of drawback entries.

"The quantities of sugar and sirup exported shall be ascertained by United States weighers and gaugers, respectively, and samples shall be taken, as ordered by the collector, to be submitted to the appraiser for report of polariscope test of sugar and sirup, weight of sirup per gallon, and such expert analysis as may be requisite."

Should it become necessary to provide for the same forms of refined products made from other kinds or grades of sugar, or for other forms of the refined products, further investigation and report would be necessary.

I return herewith Department letter dated October 22, 1894, addressed to the collector, also exhibits marked from A to E, inclusive.

Respectfully, yours,

IRA AYER, *Special Agent.*

Hon. JAMES T. KILBRETH,
Collector of Customs, New York, N. Y.

EXHIBIT A.

[Czarnikow, Macdougall & Co., Limited, New York.]

Samples to be drawn mutually by sellers and buyers and polarization of same to be made by two chemists selected, one by sellers and the other by buyers, the results to be averaged for basis of settlement, which is to be made at one thirty-second up or one-sixteenth down per degree above or below basis, fractions in proportion. Polarizations of the samples to be also made by a third chemist, these results to be used in cases where the other two chemists differ over one-half point, when the two nearest of the three will decide the average.

Below 94 degrees test, three thirty-seconds cent per pound per degree down.
Centrifugals basis 96 degrees.
Below 93 degrees test, three thirty-seconds cent per pound per degree down.
Centrifugals basis 95 degrees.
Molasses and musco sugars below 84 degrees test, three thirty-seconds cent per pound per degree down.

THE COLONIAL COL'D., LONDON, *May 9th.*

THE AMERICAN SUGAR REFINING CO., *City:*

Nine hundred and seventeen (917) bags centrifugal sugar, at $2\frac{1}{4}$ cents per pound, basis 92 degrees, and twenty-two hundred and forty-seven (2,247) bags molasses sugar, at $2\frac{1}{8}$ cents per pound, basis 89 degrees, ex. steamship *Prins Fred'k Hendrik*, from Demerara, B. G., and Trinidad, B. W. I. Net cash, payable in ten days' actual time. To be taken at Woodruff's stores, Brooklyn, less lighterage.

Samples to be drawn mutually by sellers and buyers, and polarization of same to be made by two chemists selected, one by the sellers and the other by the buyers, the results to be averaged for basis of settlement, which is to be made at $\frac{1}{32}$ up or $\frac{1}{16}$ down per degree above or below basis, fractions in proportion. Polarizations of samples to be also made by a third chemist; these results to be used in cases where the other two chemists differ over $\frac{1}{2}$ point, when the two nearest of the three will decide the average.

Below 94 degrees test, $\frac{1}{16}$ cent per pound per degree down.
Below 84 degrees test, $\frac{3}{32}$ cent per pound per degree down.

CZARNIKOW, MACDOUGALL & CO.

MAY 5.

Colon, 700 bgs.	
Quelquiya, 1027.	3,127 bgs. centrifugal sugar, at $3\frac{1}{4}$c.
Quelquiya, two, 495.	495 bgs. molls. sugar, at $2\frac{1}{4}$c.
Base Consulo, 1400.	

At —— per pound basis, 96 & 89 average, $\frac{1}{32}$ up or $\frac{1}{16}$ down, to 94 & 84 test. Any below $\frac{1}{16}$ down from 94 & 84 test. Net cash, ten days delivery, actual tare. Samples and tested as customary to fix price.

Ex. ship schr. *Wandrian* in harbor from San Domingo.

STANNART & TABOUT.

[Contract of sale.]

James Connell to Am. Sugar Refg. Co.

MAY 1ST.

Mr. G. A. E. Irving: Messrs. The American Sugar Rfg. Co.

Say, 200 bags Jamaica muscovado sugar arrived per S. S. *Argonaut*, at $2\frac{1}{4}$ cts. per pound, basis 89° arg. test. Landed weights. Cash in ten days. Sugar to be taken at Woodruff's Stores, Brooklyn, less lighterage. Damaged, if any, to be taken at a fair allowance, to be settled by the undersigned.

JAMES S. CONNELL,
By H. S. CONNELL.

MARK: A.

Samples to be drawn mutually by sellers and buyers, and polarizations of same to be made by two chemists selected, one by the sellers and the other by buyers, the results to be averaged for basis of settlement, which is to be made at $\frac{1}{32}$ up or $\frac{1}{16}$ down per degree above or below basis, fractions in proportion. Polarizations of the samples to be also made by a third chemist, these results to be used in cases where the other two chemists differ over $\frac{1}{2}$ point, when the two nearest of the three will decide the average.

Any mark or marks below 84 degrees to be omitted from the average, and allowance down on such to be at the rate of $\frac{3}{32}$ ct. per pound per degree from 84 degrees.

The invoice value of per pound herein stated is nominal; and, in accordance with the condition of the sale consignment of these goods and of the trade custom, these sugars are to be polarized at the port of landing, and there must be added to said valuation $\frac{1}{16}$ c. per lb. for every degree over 96° polariscope test, in case said goods test more than 96°, and in like manner there must be deducted $\frac{1}{16}$ c. per lb. for every degree under 96°, in order to make the actual cost fair market value of these goods at the time and place of shipment.

[The above stamp is used by J. M. Ceballos & Co. on their invoices.]

Remarks regarding the methods of selling Cuban cane centrifugal sugars.

Supposing 1,000 bags of Cuban cane centrifugals testing 96 degrees and up are sold on the basis of 96 degrees at $2\frac{1}{4}$ cents per pound; if they should test

95 degrees, the price obtained would be only $2\frac{15}{16}$ cents (after deducting the one-sixteenth cent allowance from 96 degrees to 95 degrees). Those same 1,000 bags of sugar sold on the basis of 95 degrees on the same day would obtain $2\frac{1}{2}$ cents. In other words, at the time the sale is effected the difference made between 95 degrees and 96 degrees is only one thirty-second cent, but on sales made basis 96 degrees, if they actually test 95 degrees, the allowance for this 1 degree is one-sixteenth cent. The recognized allowance, as a difference in the price between 95 degrees and 96 degrees in the market to-day, is one thirty-second cent.

Often sugars have sold at $2\frac{7}{32}$ cents for 95 degrees and on the same day $2\frac{1}{2}$ cents for 96 degrees. In these sales the one selling at $2\frac{7}{32}$ cents for 95 degrees has the advantage over the one selling at $2\frac{1}{4}$ cents for 93 degrees, because if the sugars test 96 degrees he always would get $2\frac{1}{2}$ cents by adding one thirty-second cent up for the 1 degree above, while the man that sells at $2\frac{1}{4}$ cents for 96 degrees (should his sugars test 95 degrees) will be only getting $2\frac{7}{16}$ cents after deducting the one-sixteenth cent allowance. In other words, by selling basis 96 degrees, if sugars go down to 95 degrees, the seller gives away one thirty-second cent more than if he sold basis 95 degrees. (Memorandum statement from J. M. Ceballos & Co.)

99.....$\frac{31}{32}$
98.....$\frac{15}{16}$
97.....$\frac{29}{32}$ advance.

Fraction of $\frac{1}{16}$ or $\frac{1}{32}$ of a cent for fractions of degrees to $\frac{1}{16}$ of a degree.

[Memorandum furnished by Examiner Jacobs, of the sugar division, purporting to show mode of appraisement, or of ascertaining dutiable value of sugars.]

—

EXHIBIT B.

OFFICE OF SPECIAL AGENT TREASURY DEPARTMENT,
New York, N. Y., January 5, 1895.

DEAR SIR: In connection with an inquiry which has been ordered by the Department looking to the establishment of a just rate of drawback on the exportation of refined sugars made from imported raw sugars on which duties have been paid, I will thank you to fill out the inclosed form, basing the data furnished on your knowledge and experience as a refiner.

In those cases where, under the ordinary processes of refining pursued in this country, there would be no output of certain of the refined products indicated in the form, please fill in the spaces with a straight horizontal dash, thus —.

It is understood that the largest relative production of hard refined sugars would result from refining the highest grades of raw sugars, and that such relative high production would diminish with the lower grades of raw sugar used.

It is further understood that it would be difficult, and, indeed, impossible, to give results that would be true for each kind or lot of raw sugar used of a given test, but it is hoped that, taking your refining operations in their general results for a given period, say for one year, you will be enabled to furnish data that may be accepted as substantially correct, and which may serve as a basis for drawback allowance that shall prove practically just both to the Government and the refiner.

It is usual in these cases to ask for a sworn statement from the manufacturer, and I will thank you, therefore, to have the statement, when completed, duly sworn to.

In order that this may be done consistently, the space below the tabulated form may be utilized for such explanatory remarks as may be necessary, in order to place the whole subject in a just light.

The oath may be taken by the superintendent of the refinery or by the "refiner," so called, or, indeed, by anyone authorized to represent the refining company in such capacity, and who has knowledge of the facts set forth in the statement.

Bespeaking your earnest attention to the subject, and hoping for a prompt and full response, covering, if possible, all the data required, I am,

Respectfully, yours,

IRA AYER, *Special Agent.*

—

THE W. J. MCCAHAN SUGAR REFINING COMPANY,
Philadelphia, January 7, 1895.

DEAR SIR: Yours of January 5 received. As we have only been refining sugar for a little over a year, and having used considerable domestic molasses and sorghum sugar, it is impossible for us to give you exact results, and could only give you an estimate which would be practically useless regarding our inability to furnish data.

We are, truly, yours,

THE W. J. MCCAHAN SUGAR REFINING CO.,
W. J. MCCAHAN, *President.*

Mr. IRA AYER.

—

NATIONAL SUGAR REFINING COMPANY, *Yonkers, March 6, 1895.*

DEAR SIR: The inquiry of the Treasury Department regarding sugar-refinery products which you have forwarded to us has received careful attention. It would hardly be possible for us to furnish the information requested, for the following reasons:

First. Our refinery has been running but little more than a year, and our work has been necessarily irregular, and to some extent experimental, and our results would be consequently of less value as a basis for calculation of drawback than those of another refinery.

Second. Our refinery is small and has not turned out all grades of sugar, and what data we might give would be incomplete as to the theoretical product of hard refined, that can be ascertained from standard authorities as well as we could give it.

Respectfully, yours,

NATIONAL SUGAR REFINING CO.,
By GEO. R. BUNKER, *Manager.*

Messrs. B. H. HOWELL SON & CO., *New York.*

—

[Cunningham & Miller, producers, manufacturers, and refiners of sugar.]

SUGARLAND, TEX., *April 17, 1895.*

DEAR SIR: We are in receipt of your telegram even date, and herewith find reply. Trusting promptly to hand satisfactory, we remain,

Yours, truly,

CUNNINGHAM & MILLER.

Mr. IRA AYER,
Special Agent, New York, N. Y.

[Cunningham & Miller, producers, manufacturers, and refiners of sugar.]

SUGARLAND, TEX., *April 15, 1895.*

SIR: In reply to the inquiries contained in your letter of ——, I have to state that, from our experience as refiners, 100 pounds of cane sugar polarizing 96 degrees will give in yield as follows:

	Pounds.
Hard refined	92.16
Extra C	.92
Solid matter in sirup	3.49
Loss	3.08
Total	99.65

The polarizations of the above products are as follows:

	Degrees.
Hard refined	99.8 to 100
Extra C	90 to 94
Sirup	32.8 to 41

The sirup is what is known as commercial molasses, and weighs 11.9 pounds per gallon.

We note what you have to say regarding the discrepancy between 100 pounds raw sugar and the final product plus loss, and in explanation will state that this difference (0.35 pound) can be charged to either the molasses or the loss, but it is not possible to say which; consequently we leave it out of the calculations.

The figures given (3.49 pounds) for molasses represent the dry matter of the molasses. In terms of the molasses itself, the figure would be 4.21 pounds.

Respectfully, yours,

L. W. ROBINSON, *Chemist.*

Mr. IRA AYER,
Special Agent, Custom-House, New York.

Signed and sworn to before me, B. H. James, notary public, county of Fort Bend, State of Texas.

B. H. JAMES, *Notary Public.*

—

NEW ORLEANS, *April 18, 1895.*

DEAR SIR: In reply to your inquiry contained in your letter of recent date, I have to say that I have never refined any beet sugar at all, nor any imported sugars, when only they are mixed with Louisiana sugars. I give you the only operation in my refinery from October 14 to November 30, 1894, in which Louisiana sugars only were melted, and the product of which was refined sugar of one grade, namely, "granulated."

In that case the output from 100 pounds of centrifugal sugar polarizing an average of 97 per cent was as follows: Refined granulated, 92.71; sirups, 3.81; loss, 3.48, making 100. The refined polarized 99.5 to 99.9; sirup, about 35. The sirup was a molasses of not particularly good quality or flavor, and we sold it at a very low price, about 3 cents net per gallon—that is, not furnishing the packages. Its weight was about 11½ pounds per gallon.

Yours, truly,

WM. HENDERSON.

Mr. IRA AYER,
Special Agent, Custom-House, New York City.

William Henderson, the above signed, being duly sworn, deposes and says that all facts and allegations contained in the above declaration signed by him are true and correct, to the best of his knowledge, information, and belief.

Sworn to and subscribed before me.

M. T. DUCROS, *Notary.*

NEW ORLEANS, *April 18, 1895.*

—

NEW YORK, *January 11, 1895.*

DEAR SIR: Yours of the 5th was duly received and referred to the refineries we represent, and we hope to be able to furnish you some information concerning the object of your inquiry within a few days.

Yours, very truly,

B. H. HOWELL, SON & CO.

Mr. IRA AYER, *Special Agent, City.*

—

NEW YORK, *January 31, 1895.*

DEAR SIR: In reply to your favor of the 25th instant, we beg to say that the refineries we represent have not as yet been able to make up the statement you desire.

Both the Mollenhauer and National refineries make principally hard sugars, and it will be impossible for them to answer all your questions, or to give any bases which apply to raw and refined sugars of various grades.

Yours, very truly,

B. H. HOWELL, SON & CO.

Mr. IRA L. AYER,
Special Agent, Treasury Department, City.

—

MOLLENHAUER SUGAR REFINING COMPANY,
Brooklyn, N. Y., April 22, 1895.

DEAR SIR: Referring to your various inquiries in regard to the yield of refined sugar from certain grades of raw sugar, we beg to say that we are not able to answer all your questions.

Our refinery uses principally high-grade sugar, and only at rare intervals any beet sugar.

We figure that 100 pounds of centrifugal sugar polarizing 96 degrees should yield 91 pounds of granulated and about 5 pounds of sirup.

The 5 pounds sirup is of a grade that is usually sold for table use or for mixing purposes. It is not of so low a grade as the kind which is used for distilling purposes. The sirup polarizes 38 degrees to 40 degrees, and the average weight is about 12 pounds per gallon.

The following have been the prices ruling since September 1, exclusive of the cost of packages:

	Cents per gallon.
September, 1894	7 to 8
October, 1894	7 to 7½
November, 1894	6½ to 9
December, 1894	7 to 9
January, 1895	8 to 10
February, 1895	6 to 8
March, 1895	8 to 9
April, 1895	8 to 10

Yours, very truly,

MOLLENHAUER SUGAR REFINING CO.
F. D. MOLLENHAUER, *Secretary.*

Sworn to before me this 23d day of April, 1895.

T. M. LAMBERSON, *Notary Public.*

Col. IRA AYER,
Special Agent Treasury Department, City.

THE AMERICAN SUGAR REFINING COMPANY,
New York, January 14, 1895.

DEAR SIR: Owing to my absence from the office, through illness, for the past ten days, I am but now in receipt of your communication of the 5th instant, and hope to give the matter my attention at an early date.

Very respectfully,

H. O. HAVEMEYER.

IRA AYER, Esq.,
Special Agent Treasury Department,
Custom-House, New York, N. Y.

—

THE AMERICAN SUGAR REFINING COMPANY,
New York, February 21, 1895.

DEAR SIR: In response to your letter of February 18, I beg to state that:

Ninety-two pounds of hard refined sugar and 6 pounds of sirup are obtainable from 100 pounds of first-class centrifugal sugars, polarizing 96 degrees.

Eighty-eight pounds of hard refined sugar and 10 pounds of sirup are obtainable from first class raw beet sugars polarizing 94 degrees direct and of 88 degrees net analysis.

It is impracticable to furnish the yields from any other grades of sugar in hard refined and sirup, none being used in their manufacture.

The sirup from the beet sugar is of no value; that from the centrifugal cane varies from one-half cent to 1 cent (say three-fourths cent) per pound.

Yours, truly,

H. O. HAVEMEYER.

IRA AYER, Esq.,
Special Agent, New York City.

—

THE AMERICAN SUGAR REFINING COMPANY,
New York, April 15, 1895.

DEAR SIR: In response to your communication of April 8, I beg to say that the sirup valued in my letter to you of February 21 at from one-half cent to 1 cent per pound (or, which is the same thing, 6 to 12 cents per gallon), is table sirup after it has been subjected to the full process of refining, filtering, clarifying, etc. Without such process it is fit only for distilling purposes, and sold ex package at 2 to 3 cents per gallon, an average of one-fifth of 1 cent per pound.

The polarization of these sirups averages about 40 and the weight 12 pounds per gallon, with 20 per cent water.

I reinclose you my letter of February 21.

Yours, truly,

H. O. HAVEMEYER.

IRA AYER, Esq.,
Special Agent, New York City.

—

UNITED STATES LABORATORY,
OFFICE OF APPRAISER OF MERCHANDISE,
New York, N. Y., April 9, 1895.

SIR: Referring to letter of Special Agent Ira Ayer, of April 8, 1895, requesting a statement from me showing the average refined products obtainable from 100 pounds of cane sugar (centrifugal) polarizing 96 degrees, and further requesting the average tests of each refined product and the character of the loss, I have the honor to report as follows:

The average yield from 100 pounds of cane sugar (centrifugal) polarizing 96 degrees, as ascertained from the last available sources of information, is, in my opinion, as follows:

	Pounds.
Hard refined sugar	92.50
Sirup	5
Loss	2.50

The test of hard refined sugar ranges from 99 degrees to 99.9 degrees; of sirup, from 30 degrees to 40 degrees.

Under the head of loss is given an amount representing water, ash, and other impurities. This must not be understood to represent an absolute loss in the process of refining, as a considerable portion of it may be worked into the sirup and lower grades of sugar when these are made in addition to hard refined, but of course with the result of degrading these products.

Respectfully,

EDWARD SHERER,
Chemist in Charge.

HON. WALTER H. BUNN, *United States Appraiser.*

—

OFFICE OF SPECIAL AGENT, TREASURY DEPARTMENT,
New York, N. Y., March 1, 1895.

GENTLEMEN: Referring to previous correspondence in relation to the establishment of drawback rates on exported refined sugar, I beg to inform you that the time is at hand when it will be necessary to submit a report upon the subject to the Department.

In the preparation of such report it is the desire of the Government that the views of the principal refiners of the country shall be obtained and considered, and I would be particularly glad of such data as your firm may be able to furnish.

As I am up to this date without a response from you to any of my letters, I again write and will thank you to advise me whether or not you have any facts or views pertaining to the questions involved which you desire to submit.

If it is not in your opinion practicable to use the blank transmitted with my letter of January 5, 1895, I will be glad to consider any information that you think proper to submit, which, in your judgment, will aid the Government in reaching just conclusions.

For the reason first herein noted, I will ask you kindly to write on receipt of this, so that I may have your answer on Monday, the 4th instant.

Respectfully, yours,

IRA AYER, *Special Agent.*

Messrs. NASH, SPALDING & CO.,
Boston Mass.

—

EXHIBIT C.

[Cunningham & Miller, producers, manufacturers, and refiners of sugar.]

SUGARLAND, TEX., *January 31, 1895.*

DEAR SIR: As requested in your circular letter of January 5, we inclose herewith statement as requested, as near as we can give it to you. We have never refined any raw beet sugar, our operations being confined to the cane product.

Yours, truly,

CUNNINGHAM & MILLER.

Mr. IRA AYER,
Special Agent Treasury Department,
Custom-House, New York, N. Y.

Possible product of hard refined sugar from imported raw cane sugar, and the products under the ordinary methods of refining now in use in the United States.

Polarization.	Amount of raw sugar used.	Hard refined.	Ex. C 1.	Sirup.	Loss.
	Pounds.	*Pounds.*	*Pounds.*	*Pounds.*	*Pounds.*
96	100	9,216	.92	3.49	3.68
94	100	8,894	.45	4.61	5.33

Loss consists of water, ash, and other impurities. Hard refined tests from 99.8 degrees to 100 degrees; Ex. C 1, 90 degrees to 94 degrees; sirup, 32.8 degrees to 41 degrees. The loss given is the difference between sucrose in raw sugar and sucrose in refined.

Average granulated sugar during the same period, 3.982 cents per pound; less one-tenth for cost of barrels, 3.882 cents per pound.

—

MEMORANDUM.

In discussing questions of duty and drawback on sugars, four values are to be considered: Commercial value, invoice value, dutiable value, and productive value.

In appraisal of sugars but three values are considered: Commercial value, invoice value, and dutiable value.

In drawback matters but two values are considered: Dutiable value (as fixed by the appraiser) and productive value.

Relative productive values of raw cane centrifugal sugars testing from 99 degrees to 92 degrees, based on a dutiable value of 2 cents per pound for a 96-degree sugar, and with one thirty-second of a cent per pound as the measure of difference in productive value for each degree of test.

Test.			Productive value.		Quantities of raw sugar consumed in producing 1 pound hard refined sugar.	
For 99° add	$\frac{3}{32}$	=	$\frac{96}{32}$	×	1.02686	
98° add	$\frac{2}{32}$	=	$\frac{64}{32}$	×	1.04242	
97° add	$\frac{1}{32}$	=	$\frac{32}{32}$	×	1.05846	Cost of raw material in each pound of hard refined sugar in terms of 96° sugar = 1.075 = $1\frac{3}{32}$ pounds.
96° at 2 cents		=	$\frac{64}{32}$	×	1.075	
95° deduct $\frac{1}{32}$		=	$\frac{63}{32}$	×	1.09206	
94° deduct $\frac{2}{32}$		=	$\frac{62}{32}$	×	1.10967	
93° deduct $\frac{3}{32}$		=	$\frac{61}{32}$	×	1.12786	
92° deduct $\frac{4}{32}$		=	$\frac{60}{32}$	×	1.14666	

Mode of liquidation where raw sugar of one test and value is identified.

	Cents.
$\frac{1}{32}$ cent	0.03125
$\frac{2}{32}$ cent	.0625

1,000 pounds refined sugar exported. 1,000 pounds at $1\frac{3}{32}$ = 1,075 pounds 96-degree sugar used.

Refiners identify 1,200 pounds 94-degree sugar at 1.90. $1.90 + \frac{2}{32} = 1.9625$ for 96-degree sugar.

1,075 pounds × 1.9625 = $21.09, at 40 per cent	$8.43
Less 1 per cent	.08
Drawback on 1,000 pounds exported	8.35

Mode of liquidation where raw sugars of several tests and values are identified.

1,000 pounds refined sugar exported. 1,000 pounds × $1\frac{3}{32}$=1,075 pounds 96° sugar used.

Refiners identify:

300 pounds 94° sugar, at 1.80 cents	$5.40
500 pounds 95° sugar, at 1.90 cents	9.50
400 pounds 97° sugar, at 2.10 cents	8.40

$\frac{1}{32}$ cent=.03125 cent; $\frac{2}{32}$=.0625 cent.
94° at 1.80+.0625 =96° at 1.8625.
95° at 1.90+.03125=96° at 1.93125.
97° at 2.10—.03125=96° at 2.06875.

300 pounds 94° =○= 290 pounds 96° at 1.8625	$5.40
500 pounds 95° =○= 492 pounds 96° at 1.93125	9.50
286 pounds 97° =○= 293 pounds 96° at 2.06875	6.06
1,075	20.96

Drawback on 1,000 pounds refined sugar equals duty paid on 1,075 pounds 96° sugar = $20.96 at 40 per cent = $8.38—1 per cent = $8.30.

Mode of determining quantities of raw-cane centrifugal sugars, ranging from 99 degrees to 92 degrees, consumed in the production of 1 pound of hard refined sugar, the determinations being based on a dutiable value of 2 cents per pound for a 96-degree sugar, with one thirty-second of a cent per pound as the measure of difference in productive value for each degree of test.

Test.			Productive values.		Quantities of raw sugar consumed in production of 1 pound of hard refined sugar.
For 99° add	$\frac{3}{32}$	= $\frac{96}{32}$	67		1.02686
98° add	$\frac{2}{32}$	= $\frac{64}{32}$	66		1.04242
97° add	$\frac{1}{32}$	= $\frac{32}{32}$	65		1.05846
96° at	2c	= $\frac{64}{32}$	64	:64::1.075:	1.075
95° deduct	$\frac{1}{32}$	= $\frac{63}{32}$	63		1.09206
94° deduct	$\frac{2}{32}$	= $\frac{62}{32}$	62		1.10967
93° deduct	$\frac{3}{32}$	= $\frac{61}{32}$	61		1.12786
92° deduct	$\frac{4}{32}$	= $\frac{60}{32}$	60		1.14667

Same result on page 4, but by another method.

Raw sugar identified of one test and value only, viz, 94° at 1.90 cents per pound.

1,000 pounds refined sugar exported.

Allow of 94° sugar 1.10967 pounds for 1 pound hard refined. 1,000 pounds at 1.10967=1,109.67 pounds identified. 1,109.67 at 1.90=$21.08; at 40 per cent=8.43—1 per cent=$8.35=drawback on 1,000 pounds exported.

1,000 pounds refined sugar exported.

300 pounds 94° sugar, at 1.80 cents per pound	$5.40
500 pounds 95° sugar, at 1.90 cents per pound	9.50
286 pounds 97° sugar, at 2.10 cents per pound	6.05
Total value of raw material used	20.9

Drawback on 1,000 pounds hard refined sugar equals duty paid on raw material valued at $20.95, at 40 per cent=$8.38—1 per cent=$8.30.*

740922
211692

Allow, say, 286 pounds 97° sugar.

* Same results as shown on p. —, but by another method.

DRAWBACK.

TREASURY DEPARTMENT, *July 10, 1862.*

SIR: I have examined your several reports and those of other collectors of the customs in regard to the proper rates of drawback to be allowed on exportation of articles manufactured of sugar or molasses, on which import duties have been paid, under the act of December 24, 1861, entitled "An act to increase the duties on tea, coffee, and sugar," and have decided to adopt the following rates, which will be allowed by collectors, subject to the rules issued by me on the 23d of January, 1862, viz:

Rates of drawback.—On the products of sugar: Refined sugar, 3.2 cents per pound; soft A, B, C, and lower grades of sugar, 2½ cents per pound; sirup of sugar (sugarhouse molasses), 6 cents per gallon. On the products of molasses (reboiled): Clarified molasses, 6 cents per gallon; New England rum, 6 cents per gallon; sugarhouse molasses, 4½ cents per gallon; clarified sugar, 1 cent per pound.

I am, very respectfully,

S. P. CHASE,
Secretary of the Treasury.

HIRAM BARNEY, Esq.,
Collector, etc., New York.

(809.)

RATES OF DRAWBACK ALLOWED ON THE PRODUCTS OF SUGAR AND MOLASSES.

The following rates of drawback will be allowed on the exportation of the articles hereinafter named, manufactured wholly of materials on which duty was paid under the tariff now in force:

On the products of sugar.—On refined crystalline sugar, 2½ cents per pound; on refined soft B and C, lower grade sugar, 2 cents per pound; on sirup of sugar (sugarhouse molasses), 5 cents per gallon.

On the products of molasses.—On New England rum, 5½ cents per gallon; on sirup from molasses, 4 cents per gallon; on sugar from molasses, 1 cent per pound.

All allowances under the above rates to be subject to the legal deduction of 10 per cent.

Nitrate of soda has been placed upon the free list. No drawback will be allowed on gunpowder manufactured in part from that article in cases where the nitrate of soda was imported since the present tariff went into effect.

No drawback is now allowed on copal varnish, unless manufactured of materials imported under the former tariff. (Letter to collector at New York, N. Y., March 20, 1871.)

(2312.)

DRAWBACK ON SUGAR AND SIRUP.

TREASURY DEPARTMENT, *June 26, 1875.*

SIR: On the exportation of sugar and sirup produced from imported melada, paying a duty of 1½ cents per pound and 25 per cent in addition thereto, drawback will be allowed at the following rates:

On sugar, at 2½ cents per pound.

On sirup, at 5½ cents per gallon.

The drawback on sugar to be subject to a retention of 1 per cent, and the drawback on sirup to a retention of 10 per cent.

The rate of 5½ cents per gallon of sirup, representing an addition of 25 per cent to the former rate of 4½ cents per gallon, is adopted provisionally until the question of an increased rate on this product, now pending, is fully considered and finally decided by the Department.

Very respectfully,

B. H. BRISTOW, *Secretary.*

COLLECTOR OF CUSTOMS, *New York.*

(2554.)

DRAWBACK ALLOWANCE ON SUGARS.

TREASURY DEPARTMENT, *December 17, 1875.*

SIR: The following rates of drawback on refined sugars and sirup wholly manufactured from imported raw sugar are hereby established in lieu of those heretofore in force:

On loaf, cut loaf, crushed, granulated, and powdered refined sugar, stove dried, or dried by other equally effective process, entirely the product of foreign duty-paid sugar, 3.60 cents per pound.

On refined white coffee sugar, undried, and above No. 20 Dutch standard in color, entirely the product of foreign duty-paid sugar, 3 cents per pound.

On all grades of refined coffee sugar, No. 20 Dutch standard and below in color, entirely the product of foreign duty-paid sugar, 2½ cents per pound.

On sirup resulting entirely from the refining of foreign duty-paid sugar, 6½ cents per gallon.

The allowance on sugars to be subject to the deduction of 1 per cent and the allowance on sirup to the deduction of 10 per cent, as prescribed by law.

Very respectfully,

B. H. BRISTOW, *Secretary.*

COLLECTOR OF CUSTOMS,
Baltimore, Md.

[1877. Department No. 117. Secretary's office.]

CIRCULAR TO COLLECTORS AND OTHER OFFICERS OF THE CUSTOMS.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., September 6, 1877.

The following rates of drawback on refined sugar and sirup wholly manufactured from imported raw sugar are hereby established, to take effect on and after October 1, 1877:

On loaf, cut loaf, crushed, granulated, and powdered refined sugar, stove dried, or dried by other equally effective process, entirely the product of foreign duty-paid sugar, 3.18 cents per pound.

On refined white coffee sugar, undried and above No. 20 Dutch standard in color, entirely the product of foreign duty-paid sugar, 2.58 cents per pound.

On all grades of refined coffee sugar, No. 20 Dutch standard and below in color, entirely the product of foreign duty-paid sugar, 2.8 cents per pound.

On sirup resulting entirely from the refining of foreign duty-paid sugar, 6½ cents per gallon.

The allowances on sugars will be subject to the deduction of 1 per cent. and the allowances on sirup to the deduction of 10 per cent, as prescribed by law.

Very respectfully,

JOHN SHERMAN, *Secretary.*

[Circular. 1879. Department No. 30. Secretary's office.]

SAMPLING OF SUGAR FOR DRAWBACK.

TREASURY DEPARTMENT, *Washington, D. C., February 13, 1879.*

To collectors of customs and others:

The circular instructions of this Department of September 6, 1877, by which the rates of drawback payable on exportations of refined sugar are fixed

according to the grade by the Dutch standard of the exported sugar, are hereby supplemented as follows:

Samples from at least one in every ten packages of sugar entered for exportation with benefit of drawback shall be taken at the place of landing for export by experienced samplers, under the direction of the United States appraiser or officer acting as such, to be by him examined, compared with the Dutch standard for classification, and reported upon to the collector.

JOHN SHERMAN, *Secretary.*

(4037.)

SAMPLING OF SUGAR FOR EXPORT.

TREASURY DEPARTMENT, *June 3, 1879.*

Samples from at least one in every ten packages of sugar entered for exportation with benefit of drawback shall be taken by the debenture officer and by him delivered to the United States appraiser for examination and comparison with the Dutch standard for classification.

The samples may be taken either at the place of lading or at the refinery.

The exporter will be required to note on the export entry presented at the custom-house the time when the sugar will be ready for weighing, inspection, and delivery.

Each package when weighed and inspected shall be stenciled across the marked head thereof with the words "weighed" and "inspected," and with the initials of the proper officer.

The merchandise shall be transferred forthwith, under the supervision of the inspecting officer, from the refinery to the export vessel, in bonded lighters or trucks.

The provisions of this Department's circular, dated February 13, 1879, requiring that samples shall be taken exclusively at the place of the lading of such sugars, and under the direction of the appraiser, are modified accordingly.

JOHN SHERMAN, *Secretary.*

COLLECTORS OF CUSTOMS AND OTHERS.

[Circular. 1883. Department No. 73. Secretary's office.]

DRAWBACK ON SIRUP FROM MOLASSES.

TREASURY DEPARTMENT, *Washington, D. C., June 5, 1883.*

To collectors of customs and others:

On the exportation of sirup resulting from the refining of imported molasses, upon which the duty of 4 cents per gallon, prescribed by the tariff of March 3, 1883, has been paid, a drawback will be allowed at the rate of 3.2 cents per gallon, less the legal retention of 10 per cent.

H. F. FRENCH, *Acting Secretary.*

[Circular. 1883. Department No. 77. Secretary's office.]

PROVISIONAL RATES OF DRAWBACK ON REFINED SUGAR AND SIRUP.

TREASURY DEPARTMENT, *Washington, D. C., June 9, 1883.*

To collectors of customs and others:

Until the 1st day of September, 1883, on the exportation of sugar and sirup, refined wholly from imported sugars, tank bottoms, sirups of cane juice, melada, concentrated melada, or concrete and concentrated molasses, upon which duties shall be paid at the rates prescribed by the tariff of March 3, 1883, drawback will be allowed at the following rates:

1. On refined loaf, cut loaf, crushed, granulated, and powdered sugar, stove dried or dried by other equally effective process, 2.82 cents per pound.

2. On refined white coffee sugar, undried, and above No. 20 Dutch standard in color, 2.28 cents per pound.

3. On all grades of refined coffee sugar, No. 20 Dutch standard and below in color, 1.84 cents per pound.

4. On sirup resulting entirely from the refining of the above-enumerated imported materials, 4 cents per gallon.

The allowance on sugars will be subject to the deduction of 1 per cent, and the allowance on sirup to the deduction of 10 per cent, as prescribed by law.

CHAS. J. FOLGER, *Secretary.*

[Circular. 1883. Department No. 130. Secretary's office.]

RATES OF DRAWBACK ON REFINED SUGAR AND SIRUP.

TREASURY DEPARTMENT, *Washington, D. C., October 3, 1883.*

To collectors of customs and others:

The provisional rates of drawback specified in the Department's circular of June 9, 1883, No. 77, will continue in force until January 1, 1884, unless sooner revoked.

CHAS. J. FOLGER, *Secretary.*

[Circular. 1884. Department No. 21. Secretary's office.]

DRAWBACK ON REFINED SUGAR AND SIRUP.

TREASURY DEPARTMENT, *Washington, D. C., February 7, 1884.*

To collectors of customs and others:

The following rates of drawback on sugar and its products, established provisionally by the circular of June 9, 1883, are hereby declared to be permanent:

1. On refined loaf, cut loaf, crushed, granulated, and powdered sugar, stove-dried or dried by other equally effective process, 2.82 cents per pound.

2. On refined white coffee sugar, undried, and above No. 20 Dutch standard in color, 2.28 cents per pound.

3. On all grades of refined coffee sugar, No. 20 Dutch standard and below in color, 1.84 cents per pound.

4. On sirup resulting entirely from the refining of the above-enumerated imported materials, 4 cents per gallon.

The allowance on sugars will be subject to the deduction of 1 per cent, and the allowance on sirup to the deduction of 10 per cent, as prescribed by law.

CHAS. J. FOLGER, *Secretary,*

[Circular. 1884. Department No. 121. Secretary's office—(Customs).]

DRAWBACK ON SUGAR FROM MOLASSES.

TREASURY DEPARTMENT, *Washington, D. C., July 23, 1884.*

To collectors of customs and others:

On the exportation of sugar refined from imported molasses, upon which the duty of 4 cents per gallon, prescribed by the tariff of March 3, 1883, has been paid, a drawback will be allowed at the rate of fifty-five hundredths of 1 cent per pound, less the legal retention of 1 per cent.

CHAS. E. COON, *Acting Secretary.*

[Circular. 1886. Department No. 134. Division of customs.]

REDUCING RATE OF DRAWBACK ON DRIED REFINED SUGAR.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., September 23, 1886.

To collectors of customs and others:

On all refined loaf, cut loaf, crushed, granulated, and powdered sugar, stove-dried or dried by other equally effective process, exported on and after November 1, 1886, drawback will be allowed at the rate of 2.60 cents per pound, less the legal retention of 1 per cent.

The above rate is provisionally established in lieu of the existing rate of 2.82 cents per pound, pending an inquiry as to what further reduction may be necessary.

C. S. FAIRCHILD, *Acting Secretary.*

[Circular. 1888. Department No. 20. Division of customs.]

RATE OF DRAWBACK ON DRIED REFINED SUGAR.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., February 3, 1888.

To collectors of customs and others:

The rate of drawback provisionally established by the circular of September 23, 1886 (Synopsis 7780), on all refined loaf, cut loaf, crushed, granulated, and powdered sugar, stove-dried or dried by other equally effective process, viz, 2.60 cents per pound, less the legal retention of 1 per cent., is hereby declared to be permanent.

C. S. FAIRCHILD, *Secretary.*

[Circular. 1891. Department No. 47. Division of customs.]

DRAWBACK ON REFINED SUGAR EXPORTED ON OR AFTER APRIL 1, 1891.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., March 23, 1891.

To collectors and other officers of the customs:

To insure necessary identification of refined sugars which may be exported on or after April 1, 1891, for benefit of drawback, the exporter will be required to file preliminary entry before that date, and the sugars covered thereby shall remain in the custody of a customs officer at the expense of the exporter until duly shipped for exportation.

The name of the exporting vessel and date of exportation need not be stated in the preliminary entry, but may be filled in before the time of shipment.

CHARLES FOSTER, *Secretary.*

[Circular. 1891. Department No. 69. Division of customs.]

DISCONTINUING ALLOWANCE OF DRAWBACK ON SUGAR USED IN THE MANUFACTURE OF EXPORTED CONFECTIONERY OR OTHER ARTICLES.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., May 7, 1891.

To collectors and other officers of the customs:

In view of the fact that raw sugar not above No. 16 Dutch standard in color, as well as other forms of so-called refining sugars (sirups of cane juice, melada, molasses, etc.), imported on or after the 1st day of April, 1891, are exempt from duty, and of the further fact that at the same time sugars refined in bond during the month of March, 1891, from imported raw sugars went into consumption without payment of duty, no drawback will hereafter be allowed on sugar used in the manufacture of confectionery or any other articles exported.

All previous decisions authorizing the allowance of such drawback are hereby revoked.

CHARLES FOSTER, *Secretary.*

[Circular. 1891. Department No. 78. Division of customs.]

RESCINDING CIRCULAR NO. 69, OF MAY 7, 1891, RELATIVE TO DRAWBACK ON SUGAR USED IN THE MANUFACTURE OF CONFECTIONERY AND OTHER ARTICLES.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., May 27, 1891.

To collectors and other officers of the customs:

The Department being advised that manufacturers of condensed milk, confectionery, and other articles made wholly or in part from sugar have on hand considerable quantities of refined sugar manufactured before March 1, 1891, from duty-paid raw sugar, which was purchased by them with the intention of being used in the manufacture of such articles for exportation with benefit of drawback, Circular No. 69, of May 7, 1891, discontinuing allowances of drawback on sugar used in the manufacture of such articles is hereby rescinded.

In view of the presence in the market of sugars refined from raw sugars in bond, or from raw sugars imported free of duty after April 1, 1891, the most careful scrutiny of the proofs presented with each entry for the identification of the sugar used in the manufacture of articles exported for benefit of drawback is hereby enjoined.

CHARLES FOSTER, *Secretary.*

[1896. Department Circular No. 20. Division of customs.]

DRAWBACK ON SUGAR AND SIRUP.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., February 1, 1896.

To collectors and other officers of the customs:

On the exportation of refined sugars made wholly from imported raw sugars, and on the exportation of sirups made wholly from imported raw cane sugars, drawback will be allowed equal in amount to the duties paid on the imported sugars so used, less the legal deduction of 1 per cent.

When the exported sugars are "hard refined," of standard test, commercially known as loaf, cut loaf, cube, granulated, crushed, or powdered, and are made wholly from imported raw cane sugars, the amount of drawback shall be determined by allowing for each 100 pounds of the exported article the duties paid on the respective grades and quantities of material used, as indicated in the following schedule:

Test of raw sugar used (degrees).	Allowance for 100 pounds hard refined.	Test of raw sugar used (degrees).	Allowance for 100 pounds hard refined.
	Pounds.		*Pounds.*
100	100.00	87	124.27
99	101.87	86	126.14
98	103.73	85	128.01
97	105.60	84	129.88
96	107.47	83	131.74
95	109.34	82	133.61
94	111.20	81	135.48
93	113.07	80	137.35
92	114.94	79	139.21
91	116.81	78	141.08
90	118.67	77	142.95
89	120.54	76	144.82
88	122.41	75	146.68

When "soft refined" sugars made from imported raw cane sugars are exported, the quantity of "crystallizable sugar" contained therein shall be determined by reference to weight and polariscope test of the exported article, and drawback allowance shall be based on the quantity of "crystallizable sugar" so found, as hereinbefore provided for a like quantity of "hard refined" sugar.

When the "hard refined" sugars hereinbefore described are made wholly from raw beet sugars, the dutiable value of the material used for each pound

of the exported article shall be determined by dividing the dutiable value of 1 pound of the material used by the decimal denoting the "net analysis" of such material.

The amount of drawback which may be allowed on the exported sirup product of raw cane sugars shall be determined by allowing for each gallon of the exported article, valued at 5 cents in condition as "thrown" from the "centrifugal," the duties paid on the respective grades and quantities of material used as indicated in the following schedule:

Test of raw sugar used (degrees).	Allowance for 1 gallon sirup.	Test of raw sugar used (degrees).	Allowance for 1 gallon sirup.
	Pounds.		*Pounds.*
99	1.36	86	1.56
98	1.37	85	1.58
97	1.39	84	1.60
96	1.40	83	1.62
95	1.41	82	1.64
94	1.43	81	1.66
93	1.44	80	1.68
92	1.46	79	1.70
91	1.48	78	1.72
90	1.49	77	1.74
89	1.51	76	1.77
88	1.53	75	1.79
87	1.55		

The value of the sirup in condition as thrown from the centrifugal shall be declared by the manufacturer on the drawback entry, which declaration shall be verified by the collector, and if the declaration so verified shows a value per gallon above or below 5 cents, the allowance shall be determined by increasing or reducing the schedule allowance in proportion to the increase or reduction above or below the 5 cents per gallon, but in no case shall the allowance be based on a value of sirup exceeding 8 cents per gallon without special authority from the Department.

For fractional tests of the raw cane sugar used in the manufacture of either refined sugar or sirup the allowances of quantity of material shall be computed in proportion to the schedule allowances for the degrees next above or below such fractional test.

The quantities of sugar and sirup exported shall be ascertained by United States weighers and gangers, respectively, and samples shall be taken as ordered by the collector, to be submitted to the appraiser for report of polariscope test and such other expert inspection as may be requisite.

On requisition of collectors, appraising officers shall furnish polariscope tests, "net analyses," and other conditions of valuation of raw sugars not found on the import invoice for use in liquidation of drawback entries.

J. G. CARLISLE, *Secretary.*

[1896. Department Circular No. 102. Division of Customs.]

DRAWBACK ON SUGAR AND SIRUP.

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY,
Washington, D. C., June 25, 1896.

To collectors and other officers of the customs:

On the exportation of refined sugars and sirups made wholly from imported raw sugars drawback will be allowed equal in amount to the duty paid on the material used, less the legal deduction of 1 per cent.

When the exported sugars are "hard refined," of standard test, commercially known as loaf, cut loaf, cube, granulated, crushed, or powdered, and are made wholly from imported raw cane sugars, the amount of drawback shall be determined by allowing for each 100 pounds of the exported article the duties paid on the respective grades and quantities of materials used, as indicated in the following schedule:

Test of raw sugar used (degrees).	Allowance for 100 pounds hard refined.	Test of raw sugar used (degrees).	Allowance for 100 pounds hard refined.
	Pounds.		*Pounds.*
99	101.87	86	126.14
98	103.73	85	128.01
97	105.60	84	129.88
96	107.47	83	131.74
95	109.34	82	133.61
94	111.20	81	135.48
93	113.07	80	137.35
92	114.94	79	139.21
91	116.81	78	141.08
90	118.67	77	142.95
89	120.54	76	144.82
88	122.41	75	146.68
87	124.27		

When the "hard refined" sugars hereinbefore described are made wholly from imported raw-beet sugars, the duty paid on the material used for each pound of the exported article may be determined by dividing the duty paid on 1 pound of the material by the decimal denoting the "net analysis" of such material and then deducting from the amount so found, as an equivalent of the value of the material for the sirup product, the percentage of that amount corresponding to the polariscope test of the raw sugar used, indicated in the following schedule:

Polariscope test of raw beet sugars used (degrees).	Percentages to be deducted to find duty paid on material for refined sugar.	Polariscope test of raw beet sugars used (degrees).	Percentages to be deducted to find duty paid on material for refined sugar.
"Firsts:"	*Per cent.*	"Seconds:"	*Per cent.*
96	1.2	92	3.7
95	1.5	91	4.5
94	1.9	90	5.4
93	2.4	89	6.4
92	3	88	7.5

When "soft refined" sugars made wholly from imported raw sugars are exported with benefit of drawback, the drawback entry must show the respective values of such soft sugars and of standard granulated sugar on the same market; and the drawback per pound on the "soft refined" sugar shall be such part of the drawback per pound provided for "hard refined" sugar, made from the same kind and grade of material, as the value of such soft sugar is of the value of such granulated sugar.

The rate of drawback on the "soft refined" sugar may be fixed by use of the following proportion: As the value of 1 pound of standard granulated sugar is to the value of 1 pound of the "soft refined" sugar, so is the drawback provided for the pound of granulated sugar to the drawback allowable on the pound of "soft refined" sugar made from like material.

The required values of the refined sugars declared on the drawback entry shall be verified by reference to standard market quotations on date of shipment.

The amount of drawback which may be allowed on the exported sirup products of raw sugars shall be determined by allowing for each gallon of the exported article, valued at 5 cents in condition as "thrown" from the "centrifugal," the duties paid on the respective grades and quantities of material used, as indicated in the following schedule:

Test of raw sugar used (degrees).	Allowance for 1 gallon of sirup.	Test of raw sugar used (degrees).	Allowance for 1 gallon of sirup.
	Pounds.		*Pounds.*
99	1.36	86	1.56
98	1.37	85	1.58
97	1.39	84	1.60
96	1.40	83	1.62
95	1.41	82	1.64
94	1.43	81	1.66
93	1.44	80	1.68
92	1.46	79	1.70
91	1.48	78	1.72
90	1.49	77	1.74
89	1.51	76	1.77
88	1.53	75	1.79
87	1.55		

The value of the sirup, in condition as thrown from the centrifugal, shall be declared by the manufacturer on the drawback entry, which declaration shall be verified by the collector; and if the declaration so verified shows a value per gallon above or below 5 cents, the allowance shall be determined by increasing or reducing the schedule allowance in proportion to the increase or reduction above or below the 5 cents per gallon above specified; but in no case shall the allowance be based on a value of sirup exceeding 8 cents per gallon without special authority from the Department.

When imported raw cane and beet sugars are "blended" or mixed in the process of manufacturing refined sugars and sirups, the manufacturer's declaration must show separately the respective quantities of the different kinds and grades of the sugars so mixed. In liquidating entries covering portions of the products of such mixtures, drawback shall be based on proportionate quantities of material corresponding to the quantities of the different kinds and grades of materials so mixed.

For a fraction of a degree of test of the raw sugar used in the manufacture of either refined sugar or sirup the allowance of quantity of material shall be fixed by a proportionate division of the difference between the schedule allowances for the degrees next above and below such fraction.

The quantities of sugar and sirup exported shall be ascertained by United States weighers and gaugers, respectively; and samples shall be taken as ordered by the collector to be submitted to the appraiser for the report of polariscope test and such other expert inspection as may be requisite.

On requisition of collectors, appraising officers shall furnish polariscope tests, "net analyses," and other conditions of valuation of raw sugars not found on the import invoice for use in liquidation of drawback entries.

Department's Circular No. 20, of February 1, 1896 (synopsis 16738), is hereby superseded.

W. E. CURTIS, *Acting Secretary.*

Mr. GRAY. Mr. President, I am very sorry that the Senator from Louisiana who has just taken his seat has seen fit to give us his very interesting speech on sugar just at this juncture, when I was endeavoring to direct the attention of the Senate to a specific matter of importance, as I conceive, that we had reached in due order, and thus have distracted the attention of the Senate from the particular point that I had in view.

I could not understand from what the Senator first said as to whether he agreed as compared with what he afterwards said in reply to an interlocution of my own, whether he was in favor of the abolition of this differential on the score of the bounty paid by Germany or not. He said latterly, in reply to a question I asked him from my seat, that he was in favor of it, as I understood him.

Mr. CAFFERY. I said that, in my opinion, the countervailing duty, which is from 25 to 28 per cent, is entirely too much, and at whichever end the reduction be made upon, it is immaterial to me, whether taken from the countervailing or from the differential.

Mr. GRAY. I understood that the Senator argued against the proposition that I made, that this is a matter which concerns us to deal with, because there was a suggestion made on very good grounds that we were restrained by our treaty made with Prussia in 1828 from making these discriminations against sugar coming from that country; and I think I showed—although I did it briefly—the reasons for that belief on my part, that here was the express obligation of this treaty made in 1828, which prevented this country from imposing a duty upon articles imported from Prussia higher than those that were imposed upon the most-favored nation.

Unquestionably this section 3 that we have under consideration contravenes the provision and obligation of that treaty. It is no answer to say that no higher duties are specifically or nominally levied on sugars from Prussia than those from other countries, but that your specific higher rate falls upon sugars from all countries

that may happen to fall within a certain classification. If it were so, then we could evade the obligations of a treaty simply by a skillfully drawn classification. For example, we could impose additional duties on all commodities which came from countries where the labor employed in producing them was not paid according to a specific standard of wages. If we could make a domestic law the basis of discrimination or classification, we might forbid the importation or impose higher duties on the importations from such countries as did not establish eight hours as a working day, or as did not forbid work on Sunday, or as were of a monarchical form of government; and Germany might evade her treaty obligations with us in the same way.

The payment of a bounty by Germany on the exportation of sugar to encourage that industry can not be regarded as a discrimination against us. It is as much a matter of domestic concern as a high protective tariff enacted for the same purpose, encouraging home industry.

As I said before, I do not believe it was the intention of the committee—of course it was not the intention of the committee—by the use of this general language to cover up a concealed and direct purpose of evading this treaty obligation; but we do it nevertheless by this language; we do evade it; and I believe that we would have a proper ground of complaint if the case were reversed and Germany enacted a like provision in her tariff laws.

Now, we have a very important matter with Germany, which is alluded to in the letter written by the German ambassador to the Secretary of State. In 1891 there was something like a convention between the two countries, based upon the free sugar of the McKinley law, by which the importation into Germany of American pork and American flour was favored. All that has been very much modified and very much changed by the duty imposed by the Wilson law, which was made a ground of protest then. It will be much more affected by the present provision, which is three times the discrimination of the Wilson law. Where the Wilson law imposed a countervailing duty of one-tenth of a cent, we impose, by this section 3, a countervailing duty of more than one-third of a cent—three times that of the Wilson law.

I am very sorry that the Senator from Louisiana, with whom I thought that I agreed about the general notions that underlie this whole matter of tariff imposition, should have defended, as he seemed to defend, this countervailing duty on grounds which were decidedly protectionist. He supported and, as far as I could understand him, defended the imposition of this countervailing duty on the ground that it was a proper retaliatory measure on the part of the United States against the low productive cost of other countries. If that differs at all from the ordinary protective doctrine, I am unable to perceive it; and, unless I greatly misunderstood the Senator from Louisiana, he took that position.

Mr. President, I have not yet found any reason for abandoning the beliefs that I have in regard to the elementary propositions that lie at the very foundation of this whole matter of protective tariffs and of greater commercial freedom. I do not believe it is a cause for countervailing legislation that there are conditions in other countries by which the necessaries of life can come to our people with less cost than would otherwise obtain but for those conditions. I do not believe that that is a cause, whether artificially produced or naturally produced. Whatever is the cause, I believe that the people of this country, like the people of England, should be entitled to enjoy the cheap sugar that these conditions have given us from Germany.

But it is not upon that ground that I oppose this section, nor did I rise to consume the time of the Senate in discussing it; but it was because we were bound by treaty stipulations that we can not evade, or that it was not honorable to evade and that it is not honorable to evade, and I have that much regard for the faith of this country, and for its good name and fame, that I believe the Senate will take some consideration before they adopt this provision in this bill.

Mr. WHITE. Mr. President, I do not intend to consume the time of the Senate, which is, or ought to be, exceedingly precious at this moment, but I wish to call the attention of the Senator from Delaware to the fact that in presenting the opinion of Mr. Gresham upon this topic he made no allusion, so far as I heard, to the opinion rendered by the Attorney-General, Mr. Olney.

Mr. GRAY. I recollect that opinion.

Mr. WHITE. Both opinions are published in Senate Miscellaneous Document No. 52, Fifty-third Congress, third session, and the subject was considered more or less by the Finance Committee in a general way; it has been discussed, and my attention has been several times drawn to it, and I have never been able to bring myself to agree with Secretary Gresham's views regarding this matter. I think the pith of the opinion may be expressed in this very brief extract from Attorney-General, afterwards Secretary, Olney. He says:

In the first place, the "most-favored-nation clauses" of our treaties with foreign powers have, from the foundation of our Government, been invariably construed both as not forbidding any internal regulations necessary for the protection of our home industries and as permitting commercial concessions to a country which are not gratuitous, but are in return for equivalent concessions, and to which no other country is entitled except upon rendering the same equivalents. Thus, Mr. Jefferson, when Secretary of State in 1792, said of treaties exchanging the rights of the most-favored nation that "they leave each party free to make what internal regulations they please and to give what preference they find expedient to native merchants, vessels, and productions."

In 1817 Mr. John Quincy Adams, acting in the same official capacity, took the ground that the "most-favored-nation clause" "only covered gratuitous favors and did not touch concessions for 'equivalents, expressed or implied.'" Mr. Clay, Mr. Livingston, Mr. Evarts, and Mr. Bayard, when at the head of the Department of State, have each given official expression to the same view. It has also received the sanction of the Supreme Court in more than one well-considered decision, while in Bartram *vs.* Robertson (122 U. S., 116) Mr. Justice Field, speaking for the whole court, expounded the stipulations of the "most-favored-nation clause" in this language:

"They were pledges of the two contracting parties, the United States and the King of Denmark, to each other, that, in the imposition of duties on goods imported into one of the countries which were the produce or manufacture of the other, there should be no discrimination against them in favor of goods of like character imported from any other country. They imposed an obligation upon both countries to avoid hostile legislation in that respect."

The interpretation of the "most-favored-nation clause," so clearly established as a doctrine of American law, is believed to accord with the interpretation put upon the clause by foreign powers—certainly by Germany and Great Britain.

Here is a very important feature of this consideration, for the interpretation placed by the parties affected upon a contract is always of importance in construing that contract. The opinion proceeds:

Thus, as the clause permits any internal regulations that a country may find necessary to give a preference to "native merchants, vessels, and productions," the representatives of both Great Britain and Germany expressly declared at the international sugar conference of 1888 that the export sugar bounty of one country might be counteracted by the import sugar duty of another without causing any discrimination which could be deemed a violation of the terms of the "most-favored-nation clause." So both Germany and Great Britain acquiesced in the position of the United States, that our treaty with Hawaii did not entitle those nations to equal privileges, in regard to imports, with those thus obtained by the United States, the privileges granted to the United States being in consideration of concessions by the United States, which Germany and Great Britain not only did not offer to make, but, in the nature of things, could not make.

Mr. President, if the applicability of these statements of fact, made by the distinguished author of this opinion, will be noted when we direct our attention to the proposition that in the very convention—the international sugar conference of 1888—in which this nation participated it was positively agreed, and it was understood and treated as a fact, to use the language of the opinion, that the export sugar bounty of one country might be counteracted by the import sugar duty of another. I might remark that otherwise we would put ourselves in the position of permitting legislation hostile to ourselves under the pretext that equality and uniformity prohibited our defending ourselves by similar legislation, and thus placed us upon a common plane with other nations coming under the most-favored-nation clause.

I have come here entirely unprepared to discuss this question, and we have no time to discuss it. It is a very interesting topic, and one which I should like very much to consider at more length; but I forbear.

The Senator from Wisconsin [Mr. SPOONER] calls my attention to an extract from Lawrence's Wheaton, page 493, as follows:

From excessive caution, the limitation "gratuitous" or kindred limitations are sometimes inserted before "favored nation" in recent treaties. But this does not derogate in any way from the position that privileges transferable under the term "favored nation" are only such privileges as are gratuitous.

Mr. President, our relations with Germany, while of course friendly, nevertheless are such as to disclose to the world at large, and particularly to us, who are the parties affected, a series of discriminations, against which our people have long protested, and usually in vain.

I have before me an article prepared by some of those who have taken an interest in this matter. I have no intention of reading it now, but I shall ask leave to insert it as a part of my remarks, as it is largely historical in character, and calls attention to the discriminations to which I allude.

The paper referred to is as follows:

Mr. De Kay, our consul-general at Berlin, under date of October 5, 1895, explains the situation. He informs us that the forces of agriculture in Prussia are thoroughly organized there as against commerce and manufactures; that chambers of agriculture are organized by law all over Prussia, with banks that advance on crops, rescuing farmers from the rapacity of middle men. This is the radical movement that overrides government check and conservatism. It even asks the abrogation of treaties containing the most forward national clause. It has obtained the exclusion of American cattle and of salt meats, and has secured a 100 per cent increase in the export bounty on sugar. Mr. De Kay says: "The United States must look for a strong effort on the part of all conservative, provincial, and reactionary elements of north Germany to keep out American products."

That this sentiment likewise exists in France and Austria, in fact, all over the Continent, even if in lesser degree, admits of no doubt. And in this we find the kernel contained in recent foreign protests against some one or more of the provisions of our pending tariff bill. Whether these protests are a bold, bold bluff intended to alarm the supersensitive and appeal to our cupidity at the expense of national honor, or whether they contain the seed of commercial warfare, remains to be seen.

And just here comes in the bitter history quite pertinent to the situation—embracing ten to twelve long years of persistent diplomatic effort on the part of the United States to secure from these protesting powers fair treatment for our exports, shut out by some of them by prohibitive edicts of a

discriminating character, founded on false pretext, and rendered more odious by delay and neglect, which have destroyed millions of our export trade. In fact, it forms the opening chapter in the history of these protests, and the burden has fallen on the great West.

As laying a basis for that chapter, we will quote from Acting Secretary of State, Mr. Wharton, Senate Executive Document No. 119, page 24 (June, 1892), Fifty-second Congress, first session:

"For ten years previous to the passage of the tariff act of October 1, 1890, American pork had been the object of the most unjust discrimination in Europe, and on account of the prohibitive or severely restricted laws it has been practically excluded from most of the countries of the Continent. Notwithstanding the earnest and repeated efforts of our diplomatic representatives to secure a repeal or modification of these unjust laws at the date of the passage of the tariff act of 1890, they remained in full force, to the great detriment of our export trade in this important agricultural product."

The following figures, showing the decrease of our exports of bacon, hams, and pork to Germany and France, will fully support the above statement:

Year.	Germany.	France.
1865	$67,106	$20,481
1871	221,862	267,814
1877	2,404,784	2,056,280
1881	3,203,725	4,987,073
1883	1,577,308	40,100
1890	235,572	24,447
1896	854,457	341,806

Ever since 1881 has our State Department and our ministers at Paris, Berlin, Madrid, and Vienna been engaged in persistent efforts to secure a revocation of these commercial edicts which discriminated solely against the products of the United States. The records of Congress and the archives of the State Department are full of correspondence and reports upon this subject.

In May, 1890, President Harrison, in reply to a resolution of the House of Representatives, transmitted a voluminous report from Mr. Blaine, then Secretary of State, in which was set forth the changes in tariff schedules made by certain foreign countries since 1879, and in which was embraced a statement of the edicts issued abroad, prohibiting, obstructing, or interfering with the importation and sale of our products, which clearly showed how the United States were discriminated against. The nations enumerated as having seriously increased their tariff duties on meats and breadstuffs were Austria-Hungary, Belgium, France, Germany, Italy, Portugal, Spain, Switzerland, Argentina, Brazil, Canada, and Mexico. (House Executive Document No. 362, Fifty-first Congress, first session.)

That report also stated that our pork and lard had been prohibited by Austria-Hungary since March 10, 1881; that Hungary had prohibited our canned meats in 1884; that France had prohibited our pork February 18, 1881, and our lard was then subject to rigid inspection; that Germany had prohibited our salted pork since June 25, 1880, and our potatoes since 1875. And it appears from the report that February 2, 1883, the Bundesrath prohibited American hog meats of all kinds, which included our hams and bacon; that Italy had prohibited our pork since February 20, 1879; that Spain prohibited our potatoes and had subjected our pork and lard to rigid inspection; that the Ottoman Empire had prohibited our pork since 1881. Mr. Blaine's report embraced several separate and distinct documents which had thereto in some form and at former periods been transmitted to Congress, to wit:

First. An able report from Mr. Scanlan, April 18, 1881, as Chief of the Bureau of Statistics to the State Department, concerning the alleged unwholesomeness of our meat products.

Second. House Executive Document 209, Forty-seventh Congress, first session, embracing the voluminous diplomatic correspondence on our part between August 30, 1880, and March 30, 1882, to obtain a revocation of foreign edicts discriminating against and prohibiting entry of our meat exports.

Third: House Executive Document 70, Forty-eighth Congress, first session, covering like and additional efforts between November, 1882, and October, 1883, to which was attached House Executive Document 106, Forty-eighth Congress, first session, embracing a message of the President and a voluminous and able report of a special commission appointed by the President, September, 1883, to investigate the wholesomeness of our meats.

Fourth. Senate Report 345, Forty-eighth, first, being a report on a bill from Foreign Relations to meet the conditions abroad; and

Fifth. Senate Executive Document 114, Fiftieth Congress, first session.

It having been asserted in some quarters that the present or existing prohibitous edicts, exactions, or regulations in Germany and France—sugar-producing nations—are the result of the one-tenth cent per pound "differential" duty imposed by the United States on sugar from bounty-paying nations, and Germany's recent protest being based upon that, it becomes quite important to show that this is not true, and for the very good reason that the conditions existed abroad long before the sugar differential or even export sugar had become a factor in the German or French commercial calculations.

As far back as 1880 and 1881 there was no differential duty on foreign sugar, but there were the same discriminations or prohibitions against the United States by Germany and France that now exist. Mr. Blaine's report (supra) clearly discloses that for years there was a made-up case for mere industrial advantage and profit.

The excuse or pretext for the action taken by Germany then was that our meats were not wholesome, and while France and other nations at first advanced that as the reason, France at a later period frankly avowed that she was moved by an economic policy to protect her own farms.

To overcome the sanitary objection, which the United States assumed was honestly put forth, our State Department ordered the Scanlan investigation of April 18, 1881, in which the following conclusions of fact were arrived at:

First. That the swine of America were of the best and purest breeds, fattened on the best of material.

Second. That reports set afloat in Europe of disease in our hog-export products were gross exaggerations.

Third. That the percentages of death among American swine were no greater than among European swine from similar and like causes.

Fourth. That American hogs dying of the cholera or from other causes could not by any possibility pass the severe ordeal and inspection to which hogs destined for export were subjected, and that no possible art of the curer could convert such animals into meat that could pass inspection.

Fifth. That merchantable lard could not be produced from diseased dead animals. That such product from diseased hogs was distinctly grouped and classed, and went to soap manufacturers, its odor and color preventing its sale.

Sixth. That trichina was not as prevalent in America as in Europe, and that only 2 deaths in 40,000 had occurred from it, and that they were produced by eating meat raw and uncooked.

In conclusion Mr. Scanlan cited the Belgian minister of the interior of April, 1880, in favor of our export-pork product being wholesome, in which eminent French authorities agreed.

This able, exhaustive, and convincing report was sent abroad and was intended to remove the supposedly honest objection raised to our meat exports. Tedious diplomatic controversy ensued with result, and in February, 1884, the President transmitted another voluminous report—that made by his special commission of five experts, appointed September, 1883, to examine the subject. Among other things, that report stated that trichina had been the reason advanced by foreign nations for discriminations and edicts against our meats; that while other reasons might have been advanced, none had sufficient foundation to merit the test of even a superficial examination; that trichina was as prevalent in Germany, France, and in other nations as in the United States.

The report also stated that in 1881 in Germany the microscopists were not only found notoriously incompetent, but their instruments too filthy for use; that only one case had occurred in France between 1876 and 1881, during which time 200,000,000 pounds of American pork was consumed, and that had proceeded from a French hog. See, in corroboration of this, Mr. Sargent's letter to Secretary Frelinghuysen from Berlin, January 1, 1883. The report likewise pointed out that it was a common practice in European countries for the poorer classes to eat pork raw or uncooked, and that the reports of Drs. Virchow and Hertwig at Berlin had asserted positively that no case of trichina had ever been traced to American pork.

This report was likewise sent abroad as additional and confirmatory evidence of our contention. About this time, 1883-84, there was published in France the views of the French Academy of Medicine to the effect that the importation of foreign pork might safely be "fearlessly authorized." These reports seemed to have caused France, if not Germany, to shift her position, and she thereupon concluded to place her action upon economic ground as a policy favorable to her agriculturists. In other words, the mask was thrown down, her false pretenses were fully revealed; in fact, M. Flourens, a French deputy, frankly avowed later on that European countries did not consider the exclusion of a particular import as unfriendly, but "rather as a domestic question." To same effect see letter of Mr. Sargent to Mr. Frelinghuysen, January 1, 1883, House Executive Document 70, Forty-eighth Congress, first session.

The bad faith of Germany and France had now become so patent to our Congress that in reply to the Senate Anthony resolution of January 22, 1884, the Senate Committee on Foreign Relations reported a bill to meet the conditions. That bill recommended:

First. Inspection of our meats at points of export.

Second. Exclusion by proclamation of the Executive of the products of such foreign nations as discriminated against the United States.

Third. Prohibition of the importation of adulterated food or wines. No action was ever taken on that measure, although there was a very spicy debate in the Senate over the Anthony resolution. It would appear that France, previous to the introduction of this bill, November 27, 1883, had agreed to suspend its edict, but revoked its action in December, offering a bill still later in the Deputies allowing our meats to come in at three ports under certain restrictions, evidently fearing favorable action on our Senate bill of 1884. Our Congress adjourned in July, 1884, without action, and the wily French Deputies adjourned in August following without acting on its bill.

Diplomatic efforts were renewed and were persistently continued down to 1890, France imposing double the duty on arms from the United States that she did on those from England, and double the duty on our alcohol that she did on that product from Germany.

In 1890 the late Secretary Rusk called the attention of Mr. Blaine to the prohibitory restrictions and regulations which continued to be enforced against our meat exports by Germany and France, and also to the quarantine regulations of Great Britain. In the same year we find, from Mr. Reid's Paris letter of July 4, that France, feeling the unstableness of the position she occupied, was taking new ground. She wanted equivalents in return for a revocation of her unjust edict.

The transgressor wanted pay for a violation of the ordinary rules of commercial honesty and fair dealing. Mr. Reid suggested that France desired the United States to put works of art on the free list, lower duties on French fruits, and less stringent requirements concerning Paris invoices. In reply to that Mr. Reid showed that by the McKinley bill the House had removed the 30 per cent duty on pictures and statues, but as France had made no move to meet such a concession, the Senate had reimposed it, and he then pointed out that France was discriminating against the United States and in favor of Germany, France, and Italy, and insisted that the French repeal their edict against our pork "as an act of marked justice too long deferred," and concluded by suggesting that if longer persisted in the United States might retaliate on French wines, and he insisted that it rested with France to take the first step, that she was levying duties to the prohibitive point, while the United States was simply placing high, but neither prohibitive nor discriminating duties, our high duties being no more objectionable than the very high duties of France.

Without some such efficient head as exists in Germany, France, and other European nations over the subject of foreign commerce, it is quite impossible to discover to what extent the products of the United States are discriminated against, nor by what open or, which is the more likely, covert methods. Germany pursues her warfare on the United States in very many instances other than as relates to pork and cattle. To shut out our canned meats they have been classed by a mere technicality as "ironware," and dutied as such at the prohibitive rate of $5.72 per 220 pounds; our shredded codfish in wooden boxes has been classed in the same way as "wooden ware," and dutied very high under that classification; our sugar-cured hams—covered, as here, in linen cloth—have been classed as "fine linen" and subjected to a duty of over $19 per 220 pounds, which is of course prohibitive, while our exportation of brawn—or beef and pork cooked together and salted, making a cheap and wholesome food—was dutied at first at 2 cents a pound in cans, but as our trade increased a duty of 7½ cents was imposed, it being suddenly found to be a "delicacy," and taxed as such. Our insurance companies have been driven from Germany after having been allowed to establish there and invest large sums. Our flour trade decreases because Germany makes a favorable commercial treaty with Russia.

Upon such a record as this Germany files a protest against a proposed differential on her sugar, advanced to meet her somewhat new industrial policy known as export bounties.

But the record is not complete. We have now to state what followed this legislation, and it will open up what may properly be called the second chapter in the history of our commercial relations with Germany. That chapter will bear upon the good faith of Germany, the validity of her protests, the cause of the revocation of her edict against our pork, bacon, and sausages, as it will likewise develop the real object of her recent protest. The American people are entitled to know all the facts, and as it especially concerns the great West, those who represent that section are deeply concerned.

The continued enforcement of the discriminations abroad against our meats, our diplomatic effort to remove the same, and the discussions in this country finally induced our Congress to enact a meat-inspection law, which was approved August 30, 1890, and known as chapter 839 in 26 Stat. L. That

law provides for an inspection by the Secretary of Agriculture of salted pork and bacon intended for export, etc. This was followed by the passage of chapter 555, of 26 Stat L., approved March 3, 1891, which enforces and extends the prior enactment. It provides for an inspection here of live cattle, hogs, and their carcasses, and products for export. These laws have been rigorously enforced. Section 5 of the act of August 30, 1890, is a very important one when enforced against an offending nation which shall violate the laws of commercial comity. It provides that—

"Whenever the President shall be satisfied that unjust discriminations are made by or under the authority of any foreign state against the importation to or sale in such foreign state of any product of the United States, he may direct that such products of such foreign state so discriminating against any product of the United States as he may deem proper shall be excluded from importation to the United States."

That law also contains a section (4) empowering the President to suspend the importation of adulterated products of food or drink deleterious to the public health. The statutes remain in full force.

Then we had what is known as the "free" sugar, bounty, and section 33, or "reciprocity," provisions of the McKinley tariff law of October 1, 1890. By those sugar was made conditionally free, with a duty of five-tenths of a cent on sugar above 16 Dutch standard, and six-tenths of a cent if from any country that paid an export bounty. Germany was paying an export bounty of from 13 to 27 cents per 100 pounds and France and Austria-Hungary equally as much or more. This made a "differential" on refined of one-tenth of a cent—not on sugar from Germany alone, but on such sugar from all bounty-paying nations, and hence it was hardly a discrimination against Germany. It was general and not special, and it left it in the power of nations paying such a bounty to relieve themselves of the "differential" on their sugar at any time by their own voluntary withdrawal of their export bounties. Nor did Germany ever complain of the one-tenth differential on sugar in the McKinley law as discriminating legislation.

Now, mark what followed our legislation. Because of our meat-inspection act, the power of the President to shut out products of nations discriminating against the United States, and because also of his power under section 3 of the McKinley Act to duty sugar and other articles, Germany, France, Austria-Hungary, Spain, Brazil, and other countries hastened to enter into reciprocity agreements with this country. The statutes mentioned clothed this Government with power to do a vast deal more than ten or twelve years of diplomacy.

As early as August 22, 1891, Mumm, the chargé d'affaires of Germany to the United States, addressed a letter at Saratoga to Mr. Foster, our plenipotentiary extraordinary then also at Saratoga, stating that—

"Inasmuch as the inspection of meat intended for interstate commerce in North America and for exportation to foreign countries had been made compulsory by the act of March 3, 1891, * * * there was no longer any cause for maintaining in force the prohibition * * * * of the importation of hogs, pork, and sausages of American origin," etc.

And he desired to be advised when the act, etc., would take effect, promising that Germany would thereupon abolish the prohibition. And he then proceeded to state that his declaration was based upon the supposition that if the German edict was removed, the President of the United States would "no longer have any occasion for the exercise, as regards the German Empire, of the discretionary powers conferred upon him" by section 3 of the McKinley Act nor in section 5 of the meat-inspection law of 1890. And he further stated that Germany had the greater reason for his assumption—

"Since it was prepared to grant to the United States the same reductions in customs duties on agricultural products that have been granted by Germany to Austria-Hungary."

His letter closed with the somewhat anxious desire to ascertain the disposition of the United States in regard to the enforcement of section 3 of the McKinley Act and section 5 of our meat-inspection law.

Mr. Foster answered him the same day to this effect, and we beg that these letters be carefully read. Mr. Foster stated that our meat-inspection law had been in operation several weeks, and he assured him, by direction of the President, that Germany's revocation of its meat edict would remove the occasion for the exercise by the President, as against the German Empire, of the power conferred upon him by section 5 of the meat-inspection law. * * * And he then said that the President accepted the proposition of Germany to grant to our agricultural products the same tariff reductions as Germany granted to Austria, as a due reciprocity for the action of Congress contained in section 3 of the McKinley law; and that when the President should be advised of such reductions, he would give the necessary orders to secure the continued free admission into the United States of the articles mentioned in said section 3.

On the 10th of December following (1891) Mumm addressed Secretary Blaine, inclosing him a table showing the tariff concessions to Austria by Germany, which he said, "in accordance with my declaration made on the occasion of the removal of our decree forbidding the importation of swine, pork, and sausages of American origin, likewise accrue to the United States." And on this basis the proclamation of the President was issued February 1, 1892.

In other words, we got the concession of a reduction in tariff duties on certain specified articles in return for granting Germany the continued admission free of sugar and other articles mentioned in section 3 of the McKinley Act. (See Senate Executive Document 119, Fifty-second Congress, first session, pages 108–110, 111.)

Is there any doubt whatever that there were here two separate and distinct propositions accepted by Germany, the second one being that if the President would not enforce section 5 of our meat-inspection law, Germany would, and because of that inspection act, withdraw its meat prohibition covering our pork, hogs, and sausages? She maintained her own costly inspection service, which was a severe burden on our exporters, as will appear from our diplomatic correspondence on that subject, commencing January 29, 1894; and in addition to which our canned beef was restricted. (House Executive Document 1, part 1, Fifty-third Congress, third session, pages 226–228.)

As Germany had her own inspection, and as trichina had disappeared entirely, our Government sought early in January, 1894, to have Germany dispense with our law, which she refused to do.

And now what followed. The McKinley law (section 3) being repealed, of course Germany might withdraw her tariff reductions; they probably went down without action by the repeal of section 3. Having withdrawn her meat edict, in evident fear that the President would enforce section 5 of the act of August 30, 1890, and because of our inspection of our meats, she had no excuse to again enforce it. Some new device to discriminate became necessary.

Note what followed. Pending the enactment of the Wilson bill, and before its passage, August 28, 1894, and on the 10th of July, 1894, we find Baron Saurma, of the German embassy in Washington, "protesting" (sic) against the proposed differential duty of one-tenth cent on all sugar when from all bounty-paying countries, in the Wilson bill. (Senate Executive Document 58, Fifty-third Congress, third session, page 14; House Executive Document 1, part 1, Fifty-third Congress, third session, page 394.)

His "memorandum" of protest over a month prior to the enactment of the legislation complained of placed the objection on the ground that our proposed legislation was a discrimination against German goods; that it was violative of treaty stipulations between Germany and the United States; that the export bounty paid by Germany on her sugar was a purely domestic affair; that it would drive out German sugar from the American market; that it would fall more heavily on Germany, which proposed to abolish her bounty in 1897, because other nations paid more bounty; that public opinion in Germany understood that it was agreed (Mumm) August 22, 1891, that the United States had guaranteed exemption to Germany from duty on sugar in return for the concession of the conventional duties on American agricultural products and the removal of the restrictions on the importations of "American swine."

He concluded by expressing a doubt whether Germany, if our one-tenth differential was adopted, would be able to withstand the demand for retaliation. In other words, Mumm has conceded, August 22, 1891, that our meat-inspection law, when in force, had removed the further continuation of the German edict against our pork, etc., and hence some new device became necessary; some new scheme must be devised.

Thus matters appear to have rested until August 28, 1894, the day of the final passage of the Wilson bill, on which day Saurma, the German ambassador here, addressed our Secretary of State a formal protest, calling his attention to the memorandum of July 16, 1894, and stating that Germany considered the one-tenth differential on all sugar from all bounty-paying nations as not harmonious with existing stipulations and those tendencies which the exchange of notes August 22, 1891 (from Saratoga), had called forth. He insisted that an export bounty on sugar was "a domestic affair," and that our legislation exposed both nations to the adoption of arbitrary duties.

Mr. Gresham thereupon and on the 12th of October, 1894, addressed Mr. Cleveland a letter on the subject. He sent Germany's protest on the salt tax about this time to the Attorney-General for an opinion, but it seems that he preferred to handle the sugar question himself.

On the 27th of October, 1894, the German chancellor issued his edict prohibiting our living beef cattle and fresh beef upon the sanitary (sic) ground that Texas fever had been discovered. Mr. Gresham cabled our minister, Mr. Runyon, the same day to enter vigorous protest and to say that such action, if continued, would be considered unfriendly and retaliatory. In reply V. Marshall, of the German foreign office, sought to elude Germany's responsibility for the edict by saying that it was issued at the instance of the Prussian minister of agriculture. Further diplomatic correspondence ensued between this country and Germany, running down to October 10, 1896, Mr. Dabney, of our Agricultural Department, and Minister Uhl furnishing unanswerable facts and arguments, August 22 and October 10, 1896, in favor of the revocation of this edict.

Mr. Dabney took the ground that while nations had a perfect right to protect their cattle industry, we had a right to protest against prohibitions not necessary for sanitary purposes, and he proceeded scientifically to point out the difference between Texas fever here and foot-and-mouth disease, pleuro-pneumonia, and rinderpest abroad; that those diseases had been admitted to exist abroad and that we had interdicted the importation of cattle from nations where those diseases admittedly existed; that those diseases did not exist here, were contagious and disastrous; that we had eradicated pleuro-pneumonia in 1892, and no case had existed sinc . He exposed the ignorance of foreign veterinarians most effectually concerning this disease, as he also did in regard to Texas fever. He said there was no evidence existing that Texas fever could be communicated by our cattle to the cattle of Europe or that it would spread from animal to animal even if it were carried abroad.

The experience of this country is altogether against that view. The cattle leaving a Texas-fever-infected district soon lose the power to disseminate it, etc. And he also pointed to the fact that "not one animal in any of the foreign countries to which our cattle have been shipped—and several millions have been exported within recent years—has ever been infected with Texas fever," as sufficient evidence that our regulations and inspection were intelligently conceived and honestly enforced. He further said that it was certainly remarkable for a government to prohibit one of the principle articles of export of a friendly nation on the ground that such action was necessary to prevent the introduction of contagion when the contagion mentioned had never been carried by the prohibited articles either in this or any other country. He likewise pointed to the fact that all our dressed export beef was inspected and certified, and that the United States had no objection to requiring it to be.

Mr. Uhl said that our objection went on the ground of the total exclusion of our cattle and fresh beef, which was not necessary from a sanitary standpoint; that no claim was made that any disease or unhealthy fresh beef had been sent into Germany. And so the case stands to-day.

Fourteen days prior to the issuance of this meat edict (October 27, 1894), to wit, October 12, Mr. Gresham gave Mr. Cleveland his views of the protest of Germany against the one-tenth on sugar. He conceded that Germany had not protested against the one-tenth in the McKinley law, but argued that the probable reason was found in its insignificance, as it then applied only to sugar above 16 Dutch standard, while under the Wilson law the one-tenth applied to all sugars.

On the point as to whether the one-tenth violated treaty rights, i. e., our treaty of 1828 with Prussia, he noted the fact that that treaty was with Prussia only and not with "the entire German Empire." He took the ground that because our legislation ran against all nations paying an export bounty, and not Germany alone, did not relieve it from the objection that it was a discrimination. Then whether, because Germany gave an export bounty, we had a right to meet it with an extra duty, he likewise stood for Germany's contention, to wit, that it was purely a domestic affair. He said:

"The payment by a country of a bounty on the exportation of an article of its produce or manufacture for the purpose of encouraging a domestic industry can no more be considered as a discrimination than can the imposition of a protective or practically prohibitive duty on the importation of an article—the produce or manufacture of a foreign country for the same purpose—be so considered. The two measures are the same in principle. The question as to which shall be adopted is a matter of domestic policy. * * * Both are alike intended, whatever their effect, to create a national advantage."

He concluded that the export bounty of Germany was not a discrimination, and that our one-tenth to meet that bounty was a discrimination. It was a very good defense for the German, and he soon availed himself of it. The only point on which the late Secretary stood with the United States in this matter was that our treaty of 1828 ran to Prussia only, and he therefore assumed that only sugar from Prussia came within the protest. (House Executive Document 1, part 1, pages 236–239, Fifty-third Congress, third session; Senate Executive Document 58, page 19, Fifty-third Congress, third session; Miscellaneous Document 52, Fifty-third Congress, third session.)

October 13, Germany protested against our salt duty, on which our new Secretary's (Mr. Olney) view differs from that of Mr. Gresham. (Senate Miscellaneous Document 52, Fifty-third Congress, third session; House Document 1, Fifty-fourth Congress, second session, pages 208, 209.)

Thus matters rested until October 27, 1894, when the German chancellor,

with Mr. Gresham's letter before him admitting our one-tenth to be a discrimination, selected our live cattle and fresh beef for edict. (House Executive Document 1, part 1, page 231, Fifty-third Congress, third session.) He based this prohibition on sanitary grounds, stating that in two cargoes of our cattle Texas fever had been found. All diplomatic efforts to remove that edict have been fruitless, as were those regarding pork for ten years. Our inspection laws run to all diseases. In 1895 our Secretary of Agriculture said that "Texas fever was the only disease thus far absolutely controlled by stock-yard inspection." And we have that as well as vessel inspection.

This last decree excludes not only all live American beef cattle, without exception, qualification, or discrimination, or reference to condition, but all American fresh beef. It is said to be doubtful whether Texas fever can cross the ocean, and we certainly have very rigid inspection laws. In 1894, the year the edict was issued, the United States exported 363,535 cattle, only 184 being rejected here after inspection, and all those sent abroad certified to be free from disease. (Report of Secretary of Agriculture, 1895, page 7.)

The late Senator Logan's prophecy of 1884 regarding Germany, that she would discriminate regardless of an inspection law, has thus been verified. She disclaims to have retaliated because of the one-tenth on sugar from all bounty-paying nations, but her false pretense is too transparent to deceive anybody.

And thus we find Germany discriminating against our meat products ever since 1881, with very slight interruption during the time the McKinley Act was in force, imposing her restrictions even to-day most rigorously on our live cattle and fresh beef, and in many other ways burdening our products by most frivolous technicalities, impudently filing a protest if we reimpose a "differential" on the sugar of all nations which pay an export bounty. Nothing could more forcibly attest the diplomatic assurance of a nation which put upon the United States millions of loss between 1881 and 1892, when, for fear of an enforcement of our laws and the advantage that would result to other nations at her expense under the reciprocity clause, she hastened to cover.

It may be unfortunate that the United States was blessed with a Secretary of State in October, 1894, whose opinions appear to have furnished Germany ground upon which to temporarily stand, and who so far impressed his views upon Mr. Cleveland as to induce him, in his message of December 3, 1894, to recommend the repeal of the one-tenth differential, because it gave Germany assurance that it had the State Department and the Executive in accord with its contention.

And now what is the real issue in this controversy? Simply this: Germany claims—

First. That we have a treaty under the most-favored-nation clause in which our one-tenth differential on sugar from all bounty-paying nations is a discrimination.

Second. That her export bounty on sugar is a "purely domestic affair."

Third. That the one-tenth will subject her to great loss, drive German sugar out of our market.

The answer to the first objection is, that our treaty runs to Prussia only—not to the whole German Empire; that Prussia having been absorbed by the Empire since 1828, it is by no means clear that the provisions of the treaty are not a dead letter. (See Treaties and Conventions, pages 916, 918, 1234-1236; and Secretary Gresham's letter of October 12, 1893; House Document No. 1, Fifty-fourth Congress, second session, page 209. Olney's letter.

As to the loss anticipated by Germany, the figures are at hand to prove the reverse of her expressed fear on that score.

1895—Beet sugar under 16 Dutch standard from Germany, fiscal year, value	$6,090,293
1896—Beet sugar under 16 Dutch standard from Germany, fiscal year, value	10,404,172

Showing an increase of over 66 per cent.

Congress may as well face the issue involved in this claim and once for all determine what its policy is and ought to be toward sugar-producing nations which by this somewhat new export-bounty policy are seeking foreign markets for their products.

Hence such a bounty is not a "purely domestic affair."

These export bounties have nearly driven sugar production in many of the East and in some of the West Indies to the wall, which shows that these bounties are something more than a domestic affair. First levying prohibitive duties on sugars to keep her own market, Germany, France, and Austria turn about and pay an export bounty to gain ours, as against our own industry, and thus break it down; and they coolly turn to us and say: "Our policy is purely a domestic affair, of which you may not complain and which you may not countervail." This can hardly be called diplomacy; it is impudence, an assault upon ordinary intelligence.

Mr. Gresham evidently confounded a bounty paid to home producers to encourage the upbuilding of a new industry with an export bounty which is paid to force goods into new markets, even though the effect is to reduce protection and strike a sinister blow at a home industry. An export bounty addresses itself to commerce, and that always concerns other nations. If Germany may give 27 to 54 cents per 100 pounds export bounty on her sugar, she can give 2 or 5 cents and thus destroy our sugar industry. It is a somewhat modern industrial commercial scheme in which a principle is at stake. It is a new diplomatic and legislative device to gain an unfair advantage, and great danger exists in conceding its validity.

Besides all this, Germany does not come into court with her protest with clean hands. She has interdicted our cattle and fresh meats, and for too many years she prohibited our pork products.

Her protest not only deserves no consideration whatever, but to countervail her policy we should not only insist on enough differential to meet her double export bounty, but the President should meet her last meat edict with an exercise of the power which he possesses under sections 4 and 5 of the act of August 30, 1890. It is more than time for the United States to act, and in such a manner as to leave no room for doubt as to her future policy. It has become a matter in which commercial honor is involved. Not a pound of German sugar should come into this country until Germany removes her meat edict! And as was suggested by the late Senator Logan, and more recently by Secretary Morton—

"Reciprocal certification of the chemical purity of wines exported from Germany, France, etc., to the United States may some time be demanded from those Governments as a sanitary shield to American consumers, for certainly American meats are as wholesome as foreign wines."—*Report Secretary of Agriculture, 1895*, page 7.

And why not? As the Secretary said in his Year Book for 1894, page 34, which was but a repetition of the remarks of his predecessors:

"If it is wisdom on the part of foreign nations to demand inspection and certificates for sanitary reasons by the American Government of its exports to them, and wise for us to comply with that demand, would it not be equally wise, upon sanitary grounds, for the United States to require governmental inspection and certification of all foreign nations for exports into the United States intended for the consumption of its citizens?"

Mr. WHITE. I do not concur in any view which will deprive this Republic of the power to defend herself from such legislation as she may conceive interferes with the welfare of her citizens. Conceding, as we do, the right of Germany to legislate, we have the right to legislate regarding tariff. If Germany has the right by the imposition of such a bounty or tax, or whatever you may call it, as she has levied in the case of sugar, to place her people in a position of superior advantage to ours, we have a right to so legislate as to equalize, and she can not call it even retaliatory.

I am not talking about the policy of this tax at all. I voted against the sugar-schedule tax, and I shall do it again, but I do not desire to put myself in a position of conceding our inability to do what we may see fit to do if we think that it is wise in any case to retaliate—and whether we think so or not must depend upon the policy of the dominant party—but as to the existence of our right to do it, without criticism as to the morality of the affair, I have but little question.

As part of my remarks, Mr. President, I shall add as an appendix, from the last consular report, No. 201 of the current volume, three short articles, entitled "The beet-sugar crisis in Europe," which illustrate the necessity of such legislation upon the theory of the framing of this bill as that contemplated. I do not wish to take any time or to further discuss this most interesting topic.

APPENDIX.

THE BEET-SUGAR CRISIS IN EUROPE.

PROPOSED LEGISLATION IN BELGIUM.

The Belgian sugar journal, La Sucrerie Belge, publishes in its March number a petition to the Belgian Parliament, signed by all the sugar manufacturers of this country, requesting certain modifications in the legislation now existing relative to the sugar industry. This petition was adopted at a meeting of the trade February 24 last. It presents a review not only of the situation of the sugar interests in Belgium, but also of their general condition in the other European countries of production, and for that reason, with due consideration for its authority, is of considerable importance. A textual translation is as follows:

BRUSSELS, *February 20, 1897.*

To the president and members of the Chamber of Representatives at Brussels:

The undersigned, manufacturers of beet-root sugar, have the honor to set forth to you that the principal European countries producing sugar, according to the importance of their approximate production of this year, rank as follows:

	Tons.		Tons.
Germany	1,850,000	Russia	700,000
Austria	1,000,000	Belgium	300,000
France	750,000	Holland	150,000

From the fifth place, which it occupies in this table, Belgium passes to the first, if we take as basis of estimate the relation between production on the one hand and population, territorial area, and quantity exported; this latter, indeed, exceeding five-sixths of the total quantity produced.

The existence of the Belgian sugar industry therefore depends essentially on the international sugar market, and is much more than any other affected by this latter's variations. The decisive elements of international competition are the agricultural system—factor, the price of raw material; the manufacturing system—factor, the cost of extraction; the legislative system—factor, fiscal favors; these three factors being furthermore closely conjoined by rapid and inevitable reaction.

While, however, the first two factors are capable of but slow development, and can, for this reason, introduce into the fixed equilibrium only gradual modifications, the third can cause sudden and vast disturbances. Recent events have shown the truth of this statement, and the results are so unexpected and serious as to justify the undersigned in setting forth to the public the extent and the causes of the disaster which at this moment is threatening the Belgian sugar industry and Belgian agriculture. The fiscal system applied to sugar factories in force in the various countries mentioned is chiefly established by the following laws: Germany, law of May 31, 1891; Austria, law of May 20, 1888; France, law of July 29, 1884; Russia, law of July 13, 1891; Belgium, law of April 16, 1887; Holland, law of April 15, 1891, and preceding legislation.

Since the dates above mentioned, the basis established in these various countries had undergone only secondary modifications, rather local than international, and generally of a nature to diminish the fiscal favors instead of increasing them. From the point of view of competition among the countries of Europe, a sort of peaceful stability was thus acquired, resulting in a corresponding equilibrium in the interior relations of each country between the rural and industrial systems, as well as between the cultivator and owner.

This situation, slowly established, has, during the last year, suffered the most serious disturbances. Important modifications have been adopted by all our competitors, Russia excepted; the latter, enjoying a special system, suffices almost entirely for itself without having much to export; it is, therefore, not necessary to give it special consideration.

The modifications to which we allude are the following: In Germany the law of May 27, 1896, increased the export bounties in the following proportions: (1) For raw sugar, from 30 cents to 60 cents per 220 pounds; (2) for white sugar, from 41 cents to 72 cents; (3) for refined sugar, from 48 cents to 80 cents. This is not meant to interfere with other measures, notably the imposition of supplementary taxes, and the provision by which a factory, under the penalty of having its proportion of export bounties reduced, is, so to speak, obliged to increase its output or at least to maintain it at the same level, even under the most unfavorable circumstances.

Immediately afterwards Austria, by the law of July 7, 1896, took corresponding protective and defensive measures, especially increasing from about $2,000,000 to $3,000,000 the amount of public funds destined for export bounties.

In France the Chamber of Deputies has just voted export bounties even more important than those of other countries, amounting to—(1) raw sugar, 68 cents per 220 pounds; (2) white sugar, 77 cents; (3) refined sugar, 87 cents. All these export bounties are independent of the interior advantages accorded in Germany and Austria, in various forms less tangible, although not less real, and in France in the form of bonuses upon the manufacture, which, in the official French statistics, appear for sums varying from $1.16 to $1.54½ per 220 pounds, and which may be normally fixed at $1.35 per 220 pounds.

Holland, in turn, has just revised its system, giving from the beginning to its producers a bounty of $1.06½ per 220 pounds on raw sugars.

It is an economic war to the finish between rival nations, each desiring the ruin of the others, which these measures unchain on the sugar interests of Europe.

The effect was, therefore, immediate. The reaction of these new bounties on the international market was extraordinarily strong, surpassing all anticipations. From the time of the announcement of the intention of the German

Government, quotations were on the decline. After the adoption of the law the bounties immediately increased in Austria, and a law of even a more aggravated nature was proposed in France.

All these facts succeeded in disturbing the confidence of holders and merchants, and the scare became such that quotations fell from $6.17 in April, 1896, to below $4.25 in October last per 220 pounds. In the midst of this international conflict, while our competitors are everywhere being provided with new weapons, the situation in Belgium is, by the force of events, becoming modified in an entirely different direction. It is well known that the Belgian fiscal system gives to producers the enjoyment of certain bonuses on manufacture under the form of sugar free from duty. The progress made in the methods of cultivation and manufacture has always compensated the regular increase of the amount taken into account, to such an extent that the quantity of sugar free of taxation may still to-day be estimated at an average of 18 per cent of the legal production. The tax being $8.69 per 220 pounds, the theoretical value of this benefit may be estimated at $1.32 per 220 pounds of sugar produced.

If this protection were real, it would suffice to counterbalance the advantages given by other countries, but the reality is much less than it seems. In fact, by reason of certain circumstances about to be explained, this amount suffers two important reductions:

(1) The premium on duties, according to which the commercial value of the bonuses is fixed, destroys a portion of them. This premium, very variable, remaining quoted in these later years at 10 to 15 per cent, has recently risen much higher. It has reached the quotation of 40 per cent—a point at which it approximately remains at this moment.

(2) The payment to be made to the treasury and which, in the unanimous opinion of those interested, must be made in the future unconditionally. If we consider as the basis on one hand a production of 200,000 tons taken into account, and on the other hand a variation in the payment of $1,158,000, the amount imposed upon manufacturers per 220 pounds of sugar taken into account is 58 cents, or, that is to say, 49 cents for every 220 pounds of the real production.

It must be anticipated, without doubt, that the inauguration of this mode of payment will result in a certain decrease in the rate of the premium on the duties, but the situation of the sugar market for consumption is so burdened that the payment unconditionally would not in itself alone suffice to restore the premium to 10 to 15 per cent. If we adopt as a basis of calculation the quotation of 30 per cent, we still remain below the probable truth. If from $1.32 we deduct 30 per cent, or 40 cents, and also the sum of 49 cents above mentioned, there remains as a fiscal advantage for the Belgian manufacturers the maximum of 47 cents per 220 pounds of sugar produced.

Under these conditions the situation in Belgium is very serious. At the present quotation of sugar for the next year ($4.44 per 220 pounds), it is impossible for the manufacturers to pay the beet growers a sufficiently remunerative price, and a reconciliation of the two great agricultural and manufacturing interests, satisfactory to both, has become unrealizable. The advantage acquired with so much difficulty by Belgium in the international market can not be maintained against the competition fostered by the new bounties of the three great producing countries. Manufacturers, farmers, landowners, the laboring classes, and trade are thus going to lose a resource important for the national wealth and the economy of the agricultural system.

The local causes which graft a domestic crisis on the general crisis are, on the one hand, the gradual increase of production due to the extent of the sowings, to the quality of the beet, and to the improvements in methods of manufacture; on the other hand, the failure of a corresponding increase in consumption and the curtailment of the sources of legal revenue. Foremost in this respect is the competition of saccharine and glucose, as well as the increase of the minimum of revenue to be paid. The bases for the calculation of the bounty have thus decreased, while constantly increasing quantities have come forward to share it.

It remains for the undersigned to recite the measures which might not, indeed, cure the evil, but lessen its seriousness, and, little by little, restore the equilibrium.

The undersigned do not demand export drawbacks or new bounties; they do not request any new sacrifice from the nation or from the treasury; but in view of the gravity of the danger, they have the right to require that the existing system shall afford them the advantages which it is legally intended to produce. The measures which they have the honor to request have, furthermore, as their object the assurance of domestic stability and regularity in the collection of the revenue of the treasury. In demanding the entire benefit of the present fiscal system, a benefit which in the past was always enjoyed, industry and agriculture are not making any demand which can not be accorded them.

In seeking means to suppress the excessive premium or duties, the enormous losses which they cause, and the uncertainty which results therefrom for agriculture, commerce, and industry, the undersigned, according to the declarations of the Government, pursue an object which is praiseworthy and entitled to the consideration of the public authorities. The attainment of this result is necessary to insure the cultivators in all instances the maximum price which the general economic situation may justify. The measures outlined by the undersigned have no other object.

The premium on duties results from a want of the necessary equilibrium between the consumption and the production of sugar. To restore this equilibrium, it is necessary, first, to increase the legal output in order to reduce the production of free sugar (an increase of 5 per cent does not seem excessive); second, to inaugurate the payment of the tax unconditionally, so that the situation may not be aggravated by the freedom from duties of a new quantity of sugar of the same kind, and in order to insure the normal revenue to the Treasury.

Furthermore, contrary to the intention of the legislature, a portion of the revenue from sugar has been misplaced, in the sense that the product of the excise on glucose is not included in the general revenue from sugar. It thus results that the minimum, guarantied by this industry, is in reality increased by the entire sum produced by glucose, which, in consumption, takes the place of sugar.

Saccharine has also contributed and will continue to contribute by certain of its preparations to decrease the consumption of sugar, and in consequence to injure, to the detriment of the responsible sugar industry, the natural revenue of the treasury.

Finally, by recently increasing the minimum amount of this revenue from 6,000,000 francs to 6,500,000 francs ($1,158,000 to $1,254,500), the public powers have increased the burdens of this industry exactly at the moment when on all sides it sees its means of defense in the international struggle lessening.

The restoration of the minimum to its former level, such as was held very recently, is the only concession which the undersigned ask of the State.

It is not possible, however, to be deluded concerning the efficacy of these measures; whatever may be their effect in restoring the destroyed equilibrium, it is certain that during a period of time difficult to estimate, but certainly long, the overabundance of sugar for consumption will maintain the premium on duties to such a point that, although rendered more regular by the preceding measures, it will still remain so high as to reduce proportionately the advantages of the manufacture.

A corrective is therefore necessary, and since the premium is based on the drawback, it would suffice to raise the rate of this latter to neutralize to the same degree the injurious effect of the premium. But, as there is no question of causing by this means an indirect decrease of the legal output, this should be increased likewise in the exact proportion of the increase of drawback. The undersigned propose, therefore, an increase of 15 per cent in the drawback, with a corresponding supplementary tax, and compensated by an equal increase of the legal output.

In this way the present premium would be neutralized to the extent of 15 per cent, leaving out of the 25 or 30 per cent previously mentioned only a normal loss of 10 to 15 per cent on the basis of 45 francs ($8.69) per 220 pounds during preceding years.

The measures prayed by the undersigned are, therefore, the following:

(1) That the payment to the treasury, in case of variation, should be made henceforth unconditionally.

(2) That the legal output taken into consideration should be increased by 20 per cent, with an increase of 15 per cent in the drawback and an equivalent supplementary tax.

(3) That the minimum of revenue, restored to 6,000,000 francs ($1,158,000), includes the sum realized from the excise on glucose.

These measures, which can only be temporary, would not involve any serious sacrifice for the treasury. They will barely permit this industry to gradually free itself from the serious domestic difficulties in which it is struggling.

While it is hoped to thus obtain a better equilibrium in the country itself, it is likewise to be sincerely wished that the exaggeration of the commercial struggle between Germany, Austria, and France may also result, by the greatness of the evil produced, in the return to a more logical and healthy condition.

In this war of premiums the victims are only the producers themselves, the destroyers of their own fortune to the profit of nonproducing countries. Export bounties have no other result than the constant decline of the products to the uttermost limits of the cost price, and even lower than that. Germany and Austria must, at the present time, recognize the error committed by them, and France, in spite of the enormous advantages which she thought she was assuring her producers, will be obliged, in turn, to admit that she does not find in this fatal war any profit for herself.

Of all Europe, Belgium alone will not have export bounties on her sugars, and the undersigned do not wish it. Better than any other nation, it is in a situation to take the initiative in the work of alleviation and pacification.

The undersigned, in expressing the hope that the public powers will decide in favor of their requests, as formulated in the law hereto annexed, also give expression to their desire of seeing the Belgian Government undertake the opportune and necessary labor of pacification at the moment when such serious dangers threaten this cultivation—one of the greatest industries of Europe.

Then follows the law proposed, as already set forth, and the signatures of the petitioners, some seventy in number, including all the principal manufacturers in Belgium.

To understand the proposed change in Belgian legislation relative to sugar, we must know that, under the present system, the Government annually fixes a certain quantity of sugar to be produced, and likewise a certain gross sum of $1,158,000 as the amount of tax to be paid by the manufacturers of sugar. This latter amount is proportionately divided among the various factories according to their pro rata share of production.

These estimates are called "the amount taken into consideration" or charged against the manufacturers (the original French is "prise en charge"). If the amount of revenue to be raised does not enter into the treasury in due course as the result of taxes collected, the balance lacking must be made up by the sugar manufacturers pro rata to the quantities of production charged against them respectively. The quantity to be exported by each firm is, moreover, limited by the quantity of production and of the tax charged against it and to be paid by it, for the drawback, primes, or bounties paid by the Government must not exceed the amount of tax collected—that is, $1,158,000.

The quantity for export therefore being limited, the surplus of sugar manufactured must be sold in Belgium. This surplus has been so large in recent years that the price has fallen to about $1.50 per 100 pounds less than the cost of manufacture. It is to avoid this loss that the manufacturers now propose to pay the sums assessed against them unconditionally—that is, the entire sum of $1,158,000—without the right of recovery in case of smaller production than the estimate for their respective firms, provided that the amount indirectly established by law for export shall be increased—practically indefinitely—and they shall not be obliged to make up any deficiency which may occur in the total tax of $1,158,000 (none could occur if all the pro rata assessments were paid in advance).

The manufacturers would necessarily be out the amounts paid by them as a tax, and which now, in case of deficiency in production, they receive back, but the increase of the export drawback proposed and the larger quantity of sugar permitted to be exported would fully compensate them. Exports being larger, less sugar would be offered for sale in the country, the supply would be more proportionate to the domestic demand, prices would be better, and the profits on domestic sales would surpass the amount of the excess of tax paid; hence the situation of the Belgian sugar manufacturers would be much more favorable than under the existing system.

HENRY C. MORRIS, *Consul.*

GHENT, *April 29, 1897.*

EFFECT OF THE GERMAN SUGAR LAW.

This law, which was greeted as the forerunner of better times for the beet growers, has so far been rather disappointing in its effects. The price of sugar has continued to decline until it has reached to-day 8.70 marks ($2.07) per hundredweight (110.23 pounds) free on board at Hamburg, and this in the face of a largely increased demand from the United States. The lowest figure ever touched before was in the beginning of January, 1895, when raw sugar free on board at Hamburg was sold at 8.50 marks ($2.02) per hundredweight (110.23 pounds). At the end of the "campaign year," 1895-96, there remained in Germany a stock of about 1,800,000 double hundredweights (180,000 metric tons) of raw sugar.

From present appearances, the production of raw sugar during the "campaign year" 1896-97 will amount to about 18,300,000 double hundredweights (1,830,000 metric tons), making a total stock of about 20,100,000 double hundredweights (2,010,000 metric tons) to be disposed of. During the first six months about 7,077,000 double hundredweights (707,700 metric tons) have been used for home consumption and export, and if we assume that an equal amount will be used for the remaining six months, the "campaign year" 1896-97 will close with a stock on hand of about 5,946,600 double hundredweights (594,600 metric tons), or almost one-third of the entire yearly production. Even if the consumption for the remaining six months should be considerably more, a large stock will still be left unsold, and must press heavily upon the market when the new crop comes in.

Under the former law this result, bad as it is, could be somewhat counteracted by a reduction in the area under cultivation, but the new law renders

such a reduction impracticable and inadvisable for the factories, and therefore directly enforces overproduction, instead of preventing the same, as was intended by its promoters. The cause for this is found in a stipulation of the new law, fixing the contingent amount which each factory may produce. (Factories may produce more than their contingent, but must pay a tax on such excess equal to the full export bounty.)

This stipulation says that the contingent amount for larger factories is to be fixed every year, according to the two highest annual productions for the last three years, and for smaller factories the highest annual production for the last five years is to be taken as a basis. It is, at a glance, apparent that unless a sugar factory is willing to work with a smaller contingent, it must at least maintain its present output; but, as in the struggle for supremacy many factories will try to push ahead and obtain a larger contingent at the expense of their rivals, an equal annual production will mean a reduced contingent. Factories are thus forced to increase their production if they desire to avoid being crowded out.

As a revision of the new law, after it has been in effect but a few months, can hardly be expected from the Reichstag, efforts are being made by the majority of the raw-sugar associations to have at least an amendment passed to the effect that the contingent, once assigned to a factory, can not be reduced. Unless this is accomplished, and the cause for enforced production thus in a measure removed, the already dark prospects of the industry will become still gloomier, and the weaker factories can not avoid being driven to the wall.

JULIUS MUTH, *Consul.*

MAGDEBURG, *April 30, 1897.*

SUGAR-BEET PLANTING IN GERMANY.

As was predicted in these reports (Consular Reports No. 190, page 511), the effect of the new sugar export bounty law adopted in Germany in May last year has been to still further increase the acreage of beet cultivation, which had already reached what was generally regarded as the extreme limit of safe expansion.

From an announcement just made by the International Association of Raw-Sugar Manufacturers, it appears that the area of land to be planted with beets in Germany this spring will be 1,062,908 acres, against 1,050,184 acres in 1896 and 930,749 acres in 1895.

This is equivalent to an increase of 1.2 per cent over the already very large acreage of last year, and is regarded with apprehension by economists, who realize that, notwithstanding the practical suspension of the sugar supply from Cuba, the limit of the world's consumption has been fully reached, and that any further increase in the product must react disastrously upon its market value. The increased acreage of beet cultivation is most marked in the provinces of East Prussia, Pomerania, and Mecklenburg.

But in other countries, notably Austria-Hungary, the low sugar prices of last autumn have operated, in the absence of such export bounties as are paid by Germany, to reduce the area of this year's planting, which has declined from 858,425 acres in 1896 to 748,589 acres this season, a loss of about 12.8 per cent. Similar reductions, more or less important, are reported in the plantings of Belgium, Holland, and Sweden. France, so far as appears, has not yet reported what the total acreage of beet culture will be in that country this year, but no important increase is thought to be probable, so that, taking Europe as a whole, the prospect is for a diminished area of cultivation, the increase in Germany's plantings being more than offset by the reductions in other countries.

Such, in brief, is the apparent result of the first year's operation of the new German sugar export-bounty law, sustained as it is by the advanced scientific methods of the Germans in the use of chemical fertilizers and their skillful improvement of the sugar beet itself, through which German agriculturists are enabled to produce 1 unit of sugar from 7.25 units of raw beets, instead of 1 unit to 13, as was the case a few years ago, while the highest average yield yet attained in France is 1 unit of sugar to 8.08 units of beets.

FRANK H. MASON, *Consul-General.*

FRANKFORT, *May 6, 1897.*

Mr. GRAY. Mr. President, I should not say another word at this late stage of this debate but for the fact that the opinion of the late Attorney-General, Mr. Olney, for whom I have the highest respect and for whose abilities I have the highest estimate, has been brought into this debate by the Senator from California [Mr. WHITE]. I recollect very well that opinion, and the fact that it took ground which was directly opposite to that taken by the Secretary of State to whom I have already alluded.

But, Mr. President, I want to say as emphatically as I can that the reasoning and casuistry of this astute lawyer can not change my notions as to the morality of this proposed provision. There is no way, in my opinion, by which the obligation of this express language of the treaty of 1828 can be honorably evaded. It does not use the language "favored nations;" it is not the usual phraseology of the favored-nation clause, but is much more specific. It is this:

> No higher or other duties shall be imposed on the importation into the United States of any article the produce or manufacture of Prussia, and no higher or other duties shall be imposed on the importation into the Kingdom of Prussia of any article the produce or manufacture of the United States, than are or shall be payable on the like article being the produce or manufacture of any other foreign country.

Mr. WHITE. If it will not interrupt the Senator from Delaware, may I ask whether he attaches any importance to the concession which Mr. Olney says was made by the German representatives to the conference referred to in his opinion, and which concession or interpretation of the treaty I do not understand was ever repudiated by the German Government?

Mr. GRAY. I have never seen the original of that conference, and before I could answer, I should like to see the express language in which it is contained. The only information I have about it is what is contained in Mr. Olney's report.

Mr. WHITE. I will call the attention of the Senator to another fact, that this very proposition was contained in the McKinley law, and Judge Gresham differentiated the situation in that regard by saying that it was very small, and was therefore probably not observed; yet it did involve the identical principle of interpretation.

Mr. GRAY. Of course it involved the very principle; and if there was no protest, I suppose it was because the result was so insignificant as not to be thought worth while as a ground of objection.

Mr. WHITE. The principle was there.

Mr. GRAY. Certainly. When the Senator interrupted me, I had just called attention to the express language of article 5. The whole matter, in my opinion, turns upon that. I will read it again, because the Senator has interrupted the continuity of my statement in that respect.

Mr. WHITE. I beg pardon.

Mr. GRAY. I do not object at all. The article reads:

> No higher or other duties shall be imposed on the importation into the United States of any article the produce or manufacture of Prussia, and no higher or other duties shall be imposed on the importation into the Kingdom of Prussia of any article the produce or manufacture of the United States, than are or shall be payable on the like article being the produce or manufacture of any other foreign country.

In section 3 of this bill we undertake to impose a duty of three-tenths of a cent per pound upon sugar coming from Germany more than upon sugar coming from any other country.

Mr. TURPIE. Will the Senator allow me?

Mr. GRAY. Certainly.

Mr. TURPIE. The article the Senator just read is one of reciprocity, and not of favoritism.

Mr. GRAY. One of mutual reciprocity—article 5.

Mr. TURPIE. Which is much stronger than the favored-nation clause.

Mr. GRAY. Certainly; in one sense. I do not know what conclusion the Senator wishes to draw from that.

Mr. TURPIE. I wish to draw the conclusion that it is much stronger than the ordinary favored-nation clause, and that this provision, I think, is plainly and palpably the usual language of a reciprocity treaty, binding on both countries unless abrogated.

Mr. GRAY. So, Mr. President, we have here a contract between this country and Prussia, now represented by the German Empire, and the law of contract is contained within the four corners of this article; and so long as we impose a duty upon sugar coming from Prussia higher than that coming from any other country, or all other countries, then we contravene the law of that contract and violate its provisions. I do not see how you can evade it, or how reference to this conference in 1888, alluded to by the late Attorney-General, Mr. Olney, can in any way modify the opinion that Senators ought to take of a suggested article which affects the good faith of the country they represent.

Mr. Olney, in this paper, says:

> In the first place, the "most-favored-nation clauses" of our treaties—

Which, as the Senator from Indiana [Mr. TURPIE] has just remarked, is not exactly this case and does not exactly apply to this case—

> with foreign powers have, from the foundation of our Government, been invariably construed both as not forbidding any internal regulations necessary for the protection of our home industries.

That is what I say, and it did not therefore forbid Germany from imposing an export duty upon the sugar sent out by German producers, and we had, therefore, no right to regard that as a pretext or ground for retaliatory measures on the part of the United States.

Mr. CAFFERY. I should like to ask the Senator whether our imposition of countervailing duties is not as much of an internal nature, affecting the internal policy of the United States, as is the export bounty given by Germany?

Mr. GRAY. Of course, but when that domestic policy or when that regulation, whatever you choose to call it, contravenes the express obligations which we have entered into with other countries, then it can not be sustained unless it is on the ground that we have a right to break our treaties.

Now, unquestionably the Congress of the United States can repeal a treaty, but they violate a treaty when they repeal it without just cause, and all I want to do is to call the attention of the Senate of the United States to the fact that section 3, proposing this countervailing duty, is in violation of that treaty, and, though we have the power to pass it, we subject ourselves thereby to the just criticism of the other party to the contract, and I do not believe there is anything in the reasoning of Mr. Olney, highly as I respect his ability, which for a moment to my mind successfully refutes the reasoning of the late Secretary of State, Mr. Gresham, in his letter to the President.

Mr. MORGAN. Mr. President, the very able Senator from Indiana [Mr. TURPIE] and the very able Senator from Delaware [Mr. GRAY] seem to have reached a conclusion that this difficulty does not arise out of the favored-nation clause in the treaty, and they seem to have agreed that there is no favored-nation clause in the treaty respecting the matter we have now under discussion; that it is a reciprocity treaty and not a favored-clause treaty. The favored-nation clause in a treaty almost uniformly relates to future conditions, perhaps to unexpected conditions, or rather conditions that can not at the time be definitely anticipated, whereas the

reciprocity clauses in treaties of reciprocity rest upon facts as they exist at the time, either specific facts or a general and agreed policy to which the two nations agree to conform their action.

This being a reciprocity clause and not a clause which has reference to favored-nation provisions that are common in a great many treaties, unfortunately, in the world, it is to be interpreted by the state of facts that existed at the time of its adoption. Now, to illustrate that, and to show that the Government of the United States in passing this measure is not breaking a treaty, is not violating any moral obligation, is not doing anything that it has not a perfect right to do, let us suppose that Prussia at that time projected the policy of encouraging the growth of beet sugar, and had said to the United States, "This proposition is intended to crush out the growth of cane sugar in the United States, in order to make the growth of beet sugar in Germany profitable." It is quite clear that we would not have appreciated that reciprocity provision as being very valuable to our country, and it certainly would never have gone into the treaty in any specific form.

The question arises then, What is the purview of the contract? Did the contract intend to include all methods and all measures that Prussia might thereafter choose to adopt for the purpose of making war upon a specific production in the United States? If it did not, then we are violating that contract. It did not, Mr. President. It did not include it. The contract does not cover the statement of the Senator from Delaware. The question of honor and public duty, about which he seems to be so much concerned, is not involved within the natural and necessary and proper terms of the reciprocity agreement between Prussia in 1828 and the United States in 1897. Conditions have changed. Policies have sprung up that were not then contemplated.

Germany has concluded that it is her duty to her own country, to her own people, to make war upon the production of sugar in the United States, whether from beet or sugar cane. Thereupon she draws upon her treasury for very large bounties for the exportation of sugar to the United States and to other places in the world. Now, when she resorts to that process of commercial antagonism or war against our production, she steps beyond the boundary of the contract and frees us from all obligations to comply with it, and our honor is entirely untouched.

I am quite sure that the Senate, possibly the House of Representatives, too, will sustain this doctrine so well elaborated, so clearly put by Mr. Olney in the view that he expressed in regard to it. I only say a word about it in order to avoid possible censure that might arise in my own mind and conscience, and that of other Senators, upon the declaration so earnestly made by the honorable Senator from Delaware, whose opinions are very well worth being respected on all occasions and on all subjects.

Mr. CAFFERY. The Senator from Delaware states that I am occupying a protection ground because I deprecate the bounty placed by Germany upon the exportation of sugar and advocate a retaliatory duty to counteract its bad influence. I look upon export bounties paid by Germany as an evil thing. I look upon the countervailing duty of the United States as wholly and purely a domestic and defensive matter. The treaty between the United States and Prussia relates to matters external and foreign, within the scope of international trade, without any regard to internal policy.

I submit this as a question of practical consideration. The United States being a great producer of cotton, if England, in order to increase her cotton production, should place a bounty upon cotton exported from India and Egypt into the United States, would it, under such conditions and circumstances, be a matter of internal policy and of self-preservation, or would it be a matter of external relations between us and India or Egypt?

I do not believe that any country is justified in permitting its people to be destroyed by hostile legislation of foreign countries. The only corrective is a retaliatory duty. You may say that the hardship falls upon the people of the country imposing the countervailing duty. So it does, but it is a last resort. You can have no other policy at hand. In order to get cheap cotton from India, cheap cotton from Egypt, would the United States stand by and see the cotton producers of the South destroyed, or the wheat growers of the Northwest, or the producers of any other product, manufactured or other? I think not. It is not a question of foreign policy, in my opinion, as comprehended in the favored-nation clause, but it is a pure question of self-preservation; and I say, therefore, that in the keen competition of the world in the matter of sugar production an export bounty of 38 cents a hundred given by one country to give it superior advantages over another will enable it to destroy the products of its rival in the same line; and that is the ground upon which I put my action. It is not protection ground, nor do I perceive any casuistry in it. I think the position taken by Mr. Olney that the favored-nation clause has no reference whatever to a policy of this character is well taken, well considered, and abundantly supported by original reasoning.

Mr. CHANDLER. Mr. President, it is with extreme regret that I shall vote for this clause, but I feel it to be my duty to do so, because I do not believe that otherwise the American policy of protecting the production of sugar in this country can be effectually carried out. I am told, and I fear it is true, that something like commercial warfare will be commenced by Germany against the United States if this policy is persisted in and this clause is adopted.

I am very reluctant to see any such commercial warfare arise between Germany and the United States. I would make a great personal sacrifice to avoid a controversy of this kind, and I may say further that I would be willing to largely sacrifice what would otherwise be the real interests of the United States in order to prevent any friction between the Empire of Germany and the United States of the character indicated. There are special reasons, which I will not name, special events now transpiring, which make it extremely undesirable that there should be any ill feeling growing out of the enactment of the duties imposed by the pending bill between this country and Germany, France, England, or any other European power.

I trust that in the course of time, as the result of diplomatic negotiation and as the result of reciprocal concessions of one kind and another, we may be able to maintain, by reasonable and just tariffs, the principle of protection to American industries and American labor without at the same time seriously or unjustly injuring the industries of foreign countries or creating any ill feeling on the part of the inhabitants or the governments thereof.

But, Mr. President, although such are my sentiments and strong desire, and although I vote for the amendment with extreme hesitancy, I do not see how we can avoid adopting this clause unless we are prepared to abandon the policy of protecting the sugar-producing industry of the United States, which is an avowed object of the bill.

It is true that I can not see how the Senator from Louisiana [Mr. CAFFERY], if he considers the American duty on sugar to be merely a revenue duty, votes for it as such, desires it as such, and desires it for no other reason and on no other account, can care whether there is an export bounty upon German sugar or not, because if this is merely a revenue duty, the more sugar that comes into the country the better; and if a foreign government chooses to pay a bounty to increase our imports of sugar, then upon any given rate of duty we certainly get more revenue—the more bounty the foreign government pays.

But when we come to the question of protection, the case is different. It is manifest that if protection is to be accomplished by imposing duties in the United States upon foreign products that shall equalize conditions of production to the home producers of any article of merchandise, and a particular duty is imposed for that purpose, or as one of the objects of imposing it, and in any foreign country an export bounty shall be paid upon that article, then the cost to the foreign producer as against the home producer is reduced just so much, and the equalizing of conditions has failed.

Apply the principle in this case. Manifestly if there is an export bounty upon German sugar, then the producer of German sugar has an advantage over every producer of sugar in every other country who wants to send it to the United States. He has the same advantage over the home producer, the producer of sugar in Louisiana or in Nebraska. Our tariff duty as a protective duty is imperfect unless, in the case of products coming from a country which gives an export bounty, we add to the duty which is charged upon such products of other countries a further duty equal to the export bounty so given by the foreign country.

Mr. President, that point is perfectly clear. It is the principle which is embodied in this new section 3. It applies to all countries and all products alike upon which export bounties are given, and its adoption is an inevitable and unavoidable result of the imposition of a duty for protection—one which protectionists can not fail to vote for; one, however, that I am free to concede it may be difficult for those who vote for duties for revenue purposes only to vote for, but which I am glad to see such Senators vote for whatever may be the motives which influence them, or the theoretical or intellectual or casuistical reasons which they give for their conduct.

I will not undertake to discuss the question which has been raised by the Senator from Delaware [Mr. GRAY]—there are opinions both ways—whether as the case stands Germany will have any right to complain because we impose this countervailing duty. I do not believe that Germany will have any just grounds for complaint. It is as surely a domestic question which we are dealing with as the question of an export bounty on German sugar is a domestic question for Germany.

How it can be claimed, when that export bounty is given for the purpose, as everyone knows, of stimulating the exportation of German sugar to the United States, that it is a mere domestic question of Germany in which we have no right to interfere, without at the same time admitting that the question whether we shall put a countervailing duty upon sugar which comes from countries that give export bounties is also only a domestic

question of the United States into which Germany has no right to interpose, I can not conceive.

I believe that in the near future all these controversies will be amicably arranged between the two Governments of Germany and the United States. Moreover, I believe that the policy of reciprocity as to customs duties, which is to be again revived in the United States by the provisions of the pending bill, will result in such negotiations and such commercial treaties with foreign countries that all friction shall disappear and that there may be no commercial warfare between this country and any other country.

Mr. President, I close as I began by saying that there are special reasons why I regret to be obliged to vote for this provision, but they are reasons which must give way in the face of the fact that the protection of American sugar, whether beet sugar or cane sugar or any other kind of sugar, can not be made effectual according to the controlling principle of the bill unless the countervailing duty provided for in the clause so carefully and faithfully and satisfactorily drawn by the Committee on Finance shall be adopted.

Mr. LINDSAY. Mr. President, it occurs to me that this countervailing duty is the one undisguised protective feature in the sugar-tax provision. There is no pretense that it is levied for revenue. If it were levied for revenue, then we would ascertain what the highest countervailing duty should be and we would put it on all sugars, but the committee admit, by the framework of their bill, that there is no necessity for imposing upon sugar this additional tax, unless it be to meet the export bounty paid by other governments to their sugar exporters, and thereby to protect the American sugar interest against the cheap sugar which these exporters would bring here and put upon the American market. There is no escape from it.

It is protection pure and simple, and it is resorted to for no other purpose, and can be explained upon no other hypothesis, than that it is to protect the American sugar industry against the unfair competition of the foreign sugar raisers who receive a bounty of 28 or 38 cents a hundred upon the exported sugars.

Mr. CHANDLER. Will the Senator from Kentucky allow me?

Mr. LINDSAY. Certainly.

Mr. CHANDLER. I frankly admit that it is protection, but I insist that it is within the Senator's well-known principle; it is incidental protection in connection with a revenue duty.

Mr. LINDSAY. No; it is not incidental. It is direct. It is intended to protect. This provision is not intended to raise revenue, and would not have been incorporated in the bill except for the fact that foreign governments do pay export bounties. A Senator suggests to me that it is in the law now. I do not say it is not in the law now, but I say it is a protective duty in the law as it stands, pure, simple, undisguised, and unmitigated.

Mr. CHANDLER. I do not care about the adjectives, if the Senator will only put in "incidental." Here is a duty upon sugar of nearly 2 cents a pound, and, incidental to that, we complete the idea of protection by putting on this countervailing duty on German sugar. It is just as clearly within the Senator's principle of incidental protection to American products, which he has laid down so often in this Senate, as any duty there is in the bill. The main duty is voted for by Senators upon the other side of the Chamber as a revenue duty. Now, incidental to that we make the protection complete to the American sugar by putting on the countervailing duty, and I dislike to see the Senator apply his great powers to an attempt to make a point which is too infinitesimally small to be perceived.

Mr. LINDSAY. The incidental-protection idea which the Senator from New Hampshire has so often without warrant imputed to me can be found in this bill up to $1.75 on the 100 pounds. That may be claimed to be a revenue duty, and it also incidentally protects the American sugar raiser, but the 20 cents that follows between the $1.75 and $1.95 is not a revenue duty at all, but a bounty to the sugar refiners, and the provision which we are now discussing is intended to be a protective duty, to protect the American sugar raiser against what is deemed to be unfair competition brought about by the action of the German Government.

When my friend from Louisiana [Mr. CAFFERY] says that it is our duty to protect the American sugar raiser against the action of the German Government in paying this export bounty, he concedes the whole doctrine of protection. What is the doctrine of protection based upon? It is that the pauper labor, resulting from governments maintained on the other side of the water, enables those people to manufacture the things which we desire to use cheaper than we can manufacture them, and that therefore we must protect the American industry against the competition of pauper labor. Suppose Germany, instead of giving an export bounty, had supplied the sugar raisers in Germany with cooly labor from Japan or cooly labor from China. The same argument could be made that the tax must be made higher because the American labor can not compete with the cheap labor thus furnished by the German Government to assist its people in raising cheap sugar.

I had hoped, in view of the fact that nothing could induce the other side to abandon the 20 cents protection to the sugar trust, which is a bounty pure and simple, that by the defeat of this proposition we might at least neutralize the advantage thereby given to the unholy combination, and now I find that Senators on this side say this is a proper duty; that it is a duty which may be maintained from the Democratic standpoint of a tariff for revenue, when nobody pretends that it is proposed for reveuue, but altogether for protection.

The Senator from Alabama [Mr. MORGAN] claims that reciprocity treaties are based upon the conditions existing at the time the treaties are entered into, and that changed conditions relieve the obligations of the governments incurred by such contracts of reciprocity. How far do the conditions have to change before one government is relieved of the obligations it has undertaken with another? All manufacturing and all the avenues of industry are open to improvement each day. Are we to say that the methods by which you produce the article upon which we propose to levy an additional tax have so changed that we are not bound to carry out the contract?

Who is to determine the time when the conditions have so changed that the contract ceases to bind? I say that if we have bound ourselves to admit Prussian articles of commerce upon as low a rate as we admit those of any other country, it does not lie in our mouths to say that Prussian conditions have so improved that she can undersell our own people unless we discriminate against her. If we wish to get rid of the treaty, let us go at it in a straightforward manner. Do not let us disregard the treaty by passing acts of Congress clearly in conflict with it.

It is a domestic question with Germany whether she will pay an export bounty, and it is a domestic question with us whether we will impose a retaliatory duty upon the articles which come from Germany, just as it is a domestic question whether we shall levy a tariff for revenue or a tariff for protection. But if the Constitution forbids our levying a tariff for protection, as the Democrats insist it does, then the treaty forbids us to levy a duty for the purpose of retaliating against a country which we have agreed shall not be retaliated against by imposing duties upon her products higher than those we impose upon the products of other nations.

I can understand why France, a protective-tariff country, will resort to these retaliatory duties. I can understand why gentlemen on the other side who believe in the doctrine of protecting American industries may resort to those retaliatory dutics. But I do not understand how gentlemen who hold to the doctrine that the power to tax is limited by the Constitution to taxing for revenue only and for public purposes alone can justify this attempt to violate the treaty with a sister nation in order that we may meet the advantages which she has secured through her domestic policy.

Mr. GRAY. Before the Senator from Kentucky sits down, I will state that undoubtedly it is within the competence of Congress to pass this legislation. We can repeal the treaty in whole or in part. There is no doubt about that. But it is none the less a violation of express language of the treaty, and it subjects us to the criticism to which any country is subjected that does violate it.

Mr. LINDSAY. Oh, yes; we can violate the treaty just in the way we insist our friends on the other side persistently violate the Constitution. But while we may abrogate, we have no right to violate the treaty any more than we have right to violate the constitutional limitation.

Mr. CAFFERY. Mr. President, it occurs to me that my friend from Kentucky has used a great deal of casuistry to bring a doctrine unconnected with tariff, unconnected with revenue, under his sharp criticism on tariff lines. Even upon the doctrine of absolute free trade the position that I occupy is defensible. Free trade is that natural conditions among men and nations ought not to be interfered with by legislative action; that natural advantages possessed by one country ought not to be offset by artificial aids afforded by another.

On the doctrine of free trade there is a free interchange of commodities, one nation exchanging what it can produce cheaper and better for that which another nation can produce cheaper and better. But in order to disprove and overthrow the principle of self-preservation as against a violation of free trade, against the doctrine of free exchange, the Senator from Kentucky injects the argument and the criticism that whoever sustains the principle of self-preservation is therefore a protectionist.

Mr. LINDSAY. I will ask the Senator, with his permission, whether levying a tax for the preservation of a particular industry is not a tax for the protection of that industry?

Mr. CAFFERY. Not in the sense of protection according to the Republican idea.

Sir, when you oppose, as against England or any country in the

world, the artificial barrier of a protective wall against the interchange of products between England and the United States that would naturally flow between them, then you violate the doctrine of free exchange. But the case is entirely different when free-trade relations are interfered with, and under guise of bounty a trade war is inaugurated. Any nation that will sit down and leave its people to be destroyed, not according to the law of free exchange, but according to the laws of destruction, and in violation of all trade laws, is forgetful of its duties to its own citizens.

When a tax is resorted to, not as a method of building up industries, but as a means to prevent your own industries from being destroyed by a country violating the law of free trade and free exchange, then the tax is, in my opinion, justifiable.

Suppose, for instance, that exchanges can flow between two countries that are on a free-trade basis, and one country gives an export bounty to its produce over that of another, what does that mean? That is not only violative of the law of free exchange, but it is destructive of the country against which the export bounty is leveled. It is not trade; it is war; it is destruction. Free trader as I am, I am not prepared to see the industries of my country destroyed by export bounties given by other countries. When I oppose those doctrines and when I oppose such duties, I uphold the laws of free trade; I put a brake, a barrier, against the violation of the law of free exchange, which is free trade.

The difficulty does not arise in cases where the products on which an export bounty is given are not produced in the country to which they are exported. In that case that country enjoys all the benefits of the mistaken policy. But when there is an equality of production, and sometimes the lines of production verge very near together, is it possible that in violation of all laws of self-defense we are to sit down and permit ourselves to be ruined by export bounties?

We oppose any violation of the correct law of exchange when we place a retaliatory duty upon export bounties which would ruin us. That is my position. It is not grounded upon tariff. It is a law of self-preservation. There is no parallel between giving an artificial aid by government in the shape of a large export bounty and of pretended protection against pauper labor.

Labor conditions are natural conditions; soil conditions, climate conditions, are natural conditions. I contend that you can not equalize these conditions by legislation. But there is an artificial condition created by export bounties, which can only be neutralized by legislation. Here is a bonus paid. Here is a powerful government determined on the destruction of the trade of its neighbor in a production in which they are about on an equality, and I submit that the position I take is sustained not only upon the doctrine of the freest exchange, but precisely in accordance with that doctrine.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

Mr. BACON. On that I ask for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. GEAR (when his name was called). I am paired with the senior Senator from New Jersey [Mr. SMITH], and withhold my vote. If he were present, I should vote "yea."

Mr. PLATT of New York (when his name was called). I am paired with the senior Senator from New York [Mr. MURPHY], and therefore withhold my vote.

Mr. PRITCHARD (when his name was called). I am paired with the junior Senator from South Carolina [Mr. MCLAURIN].

Mr. THURSTON (when his name was called). I have a general pair with the senior Senator from South Carolina [Mr. TILLMAN]. If he were present, I should vote "yea."

Mr. VEST (when his name was called). I am paired with the Senator from Minnesota [Mr. NELSON]. If he were present, I should vote "nay."

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER].

The roll call was concluded.

Mr. CHILTON (after having voted in the negative). I voted through inadvertence. I am paired with the Senator from Oregon [Mr. MCBRIDE], and withdraw my vote.

Mr. MILLS (after having voted in the negative). I desire to inquire if the Senator from New Hampshire [Mr. GALLINGER] has voted?

The PRESIDING OFFICER. He has not voted.

Mr. MILLS. Then I withdraw my vote. I am paired with that Senator.

Mr. CLARK (after having voted in the affirmative). Has the junior Senator from Kansas [Mr. HARRIS] voted?

The PRESIDING OFFICER. He has not voted.

Mr. CLARK. Being paired with that Senator, I withdraw my vote.

The PRESIDING OFFICER (Mr. FAULKNER). The Chair will state that he is paired with the Senator from West Virginia (Mr. ELKINS], and therefore withholds his vote.

Mr. MANTLE. I wish to inquire if it is still understood that the Senator from South Dakota [Mr. PETTIGREW] remains paired with the Senator from Minnesota [Mr. DAVIS], as announced last evening?

The PRESIDING OFFICER. The Chair can not give the Senator from Montana any information on the subject.

Mr. WHITE. Has the Senator from Idaho [Mr. SHOUP] voted?

The PRESIDING OFFICER. He has not voted, the Chair is informed.

Mr. WHITE. I am paired with that Senator, and withhold my vote.

Mr. TURPIE. I am paired with the senior Senator from Minnesota [Mr. DAVIS].

Mr. TELLER. That pair has been transferred to the Senator from South Dakota [Mr. PETTIGREW].

Mr. TURPIE. Has the senior Senator from Minnesota voted?

The PRESIDING OFFICER. The senior Senator from Minnesota has not voted, the Chair is informed.

Mr. BERRY. My colleague [Mr. JONES of Arkansas] seems to be absent from the Chamber at this time. If he were here, he would vote "nay."

The result was announced—yeas 33, nays 19; as follows:

YEAS—33.

Allen,	Foraker,	Lodge,	Sewell,
Allison,	Frye,	McEnery,	Spooner,

So the amendment of the committee was agreed to.

Mr. MILLS. I desire to move now to strike that provision from the bill. The amendment of the committee has been adopted in lieu of the text of the bill from the House, and it is now in order to move to strike it from the bill.

Mr. ALLISON. Although that is nominally true, it is not a provision that relates to the subject-matter of the House section. I now intend to propose a section which is to be a substitute for the House provision as respects reciprocal trade with other countries.

Mr. MILLS. But I am after the bounty provision. I want to strike that from the bill.

Mr. GRAY. The countervailing duty.

Mr. ALLISON. Very well. I only suggest to the Senator that if he wishes to strike that from the bill he do so without reference to the text of section 3 as it comes to us from the House.

Mr. MILLS. I want to strike from the bill just what you have had put in the bill.

Mr. ALLISON. I supposed we had just taken a vote on that subject and put it in.

Mr. MILLS. No; we did not. We took a vote on your substitute for the House provision. Under parliamentary law you had a right to perfect the section before a motion to strike it out could be entertained.

Mr. ALLISON. Nominally that is true.

The PRESIDING OFFICER. The Chair understands the motion was to strike out and insert, or to insert a new section, and that has been adopted by the Senate. In either case a motion to strike that out would not be in order at this time, but it would be in order in the Senate.

Mr. MILLS. I think it is parliamentary law to permit the friends of a measure to perfect it before you can move to strike it out. It would not have been in order for me to move to strike out the section from the bill until the friends had perfected the section to suit themselves. I think there is no question about that. I have waited for the provision to be perfected.

The PRESIDING OFFICER. The Chair will state that the Chair understands this to be an entirely new section. The amendment offered by the committee is a new section.

Mr. MILLS. The motion of the Senator from Iowa was to strike out all of section 3, as has been done, clear down to section 4, and substitute what he sent up, which is now section 3 of the bill.

Mr. ALLISON. That was not my purpose. I may have used that phraseology. It is my purpose to substitute for section 3 of the House bill an amendment which I shall now send to the desk. The section, as respects countervailing duties, is a separate and independent section. If the Senator desires to take another vote on the question, I would rather do it than debate it very long.

Mr. MILLS. I have some remarks to make, but I can reserve them.

Mr. ALLISON. I will offer the amendment if this matter is disposed of.

Mr. WHITE. If the Senator from Iowa will permit me to make a suggestion, I understood the Senator from Texas to say that he wishes to make some remarks in connection with the matter.

Mr. MILLS. Everything is free here. I can do so hereafter.

Mr. WHITE. The Senator can make his remarks in connection with the other matter.

Mr. ALLISON. Certainly; that is all very well. I have no objection to that; or I will yield now if the Senator desires.

The PRESIDING OFFICER. If the Senator from Texas has yielded the floor, the amendment offered by the Senator from Iowa will be read.

Mr. ALLISON. It is to be a substitute for the text of section 3, stricken from the bill by the committee. It will be section 2½. We have already adopted the other section.

The PRESIDING OFFICER. It can be made section blank, and the clerks can renumber the sections. The amendment submitted by the Senator from Iowa will be read.

The SECRETARY. It is proposed to strike out section 3 of the bill and in lieu thereof to insert:

SEC. —. That whenever the President of the United States, by or with the advice and consent of the Senate, with a view to secure reciprocal trade with foreign countries, shall, within the period of two years from and after the passage of this act, enter into commercial treaty or treaties with any other country or countries concerning the admission into any such country or countries of the goods, wares, and merchandise of the United States and their use and disposition therein, deemed to be for the interests of the United States, and in such treaty or treaties, in consideration of the advantages accruing to the United States therefrom, shall provide for the reduction during a specified period, not exceeding five years, of the duties imposed by this act, to the extent of not more than 20 per cent thereof, upon such goods, wares, or merchandise as may be designated therein of the country or countries with which such treaty or treaties shall be made as in this section provided for; or shall provide for the transfer during such period from the dutiable list of this act to the free list thereof of such goods, wares, and merchandise, being the natural products of such foreign country or countries and not of the United States; or shall provide for the retention upon the free list of this act during a specified period, not exceeding five years, of such goods, wares, and merchandise now included in said free list as may be designated therein; and when any such treaty shall have been duly ratified, and public proclamation made accordingly, then and thereafter the duties which shall be collected by the United States upon any of the designated goods, wares, and merchandise from the foreign country with which such treaty has been made shall, during the period provided for, be the duties specified and provided for in such treaty, and none other.

The PRESIDING OFFICER. The Chair will call the attention of the Senator from Iowa to the statement he made in offering the amendment. The Senator said that he understood it to be a substitute for the third section as reported to the bill as it came from the House of Representatives; but the Senator means, as the Chair supposes, to move to strike out section 3 as it appears in the House bill, and then to substitute the section he has offered.

Mr. ALLISON. That is my motion.

Mr STEWART. Mr. President, I have very grave doubt about the propriety of any commercial treaties. I believe the United States would be better off by having a law containing a simple provision authorizing the President to give notice for one year, and then to abrogate all commercial treaties. The proposed course will only embarrass the Administration, and can work no good. We started out in the beginning without commercial treaties; we passed laws which were beneficial to the United States; and some of those laws are still on the statute books. I believe that the leading provision of the first tariff law is still retained in all the tariff statutes. If I recollect, that provision gives a drawback in the way of a rebate on goods carried in American ships. That extended our shipping industry very much.

Under commercial treaties many complications arise, and I believe the time will soon come when we shall repeal all such treaties. A good deal of irritation, in my opinion, will result from giving authority to the President to make these special bargains all along the line. I do not think any good will come of it. I believe the United States should take the high ground that commerce should take care of itself. We should not attempt to pass general laws in relation to the conduct and conditions of other nations. This is a matter which would be governed necessarily by the law of self-interest. Commerce will take care of itself if you do not trammel it with commercial treaties.

That is my best judgment, so far as I have been able to study the subject. Perhaps my judgment is immature on this matter; but the more I study it, the more I am confirmed in my view that we should repeal all commercial treaties and let commerce regulate itself. When the world is sufficiently civilized, they will regulate trade according to the highest interests of all countries. I think the time will come when all commercial treaties will be abrogated and business will be conducted between nations as it is between men, on the basis of self-interest and without regard to special bargains.

The PRESIDING OFFICER. The question is on agreeing to the amendment submitted by the Committee on Finance.

Mr. VEST. Mr. President, I never believed that Congress had the right to delegate the treaty-making power to the Executive. I would advance that opinion with some diffidence but for the very high Republican authority and legal authority that sustains me in that position. I have in my hand a pamphlet copy of a speech made by the Hon. William M. Evarts on September 8, 1890, in which I think he proved conclusively—and it has never been successfully controverted—that the Senate of the United States could not abdicate its treaty-making power and give that right exclusively to the President. In the conclusion of this very able address, which is all I shall read of it, Mr. Evarts said:

Mr. President, I have said all that I need to say. We have nothing to do with the question of equivalents by treaty. We have nothing to do with the question of authority to the President to ascertain and act upon events which Congress defines as in the region of shipping. We are saying to the President, "We have taken certain articles out of the duty and revenue scheme and made them free; when you find that other countries, all the countries that come within the purview of hides or sugar or coffee, in all the scheme and range of their tariff system and of ours do not give us a good quid pro quo, then you can reimpose the duties."

Mr. Evarts then goes on to say that he can not subscribe to this doctrine, that he believes that the treaty-making power rests with the Senate of the United States and the President, and that we can not delegate to the President exclusively our discretion as to what treaties shall be made with foreign countries.

Mr. President, I shall not undertake to elaborate this proposition. It is to me self-evident. If we can give to the President the exclusive right to make treaties as to revenue without consulting the Senate, we can do the same thing as to any other question, and the delegation of the Constitution of the United States of the treaty-making power to the President and the Senate is absolutely nullified and goes for nothing.

Mr. ALLISON. Do I understand the Senator from Missouri contends that this confers power upon the President?

Mr. VEST. That is just exactly what this amendment says.

Mr. HOAR. Oh, no.

Mr. ALLISON. It is intended to confer power upon the President, by and with the advice and consent of the Senate, and I have already modified the amendment so as to insert those words.

Mr. WHITE. The power rests there anyhow.

Mr. ALLISON. Undoubtedly it would, under the phraseology of the Constitution, in my judgment.

Mr. VEST. I did not hear any amendment proposed by the Senator from Iowa, and I read from the text of the bill. There is nothing about the advice and consent of the Senate in the print of the amendment I have before me, which reads:

That whenever the President of the United States, with a view to secure reciprocal trade with foreign countries, shall, within the period of two years from and after the passage of this act, enter into commercial treaty, etc.

Mr. ALLISON. I modified the amendment before offering it by inserting in line 2, after the words "United States," the words "by and with the advice and consent of the Senate."

Mr. VEST. I did not hear any such amendment.

Mr. ALLISON. I supposed the Senator understood it.

Mr. CHANDLER. I understand the amendment originally meant the same thing. It says, "When any such treaty shall have been duly ratified," then certain things shall take effect, which undoubtedly meant ratification by the Senate. That was the understanding.

Mr. VEST. There is nothing in the amendment originally presented which says anything about that.

Mr. COCKRELL. Let the amendment be read as proposed.

Mr. CHANDLER. It says "duly ratified."

The PRESIDING OFFICER. The amendment as proposed by the Senator from Iowa will be stated.

The Secretary read as follows:

That whenever the President of the United States, by and with the advice and consent of the Senate, with a view to secure reciprocal trade with foreign countries, shall, within the period of two years from and after the passage of this act, enter into commercial treaty or treaties with any other country or countries concerning the admission into any such country or countries of the goods, wares, and merchandise of the United States and their use and disposition therein, deemed to be for the interests of the United States, and in such treaty or treaties, in consideration of the advantages accruing to the United States therefrom, shall provide for the reduction during a specified period, not exceeding five years, of the duties imposed by this act, to the extent of not more than 20 per cent thereof, upon such goods, wares, or merchandise as may be designated therein of the country or countries with which such treaty or treaties shall be made as in this section provided for; or shall provide for the transfer during such period from the dutiable list of this act to the free list thereof of such goods, wares, and merchandise, being the natural products of such foreign country or countries and not of the United States; or shall provide for the retention upon the free list of this act during a specified period, not exceeding five years, of such goods, wares, and merchandise now included in said free list as may be designated therein; and when any such treaty shall have been duly ratified, and public proclamation made accordingly, then and thereafter the duties which shall be collected by

the United States upon any of the designated goods, wares, and merchandise from the foreign country with which such treaty has been made shall, during the period provided for, be the duties specified and provided for in such treaty, and none other.

Mr. VEST. The words "by and with the advice and consent of the Senate" have been interpolated since this amendment was printed, and I was out of the Senate at the time it was done.

Mr. MILLS. I desire to say, further, that the President and the Senate can not by treaty contract away the revenues of this Government without the consent of the House of Representatives.

Mr. SPOONER. We do not try to do it by this amendment.

Mr. VEST. As a matter of course, the amendment which the Senator from Iowa has added to the printed amendment answers to some extent the objection which I had made, but the Senator from Texas [Mr. MILLS] states another very serious objection, and that is, can the Senate of the United States, or can Congress, take the taxing power, the power to regulate the revenues of the Government, entirely away from the House of Representatives? Can we by any legislation abolish the revenue power of the House of Representatives? The framers of the Constitution were particularly anxious to preserve the feature that all revenue bills should originate in the popular branch of Congress.

Mr. WHITE. Mr. President, if the Senator from Missouri will permit me, this Government in the Hawaiian treaty did that identical thing; and when the matter of abrogation was referred to the Finance Committee of the Senate in 1883, if I recollect aright, in a minority report of the committee, signed by Senators ALDRICH, Voorhees, and MORRILL, the position now taken by the Senator from Missouri was adopted by the gentlemen then constituting the minority of that committee; but the Hawaiian treaty did that very thing. I am not speaking of the policy of it, but simply the practice. I think it is a very poor practice.

Mr. MILLS. The Ways and Means Committee of the House of Representatives took the same position, and refused to ratify the treaty.

Mr. ALLISON. If the Senator from Missouri will allow me, if he will scrutinize this amendment a little more closely he will see that this is a legislative provision which limits the treaty-making power between 1 and 20 per cent of duties that are levied upon goods.

Mr. WHITE. If I do not interrupt the Senator from Missouri too much, let me suggest to the Senator from Iowa that if the treaty-making power has jurisdiction over this matter at all, it is not subject to legislative limitation.

Mr. ALLISON. But, Mr. President, if the Senator from Missouri will yield to me just a moment more, the criticism the Senator from Missouri now makes is that it is not within the power of the President and the Senate to make treaties which will change the law as to the rates of duty; that that is a legislative power. We can do that certainly at one time as well as at another, and we propose to do that now in this bill, so that when the treaty-making power shall have been exerted, the legislative power gives the authority to provide a change of these duties, which shall become operative when the treaty is operative.

Mr. SPOONER. It provides it itself.

Mr. ALLISON. It provides it itself, and it is a law.

Mr. HOAR. If the Senator from Missouri will allow me to state to him a proposition for his consideration——

Mr. VEST. Yes.

Mr. HOAR. Is not this simply an enactment by the National Legislature that whenever a certain treaty shall have been made a certain law shall take effect and be in force?

Mr. ALLISON. That is well stated by the Senator from Massachusetts.

Mr. VEST. I hardly think so, Mr. President.

Mr. LINDSAY. Just the reverse.

Mr. VEST. Here is a proposition, as I understand it, in the first place to exercise the treaty-making power, and, in order to obviate the first objection I made, the Senator from Iowa has amended his amendment so as to put in the ratification of the Senate. That, as a matter of course, is a resort to the treaty-making power. Now it is attempted to go further and to meet the other objection as to the revenue power of the House of Representatives by resorting to the legislative power of Congress, or both Houses conjointly with the approbation of the President. It seems to me that the limitation here as to 20 per cent does not change the argument at all. If the principle which I have announced be a correct one, then it does not matter at all in regard to the amount of revenue that is to be affected.

But, Mr. President, I was proceeding to say, and intended to say, that even if there be no legal, constitutional objection to the exercise of this commercial treaty-making power—for I take it that is what it is, although now the legislative power of the House of Representatives has been interpolated as an auxiliary agent—even if we have the unquestioned power, I believe that it would be absolutely nugatory under existing circumstances.

I do not believe that after a declaration of commercial war, such as we make in the pending bill when we have put duties up to 57 per cent higher than the McKinley rate, higher than any tariff ever enacted in any civilized country—when, in the face of treaties made by Japan, by Germany, and by the South American States, whose trade we have been exceedingly anxious to obtain—when we have done this in the face of their protests, I do not believe that we can wipe it all away by reciprocal treaties.

The principal delegate from the Argentine Republic, in addressing the Board of Commerce at Cincinnati the other day, declared that his country would make no reciprocal treaty with the United States if this tariff bill should be enacted; and he used the words which I used a few minutes ago: "It is a declaration of war. You have put a duty upon wool; you have put a duty upon hides; and you now come to us and want to make a reciprocal treaty in the face of this declaration of commercial war placed upon your statute books." Do you believe that Germany and Japan will make any reciprocal treaty with this country, when we have assailed directly and conspicuously every interest which they have commercially?

Mr. President, we have had a peculiar history in regard to this matter of reciprocity——

Mr. HOAR. May I ask the Senator how this bill assails the Argentine Republic by a duty on hides or wool any more than the bill framed by the Senator three years ago assailed Cuba or Spain by a duty on sugar?

Mr. VEST. I think that bill did—that is my answer to that—and Spain so considered it.

Mr. HOAR. I did not ask how Spain considered it. I asked the honorable Senator to distinguish——

Mr. VEST. I will answer the Senator, in the language of the delegate from Argentina, that their principal interests were in selling to us their wool and their hides, and we have put a duty upon those articles.

Mr. HOAR. The principal interest of Cuba was selling sugar to us, and you put a duty on that article.

Mr. VEST. Nobody who voted for that duty upon sugar pretended that we were then doing anything to secure the good will, commercially, of Spain or of any of her colonies. If, in order to pass the balance of the bill in 1894, we were willing to put the duty upon sugar which was imposed, that was a question of adjustment. We assumed the responsibility and did not shirk from the consequences.

I am now talking not about a theory, but a status, a condition. I am quoting from the representatives of these very countries as to how they look upon this tariff bill and what are the chances now of friendly commercial treaties with those people, all of whose interests we have attacked. Whether we are right in attacking them or not the Republican party will defend before the people of the country hereafter. We shall not evade that issue, but, on the contrary, I am prepared to say that we shall welcome it. I am talking now about a status, a condition, a consequence of what we shall have done when this bill is enacted.

Mr. President, we have had rather a strange history in regard to this reciprocity question. In 1890 Mr. Blaine, who was then Secretary of State, inaugurated a plan for reciprocal relations with all the countries of the American Continent. The senior Senator from Maine [Mr. HALE], who I see before me, introduced into the Senate an amendment to the McKinley bill, which he said at the time was drawn in the State Department by Mr. Blaine, and that provided for reciprocal relations with all the countries, as I have said, of the Western Hemisphere, and of course included Canada.

The very minute that that amendment was introduced the tocsin of war was sounded in New England, and the New England Senators said, "You can not put any such amendment as that in this bill, because it is inimical to the interests of the New England States," or words to that effect. The amendment was referred to the Committee on Finance, of which the Senator from Rhode Island [Mr. ALDRICH] now absent was a conspicuous and active member, and he drew what is known as the Aldrich amendment, found in the McKinley Act of 1890. That amendment struck out Canada, and provided that reciprocal relations should be had alone with the American countries south of us. That was the provision of the McKinley Act. This amendment is better in that regard.

Mr. HALE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Maine?

Mr. VEST. Certainly.

Mr. HALE. I recall the circumstances very plainly, as there was some controversy and considerable newspaper discussion upon the amendment originally introduced by me, which was prepared in the State Department by the then Secretary of State, Mr. Blaine, as being antagonized by the Aldrich amendment. I know that the then Secretary of State was very keenly interested in the passage of the Aldrich amendment; he was in no degree hostile to

it, and was greatly gratified when it passed, although it passed by a close vote in the Senate. The matter was discussed here on the floor. I took some part in the discussion, and stated then that the amendment which I offered was not in any degree considered as perfect.

I may say further, bearing upon what the Senator from Missouri has just stated, that there never was any intention of applying the provisions of the amendment to Canada. I never so intended, and did not consider that its provisions included Canada.

Mr. HOAR. The Senator will allow me to refresh his recollection. I remember very distinctly that he used the phrase, when introducing the amendment, that it was "a skeleton amendment."

Mr. HALE. Yes; it was not intended as much more than what may be called a blazing the way for a reciprocity provision; and when it was considered fully by the committee, and the amendment was reported and passed by almost a tie vote here, it was considered thoroughly satisfactory, both by those who supported the bill and the Secretary of State; and I know that in introducing the amendment I considered that the Aldrich amendment carried out the main proposition which was intended when I originally introduced the amendment. There was no antagonism between the two.

Mr. LINDSAY. Will the Senator permit me to ask him a question?

Mr. HALE. Yes.

Mr. LINDSAY. Why was not that amendment intended to apply to Canada as well as to the South American countries?

Mr. HALE. Mr. President, the conditions that apply, for instance, to southern countries, of producing things which we do not produce, or of our sending to them those things that they do not produce, in no degree apply to Canada. Precisely the reverse condition applies to Canada. She competes with us at our doors, in our very lines of production; and it never was intended, it never was for a moment thought of—I would not for a moment have considered or harbored the idea—that the reciprocity feature was to apply to Canada.

Mr. LINDSAY. I understand this proposed amendment does apply to Canada.

Mr. VEST. Of course; it applies to any country.

Mr. TURPIE. I inquire of the Senator from Maine whether, in relation to Canada, the exclusion of that country was not largely influenced by the fact that we had negotiated a reciprocity treaty with Canada, concluded for twenty years and in operation for five years, which was terminated by notice from the Government of the United States at the end of five years, for the reason that it had been during all the time of its operation a dead loss to the interests of our own country? Was not that one of the reasons why Canada was not included in the reciprocity arrangement of which the Senator from Maine speaks?

Mr. VEST. Mr. President, I will ask the Senator from Maine, if he has no objection, whether the amendment which he brought here in 1890 as coming from the State Department did not authorize the President to make his proclamation of reciprocity with all countries of the Western Hemisphere?

Mr. HALE. But not to all provinces or dependent people in all countries. I never held nor believed that that amendment would apply to Canada. It was to apply to independent countries, and Canada is a dependency. We can make no treaty with Canada. We can make reciprocity treaties with the Argentine Republic, with Brazil, with Guatemala, with Mexico, and other independent countries. The whole theory of the amendment was to make reciprocity treaties with such countries. You can not make a treaty with Canada. It is not a country with which you can make a treaty, and therefore it was not included in the original proposition.

Mr. VEST. Mr. President, I hold in my hand a speech which I made in 1890 upon this question, to which I refer for the purpose of refreshing my memory, and I see that I quote in it the two amendments which were proposed by the Senator as coming from the State Department, and then the Aldrich amendment, as it was known, which is the third section of the McKinley Act. I stated then upon the floor of the Senate:

> The most superficial examination of the two amendments will show the radical and irreconcilable difference.
>
> The original amendment opens the ports of the United States to all products of any nation of the American hemisphere on which no export duties are charged, so long as such nation admits free of all duties the articles of American production and manufacture named in the amendment.
>
> The Aldrich amendment confines reciprocity to countries producing and exporting sugars, molasses, tea, coffee, and hides, and leaves the President to determine whether the duties imposed by such countries, including export duties, are reciprocally unjust and unreasonable.

Now, if it is necessary, these two amendments can be placed in juxtaposition, and they will fully carry out the statement I made then and repeat now. For the first time to-day I have heard from the Senator from Maine that it was not intended to include Canada.

Mr. HALE. Does the Senator remember the language of the proposition?

> And the President of the United States is hereby authorized, without further legislation, to declare the ports of the United States free and open to all products of any nation of the American hemisphere.

Mr. VEST. It is very well known that Canada makes her own tariff laws.

Mr. HALE. You can make no treaty with Canada. She is not a nation, and therefore could not have been included.

Mr. VEST. As a matter of course, while Canada might not in her own name have made a treaty with this country, it is very well known that a request from the Canadian Parliament to the effect that they desired to make such a treaty would be respected and carried out by the mother country. The duties imposed to-day in Canada are just as much imposed upon the mother country as upon the United States or any foreign country.

It seems to me, respectfully, simply an evasion to say that that was the meaning of the first amendment that was brought here in 1890. Mr. Blaine never pretended that he put any other construction upon it but that Canada was included. It is true that he afterwards accepted, if not with alacrity, with composure, the modification made by Mr. ALDRICH, because it was better than nothing. We all remember what occurred here.

Mr. HOAR. Will the Senator allow me to interrupt him a moment?

Mr. VEST. Certainly.

Mr. HOAR. Shortly before that proposition of Mr. Blaine's was presented I visited him at the State Department with a very eminent and intelligent Canadian, and Mr. Blaine took down the old reciprocity treaty, which had been abolished, and took the list of the articles and the amounts thereof which were introduced from Canada into this country under it, and showed how those articles consisted wholly, or nearly wholly, of articles that we produced, so that Canada was our competitor, and in my presence he showed this gentleman how impossible practically reciprocity between this country and Canada was. The gentleman went there to talk on the subject, and that was the answer given in my presence.

Mr. VEST. I have no disposition to question the accuracy of the statement made by the Senator from Massachusetts, but I will ask the Secretary to read a statement made in the Senate in 1890 by the senior Senator from Maine [Mr. HALE], to show his construction then of this matter.

The Secretary read as follows:

> As some attempt has been made to show that the original reciprocity amendment received rude treatment at the hands of the Senate, and that its original authors were not considered in the legislation of Congress, I may state here that, after the changed condition resulting from the repeal of nearly all of the sugar duty, the Aldrich amendment was heartily accepted by the friends of the original amendment in the Senate, by the Secretary of State, and by the President. The basis of the original amendment was the retention of the sugar duty till reciprocal treaties could be negotiated. When that basis was changed and the repeal became a fixed fact, it is difficult to see what other plan than the Aldrich amendment could be devised.

Mr. VEST. It is pertinent, unless there was some special object in making the change to the Aldrich amendment, to inquire why it was done. If the original amendment did not include the countries of the Western Hemisphere, including Canada as a country—if that was not the meaning of it, why was it necessary to make the change to the Aldrich amendment and interpolate that in the bill instead of the original amendment?

Mr. HALE. I remember that at the time there were persons, like the Senator from Missouri now, who raised that question, and in order to make it absolutely certain the Aldrich amendment was drawn and duly considered, which met with no hostility from the projectors of the original amendment, but their hearty and earnest support, and left it entirely clear; as I repeat here with emphasis, it was the intention of the original amendment that Canada should not be included in the reciprocity.

Mr. VEST. Whatever may have been the intention, that was the construction put by the country upon the amendment at the time. That was the charge made in the Senate and in the House of Representatives.

President McKinley was then chairman of the Ways and Means Committee of the House. Mr. Blaine appeared before the committee and urged reciprocity, urged the amendment which he had drawn, and which was afterwards introduced in the Senate by the senior Senator from Maine. The amendment was not received in a friendly or hospitable spirit by the Ways and Means Committee of the House. It was rejected upon the ground principally, alleged by the father of protection in the Senate, the Senator from Vermont [Mr. MORRILL], and by Senator Evarts, of New York, that the new doctrine of reciprocity was an innovation and an attack upon the general high protective system of the country.

We all remember the dramatic scene that occurred in the room of the Committee on Appropriations of the Senate, when Mr. Blaine made his unsuccessful trip to the Ways and Means Committee

room in the House of Representatives and on his way back, filled with disappointment and chagrin at the failure of his mission, stopped in the committee room of the Committee on Appropriations of the Senate. Ex-Senator Blackburn, of Kentucky, was in the committee room at the time, with the Senator from Iowa [Mr. ALLISON] I believe, and there was a dramatic account in the papers of the country of what transpired at the time when Mr. Blaine related his unsuccessful attempt to secure reciprocity in the House bill, and, as the papers stated and as eyewitnesses have stated in my presence, in his mortification and rage seized his hat and smashed it on the table, saying the bill would not open a market for an additional barrel of flour or a pound of meat, referring to the bill as it was drawn up in the House of Representatives.

Afterwards, representing the State Department, my friend the senior Senator from Maine introduced the amendment which we have discussed here this morning. It was not acceptable to a majority of the Finance Committee, the Republicans then controlling the Senate, and the Aldrich amendment was brought in as a compromise. As I said before, it was accepted by Mr. Blaine because it was claimed it was the best that could be done.

But, again, our experiment with reciprocity as far as it went under the McKinley Act up to 1894, from 1890, was not successful. I have before me the official report of Mr. Worthington C. Ford as to the operation of the reciprocal arrangement, as it was termed, with the countries with which we had those treaties, first, from 1885 until 1890, before the treaties were made, and the increase in exports to all the countries of South America. During the time from 1885 until 1890, and it is the exports in which we are interested and not the imports, the increase amounted to 40.22 per cent. In 1890 the third section of the McKinley Act was enacted which contained the reciprocal feature, and from 1890 until 1894 the increase in the exports from this country to those countries amounted to only 22.55 per cent, or about one-half.

Here we have now an official and a mathematical statement as to the result of reciprocity. If it be true that these reciprocal commercial treaties will bring to us a large export trade with those countries, why was there not such an increase from 1890 to 1894, when we repealed the reciprocal features of the McKinley Act? Why was it that without those reciprocal treaties from 1885 to 1890 our export trade increased 40 per cent and more against 22 per cent under the reciprocal treaties?

Mr. President, we are attempting to fight successfully against the immutable laws of commerce and of nature. We are attempting to secure trade with South American countries by reciprocal treaties when we have no carrying trade, when our commercial travelers are not amongst those people seeking to know what they want and then fashioning our goods to suit those wants. Year after year our statesmen and politicians complain that the trade of South America goes by our doors and on to England. How does England command it? It commands it by superior enterprise, by immense superiority in the carrying trade. We have no carrying trade. It has dwindled down until it takes a microscope almost to find it. About 12 per cent of the commerce of the United States is carried in American bottoms.

A few years ago I was in Hamburg, the second great port of the world, destined to be the first. With the American consul I went around in his steam launch amongst the ships in the harbor. With 153 steam vessels in the harbor, the American flag was not on a single one of them. You can travel over the oceans of the world, and except upon a war vessel of the United States the Stars and Stripes are not to be discovered. Yet our Republican friends persist in their navigation laws year after year, as an African idolator worships his fetich, declaring that the system must be retained, while year after year our carrying trade is dwindling down, and the other great nations of the world, with their carrying trade, are taking away from us the commerce of these adjacent countries.

It would seem that nature had made the South American States commercially tributary to us. Propinquity and geography have made them our allies commercially, to say nothing of their political affinity, for they are Republics and we are the great exemplar Republic of the world. But their commerce goes by our doors in British ships and is carried to the ports of England, and the English drummers are found in the cities of South America discovering what those people need in the way of prints and cottons and manufactures and agricultural implements, even, of all kinds, and this trade is taken away from us.

Mr. President, I do not believe that this scheme will bring us the commercial relations which we seek to obtain. I do not believe that you can strike down the interests of every people with whom we come in contact and then administer to them this sugared dose of reciprocal commercial treaties.

Mr. LINDSAY. Mr. President, the pending amendment provides—

That whenever the President of the United States, by and with the advice and consent of the Senate, with a view to secure reciprocal trade with foreign countries, shall, within the period of two years from and after the passage of this act, enter into commercial treaty or treaties with any other country or countries—

Which treaties—

shall provide for the reduction during a specified period, not exceeding five years, of the duties imposed by this act, to the extent of not more than 20 per cent thereof, upon such goods, wares, or merchandise as may be designated therein of the country or countries with which such treaty or treaties shall be made as in this section provided for.

It also declares that the treaty may provide for the retention upon the free list of certain articles put by this bill upon the free list, and then that—

When any such treaty shall have been duly ratified, and public proclamation made accordingly, then and thereafter the duties which shall be collected by the United States upon any of the designated goods, wares, and merchandise from the foreign country with which such treaty has been made shall, during the period provided for, be the duties specified and provided for in such treaty, and none other.

Now we are told that this amounts to a law, and that when certain conditions provided for come about, then this law shall operate as to certain duties and no more shall be collected during the period of the existence of the treaty or that certain articles, for the length of time provided for, shall remain upon the free list, and that the treaties may provide that the reduction of duties shall extend over a period of five years, or that the particular articles shall remain upon the free list for the period of five years.

The Constitution gives no such power to the President by and with the advice and consent of the Senate. Then, if the President takes any such power, he must receive it in virtue of this act passed by the Senate and House of Representatives and approved by the President or passed over his veto. So we will have this state of case, that the legislative department of the Government will have conferred upon the Executive the power to make treaties he could not make under the Constitution, which treaties may provide that the revenues of the Government shall be controlled by their terms during a period not exceeding five years. If that authority can exist at all, it must exist in virtue of this act of the Congress of the United States; and if it be a power that can be enforced at all, it will rest upon an abdication, during the term of five years, by the two Houses of Congress of the right to legislate upon these subjects of taxation.

Suppose a treaty be made and ratified by the Senate, and next year the House of Representatives conclude that the rates of duties fixed in the treaty are insufficient to raise the necessary revenues, or that they operate to the detriment of the United States in some particular; are we to be told that the power of the House of Representatives to originate bills in regard to taxation and to provide for a different rate of duty has been taken away from the House; that the power reposed in the House by the Constitution has been successfully abdicated or abandoned by and through the mysterious process of such legislation as this?

I believe it was the tariff bill of 1833 which attempted to provide that certain descending rates of duty should prevail during a period of ten years. Mr. Clay was forced to admit that those provisions of the act were only morally, and not legally, binding, and it is known to the country that before the ten years had expired the provisions of the act had been utterly disregarded.

Here we are attempting to do that which could not be done in 1833—to clothe the President and the Senate with the power to suspend the constitutional functions of the House of Representatives and of the Congress of the United States during a period of five years.

If we had the power to do these things, we ought not to exercise that power. Why follow up this bill with provisions for reciprocity? Having turned our backs upon the business world, having made commerce almost a crime, why talk now about restoring natural conditions by a treaty?

We have brought distinguished men from the South American States into our country to consider our great resources, to become acquainted with the possibilities of the future. We entertained them at Philadelphia. We are taking them over the country, and I hold in my hand to-day a newspaper published in the city of Cincinnati containing a graphic picture of the scene which transpired on the Board of Trade of that city less than a week ago. This newspaper tells us that there was plenty of music and enthusiasm and speeches:

The large street flag of the chamber floated gayly in the breeze over the center of Fourth street, while another had been gracefully draped about the rostrum. In one of the archways separating the entrance from the floor proper hung a neat floral ornament. The word "Welcome" appeared in large letters upon a transparent sign, which was surrounded by a heavy frame of bright-colored flowers.

Chairs were arranged for their comfort, and the proceedings were opened by a speech from the president of the Board of Trade, which speech was responded to by the representative of the Argentine Republic, one of those South American countries which in the past has traded with the United States, and which country has bought from us two dollars' for every one dollar's worth of goods

we have bought from Argentina. What does this distinguished man say? Among other things, he said:

Allow me, gentlemen, to make a few remarks in regard to the Argentine Republic, which country I represent here. The imports from the United States to the Argentine Republic in 1896 amounted to the sum of $11,210,475. The exports from the Argentine Republic to the United States amounted to $5,401,963.

THE COMMERCIAL BALANCE.

The official figures show the difference in the commercial balance between your country and mine of $5,000,000 against the Argentine Republic. This balance is produced by the excess of importation from the United States to the Argentine Republic, and the small exportation from the Argentine Republic to the United States.

Now, your petroleum and your agricultural machinery are imported into our country free of duty, your pine wood paying a very small duty, and with us your Congress should have this in mind and treat the Argentine Republic with a certain amount of consideration; but, unfortunately, it has been to the contrary. The two principal products that we export to the United States are wool and hides. We have over 100,000,000 sheep, which produce every year about 250,000,000 kilos of wool, and this article has always been imported into the United States free of duty, the same as we import free of duty your machinery and your petroleum. But now the tariff bill has imposed a prohibitive tax upon our wool. We have been exporting to your country our hides during the past twenty-five years free of duty, but now you have taxed them with 1½ cents per pound, and you can not consider how much this duty will affect our trade when you think we have over 22,000,000 oxen.

On the very day that speech was made by the guest of the country, the Senate was engaged in increasing the duty on hides from 1½ cents per pound to 20 per cent ad valorem, which I understand amounts to a duty of 3 or 4 cents per pound.

The speaker, continuing, said:

We have been treated in an unfriendly manner, and at the same time you submit to us the idea of a reciprocity treaty. I am very sorry to say that under these circumstances the statesmen of the Argentine Republic will not accept any kind of treaties, not only for certain reasons that you can easily understand, but because our productions are exported free of duty to England, France, Germany, Belgium, and Italy, and we receive from Europe all the goods we require, all the capital that we need for our commercial development, and all the immigration necessary to populate our extended territory.

That is the first response we get from South America, from the one country in South America where the balance of trade is in our favor, to the reciprocity clause of this most extraordinary bill.

The Senator from Maine [Mr. HALE] says that in 1890 Canada was not intended to be included, and all during the past two months we have been engaged in the business of excluding the products of Canada from consumption by the American people. Canada is another country where the balance of trade is in our favor. The statistics show that $100,000,000 worth of trade between Canada and the United States was had during the year 1896, and that $33,000,000 covered our imports, while we sold to the Canadians $66,000,000 worth of our goods.

We are to bring prosperity back to the country, we are to build up our commerce, we are to enlarge our merchant marine through a bill like this, and we are told every day that prosperity was broken down, that the country was ruined through the provisions of what is called the Wilson-Gorman bill, which the other side omit no opportunity to denounce as a measure of perfidy and dishonor.

It is a little remarkable that under the operation of the Wilson Act last year——

Mr. HOAR. I am not sure that I understood the Senator from Kentucky. Does he claim that the phrase "a measure of perfidy and dishonor" applied to the Wilson bill is of Republican origin?

Mr. LINDSAY. I did not claim that it originated with the Republicans, but what I do say is that during all this discussion the Republicans have rolled it as a sweet morsel under their tongues.

I do not represent a manufacturing State. The gentlemen across the aisle have the manufacturing interests in their exclusive control. I cut out of the Manufacturer, a Philadelphia periodical devoted to the interests of the manufacturing people, an article which I will now read to the Senate. This is a Republican statement of manufacturing conditions as they exist under the provisions of the Wilson Act:

The figures giving the export trade of the United States for April have just been compiled by the Bureau of Statistics of the Treasury Department. They are again full of encouragement for our manufacturers. During the month we exported manufactured goods to the value of $24,014,318, or 31.56 per cent of the total exports of the month. The manufacturing industries have been advancing month by month in comparison with the farms and mines, the sale of whose products abroad can not keep pace with the great export movement in manufactured goods.

The figures for the ten months ending with April are no less striking. Manufactured merchandise during this period was sent abroad to the value of $224,023,016. Although the percentage is not so great as in the case of the single month, manufactures represent 25.35 per cent of the total exports for the period. Evidence accumulates of the growing popularity of American goods abroad. The enterprise of our manufacturers and merchants in placing them upon foreign markets is compelling the admiration of the world, and the statistics, as they are issued each month by the Government, attest fully enough to the success which this nation is so rapidly achieving in the foreign trade.

The exports of manufactured goods for the fiscal year ending 30th of June will exceed $270,000,000, which is more than was ever exported in any one year under any preceding tariff law.

The pending bill is intended to break down the sale of American manufactured goods in foreign countries and to compel the American people to support the manufacturers of the United States and to abandon this foreign trade. All that we get for the monstrous duties to be levied upon every character of foreign product, all we get for all the pains taken to break down barter with foreign countries, is this unconstitutional provision in the way of a reciprocity clause, which provides, if it provides anything, that, in order that it may be carried out, the House of Representatives, the Congress of the United States, shall be compelled, at the election of the President and the Senate, to abdicate their constitutional power to legislate upon the subject of taxation.

Mr. PETTUS. Mr. President, it seems to me that the proposition announced by the Senator from Texas as an objection to the power of legislation to enact this provision ought to be maturely considered before it is enacted. The power of Congress to make laws no one disputes, provided it is done inside of their delegated authority. No one disputes that the subject of the levying of duties is inside of that power. But it is the Congress that has the power to enact these laws, and it seems to me that the Senator from Texas has the right theory.

The Senator from Massachusetts makes an exception, and it is a well-known exception. We all recognize it. Congress could enact a law which was to terminate upon a certain fixed event. There is no doubt about that. Lawyers would not dispute it. Congress could enact that sugar should pay a tax of 5 per cent ad valorem so long as the United States owed any bonded debt, but that when the bonded debt was paid then the duty should cease. That is entirely a different proposition from the idea that Congress could invest other people with the right to change its laws. It is a different idea altogether. A law, as I have said, can be so framed as to terminate or change on a certain event to happen in the future, but that is an event fixed by the law itself; it does not depend upon the will of another. It is a thing to occur, and when it occurs then the law changes according to its own terms.

Now, what do you propose to do here? It is always best to simplify a law question in order to understand it clearly. I will illustrate what you propose to enact by an example. We levy a tax of 4 per cent ad valorem on hides imported into the United States, but we provide that whenever the President of the United States and the Senate shall see fit they may by treaty repeal that law and put hides on the free list. That is the sum and substance of this provision, except that it goes to all other things.

But I am confining it now to hides merely for the purpose of illustration. You enact that the President and the Senate combined may make a contract by which that law is repealed, and instead of putting a duty of 4 per cent on hides, they shall put hides on the free list. They can not do it. The Constitution of the United States vests the President and the Senate with no such power. The Congress can do it, and nothing but the Congress. Do you propose to repeal a law by the will of anybody less than Congress? No, Mr. President, so long as the Constitution stands the Senator from Texas in a single sentence announced what is necessarily the right conclusion in reference to this enactment.

Mr. MORGAN. Mr. President, if I believed with my colleague that there was any constitutional difficulty in voting for this amendment, I would not hesitate to vote against it, although I think I can see in the amendment itself a possible advantage, probably a very great advantage, to the commerce of the United States, particularly with the Orient and with South America and Central America.

When the McKinley bill was before the Senate and that reciprocity provision was in it, I made—but of course not in so clear a way as the Senator from Alabama [Mr. PETTUS] and the Senator from Texas [Mr. MILLS] have stated it—an argument against the constitutionality of that law based upon exactly the same predicate that the Senators advance at this moment.

I never felt more certain about anything, and scarcely ever felt more indignant about what I conceived to be a violation of the Constitution of the United States, than I thought was found in the McKinley reciprocity provision. The matter went to the Supreme Court of the United States in the case of Field against Clark, in 143 United States Reports, and I found myself in a minority, a very honorable minority, the Chief Justice and Justice Lamar, of Mississippi, the balance of the court deciding that my point was not well taken. They held in that case, as will be the fact here, that upon the occurrence of a certain event, to be determined in that case by the President of the United States, the rate of duty should be changed, and certain goods should either be put upon the free list or put under taxation, according to his judgment of the tariff policy of China Japan, Brazil, etc., as he might think or believe that that policy was in derogation of our rights, or in a spirit of hostility toward us, or that it was not fair and just, considering all of our relations under tariff laws with those powers.

The Supreme Court, in the case that I have mentioned, decided that the President of the United States could be invested by Congress with the power to decide when those events had occurred.

He had a very large latitude of discretion in making the decision. The subject that came to his attention in arriving at his conclusions under that law was of a judicial rather than a ministerial character, because he had to pronounce not only upon the existence of certain facts, but upon their bearing and effect upon the commerce between other countries and the United States. Notwithstanding that near approach to putting within his hand the power to repeal the statute, as I contended, the Supreme Court held that there was no such operation of that law at all; that when that law spoke in accordance with the decision arrived at by the President, as announced in his proclamation, it spoke from the act itself and not from any act performed by him to change the law in any particular; that the law spoke throughout the whole transaction, and only the law, and that the President of the United States did not in the slightest degree change the law; he merely decided that upon a certain state of facts the law was or was not operative.

The third section of the act of October, 1890, is as follows:

That with a view to secure reciprocal trade with countries producing the following articles, and for this purpose, on and after the 1st day of January, 1892, whenever and so often as the President shall be satisfied that the government of any country producing and exporting sugars, molasses, coffee, tea, and hides, raw and uncured, or any of such articles, imposes duties or other exactions upon the agricultural or other products of the United States, which, in view of the free introduction of such sugar, molasses, coffee, tea, and hides into the United States he may deem to be reciprocally unequal and unreasonable, he shall have the power and it shall be his duty to suspend, by proclamation to that effect, the provisions of this act relating to the free introduction of such sugar, molasses, coffee, tea, and hides, the production of such country, for such time as he shall deem just, and in such case and during such suspension duties shall be levied, collected, and paid upon sugar, molasses, coffee, tea, and hides the product of or exported from such designated country as follows, namely.

And then it goes on to make the rates of duty. The Supreme Court say in regard to that act:

That Congress can not delegate legislative power to the President is a principle universally recognized as vital to the integrity and maintenance of the system of government ordained by the Constitution. The act of October 1, 1890, in the particular under consideration, is not inconsistent with that principle. It does not, in any real sense, invest the President with the power of legislation.

For the purpose of securing reciprocal trade with countries producing and exporting sugar, molasses, coffee, tea, and hides, Congress itself determined that the provisions of the act of October 1, 1890, permitting the free introduction of such articles, should be suspended as to any country producing and exporting them that imposed exactions and duties on the agricultural and other products of the United States, which the President deemed—that is, which he found to be—reciprocally unequal and unreasonable.

Congress itself prescribed in advance the duties to be levied, collected, and paid on sugar, molasses, coffee, tea, or hides, produced by or exported from such designated country, while the suspension lasted. Nothing involving the expediency or the just operation of such legislation was left to the determination of the President. The words "he may deem" in the third section of course implied that the President would examine the commercial regulations of other countries producing and exporting sugar, molasses, coffee, tea, and hides, and form a judgment as to whether they were reciprocally equal and reasonable, or the contrary, in their effect upon American products.

But when he ascertained the fact that duties and exactions, reciprocally unequal and unreasonable, were imposed upon the agricultural or other products of the United States by a country producing and exporting sugar, molasses, coffee, tea, or hides, it became his duty to issue a proclamation declaring the suspension, as to that country, which Congress had determined should occur. He had no discretion in the premises except in respect to the duration of the suspension so ordered. But that related only to the enforcement of the policy established by Congress.

As the suspension was absolutely required when the President ascertained the existence of a particular fact, it can not be said that in ascertaining that fact and in issuing his proclamation, in obedience to the legislative will, he exercised the function of making laws. Legislative power was exercised when Congress declared that the suspension should take effect upon a named contingency. What the President was required to do was simply in execution of the act of Congress.

It was not the making of law. He was the mere agent of the lawmaking department to ascertain and declare the event upon which its expressed will was to take effect. It was a part of the law itself as it left the hands of Congress that the provisions, full and complete in themselves, permitting the free introduction of sugars, molasses, coffee, tea, and hides from particular countries should be suspended in a given contingency, and that in case of such suspension certain duties should be imposed.

The court then goes on to argue the subject at greater length, but that is as much of the opinion as it is necessary for me to read to justify me in my own belief in voting for this amendment so far as the constitutional question is concerned.

I can not find the difference in principle between the amendment proposed now and the decision of the Supreme Court as to the effect of the action of the President and the Senate in making a treaty of commercial reciprocity with any particular country within a certain given period whereby articles might be put upon the free list or the duty existing might be reduced 20 per cent—I suppose it means upon the value of the article.

If the President of the United States, acting alone, could lawfully pass upon the conditions of foreign commerce, as he was authorized to do under the act of 1890, and could form a judgment thereupon, whereupon the act taxing the various articles could be suspended absolutely, and if in doing that he did not repeal that statute, if in doing that he did not legislate at all, I can not understand why the President and the Senate, in the exercise of the treaty-making power, may not put this upon the footing of an agreement between the two countries, and why the act of Congress, if now passed, would not operate in advance to ratify and confirm a treaty and make it fully applicable to the subject.

I can not understand the distinction between the two cases, if one exists, and I have looked carefully to see if any distinction does exist, because I desire that this amendment shall pass. This tariff law contains enough now to astonish and almost to horrify me in respect to the injustice that it imposes upon the people of the United States, and also in respect to the open declaration of war against the commerce of the world. But notwithstanding I look upon it in that sense, and feel that it is justly liable to the objections which I have just expressed, I do not look at it as a mere red rag that I must run at every time a feature of it is displayed. If the Republican party in this Chamber and in the other House can put modifying provisions into this tariff bill which I think are for the benefit of the country, I will sustain them. I am bound to do that as a legislator on this floor.

It can not be said that commercial reciprocity upon fair terms with any country is disadvantageous to the United States, although the treaties, which were virtually conventions made under the act of 1890, were not sent to Congress for ratification or approval, and although the President had the right to select any article that we exported out of all our exports and make an agreement, if you please—not an actual agreement, but arrive at a consensus of opinion and action——

Mr. GRAY. I will call the attention of the Senator to the fact that the reciprocity clause in the act of 1890 did not contemplate a treaty at all.

Mr. MORGAN. I understand.

Mr. GRAY. It was merely a proclamation by the President, whenever he deemed the exactions of another government unequal reciprocally, that certain articles on the free list should be suspended from that list and that the duty which was provided by Congress in advance should be laid upon them.

Mr. MORGAN. My language is correct. I was not in the slightest degree in error, because I said it was not a treaty. I said it was a consensus of opinion, of action between two governments, which did not amount to a treaty or a contract or an agreement at all; and although the President of the United States could do that without presenting the subject to Congress for its approval or ratification, and the Supreme Court of the United States sustained him in it, yet in this case, when an actual agreement must be entered into and must be submitted to the Senate before it becomes operative, I think the guard and restriction is much more favorable to us than it was under the act of 1890.

Mr. GRAY. All I suggest is that the criticisms that lay against the provisions of the act of 1890 do not lie against this provision.

Mr. MORGAN. Very good.

Mr. PETTUS. I desire to call the attention of the Senator from Alabama to another feature which is not exactly in accordance with the decision the Senator has read. That law named the articles. It names what shall be done if the President elects. I am still of the opinion I was as to his power and as to our power to confer it. But suppose that decision to be the law and the President would have to act upon it until it is repealed. This is a provision for the reduction during a specified period not exceeding five years. That is uncertain. There may be, in the discretion of the President, from one to five years a reduction of all the duties imposed by this act to the extent not of 25 per cent, but of 20 per cent. He may reduce the rate 1 per cent, 2 per cent, 5 per cent, or 20 per cent. And then there is a further provision that he may put the articles on the free list. Is there no legislative power in all that?

Mr. MORGAN. Mr. President, I will deal with that proposition when I get to it. I had not reached it yet. I was trying to show that the power which was conferred under this amendment upon the President and the Senate is of the same nature as the power that was conferred upon the President alone under the act of 1890; and inasmuch as that power was held to be constitutional, this power I hold to be constitutional because I can not see that they are in the slightest degree different from each other.

Now, we desire, if I understand what the people of the United States ought to desire, as large a commerce as we can get with the outside world. We desire markets for our surplus products. There is scarcely one production that anyone can name of an ordinary or an organic character that the people of the United States do not produce in abundance and superabundance. We have a surplus for exportation of almost every production in the United States, and what we most want is a market in which we can exchange our surplus for the productions of other countries, not for money merely, but for the productions of other countries.

This amendment fosters that idea by enabling us to make concerted agreements with any foreign government in the world about any article that we put under taxation or any article that we do not put under taxation. So, with the consent of the Congress of the United States given in advance, the President and the Senate can negotiate commercial agreements with foreign countries which will be for the benefit of our home trade. Well, I like

that idea. I am very fond of it. I have never heard that the United States suffered any disadvantage even from the peculiar arrangements that were made by the President of the United States under the act of 1890; and while Congress was not informed from time to time of all these concerted arrangements between our country and other countries on these subjects, we were informed that quite a large increase in our commerce took place with those different countries.

It is very true that that law admitted the possibility of the President discriminating in favor of certain productions of the United States and against others. He might make an exchange with Brazil on the subject of coffee on the basis of our kerosene productions, and might omit the iron production or a great many other productions that we have in this country, to the disadvantage of those which were not preferred in the agreement. This act, however, takes that opportunity away from the President of the United States, and, with the consent of Congress, confers it upon the President and the Senate under the treaty-making power.

I do not consider, Mr. President, that these agents of the Government of the United States to enforce these laws have any discretion in the matter at all, except merely to suggest the political consent and make obligatory the contract between the United States and any foreign country with which the President may negotiate a commercial treaty of this character, provided two-thirds of the Senate shall vote to ratify and confirm it. That is caution enough; that is conservatism enough to answer, I think, the demands of the most timid man who will ever have to deal with this question. There is no legislation in that. If there is any legislation in that, then there was legislation in the act of 1890, notwithstanding the Supreme Court said there was none on the part of the President.

I am not undertaking, Mr. President, to repudiate or to get rid of a decision of the Supreme Court of the United States, even when it is made by a majority of but one of the judges; and here there were only two dissenting voices upon that bench, and they themselves concurred in all of this opinion except upon the point which I just now mentioned, and there were other very important points that were urged just as earnestly, and apparently upon as good foundation of argument, as the point in respect of the third section of that act.

Now I come to the question whether or not in passing this act we confer upon the Senate a new power. The Senate has the power to pass upon commercial treaties or treaties of every kind and character, and I have been always the jealous advocate of the exercise of that power by the Senate. I have always maintained that these diplomatic and commercial agreements which have had currency in the country, which have very often been approved and carried into effect without the assent or consideration of the Senate, are very dangerous, to say the least of it. The power is here conferring upon the President and the Senate the treaty-making power, which includes the power to make conventions and all manner of contracts with foreign governments, obligatory upon both. So I have been jealous of the exercise of that power.

Then, Mr. President, this arrives at an agreement between the United States, I will say, and Brazil as to the interchange of commodities which are produced in one country and are not produced in the other. I will take again kerosene and coffee. Coffee is not produced in the United States, and kerosene is not produced in Brazil, so far as I have ever heard. If the President of the United States sees that he can make an advantageous agreement with Brazil about a matter of that kind, then the question at once arises as to whether he has the power to make such an agreement. Well, he has not the power under the Constitution.

The question then arises, Can Congress confer upon him the power solely and exclusively to make a treaty or an agreement with Brazil with respect to commerce or in respect to anything else? You say, "No." Therefore it becomes necessary, in order to effectuate an agreement between Brazil and the United States, that the President and the Senate should act upon it. Here is no exercise of unconstitutional power; nor is it the exercise of a power conferred upon the President and the Senate by act of Congress; but it is an exercise of power conferred upon the President and the Senate by the direct language of the Constitution. So we are on perfectly safe ground up to this point.

When that treaty is made, it is a commercial treaty. We ask ourselves, Can any commercial treaty between the United States and a foreign country be made the supreme law of this land by the action of the President and the Senate alone? The answer is, No. The treaty itself is of such a nature as that it requires the assent of Congress to put it into effect. Then, have you the assent of Congress? I say it is in this act, and here it is. "But then the assent is given before the act is confirmed," says some critical gentleman, "and how can that be done?" Congress has as much right to give its assent in advance as it has after a contract has been made, because the President and the Senate can not bind Congress under this enactment except in the two particulars mentioned: One is a reduction of the duties upon imports from abroad not to exceed 20 per cent of the duty, and the other is to put a subject upon the free list that is now under taxation. I think that that demonstrates really that there is no fault in the action of Congress; there is no difficulty in the action of Congress in providing in advance and giving its consent in advance that an agreement or a treaty made under those limitations shall be effectual from the time of the ratification by the Senate and the issuance of the proclamation by the President which puts it into force and gives it publicity and makes it universally obligatory upon all the officers of the Government. So I can not see the difficulty in that case at all; but I can see, Mr. President, that very great advantage might come to this country from the reduction of duties upon the goods that we impose under this act or by putting many of the articles upon the free list that are contained in this act, and I admire the flexibility of this amendment, because it can be accommodated to the changing conditions or to the further experience of the people of the United States.

Shall I oppose this amendment upon the ground that it is in some direction or in some degree an approximation to free trade? Surely I can not, upon the principles which I advocate, predicate my opposition upon any such ground. Can the gentlemen on the other side oppose it on the ground that there is a reciprocal advantage? Certainly not. Their object is to get as much of the productions of other countries within the grasp of our people, or within their convenient use, as possible, and they think one of the ways to do that is to impose a high tariff duty upon goods within the United States, manufactured here, in order that their manufactories may be kept at work, and that they may be able thereby to send their surplus to foreign countries for traffic.

What means this law of rebate, about which my colleague [Mr. PETTUS] spoke the other day, which has been upon the statute book ever since the first tariff was enacted in this country? What is the general law of rebate? It is that any manufacturer can import from foreign countries any goods, any property that he pleases, any material whatever, raw material or in part manufactured. He can go on and complete it by manufacture and make out of it such a commodity as he chooses. He may have paid the full amount of duty when it came into the United States, or he can put it under bond and pay the duty if the article enters into consumption in our own country; or he may export the article and get a drawback of 90 per cent of all the duty he has paid.

What was the object of that law except to enable our mechanics and manufacturers to use their handicraft and their skill in sending their goods out to other markets to sell cheaper than they would sell them to our people? This encouragement has been given to this class of people from the foundation of this Government. I oppose it. I think it is an unjust and an unfair law. I think it gives advantages to certain classes of labor and occupations in this country at the expense of the people of the United States. Still we have no chance to repeal it. The Democratic party and the Republican party have alike adhered to it in every tariff bill that has been enacted, and have always upheld that provision.

Now, to get the benefit of that we ought to have the opportunity of making advantageous contracts with foreign countries that in the exchange of our productions, of whatever kind or character, we might get them reciprocally to send their goods to our market; and I can see nothing harmful in that to the people of the United States and nothing that impeaches my Democracy in the slightest degree. It is in the direction of free trade, and for that reason I want it.

Mr. GRAY. Mr. President, there is not only nothing that impeaches the Democracy of the Senator from Alabama [Mr. MORGAN] in voting for this amendment, but I think there is something in our records that goes to confirm the Democracy of some such measure as this, some amendment looking toward a little bit of free trade, for we recollect that in 1890 the very comprehensive reciprocity provision that was introduced in the first place by the distinguished Senator from Maine [Mr. HALE], said to have had its origin in the State Department, presided over by that distinguished statesman, Mr. Blaine, provided:

> And the President of the United States is hereby directed, without further legislation, to declare the ports of the United States free and open to all the products of any country of the American hemisphere upon which no export duties are imposed, whenever and so long as the government of such country shall admit to the ports of such country free of all national, provincial (State), municipal, and other taxes, flour, corn meal, and other breadstuffs, preserved meats, fish, vegetables and fruits, cotton-seed oil, rice, and other provisions, including all articles of food, lumber, furniture, and all other articles of wood, agricultural implements and machinery, mining and mechanical machinery, vessels or boats of iron, steel, or wood, structural steel and iron, steel rails, locomotives, railway cars and supplies, street cars, refined petroleum, or such other products of the United States as may be agreed upon.

Although that amendment was lost in the Committee on Finance, and in its place came out a sort of bastard reciprocity amendment, called the reciprocity feature of the act of 1890, it was offered in so many words by myself as a substitute for that

measure, and every Democrat in this Senate voted for it and every Republican voted against it. That was a large measure of free trade for this hemisphere.

Mr. President, I have no objection, but, on the contrary, I am anxious to kick as many holes in this tariff bill as I can. We will have surrounded ourselves by a barrier of commercial restriction when this bill becomes a law that will need to have daylight let through it, and wherever I can properly do so I shall be glad to aid in tearing down some part of that barrier and letting a little bit of free trade and free sunshine come in.

Mr. CHANDLER. Are you going to vote for this amendment?

Mr. GRAY. I am going to vote for this amendment, and that is the reason I have presumed to take a moment—I trust it will only be a moment—to explain why I shall vote for it.

I do not think this amendment is open to the objections that were made to the reciprocity feature of the McKinley bill of 1890, because in that case the provision allowing certain articles to come into this country free was to be suspended by the President whenever, in his judgment, he deemed that in any country the reciprocal relations were unjust or unequal; but in this case we merely provide in advance, as the Senator from Alabama has said, that whenever the President of the United States and the Senate of the United States in exercising the treaty-making power shall make a treaty with another country which shall be, in his judgment, advantageous to the United States—for, of course, he would not make it unless it was—

In consideration of the advantages accruing to the United States therefrom, shall provide for the reduction during a specified period, not exceeding five years, of the duties imposed by this act, to the extent of not more than 20 per cent thereof, upon such goods, wares, or merchandise as may be designated therein of the country or countries with which such treaty or treaties shall be made as in this section provided for; or shall provide for the transfer during such period from the dutiable list of this act to the free list thereof of such goods, wares, and merchandise.

Then we provide that upon said treaty being proclaimed only such duties shall be collected as are designated in such treaty.

In the first case in the reciprocity provision, so called, of the McKinley law, we undertook to say that the President might in effect—and that was the objection I had to it, and I voted against that part of it—that the President might transfer from the free list to the dutiable list certain articles, and might impose taxes upon the American people by way of retaliation upon a foreign country. But in this case we merely provide that when the treaty-making power of this country is exercised in a certain direction by legislation we will accommodate ourselves to it. This is not conferring upon the President any power. The treaty-making power resting in the President is conferred by the Constitution when it says:

He shall have power, by and with the advice and consent of the Senate, to make treaties.

That is the language used in the Constitution in conferring that power. There is not another word to limit it. So that the President and the Senate may make a commercial treaty of any scope whatever; and although the Congress of the United States may be unwilling to pass the legislation necessary to carry it into effect, the Congress of the United States can not limit or qualify the power given by the Constitution to the President and the Senate to make such treaties as in their judgment shall be wise and expedient.

Mr. WHITE. Will the Senator allow me?

Mr. GRAY. In a minute.

So, then, the President, having the right, without this amendment—and this amendment can not confer the right if he has it now—the President exercising the right given by the Constitution to make a commercial treaty, we merely provide, that having been done within certain limits, if it shall be of a certain character that legislation shall accommodate itself to it.

Mr. WHITE. If it be true—and I am not saying it is not for the purpose of the question—that the President and the Senate can negotiate a commercial treaty fixing the rates of duty, can Congress by any act limit the exercise of that power?

Mr. GRAY. They can limit it by refusing to carry it out. That might break the treaty, but nevertheless the President and the Senate have the power to make a treaty. We can not only refuse to carry it out, and thereby violate our faith with the other nation—and it might be so serious as to be a casus belli—but we repeal the treaty, and thereby break the treaty after it is made.

Mr. WHITE. The Senator from Delaware misapprehends me. My allusion was to the provision of this section limiting the reduction of duty to 20 per cent. The point I wished to attract the attention of the Senator to was this: That if the Senate has the power, with the President, in the exercise of the treaty-making authority, to negotiate commercial treaties, can this legislation limit any reduction which may be made to 20 per cent? May not the President and the Senate, without any action, in spite of any action even, put articles upon the free list?

Mr. GRAY. Certainly. I answer the Senator from California that the President and the Senate may, in the exercise of the treaty-making power, negotiate a treaty which reduces the duties more than 20 per cent or puts articles upon the free list that are not included in the scope of this amendment. But this amendment merely says that if the treaty-making power shall, in the exercise of its undoubted right, make a treaty with any country which shall not reduce the duty more than 20 per cent or shall not put other than these articles on the free list, then the rate of duty prescribed in that treaty shall be in effect and shall be collected.

Mr. CHANDLER. Mr. President——

Mr. GRAY. If the Senator will wait one moment until I finish my proposition, I will yield to him.

If the President and the Senate should make a treaty without regard to this amendment at all, it would be in the exercise of the power conferred by the Constitution. Congress may refuse, undoubtedly, as I said a moment ago, to carry that into effect; or if it does not need legislation to carry it into effect, inasmuch as treaties made by and in pursuance of the treaty-making power are a part of the supreme law of the land, the Congress of the United States may repeal that treaty, or any part of it—though by repealing it it might break faith, as it undoubtedly would in a great many instances, with the nation with whom it was made—the power rests with Congress, and can not be successfully disputed.

Mr. CHANDLER. The statement which the Senator has just made covers the point of the inquiry that I proposed to make, which was in substance this: By this act we say beforehand by legislation that a certain contract may be made by means of a treaty which affects duties for a certain number of years, or authorizes that contract, which may be broken by the legislation of the two Houses. Necessarily it would be a breach of plighted faith, but it can be done if we choose to break our faith pledged in the form of this contract. Is not that the whole substance of the discussion?

Mr. GRAY. I think so. I agree with the Senator there. I do not see why we have not the power, as the legislative branch of the Government, to declare by legislative act that duties designated in a treaty made under the treaty-making power of the Constitution shall be the duties as designated in the treaty. We have the power, immediately after the negotiation of such a treaty, of rescinding this act; we can repeal that duty; undoubtedly it is all in our hands; but for whatever this act is worth, we have a right to pass it, and I can not see why it is not entirely within the legislative power granted by the Constitution.

Mr. PETTUS. I desire to ask the Senator from Delaware a question. I ask if he believes that the treaty-making power includes the right to repeal a law of the United States enacted by Congress?

Mr. GRAY. That is a different thing and a different question. I believe that the treaty-making power conferred by the Constitution is without any express limitation. I believe that in the exercise of that power a treaty may be made the result of which will be the supreme law of the land until it is repealed by Congress, or expires by its own limitation, or expires by Executive authority.

Mr. MILLS. A treaty of peace would repeal a declaration of war.

Mr. GRAY. It certainly would.

Mr. President, I did vote and speak against the reciprocity clause in the act of 1890, but I did vote for the broad measure of reciprocity introduced by the Senator from Maine [Mr. HALE], which was supposed to have had its origin in the fertile and suggestive brain of the then Secretary of State, Mr. Blaine. I believe this amendment is not obnoxious to the criticism made against the former amendment, and therefore for the reasons I have stated I shall vote for it.

Mr. TELLER. Mr. President, I want to say a word or two as to this amendment. It is a very broad question, and one that presents to my mind many difficulties. The Senator from Delaware [Mr. GRAY] says that the treaty-making power is unlimited. That, I think, needs some qualification. The Supreme Court of the United States has declared that a treaty is the law of the land, and while it has hesitated somewhat to say that it is a legislative act, it has come very near that at least.

Mr. GRAY. The Constitution says it is the law of the land.

Mr. TELLER. The Constitution says it is the law of the land. The Supreme Court says it is a contract between the United States and the nation with which we make the contract, and that in this country it is a little more. It is a little more under our Constitution than it would be under the English constitution and the constitution of some other countries.

The Constitution of the United States, ex industria, puts the power to raise revenue in the House of Representatives, and I do not suppose that anybody will contend here for a moment that the House of Representatives can delegate that function to any other body. I do not suppose that anybody will contend that the House can subrogate its rights or that, because the House declines to act, we can originate revenue laws in this body. If the Senator from Delaware is correct, that there is no restriction whatever

upon the treaty-making power, it certainly is within the province of the Executive and the Senate to take away from the House the revenue-raising power by providing, when they provide for a system of revenue, for another, and thus nullify and abrogate their act.

Mr. GRAY. The Senator from Colorado will excuse me. I said there is no express restriction in the Constitution upon the treaty-making power.

Mr. TELLER. There is an express restriction upon the treaty-making power. The Constitution declares that the President, by and with the advice and consent of the Senate, may make treaties. What did the authors of the Constitution intend? Did they intend that we should make commercial agreements and call them treaties? In those days commercial agreements were unknown to the diplomats of the world.

The other day I heard some Senators discussing the question, and they said when you make a commercial treaty you do not need to submit it to the Senate. If that is true, then we could shear the legislative body, and the President of the United States could assume the power which is expressly and exclusively given to the House to raise revenue, and he could do it in spite of the House and in spite of the Senate. The President of the United States can make no treaty of any kind or character without the consent of the Senate. That is one of the objections I had to the arbitration treaty. In my judgment, the arbitration treaty, carefully prepared and for the express purpose of shearing the Senate of its constitutional power to pass upon such questions, had left out the provision that the Senate should pass upon treaties submitting questions of dispute to the arbitration board provided.

This is a very grave question. It is one that is worthy of a great deal of consideration, and it ought not to have been brought in here in the last days of the session. I desire to vote for an arrangement for reciprocal commercial relations if I can. In my judgment the wisest and best policy in this matter is to remit it to the legislative department of the Government in the end. Let the President of the United States negotiate the treaties. Then let the House of Representatives have its constitutional power to say whether this shears the legislative bodies of their power to raise revenue.

The most important function of government is that of raising revenue. A nation can not exist unless it has proper revenues. In these days the whole of the world is practically an armed camp. I know if I should say a word about the warlike attitude of the world, I should run counter to the public sentiment of this country, that we have reached the millennium, we have reached the period when the sword is to be beaten into plowshares and people are to learn war no more, but it is a notorious fact that never in the history of the world have so many men been tramping with guns on their shoulders.

There has never been a time when there were so many ships afloat, with all the destructive weapons of the age. There has never been a time in the history of the world when the burden has been so great upon the people who produce to maintain idle armies and worthless ships as to-day, and that being true, self-protection, self-defense, requires that every nation shall keep within its legislative hand the power to raise revenue, adequate and sufficient at all times, and in a free Government like ours that power can not be remitted to the Executive. It must be held by the people through their representatives. It is unrepublican and it is undemocratic to transfer to the Executive, even with the approval of the Senate, the power to nullify the acts of the people's representatives, a function which has been studiously and carefully given to them by the Constitution and withheld from every other branch of the Government.

Mr. President, should the committee in the closing hours of the bill, too long delayed in its passage, too long a cause of disorder in the commercial world, have brought here such a question and submitted it? It seems to me they should not. I desire to vote, I repeat, for anything that will enable us to get closer commercial relations with our neighbors, but it must be done in a constitutional way. It must be done in such a way that those who are entitled to provide the revenue and who are entitled to say how much or how little it shall be shall not be hampered, and the right of the nation to exist shall not be imperiled because of a difference of opinion between the Executive and the House, or between the Executive and the Senate and the House.

What condition would we be in if the Senate of the United States should conclude that we wanted no revenue from imports and the House should determine that we wanted a revenue system as you have in this bill, more than you ever had in any other bill in the history of the Government? What would be the condition of this country should we then be confronted with a necessity of immediate and large amounts of revenue for our defense or the maintenance of our Army or the maintenance of our national integrity?

The amendments submitted day before yesterday for the first time involve grave constitutional questions and great questions of policy, which ought not to be in the closing hours of a debate like this thrust upon us, and we ought not to be asked to take part in its consideration. If the Senator who has the amendment in charge will bring it within the rule I have laid down, that the legislative department shall be consulted and shall approve, then I am willing to vote for it, because I want, as I repeat, closer commercial relations, and I believe in them.

Great Britain can make a treaty of this kind through her council; she has not to submit these questions by the constitution to the Parliament; and yet Great Britain will not to-day make an effort like this without the approval of Parliament. We ought not to make it, and it is not any answer to say that the House indicated their intention or willingness to abandon their constitutional prerogative by the provision they sent here. That is not the question.

The question is, Can we safely remit the revenue-raising function to the President and one branch of Congress, when the Constitution studiously declares that it shall exist in both Houses, and that in the first instance the House of Representatives shall be the moving agency, that their judgment shall be first? Why? Because they were supposed to represent the people, while we represent the States. It is supposed that a body which comes fresh from the people every two years would be likely to handle this question better than the representatives of the different States.

If this provision is carried out without any action on the part of the House, it will be in the power of the Senate and in the power of the President to determine practically what shall be and how much shall be the revenue in this country.

Mr. CHANDLER obtained the floor.

Mr. PLATT of Connecticut. I should like to ask the Senator from Colorado a question before he leaves the subject.

Mr. TELLER. Very well.

Mr. PLATT of Connecticut. Does not the Senator think that this Congress, including the Senate and the House, can properly pass a law changing the rates in the pending bill upon the happening of a particular fact; and if so, can they not say that if this particular fact, namely, a treaty negotiated by the President and ratified by the Senate, shall take place, then the rates of this bill shall be different? Will not the House have exercised its power?

Mr. TELLER. No; it will not. It will have delegated its legislative power. It will have subrogated functions to determine in the first instance what shall be the duties and what shall be the revenue. It can not be done under our Constitution and under our laws, in my judgment, any more than you can delegate judicial authority and judicial functions. They may say that when sugar reaches a certain price per pound there shall be a duty of 1 cent a pound or 2 or 3 or 4 cents a pound, but that is a contingency which they provide for and anticipate and determine what shall be done when it is reached. They can not say we submit this question to the Executive mind, revised by the Senatorial mind, because they know nothing about what will be the Executive mind or the Senatorial mind. That is my answer to the Senator from Connecticut.

Mr. CHANDLER. Let me ask the question of the Senator from Colorado a little more fully. Does he maintain that it is not competent for Congress by law to authorize, within certain limits, a contract to be made by the President and the Senate with a foreign country that shall reduce the duties during a period specified upon goods, wares, and merchandise imported into the United States? Does the Senator say that such a contract can not be authorized by law of Congress because it is a surrender of the legislative power?

Mr. TELLER. Oh, no; I do not, and I have not said anything of the kind.

Mr. CHANDLER. That is all this provision is.

Mr. TELLER. I have said nothing from which that could be inferred. That is not the case. We could say here that the President of the United States may arrange with England that whenever England puts a duty of a certain class upon an article we will put the same duty upon it. We determine what that duty is. The legislative mind determines it. That is a very different case from one in which we say that the President, at his own will and at his own suggestion, without any action by the House or the Senate, shall fix the duties to suit himself, and if he can get the approval of one body of the legislative department, that it shall become the law. The case proposed is a very different case from that suggested by the Senator from New Hampshire.

Mr. CHANDLER. Let me ask the Senator if it really is a different case. By legislation a bargain is authorized to be made by the President and the Senate through a commercial treaty which affects duties within certain limits. It says within 20 per cent. Now, does the Senator say that it is a surrender of the legislative power for Congress beforehand to authorize a time contract within those limits?

Mr. TELLER. That is not what is proposed.

Mr. CHANDLER. That is exactly what is proposed.

Mr. TELLER. It is not what is proposed here. You propose to leave the whole question within those limits to the Executive and the Senate.

Mr. CHANDLER. That is what I say—those limits.

Mr. TELLER. You do not say the duty shall be a certain fixed duty. If you did, that would be the legislative act fixing the duty when the contingency provided for happened. I hope the Senator can see the distinction. If he can not, I will endeavor to make it a little clearer.

Mr. CHANDLER. I see the distinction, but it is very small. To say that Congress can by law authorize a commercial treaty of that kind, provided the law fixes the exact duties which the President may levy upon imported goods or may remove from imported goods, and yet can not give the President and Senate the discretion to make such a commercial treaty changing duties within certain limits, makes a very small distinction upon which the Senator attempts to found his claim that one act would be constitutional and the other act unconstitutional.

Mr. TELLER. Will the Senator from New Hampshire allow me to ask him a question?

Mr. CHANDLER. Certainly.

Mr. TELLER. What is the objection to submitting the commercial treaty to the House as well as to the Senate? I suppose everybody will admit that the Congress of the United States can make a commercial arrangement with another nation.

Mr. CHANDLER. The Senator from Colorado says it can not be done by authority given beforehand. It must all come back——

Mr. TELLER. I said nothing of the kind.

Mr. CHANDLER. It must come back to the House and the Senate, and the Senate and the House must pass upon every detail of it; otherwise one Congress is giving away the legislative power of another.

Mr. TELLER. That is what I say, that the Congress must ratify this kind of a treaty or else Congress must subrogate its duties and its rights in the matter. I desire to ask the Senator from New Hampshire what is his objection to submitting it to Congress? There must be some insurmountable objection from the way this matter is treated here. Is the Senator afraid of the House?

Mr. CHANDLER. The Senator did not ask me a question. He made a speech at me.

Mr. President, I call the attention of the Senator from Colorado to the fact that the Senate amendment is a substitute for a House provision. The Senator has complained of the Finance Committee for bringing in the amendment at this late day. The Senator at his home in Colorado for six weeks or two months had before him the provisions of the bill studying them, and he had section 3, which covers pages 191, 192, 193, and 194, before him and saw that the House of Representatives there proposed to surrender the power of making a commercial treaty to the President without even requiring such treaty to be approved by the Senate.

Now, the Senate Committee on Finance was confronted with that difficulty. The reciprocity clause of the act of 1890 did not provide for commercial treaties at all. It only provided that when the President was satisfied of a certain fact he might cause duties to be collected upon certain products at rates named, notably upon sugar, which would otherwise be free. But the fact that we have put a duty on sugar in the law now proposed has made it impossible to resort at this time to the old method of the law of 1890; so the House went on and authorized commercial treaties, adopted a new form of reciprocity by commercial treaties, and at great length inserted these provisions in the bill without any requirement that the Senate should ratify the treaties.

But the Senate committee have proposed a substitute for these long provisions of the House, to strike out which provisions a proposition has been pending for several weeks, and the substitute is a brief, concise, strong, intelligible, and, as I submit, an entirely constitutional provision of law.

Mr. LINDSAY. If the Senator from New Hampshire will permit me, I will suggest to him the fact that when the bill was reported back from the Finance Committee all of the reciprocity provisions were stricken out by way of amendment, and nothing was suggested in lieu of them until the pending amendment was presented.

Mr. TELLER. That is what I wanted to say.

Mr. CHANDLER. The Senator from Iowa distinctly gave notice of what he intended to do.

Mr. ALLISON. I wish to state that it has been said over and over again in this Chamber that these provisions were stricken out because we did not consider them effective for the purposes intended, and that during the consideration of the bill the Committee on Finance would present a substitute for these provisions. So the whole question has been before every Senator during the entire time.

Mr. CHANDLER. That statement was made two or three weeks ago.

Mr. LINDSAY. The substitute was not presented until yesterday, however.

Mr. ALLISON. Undoubtedly.

Mr. LINDSAY. And no one knew what it was going to be.

Mr. CHANDLER. The Senator from Kentucky knew it was coming. It is clear and concise, and the brilliant intellect of the Senator from Kentucky fathomed its depths in five minutes. He knows all about it—what it means and what it does not mean.

Mr. WHITE rose.

Mr. CHANDLER. Does the Senator from California desire to ask me a question?

Mr. WHITE. No, sir. I desire to make a few remarks in regard to this matter, if the Senator from New Hampshire has concluded.

Mr. CHANDLER. I was in hopes the Senator did. I was waiting for the Senator.

Mr. WHITE. I would if I did not not feel that I would be delaying the passage of this meritorious bill, which the Senator himself is now delaying.

Mr. CHANDLER. The Senator has a commendable anxiety to see this bill of prosperity and blessing take the place of the present law of perfidy and dishonor, and I sympathize with him; but there is required a few more hours' consideration of it.

The Senator from Kentucky complains that he ought to have seen this provision earlier. Within fifteen minutes after the Senator from Kentucky saw it he was on the floor making a learned exposition of it in opposition to the system of reciprocity proposed by the act.

Mr. WHITE. If the Senator from New Hampshire will allow me, I will retract what I said.

Mr. CHANDLER. I am delighted to hear the Senator.

Mr. WHITE. Is it the fact, I will ask the Senator, that the majority of the Committee on Finance, not having prepared the stamp-tax provision and desiring further consideration of the bill postponed, have requested the Senator from New Hampshire to take the time of the Senate this afternoon?

Mr. CHANDLER. No, Mr. President, they have not requested me to take the floor for that purpose. They asked me to take the floor to give attention to anything which the Senator from California might say that was worthy of notice, and nothing of that sort being before the Senate, I will go on with my brief remarks upon this important provision.

Mr. President, I am in favor of reciprocity provisions in tariff bills. I am a high protectionist, and I do not believe that duties once imposed should be stricken off lightly. But I am not to be deterred from supporting this amendment because it is supported by the Senator from Alabama [Mr. MORGAN] and the Senator from Delaware [Mr. GRAY], of a party opposite to mine. They say they are willing to have the duties of this bill reduced in this way, and so am I, because I am deliberately in favor of a system of reciprocal treaties with foreign countries.

I am in favor of improving and strengthening our commercial relations by specific arrangements with other nations, not only with the nations of the Western Hemisphere, but with the nations of Europe; and if this clause is adopted I expect great good to result from it.

There has been allusion here to-day to prospective difficulties with Germany growing out of the countervailing duty on sugar and other articles that have been imposed by this act. I am in hopes that the stress of such difficulties as may arise will be relieved by commercial treaties with Germany. I do not expect commercial treaties with England, because England is a free-trade country; but I do confidently expect that there will be commercial treaties negotiated under this clause, if it becomes a law, with the Republic of France.

That Republic is probably the most enlightened nation of the world in managing its trade relations with other countries. France is not a free-trade country, nor has she a rigid, unvarying system of tariffs. France is a nation of commercial treaties with other nations. Her system of relations with other countries is built upon special agreements with those countries. The French Executive, I think, has been given powers by the French Chambers to negotiate just such treaties as are provided for by the clause now under discussion. I do not believe that any constitutional impediment to such powers exists in France, because the French Chambers fix maximum and minimum duties; and within those limits—the Senator from Iowa will correct me if I am wrong—the duties are varied when France makes commercial arrangements with other countries.

Mr. ALLISON. I will say to the Senator that not only France, but Germany, Russia, Belgium, Holland, and, I believe, nearly every country of Europe has what are known as maximum and minimum rates and laws whereby within certain lines the proper council can reduce duties upon the products of other countries in consideration of the reduction of duties by other countries upon their products, and in that way Europe is to-day full of maximum

and minimum treaties affecting trade relations favorable to those countries with each other. This is in the same line and for the same purpose.

Mr. CHANDLER. The Senator has well stated briefly my whole idea. As I infer from what the Senator from Iowa has said, there is given in those countries to the Executive the power, within certain limits, to make reciprocal contracts with all the nations of the world, and that is the way those countries seek to build up their trade. The patriotic Senator from Alabama [Mr. MORGAN], who has studied the whole subject of our foreign relations, political and commercial, more carefully and fully than any other Senator in this Chamber, quickly perceived the advantages to this country to be derived from inaugurating in a new form, by a system of commercial treaties, the mutual adjustment of the respective tariff duties of other countries and of the United States, so as to vastly benefit our people and increase our trade.

Mr. President, I expect great good from this clause. I believe that the idea of reciprocity, which originated in these later days with Mr. Blaine, which was inaugurated in the McKinley Act of 1890, and which was unwisely struck down in the Wilson Act of 1894, will grow and strengthen until the principle is a part of the permanent policy of the United States.

As I said this morning in reference to the countervailing duty with Germany, for which I voted as a matter of necessity, but reluctantly, there are special reasons at this time why the Congress of the United States should show its willingness to negotiate on the most liberal terms with the European countries in connection with tariff duties.

Mr. WHITE. Mr. President, I agree with the Senator from Colorado [Mr. TELLER] that it is unfortunate that this grave feature of the tariff bill is brought before us now that we are so near the terminative of the revenue debate. There are certain matters connected with the proposition which are very interesting, and which should be dwelt upon with more care than it is possible at this late hour to bestow.

I do not agree with the Senator from Alabama [Mr. MORGAN] that this amendment offers a case similar to that presented by the act of 1890 with regard to reciprocity, and which was passed upon by the Supreme Court of the United States in the case of Field *vs.* Clark. On the contrary, it is my opinion that the theory upon which the judgment in that matter rested is sufficient to indicate that the same court would decide that the proposed provision is beyond our power; that we can not confer upon the Executive a discretion as to the extent of tariff imposition, and can not deprive either House of or permit either to escape from the inhibitions and delegations of the Constitution.

There are two aspects in which this matter may be considered—first, as to its efficacy with reference to the President alone; and secondly, what, if anything, is added to its legal worth by the interposition of the Senate as an element of authority? In the adjudication referred to by the Senator from Alabama, the Supreme Court said—I am reading from page 692, volume 143, United States Supreme Court Reports:

> That Congress can not delegate legislative power to the President is a principle universally recognized as vital to the integrity and maintenance of the system of government ordained by the Constitution. * * *
>
> Congress itself prescribed, in advance, the duties to be levied, collected, and paid on sugar, molasses, coffee, tea, or hides, produced by or exported from such designated country, while the suspension lasted.

Now, note the point. In the act of 1890 there was absolutely no discretion attempted to be conferred upon the President as to the amount of duties to be levied beyond this, that the Executive was authorized to ascertain a certain fact, to wit, whether there had been discriminations against the United States, and when he so determined, then the rates directly fixed and defined by Congress went into effect.

The President exercised no discretion as to those rates. No power was attempted to be conferred upon him as to the amount of tariff that should be levied. But this proposed amendment assumes to give to the President of the United States, and as amended assumes to give him, in conjunction with the Senate, authority to make and enact a tariff within certain limits. The reduction shall not exceed 20 per cent. Within that boundary, the President, or President and Senate, may do as may seem desirable.

> That whenever the President of the United States, by or with the advice and consent of the Senate, with a view to secure reciprocal trade with foreign countries, shall, within the period of two years from and after the passage of this act, enter into commercial treaty or treaties with any other country or countries concerning the admission into any such country or countries of the goods, wares, and merchandise of the United States and their use and disposition therein, deemed to be for the interests of the United States, and in such treaty or treaties, in consideration of the advantages accruing to the United States therefrom, shall provide—

Shall provide what?—

> for the reduction during a specified period, not exceeding five years, of the duties imposed by this act, to the extent of not more than 20 per cent thereof.

Therefore the President and the Senate legislate as to this duty. The peculiar tribunal thus sought to be created does not find a fact upon the happening of which a tariff rate prescribed by law becomes operative, but the amount of the duty is settled apart from the Congress. The finding of the precedent fact is not related to the going into effect of a law already made, but is the result of an Executive and Senatorial determination as to the extent of the tariff, if any, that ought to be imposed. Thus, as suggested by the Senator from Indiana [Mr. TURPIE], the Executive or Executive and Senate are to enact a new law. Is not this the delegation of legislative power?

What is the rate of duty to be fixed under this amendment in case the President of the United States and the Senate shall find it advisable to enter into a commercial treaty? Is there anyone here competent to state the rate that shall be prescribed? Under the act of 1890, which was sustained by a divided court, there was no difficulty in that regard. Upon the happening of the event a certain tariff imposition fixed by law went into full force and effect. A complete scheme was made operative as soon as the President found the fact regarding a discrimination.

In the same opinion the court proceeds in the very line which I am now examining, speaking of the President:

> Nothing involving the expediency or the just operation of such legislation was left to the determination of the President.

But here the President is given the right to say whether it is expedient that the duty shall be 19 per cent, or 20 per cent, or 16, or 12, or 10, or 8, or 6.

Mr. PETTUS. Or nothing.

Mr. WHITE. Certainly.

The court continues:

> The words "he may deem" in the third section of course implied that the President would examine the commercial regulations of other countries producing and exporting sugar, molasses, coffee, tea, and hides, and form a judgment as to whether they were reciprocally equal and reasonable or the contrary in their effect upon American products.
>
> But when he ascertained the fact that duties and exactions, reciprocally unequal and unreasonable, were imposed upon the agricultural or other products of the United States by a country producing and exporting sugar, molasses, coffee, tea, or hides, it became his duty to issue a proclamation declaring the suspension, as to that country, which Congress had determined should occur.

But no such condition is disclosed here, no suspension is declared upon the declaration of which a duty goes into full force and effect; but as soon as a particular status is found to exist, then the President or the President and the Senate consider and deliberate and exercise a discretion (a function purely legislative) and enact that the tariff shall be 2, 4, 6, 8, or 10 per cent, or anything within 20 per cent. If this does not involve legislation, where do you find legislation? If it is not legislation, it is because it is not legislation to pass a tariff law. This does not present a case showing a finding of a fact effectual to put into operation a law already written, but it suggests the power to make a law as soon as an antecedent fact shall be ascertained. The decision proceeds:

> He had no discretion in the premises except in respect to the duration of the suspension so ordered. But that related only to the enforcement of the policy established by Congress. As the suspension was absolutely required when the President ascertained the existence of a particular fact, it can not be said that in ascertaining that fact and in issuing his proclamation, in obedience to the legislative will, he exercised the function of making laws. Legislative power was exercised when Congress declared that the suspension should take effect upon a named contingency. What the President was required to do was simply in execution of the act of Congress. It was not the making of law. He was the mere agent of the lawmaking department to ascertain and declare the event upon which its expressed will was to take effect. It was a part of the law itself as it left the hands of Congress that the provisions, full and complete in themselves—

Let me repeat—

> It was a part of the law itself as it left the hands of Congress that the provisions, full and complete in themselves, permitting the free introduction of sugars, molasses, coffee, tea, and hides from particular countries should be suspended in a given contingency, and that in case of such suspensions certain duties should be imposed.

Mr. President, this opinion, far from being a determination sustaining this attempted usurpation, is in reality a decision against the assumption. The reasons given by the court, and upon which alone the validity of the McKinley provision was sustained, do not appear in the pending proposition.

Again, Justice Harlan proceeds:

> "The true distinction," as Judge Ranney, speaking for the supreme court of Ohio, has well said, "is between the delegation of power to make the law, which necessarily involves a discretion as to what it shall be, and conferring authority or discretion as to its execution, to be exercised under and in pursuance of the law."

But by the committee amendment it is proposed to delegate to the President and to the Senate the power to fix a duty, not the power to find a condition of things upon the ascertainment of which the duty fixed by the law already enacted shall be effective, but to determine and decide the rate of duty, what the tariff imposition levied against certain commodities from certain countries shall be if contingencies specified arise. Congress does not fix the amount of duty. It is asked to delegate to the President or to the President and Senate the power to declare the extent of the tax.

Mr. PETTUS. Or whether there shall be any duty at all or not.
Mr. WHITE. Precisely. The court further proceeds:

"To assert that a law is less than a law because it is made to depend on a future event or act, is to rob the legislature of the power to act wisely for the public welfare whenever a law is passed relating to a state of affairs not yet developed, or to things future and impossible to fully know." The proper distinction, the court said, was this: "The legislature can not delegate its power to make a law; but it can make a law to delegate a power to determine some fact or state of things upon which the law makes, or intends to make, its own action depend."

It seems to me, Mr. President, that under this decision, so confidently relied upon here, it is palpable that the proposed amendment designs to give to the President of the United States the power to make a law, and if that be true it follows, unquestionably, that by adding "by and with the advice and consent of the Senate" we seek to cure an obvious difficulty by joining the Senate with the President. But can this reenforcement amount to anything? Whence do the President and the Senate derive the power to make treaties? From the Constitution. What is the limit and admeasurement of the right to engage in treaty obligations? Is it found outside of the organic law? Can it depend upon any act of Congress? Can it be added to or lessened by any act of Congress? Clearly not. The Senate and the President, acting pursuant to the treaty-making power prescribed by the Constitution, obtain from that instrument their authority, and from that instrument alone; and hence if the Constitution itself fails to give to the President and the Senate, acting pursuant to the treaty-making power, the authority to fix these duties, this act is absolutely void. But if the Constitution does confer that authority, this act is absolutely unnecessary. And it is not, so far as the wisdom of the proposition is concerned, material to inquire whether the authority does or does not rest in the Senate and in the President. It is needless in one case and impotent in the other.

The question, as I said, is a very interesting one. It is one not easy to discuss upon the spur of the moment. This amendment having been just tendered, affords no opportunity for careful examination. I do not feel prepared to speak satisfactorily regarding it. But there have been certain declarations made here which seem to fortify the statement of the Senator from Colorado [Mr. TELLER], that it is a very doubtful and a very close question as to whether the President and Senate can alone fix duties. I beg leave to read a brief minority report signed by Senators MORRILL, Voorhees, and ALDRICH, dated February 27, 1883, with reference to the Hawaiian Island treaty matter:

The undersigned agree to the report of the majority of the Committee on Finance, and for the following additional reasons not concurred in by other members of the committee:

When our Constitution was framed no compact between two different nations such as a reciprocity treaty was known or ever existed; and the power of the President, "with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senate concur," must be accepted as a limitation of the power to just what was then known and understood to be comprehended by the words "to make treaties."

The Constitution can not be changed by any modern diplomatic inventions. It is true that Cromwell, in 1654, made a treaty with Portugal, by which English woolens were to be admitted into Portugal at a lower rate of duty than from other countries, and the wines of Portugal were to be charged when brought to England with a less rate of duty than wines imported from France or elsewhere; but this, although a commercial treaty, was not a reciprocity treaty, and Adam Smith conclusively proved that even this much-vaunted treaty was disadvantageous to England.

Our Constitution does not lack harmony, and all of its provisions show that it was never intended that the President and the Senate should have even the initiative in regulating trade or commerce. That power is given up wholly to "Congress to regulate foreign and domestic commerce and with the Indian tribes," and the President can not call to his aid any foreign power, even with the advice and consent of the Senate, to regulate commerce, whether foreign or domestic.

A still greater inhibition of this modern shape of the treaty power is found in another provision of the Constitution, which provides that—

"All bills for raising revenue shall originate in the House of Representatives; but the Senate may propose or concur with amendments as on other bills."

No reciprocity treaty could be made that would not be a direct infraction of this provision of the Constitution, as all such treaties must necessarily curtail the boundaries within which revenues are or can be raised. If such a treaty could be made with one nation, it would be possible to make like treaties with all, and thus the power of the House of Representatives to originate revenue bills would be suspended and frittered away.

It does not help the main question in the least to obtain the consent of an existing House of Representatives to pass a law in conformity with or to carry out the provisions of such a treaty. The power of the House to originate revenue bills inheres forever, and no existing House can exercise that power so as to deprive a succeeding House of any of its proper constitutional functions.

Again, the "most-favored-nation" clause, in the larger part of our treaties with other nations, is a perpetual suggestion of the most serious complications always lying in wait for all reciprocity treaties. Should any of these nations tender the same or equal terms, we must, of course, accord the same and equal favors, and any reciprocity treaty might be suddenly and wonderfully expanded; or we might have the alternative of a conflict with many nations with whom peaceful relations are most desirable.

In the determination of this question our experience ought to have some weight; and that experience shows, in every instance where a reciprocity treaty has been tried, that immense American interests have been sacrificed. No one has resulted to our advantage.

JUSTIN S. MORRILL.
DANIEL W. VOORHEES.
NELSON W. ALDRICH.

Mr. President, without affirming anything with reference to our right to affect revenue by making a treaty (for the Senator from Delaware may be correct, and we may have such a power; but it is an exceedingly dangerous power if it exists), I do not care to say anything more than that it is a disputable, a debatable question, one which should not be lightly considered or determined, but which should challenge the earnest attention of every Senator and should not be disposed of without the most careful and painstaking investigation. It is not a proper subject for a partisan caucus; it pertains to a broader field.

But under the decision of the Supreme Court of the United States in the case cited, we have no jurisdiction to confer upon the President any discretion as to the amount of duties to be levied; and by bringing the Senate to the aid of the President through this amendment, we do not contribute any authority to the treaty-making department of the Government. We can give nothing which it does not now possess.

The pending amendment is not, as has been intimated, a provision designed to prepare the way to make ready the home for a treaty hereafter to be ratified. On the contrary, it is an admitted curtailment of the power to make a treaty, if that power exists, as is stated and claimed by the friends of this provision, because if the Senate and the President have the power to make a treaty affecting the revenue, then it follows that the amendment is nugatory in so far as it seeks to circumscribe the limits of that power, and therefore is not only valueless, but trenches upon constitutional prerogatives.

Mr. President, what are the objects to be attained by this peculiar amendment? Reciprocal trade advantage. I am not discussing the matter in that aspect. I am speaking as to its legality.

I do not intend to vote for any measure which I believe to be without the power of Congress; I do not intend to vote for any amendment to this bill which I think will be utterly valueless for any purpose whatsoever, and which can not have in the slightest degree the effect which its friends claim they anticipate.

We have, Mr. President, negotiated treaties, and we have ratified treaties, in which there may be found a seeming exercise of the power to affect revenue, an interference with the right to raise revenue. I do not dispute that. We negotiated a treaty with Hawaii, by which we absolutely remitted the customs dues which we would ordinarily have collected under the revenue laws of the United States. I must, however, recognize the danger pointed out in the minority report which I have just read. It is apparent that the Senate and the President might, if their powers be as great as here claimed, absolutely ignore the House of Representatives with reference to revenue.

If we suppose a case where the President and the Senate are bitterly hostile to the House—and God grant that no such condition may ever arise, but in interpreting the organic law it is not amiss to consider possibilities—what would be the consequences of unlimited jurisdiction in the treaty-making tribunal regarding revenue?

The Constitution, it is true, fixes no specific limitation as to treaty inclusion, but this general delegation is limited wherever else in the organic law is contained a provision expressly allotting to any department of the Government authority to act in a specified case. Thus we are informed by this paramount authority that the House of Representatives must initiate revenue legislation and that the Senate is impotent to pass a revenue bill without that precedent condition. May we not inquire whether it is probable that that great instrument can be construed to permit us to do by indirection that which we can not directly accomplish?

Mr. President, in the contingency which I named we might negotiate commercial treaties with the world. It has been frequently held by the Supreme Court of the United States that a treaty may repeal an act, an act repeal a treaty, and that each is the paramount law of the land according to the latest in case of conflict controlling. Thus by a treaty we might repeal all revenue provisions, and when the House of Representatives has exercised its constitutional function and reenacted a revenue bill seeking to avoid such treaties, we can absolutely render their efforts abortive by refusing our participancy or acquiescence.

Thus inevitably would come about the result to which the Senator from Colorado [Mr. TELLER] alluded, and this body, not given any such authority by the Constitution to initiate or solely enact revenue measures, would exercise the power and maintain itself and would prescribe the form and extent of revenue exactions, and the House of Representatives, given by the founders of the Republic the right to begin such legislation, and made not only an essential part, but the constitutionally suggestive part of revenue laws, would be deprived of its functions, shorn of the prerogative granted expressly by the organic law itself.

The importance of these questions, which, as I have said several times, are debatable and present matters for careful consideration, demonstrates that this is not the proper time for the presentation of such an amendment as this. There is, of course, one consoling feature about the affair, if I am right in my contention,

and that is that the amendment will be inoperative; but it appears to me that the insertion of such a provision in this bill should be the result of most cautious and painstaking deliberation. I appreciate the difficulties of the Committee on Finance: I know the troubles they have had, and I can well excuse them, if they need any excuse whatever, for their failure to present this proposal earlier. We are here with the bill almost finished, but we have not the stamp-tax provision before us yet. Other important features are still withheld. The difficulties are undoubtedly inevitable, but they are no less unfortunate.

Mr. MORGAN. Mr. President, this case has been argued by some Senators, by my colleague [Mr. PETTUS] and the Senator from California [Mr. WHITE], upon the hypothesis that this amendment undertook to fix the rate of duty upon goods by the action of the President and the Senate, and that that was legislation. That is the most incisive as well as the strongest point which has been made against the amendment. This amendment does not assume to do anything of that kind; it does not fix any rate of duty at all; it does not assume to prescribe what the rate shall be or that it shall be changed in any respect whatever. It only intends to remit, and only goes to the extent of remitting, the duty under certain conditions and under certain circumstances, which would otherwise be raised under this law.

Mr. PETTUS. Has the Senator read the last clause of the proposed amendment, that the duties specified and provided for in such a treaty, and none others, shall be collected?

Mr. MORGAN. Yes; that is a prohibition upon the officers of the law to collect anything else after the duty has been remitted. But, Mr. President, this is a power which has been very often exercised in the United States.

Now, I will read to the Senate a statute on that subject, which was passed in 1828, which was again reenacted in 1830, and again in 1832, and, predicated upon that, there have been various enactments since 1832:

SEC. 4228. Upon satisfactory proof being given to the President, by the government of any foreign nation, that no discriminating duties of tonnage or imposts are imposed or levied in the ports of such nation upon vessels wholly belonging to citizens of the United States, or upon the produce, manufactures, or merchandise imported in the same from the United States or from any foreign country, the President may issue his proclamation, declaring that the foreign discriminating duties of tonnage and impost within the United States are suspended and discontinued, so far as respects the vessels of such foreign nation and the produce, manufactures, or merchandise imported into the United States from such foreign nation, or from any other foreign country; the suspension to take effect from the time of such notification being given to the President, and to continue so long as the reciprocal exemption of vessels belonging to citizens of the United States and their cargoes shall be continued, and no longer.

What kind of duties are provided for in this act? Duties of tonnage and imposts. What are imposts? They are decided by the Supreme Court of the United States to be customs dues, what we call tariff duties. There is an impost duty laid, and there was an impost duty laid until a recent date, discriminating at the rate of 10 per cent against those countries which made discriminations against us. The President of the United States, in virtue of section 4228, which I have just read, has the right, when he ascertains that a country from which goods come, or vessels come, makes no discrimination against us in imposts or in tonnage duties, to remit the imposts and tonnage prescribed under this act. Where does that power come from?

How did Congress ever fancy that it had the authority to confer upon the President of the United States the power absolutely to remit the whole of the impost and tonnage and customs duties, when the country with whom we were dealing, or with whom he was dealing, had prescribed in its commercial regulations that it would free our vessels from imposts and also from tonnage? That is a regulation of commerce.

Congress, says the Constitution, has the power to regulate commerce, but Congress makes the President of the United States its agent to regulate commerce upon certain terms and conditions which he ascertains to exist; and therefore he does not fix a new rate of duty upon goods coming in from foreign countries, nor does he fix a new rate of tonnage upon ships coming in from foreign countries, but he remits the duties and the tonnage. Now, what does this proposed amendment say? It says that—

In consideration of the advantages accruing to the United States therefrom, shall provide for the reduction during a specified period, not exceeding five years, of the duties imposed by this act, to the extent of not more than 20 per cent thereof.

We have as much right to authorize the President of the United States to remit impost duties levied under this act as we have to authorize him to remit a fine or a penalty or to authorize somebody else to do it. This is not legislation to tax anybody; it is legislation to remove taxation and legislation to remit the proceeds of taxation, so that they shall not come into the Treasury.

When the President and the Senate find out that a foreign government has placed itself in contract or agreement relations with us upon a basis to justify this act on the part of this wise and discriminating agency of the Government of the United States, then this law says—it is not a new law—that those duties shall be remitted. How much? You give to the President, and the Senate in conjunction with him, the authority to say how much. It is a mere instrumentality we establish in dealing here with the constitutional power of the President and the Senate as a treaty-making power, except to ascertain that a valid agreement of this kind has been made with a foreign country.

Suppose we ratify a treaty of that kind and a foreign country does not comply with this act, then it is a nullity; it can not be executed by the act; and not being capable of being executed by the act, and there being no other law to execute that treaty, it would naturally fail, it would amount to nothing—a mere effort that went out in smoke, in thin air.

Now we come to the free list. The President and the Senate have the right to remit absolutely duties imposed by this act and to keep a certain taxed article upon the free list, to provide for its retention on the free list whenever we can make a commercial agreement with them which, in the opinion of these agencies established by this law, is a good one for the benefit of the people of the United States. When the President and the Senate act in accordance with the latter clause of this provision, do they enact any new law? Do they assume to do it? Do they increase the taxation upon the people of the United States, or upon anybody else? There is no change, except merely that we can put articles upon the free list or retain articles already upon the free list, as provided in the terms of the act of Congress. It is confined as follows:

Or shall provide for the transfer during such period from the dutiable list of this act to the free list thereof of such goods, wares, and merchandise, being the natural products of such foreign country or countries and not of the United States; or shall provide for the retention upon the free list of this act during a specified period, not exceeding five years, of such goods, wares, and merchandise now included in said free list as may be designated therein; and when any such treaty shall have been duly ratified, and public proclamation made accordingly, then and thereafter the duties which shall be collected by the United States upon any of the designated goods, wares, and merchandise from the foreign country with which such treaty has been made shall, during the period provided for, be the duties specified and provided for in such treaty, and none other.

That is to say, you can not increase, you can not fix a new rate, you can not fix a new ad valorem percentage upon them. What you can do is to reduce the taxation upon them, or you can put them on the free list, or keep them on the free list.

I have not yet heard that the Government of the United States was so lame and impotent as that it did not have the right or the power to make a remission of revenues coming into its Treasury when that remission was considered to be for the public good.

That is my answer to the able disquisition of the Senator from California [Mr. WHITE] upon that opinion, in which, however, I think he is greatly mistaken as to what the court said, or intended to say, or meant, when he stated that the Supreme Court had determined in that case that the President of the United States could not, under any circumstances, decide upon anything which would change the measure of the administration of the law; not the law itself, but the measure of its administration.

Mr. President, the power of remitter exists all through the Government of the United States. All executive power has almost an inherent right to remit the rights of the United States up to a certain extent, but when it is conferred by a statute, there can be no doubt about it on constitutional grounds.

When the President does a thing of that kind, remits a penalty, or a fine, or a forfeiture, when he directs the Attorney-General to discharge a prosecution, to nolle pros a prosecution, or to discharge a proceeding in rem against a vessel which has been caught in the act of doing some wrong to the public law—all of those things are the exercise not simply of the pardoning power—that is not the power he exercises—it is the power in the name of the Government of the United States to remit penalties, to collect a part of a penalty or to collect all of it, or to remit the whole of it or to remit a part of it, and this act has not proceeded in any respect upon the idea that the President and the Senate were exercising either their ordinary constitutional functions in making treaties, or that they were legislating in any sense at all except as they were empowered as a special tribunal of the Government of the United States to say how much of its revenues might be given away in favor of a country that had projects to offer us that were valuable to the commerce of our country. I regret very much to believe that the Government of the United States is so constrained that it can not exercise for the benefit of this people a power like that.

We who are State-rights men and who look critically upon the powers of the Government of the United States are very apt to fall into error upon these things. But when the power exists, as it is displayed in the statute which I have just read here—which is a case entirely in point and has been often confirmed by the Congress of the United States and never heretofore denied—and we know that it does exist, our duty then is to construe the statute liberally in favor of the promotion of the welfare of the people of the United States. When the question of its nonexistence is presented, then, of course, that is a different matter. I

never ask a Senator a second question when he tells me that on constitutional grounds he can not conscientiously support a measure.

When that objection addresses itself to the conscience of a Senator, I let him alone, because that is a matter which impinges upon his oath of office, his oath to support the Constitution, and I care not to persuade any Senator to give up his views of the Constitution; but when we find a part of this power may be exercised—and I suppose the Senators who have been discussing it with me here this afternoon will not deny that these articles might be constitutionally put on the free list and the duty remitted entirely without engaging in legislation—when the power that we exercise is clearly within the reach of the Congress of the United States, then the next question that addresses itself to my mind is whether the exercise of it is beneficial for the people of this country. If it is, I at once turn and give a liberal construction to that power.

Mr. ALLISON. I hope we shall now have a vote upon the amendment.

The VICE-PRESIDENT. The question before the Senate is on the amendment proposed by the Senator from Iowa [Mr. ALLISON], on behalf of the Committee on Finance, to strike out section 3 of the bill, on page 190, and insert in lieu thereof a new section. Is the Senate ready for the question?

Mr. TELLER. I do not want to delay this matter, but it seems to me this is not a question that ought to be voted upon with so much haste. I do not want to be placed in the position of delaying this bill in any way or manner, but there are certain things which I should like to have an opportunity of more fully examining before voting upon a question so important as this. However, if the Senate wants to vote upon it, I shall not stand in the way and prevent the vote being taken.

The VICE-PRESIDENT. The question is on the amendment proposed by the Senator from Iowa [Mr. ALLISON].

Mr. BACON. I call for the yeas and nays.

The yeas and nays were ordered; and the Secretary proceeded to call the roll.

Mr. BAKER (when his name was called). I am paired upon this question with the Senator from Nebraska [Mr. ALLEN], and therefore withhold my vote.

Mr. HANNA (when his name was called). I am paired with the junior Senator from Utah [Mr. RAWLINS], and therefore withhold my vote.

Mr. BATE (when the name of Mr. HARRIS of Tennessee was called). My colleague [Mr. HARRIS], who is unable to be here, is paired with the Senator from Vermont [Mr. MORRILL].

Mr. LODGE (when his name was called). I am paired with the junior Senator from Georgia [Mr. CLAY], and therefore withhold my vote.

Mr. McBRIDE (when his name was called). I am paired for the day with the Senator from Texas [Mr. CHILTON]. If he were present, I should vote "yea."

Mr. MALLORY (when his name was called). I am paired with the junior Senator from Vermont [Mr. PROCTOR]. If he were present, I should vote "nay."

Mr. MARTIN (when his name was called). I am paired with the senior Senator from Montana [Mr. MANTLE]. If he were present, I should vote "nay."

Mr. PETTUS (when his name was called). I am paired with the senior Senator from Massachusetts [Mr. HOAR]. If I had the privilege, I should vote "nay."

Mr. FAIRBANKS (when the name of Mr. PLATT of New York was called). I was requested to state that the junior Senator from New York [Mr. PLATT] is paired with his colleague [Mr. MURPHY].

Mr. PRITCHARD (when his name was called). I am paired with the junior Senator from South Carolina [Mr. McLAURIN]. If he were present, I should vote "yea."

Mr. SEWELL (when his name was called). I am paired with the senior Senator from Wisconsin [Mr. MITCHELL]. If he were present, I should vote "yea."

Mr. SPOONER (when his name was called). I am paired with the Senator from Mississippi [Mr. WALTHALL].

Mr. TURPIE (when his name was called). I am paired with the senior Senator from Minnesota [Mr. DAVIS]. If he were present, I should vote "nay."

Mr. BERRY (when Mr. WALTHALL's name was called). If the Senator from Mississippi [Mr. WALTHALL] were present, he would vote "nay."

Mr. WARREN (when his name was called). I am paired with the junior Senator from Washington [Mr. TURNER].

The roll call was concluded.

Mr. LODGE. I transfer my pair with the Senator from Georgia [Mr. CLAY] to the Senator from Vermont [Mr. PROCTOR], which will enable the Senator from Florida [Mr. MALLORY] and me to vote. I vote "yea."

Mr. MALLORY. I vote "nay."

Mr. PRITCHARD. I transfer my pair with the Senator from South Carolina [Mr. McLAURIN] to the senior Senator from Massachusetts [Mr. HOAR], which will enable the Senator from Alabama [Mr. PETTUS] and me to vote, if it is agreeable to the Senator. I vote "yea."

Mr. GALLINGER. I have a general pair with the senior Senator from Texas [Mr. MILLS]. I transfer my pair to the Senator from Montana [Mr. CARTER], and will vote. I vote "yea."

Mr. PETTUS. I could not hear what the Senator from North Carolina [Mr. PRITCHARD] said.

Mr. GALLINGER. I will state, in the absence of the Senator from North Carolina, that he suggested that he was paired with the Senator from South Carolina [Mr. McLAURIN], and if agreeable to the Senator from Alabama, the junior Senator from South Carolina and the Senator from Massachusetts [Mr. HOAR] would stand paired, so that the Senator from North Carolina and the Senator from Alabama could vote.

Mr. PETTUS. Under that arrangement I will vote. I vote "nay."

Mr. BACON. I desire to state that my colleague [Mr. CLAY] has been recently called from the Chamber. If he were present, he would vote "nay."

Mr. BURROWS. I am paired with the Senator from Louisiana [Mr. CAFFERY], who has not voted. I transfer my pair to the Senator from Illinois [Mr. MASON], and will allow my vote to stand.

The result was announced—yeas 30, nays 18; as follows:

YEAS—30.

Allison,	Foraker,	Heitfeld,	Pritchard,
Burrows,	Frye,	Lodge,	Quay,
Chandler,	Gallinger,	McMillan,	Shoup,
Clark,	Gray,	Morgan,	Wellington,
Cullom,	Hale,	Nelson,	Wetmore,
Deboe,	Hansbrough,	Penrose,	Wilson.
Elkins,	Harris, Kans.	Perkins,	
Fairbanks,	Hawley,	Platt, Conn.	

NAYS—18.

Bacon,	Daniel,	Mallory,	Teller,
Bate,	Jones, Ark.	Pasco,	Vest,
Berry,	Kenney,	Pettus,	White.
Butler,	Lindsay,	Roach,	
Cockrell,	McEnery,	Stewart,	

NOT VOTING—41.

Aldrich,	George,	Mason,	Spooner,
Allen,	Gorman,	Mills,	Thurston,
Baker,	Hanna,	Mitchell,	Tillman,
Caffery,	Harris, Tenn.	Morrill,	Turner,
Cannon,	Hoar,	Murphy,	Turpie,
Carter,	Jones, Nev.	Pettigrew,	Walthall,
Chilton,	Kyle,	Platt, N. Y.	Warren,
Clay,	McBride,	Proctor,	Wolcott.
Davis,	McLaurin,	Rawlins,	
Faulkner,	Mantle,	Sewell,	
Gear,	Martin,	Smith,	

So the amendment was agreed to.

Mr. CULLOM. If the Senator in charge of the bill is willing, I should like to have a brief executive session.

Mr. ALLISON. I was about to ask consent of the Senate to fix a time when we can finally dispose of the bill in the Senate. I hope we may have unanimous consent that a time may be fixed. I trust we can finish the bill to-morrow.

Mr. TELLER. It is utterly useless for the Senator to ask the Senate to fix a time until we know all the amendments that are to be proposed. I do not intend to delay the passage of the bill, but I do not propose that a lot of amendments shall come in which we will have no opportunity to discuss.

Mr. WHITE. We want to see the bill, of course.

Mr. TELLER. Besides that, we want to see the bill. I will say to the Senator that there is no probability of the Senate being able to vote on the passage of the bill to-morrow.

Mr. ALLISON. I will waive the suggestion, then.

Mr. LINDSAY. I will ask whether it is in order to offer an amendment?

Mr. WHITE. Will the Senator from Kentucky allow me to ask a question of the Senator from Iowa?

Mr. LINDSAY. Certainly.

Mr. WHITE. Would it be possible for the Senator from Iowa to have any amendments which the committee may contemplate offering here to-morrow morning? Of course we have reliable information from the newspapers as to what is going to be done, but it is a little troublesome to have those papers upon our desks, and we find it difficult to read them; and if the Senator from Iowa will present the amendments in the morning or now, so far as I am personally concerned, I would be willing to arrange upon some time. I do not know, however, what the Senator may have in his possession in reference to the bill. I understand that there is an amendment regarding a stamp tax.

I believe yesterday I stated that there would be no antitrust amendment. I am willing personally to rely upon my judgment of the circumstances as to that, but if there are any other amendments coming, we might have them in the morning, and I think a very early arrangement could be had.
